

Mr. Horton was making his lunch and he was thinking about the calories he was eating. He had **5** items, Ginger Ale, a sandwich, carrots, a yogurt, and a pretzel. The total amount of calories he was eating was **288**. He knew some of the calories because they were listed, but he wanted to figure out how many calories were in each item.

	<h1>20</h1>	
<h1>5</h1>		
	<h1>60</h1>	

				
_____ calories	_____ calories	_____ calories	_____ calories	_____ calories
