San Diego

30 June 2017

Hello Thermography Patients!

We are retiring! Thermography and CTA have been my life's work, and I am pleased to inform you that I have mentored Dr. Claire H. O'Neill, over the past several years, and she will be leading CTA into the future. She is as passionate about thermography as I have been, and follows the specific thermographic protocol that has been researched and developed since the 1970's. I have the utmost confidence in her ability to continue my legacy of thermography and CTA.

Dr. Claire is a practicing chiropractor, specializing in women and children, and owns Thermography Wellness Centers, speaking and educating nationally about thermography. She has addressed large venues of 4,000 chiropractors, integrative medical doctors and health practitioners at Cal Jam Events, and California Chiropractic Association, as well as, small public gatherings. She has the passion and the training to keep my legacy in thermography moving in the right direction, so I am gifting CTA to Dr. Claire. I would like you to trust her as I do. She, with her technicians, Debra and Debby, will be assuming leadership at CTA June 1, 2017, so there will be no lapse in your care.

I would like to thank each one of you for your trust and loyalty shown these many years; this has been highly rewarding work. Victoria will miss seeing each of you, and know that you will continue to receive the personal care we have provided. Please keep yourself well, we wish you the very best!
