## **Sales Policy**

All merchandise is sold without warranty, either expressed or implied. However, satisfaction is guaranteed on all parts. We will gladly exchange merchandise that is in perfect condition within 30 days with copy of receipt and prior authorization. Merchandise is non-returnable after 60 days from date of purchase. A restocking charge will apply on all returned items.

Restocking is based on purchases in the amounts of **\$0.00 - \$200.00** is **25%** of the sale plus the cost of shipping. **\$201.00 or greater** is subject to a **\$55.00** charge plus the cost of shipping.

No COD orders are accepted. California residents, please add sales tax.

### **Check Fit First**

**Please recheck your sizes and part numbers before ordering. We do not accept and are not responsible for the manner in which any of the products listed in our catalog are used. Merchandise that is rusted or has been drilled, cut, ground on, or altered in any manner will not be accepted for exchange. Under no circumstance will we accept primed, painted, chemically treated or media blasted (shell, plastic, sand, etc.) merchandise for exchange.**

Returned merchandise must be packed carefully, as you will be responsible for any damage due to inadequate packing. Replacement will be subject to freight claim settlement.

### **Fine Quality**

The merchandise shown on these pages is the finest quality made. We have thousands of satisfied customers in the country and abroad. Our merchandise is displayed at car shows and in museums throughout the world. All of the stock parts are duplicates of the originals. Careful attention is given to all details. All parts are of the same gauge metal as the originals.

Parts are shipped in boxes or crates to avoid damage.

If you have any questions concerning our merchandise, please call or write. We are glad to help you in anyway we can.

**Prices are subject to change without notice.**

# Ford Model T Hood Measurements

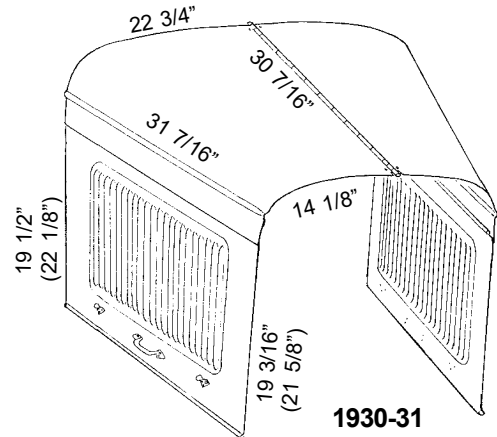

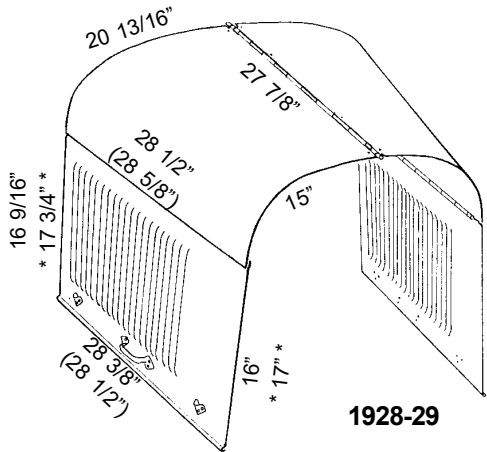

How to tell the Correct Hood for Your Car

These pictures show the specific measurements for the various years of Model T cars. If you are in doubt about the correct hood for your car a little measuring should settle the problem. Be sure to note the difference in the height of the side panel between the 1917-23 low hood and the 1924-25 high hood.

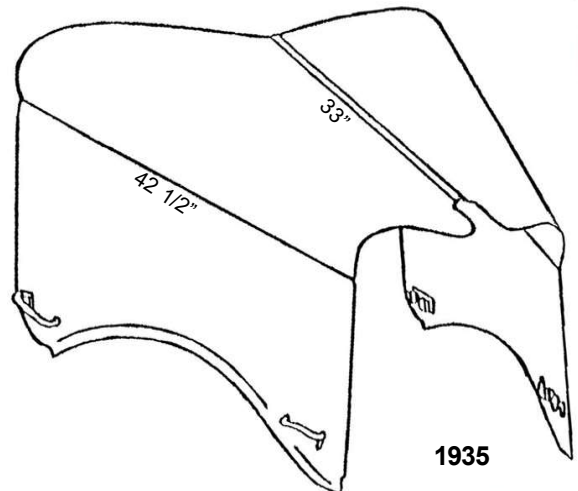

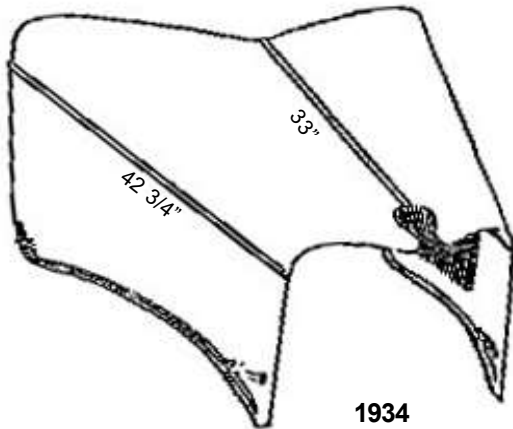

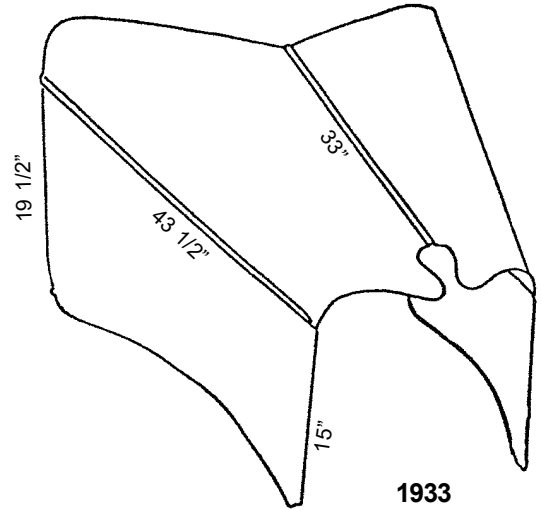

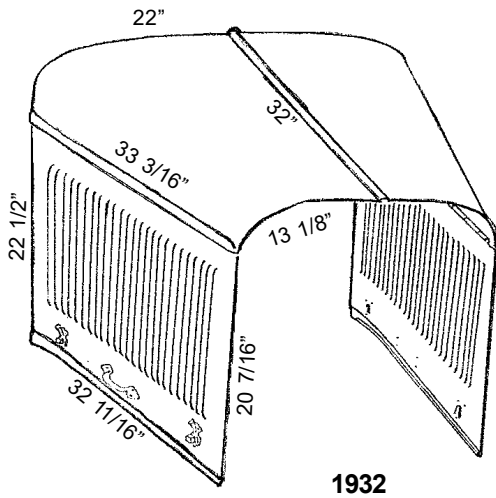

If you still have questions concerning the proper hood, please write or call us.

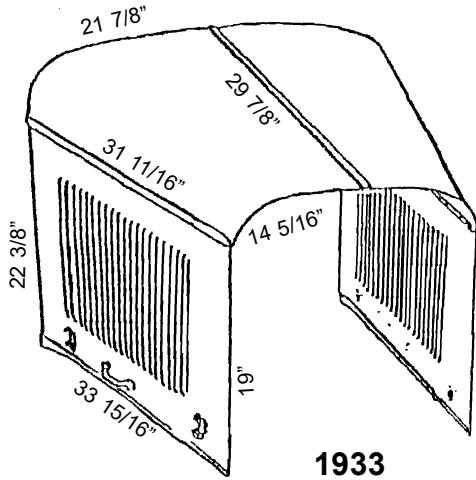

# Ford Hood Measurements

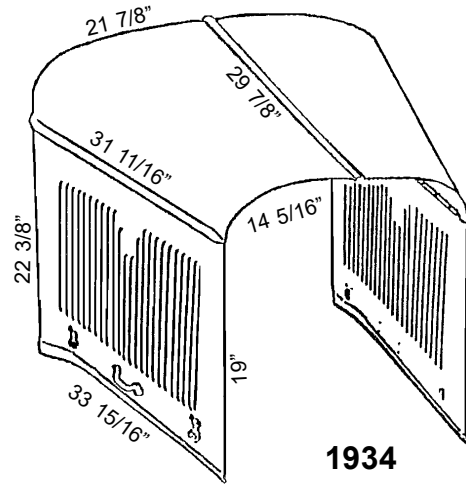

Measurements in parenthesis are for 1928-29 hoods to fit a 1932 grill shell. Measurements in parenthesis are for 1930-31 3 piece hood. Measurements in \* are for the 3 piece hood.

## Ford 1930-31 Model A 4 Pc Hoods

Highest quality 1930-31 Model A Hoods. All stock hoods are exactly as the originals with the same gauge metal, correct size and placement of the louvers, pressed steel handles and clips installed and the hinge rods are included. Various styles of hot rod hoods are available with the 1932 center hinge which gives a flat attractive appearance that provides ease of opening and helps prevent paint chipping. Polished stainless steel center hinge molding is included.

**1930-31 with 1932 Henry Louvers**

We took the stock hood and redesigned it by lifting the side hinge up into the beltline on the top panels. This gave us taller side panels that allow us to put the original 1932 Ford louver in the panels. If you have a 1932 grill shell on your 1930-31 Ford, you need this hood. An added benefit is that the hoods go a long way towards eliminating over heating problems.

#455 1930-31 Plain Tops/1932 25 Henry Louver Sides \$1080.00

# Ford 1932 4 Pc Hoods

The stock hoods are made exactly as the originals with the same gauge metal. Both the 20 and 25 louver hoods are available. All hoods are fit to a cowl and radiator shell to assure an accurate contour. Hot rod styles with various louver patterns are available in the same high quality. Pressed steel handles and clips with rubber bumpers attached. Polished stainless steel center hinge molding included.

After years and years of "When are you going to make correct 25 louver hood sides?", they are here. The louvers are very deep and very open. You can look at the complete engine and then look through the engine bay and out the other side. The louvers are bowed outward from the centerline of the car as well as the dummy louvers at the front and the back. The panels also have the correct twist front to back. These will fit your original Ford top panels. Made in both four-piece and three-piece styles, they can be ordered to fit cars with stretched chassis as well. Made from Ford's blueprints.

#503 1932 Plain Tops/25 Henry Louver Sides \$1,260.00

# Louver Comparison

**1933 Curved Louver**

**1934 Straight Louver**

This shows the difference and lets you compare side by side the 1933 and 1934 Ford stock passenger car louvers.

**1932 25 Louver-No Dummy Louver**

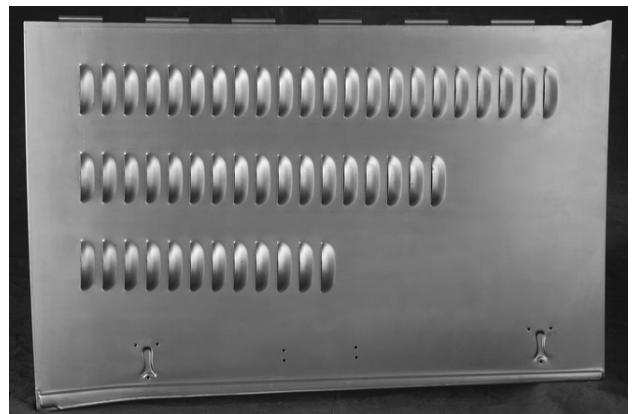

**1932 "Henry" 25 Louver w/Dummy Louver**

This side by side comparison is of our 1932 Ford 25 louvered hood sides-All open with no dummy louver at the front and rear. The other is our New 1932 "Original Henry" 25 louver hood sides with the louvers that are very deep and open. You can look at the complete engine and then look through the engine bay and out the other side. The louvers are bowed outward from the centerline of the car as well as the dummy louvers at the front and the back. The first two louvers are shortened to give room for the hold down. The panels also have the correct twist front to back.

**Contemporary Louver**

**Dry Lakes Louver**

This side by side comparison of our 3" hot rod louvers shows the Contemporary louver and our Dry Lakes louver styles both on a 1932 Ford hood side panel.

# How to Make a Hood Pattern

## Making a Pattern for a One-Piece Top

Starting in the middle of the door, place 3/4" masking tape under the beltline with the top edge of the tapeline placed into the bottom fold of the belt. Tape should be flat on the field area of door and not on any portion of the beltline. Continue forward on the car placing tapeline under beltline on the cowl area. Then moving to the front of the car, stretch tape line making sure you are projecting the belt in a straight line across the engine opening. When the projected beltline looks correct stick tape to the side of the grill shell. Repeat the process on the other side of the car. Be sure both of the tapelines are the same height on the grill shell.

Start on one side by moving up 1" from the first tapeline that was started and run another tapeline from the grill to the cowl. Repeat this process until you come to the tapeline on the other side of the car. You will have what looks like a see thru top panel of tapelines.

Next go to the meat market and ask the butcher for a couple of large pieces of butcher paper. Tape together if need be and lay paper over tape area. Trim it down to approximately 2" larger than finished size pattern. Tape the four corners down without pulling tapelines out of shape. Using a sharpened pencil lay it on its side and trace the edge of the cowl thru the paper. Repeat this step on the grill shell as well. Then go back to the two bottom tape lines and mark the top of the tapeline where it meets the cowl and grill. This is marking where the bottom of the beltline on the hood will be. Now mark on the paper where the top of the beltline on the cowl is. With all of the different bodies made today the belt width can vary greatly. Now you have a full pattern. No gap at the shell and no gap at the cowl. **(We recommend a 1/8" gap so trim pattern accordingly)** If you wish to grind the ends to fit that is fine also.

Please remember -

**“What you send to us is what you get back from us!”**

Making a paper pattern also lets you see what the car will look like on completion. If you do not like the look now is the time to change things. It is much cheaper than having us build another hood.

We have made thousands of hoods from this pattern method with excellent results and we recommend a pattern for custom hoods over a 3" stretch to ensure the best quality and fit possible. If you have any questions please feel free to call us at (209) 632-2203.

# Special Orders

## Stock Hoods

We can manufacture reproduction hoods for nearly all pre-1935 automobiles if we have a pattern. In case of only one car in existence or other various circumstances, we require drawings or photographs and dimensions for the hood. Special stock hoods of many designs can be made upon request. We can make hood panels of steel, aluminum (polished, satin or natural finish) copper and brass where required.

## Street Rod Hoods

Hood tops may be lengthened or shortened to any length required. Hood sides may be lengthened or shortened front to back and top to bottom. We can make special top panels to fit blowers or to accomodate other engine alterations.

## Fenders

We make southern wide track fenders and Canadian Model T fenders.

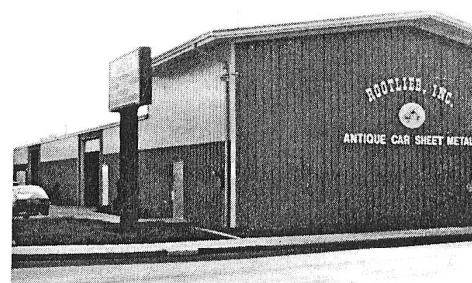

## Special Sheet Metal

If you have a special sheet metal need, send us several detailed photos of your part. We will evaluate the possibily of production and the approximate time and cost for the reproduction.

## Rootlieb, Inc

Our plant is located near freeway 99 at 815 S. Soderquist in Turlock, California. Our plant was started in 1973 and has grown to a 14,000 square foot establishment.

A wide range of specialized tooling enables us to produce the large variety of items in this catalog. Our careful attention to quality and detail has made us one of the largest manufactures of vintage sheet metal in the world. We always have several items in the tooling stage and more in the planning stage. If you are ever in our area, please feel free to stop and visit us. We are open Monday through Friday from 7:30 am to 4:30 pm. We shall be glad to have you come for a tour.

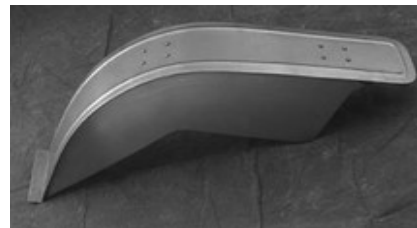

# Ford Model T Fenders

Finest quality Model T fenders that are made exactly as the originals using the same gauge metal. Early 1909-1916 fenders have the correct brackets riveted into place using the correct size and shaped rivets. Southern tread, wide track fenders that are 2" wider than stock fenders are available. Additional width is also available for street rods by special order only.

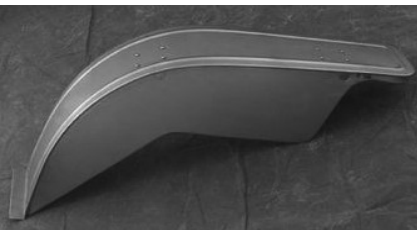

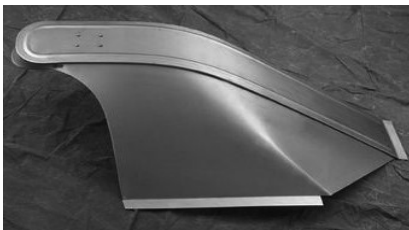

1909-12 Fenders have round head rivets.  
1913-16 Fenders have oval head rivets.

# Ford Model T Fenders

Fine quality fenders made of same gauge metal as originals. Mounting holes are not punched to enable you to align the fender with the holes on your frame, aprons and running boards. The headlight mounting holes are punched and the offset area is die-stamped into the fender skirt. If your fenders do not have an offset, please advise and we will make your fenders without an offset.

## Model T Speedster Kit

Curved Fender

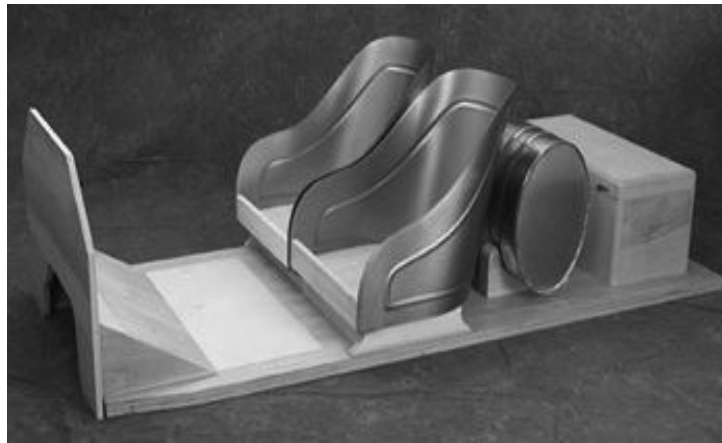

Straight Fender

A speedster of classic design and elegance! A speedster that will provide you with hours of enjoyment as well as being an excellent investment. The T Speedster is easy to assemble, even for a beginner. You will need to provide your own chassis and running gear. The kit is designed to fit perfectly on any 1909 to 1925 chassis. For a low, racy look as shown in the above picture, use a dropped axle and lowered rear cross-member. Choose either the curved top or flat top special speedster fenders (as shown) with a free floating skirt. The Torpedo style hood gives a longer look and provides more ventilation. Use a monacle windshield as shown, or order a straight top fire-wall to use with a stock windshield. If you prefer a standard type speedster, use a stock axle and cross-member with our T Speedster body kit. Add your choice of early Model T stock fenders with corresponding splash aprons and running boards. You will have a speedster with a very pleasing design and proportion. Your own creativity will add the distinctive finishing touches. Complete speedster kit available as shown on the opposite page.

## Model A Speedster Kit

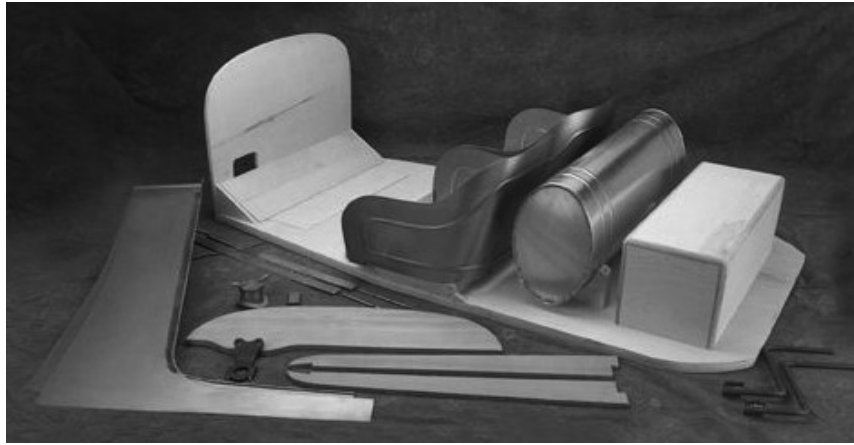

For those who prefer the open wheel style of the dirt-track racers, so popular in the 1920's & 1930's, we offer the Model A body kit. With its lean and racy look it draws attention everywhere it goes. The best racer body in terms of ease of construction, ease on pocketbook, and most important-it will give you the satisfaction of building a car you can be proud of. Full assembly instructions now come with the body, making it perfect for the beginning enthusiast.

Order now, so you will be ready to spend the next season with the wind in your hair and the crisp note of the exhaust in your ear.

## Important Measurements

When ordering a 1933-36 Dodge or Plymouth hood, you must specify the year, the make and the belt-line measurement.

This information is necessary to insure the correct hood for your car.

Shown below are the belt-line measurements for patterns that we have available.

1933-35	Dodge (short wheel base)	44 1/2"	Belt-line
1933	Dodge (long wheel base)	48"	Belt-line
1934	Dodge (long wheel base)	50"	Belt-line
1936	Dodge	47 1/2"	Side Hinge
1936	Dodge Pickup	43 5/8"	Belt-line
1933	Plymouth PC	43"	Belt-line
1933	Plymouth PD	45"	Belt-line
