

Lexington AT

Benefits:

- ✓ Dark Genetic Color
- ✓ Early Spring Green-Up
- ✓ Excellent Summer Stress Tolerance
- ✓ Aggressive Tillering (AT®)
- ✓ Good Brown Patch Resistance

Seeding Rates:

8-10 LBS/1,000 square feet for new establishment

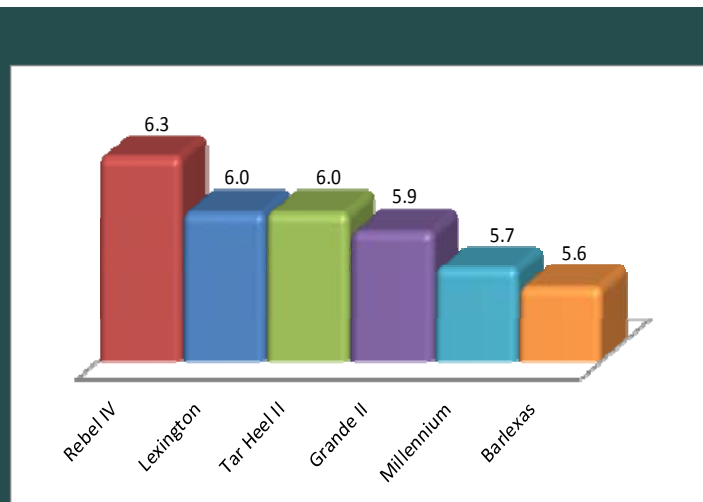

4-5 LBS/1,000 square feet for overseeding

Lexington AT® is a member of the newest generation of traditional style turf type tall fescue. The color and overall turf quality are so outstanding that **Lexington AT®** may be seeded alone.

Lexington AT® ability to resist brown patch makes it a wonderful component for a three-way turf type tall fescue blend, or part of bluegrass and perennial ryegrass mixtures.

Lexington AT® adapts well to the transitional zone, the Northeast and the Northwest summer-time conditions. It will grow well in most soils and responds well to water and fertilizer applications.

Lexington AT® has performed extremely well in the current NTEP trials. It is a top performer in genetic color, spring green-up and overall quality.

2001 NTEP Tall Fescue Test 2002-05 Data. Summary of Turfgrass Quality ratings for Schedule A. Turfgrass Quality Ratings 1-9, 9=Ideal Turf. LSD 0.2. Top variety Rebel IV (6.3). Bottom variety KY 31 (3.6). See full report and more data available at www.ntep.org
