

# Winco's Unique Processes To Serve You

**Customer Dedicated Low Cost Tooling** – Winco is committed to providing superior, low cost, customer-dedicated tooling. You will never have to worry when you work with Winco. What is the key to our success? We build low cost, high quality, heat treated tool steel components using state-of-the-art robotics. Robots are used to load and unload work pieces into programmable wire EDM machines. Dedicated tooling results in superior quality and superior service.

**Fast Production Startups** – Winco's fast production startups are just what you need when you need to have your part fast. We are flexible and can help you meet your deadline. Using unique internally designed, inventoried, and standardized tooling components, Winco is ready to create tooling for your part once your print geometry is entered into our system. Winco's standardization enables us to provide superior service.

**Quick Setups** – Winco's setup times are fast, typically under five minutes. Every operation within Winco is standardized and designed for quick changeover from job to job. Winco's quick setup times enable Winco to do quick turnaround jobs and emergency runs. Quick setups yield competitive pricing and superior service.

**Part Dimensional Consistency** - Winco's use of dedicated tooling, designed expressly for your parts, assures you of high quality stampings within a run and from run to run. We use computerized optical machines to verify runs on tools dedicated to your part. Dedicated customer tooling translates into superior service and superior quality.

**Specialize in Short-to-Medium Run Quantities** – Winco's specialty is short-to-medium runs so we focus on one thing and do it better than anyone else. Technology driven stamping processes combined with Winco's flexibility and our customer focus enable us to serve you better. Specialization means competitive pricing, superior service, and superior quality.
