

Ages 1 to 4 years

1. Hepatitis B (Engerix-B or TwinRix Jr.)

Normally three injections.

Dosing schedules may vary depending on brand of vaccine and health status of child.

A partial series is acceptable so long as the next injection in the series is not due at the time of the immigration medical.

or

Proof of vaccination not required when there is proof of immunity using an antibody titers blood test.

2. Combination Vaccine for: Diphtheria Tetanus Polio Pertussis Hib (DTaP-HIB)

This series usually begins at age 2 months with a second booster at 4 months and a third at age 6 months. Your child must be as up-to-date as possible with the series at the time of the immigration medical.

3. MMR Combination Vaccine for: Mumps Measles Rubella

Given as a single injection sometime after the child's first birthday.

4. Chickenpox (Varicella). Varivax

If the child has had chickenpox, written documentation is not required.

A verbal declaration from the parent or guardian is all that is required.

or

If no history of chickenpox then written proof of immunization against chickenpox is required.

5. Pneumococcal conjugate vaccine (Prevnar-13)

Required for children 2 months of age up to 59 months of age.

6. Hepatitis A

Required for children age 12 months to 23 months.

7. Influenza (Flu shot)

Required for everyone over 6 months of age. (during flu season only - November to February)
