February 11, 2003

Dave,

Just wanted to drop you a note and let you know how much I appreciated the job you did for me on my boat ramp repair. You, Kathy and Herb were a great help and it is a pleasure to deal with someone who does exactly what they say they will do. As you know, I had a quote for a sheet pile cofferdam that was almost twice as expensive as your water structure. With the sheet piling, it would have taken more than twice as long to do the repair, been very disruptive to our marina, and not nearly as friendly to the environment as your water structure. With your help, I was able to de-water the repair area *and* make the repairs for about what the sheet pile cofferdam was going to cost. Thanks again for the great service and I will be recommending you to other marina operators.

Thank you,

Terry Kelly
