

Hi,

In our Search For God Group this morning, a friend told me about this video(11 minutes). It is about a family of 8 that were the only ones who didn't get the flu or have a family member pass over. It corresponds to what Edgar Cayce said about the FLU not being able to survive in an alkaline environment. It is a much simpler way of making your blood system alkaline; or you can use the orange juice and lemon; and in some readings Edgar Cayce even recommended [Alka Seltzer](#).

### **THE COLD AND FLU GERM CAN'T SURVIVE IN AN ALKALINE ENVIRONMENT - Edgar Cayce**

**In a small town in Alabama over 100 years ago this woman's mother gave all eight of them a half teaspoon of baking soda in a glass of water. She was 10 years old at the time and would drop jars of soup off at the homes of the families that were sick.**

The link to the article, talks about how patients that were left out in the fresh air and sun survived, while those in the hospitals died.

**IT IS THAT SIMPLE - PLEASE SHARE**
