RE: Recommendation for Sean Nealon

To Whom It May Concern

I would like to recommend Sean Nealon as a candidate for a position with your organization. Sean was employed at Qleek from March through June of 2016 as a software intern.

After an informational interview with Sean, it seemed clear that he was creative and dedicated to his passion. At the end of the interview, Sean was asked to meet with us in two weeks to demonstrate the acquisition of knowledge pertaining to: Android Programming and the Spotify SDK. During our next meeting, Sean showcased not only what he had learned but demoed an Android App he had made in the process. This is one example of Sean's willingness to tackle new subjects, learn independently and work hard.

Sean worked long hours, learned a tremendous amount during his time as an intern and offered an upbeat personality to the work environment. He would be an asset to any employer and I recommend him for any endeavor he chooses to pursue.

Respectfully yours,

Ismail Salhi, CEO
