

Product Detector for Collins 75A-2 / 75A-3

New product for adding a product detector to the Collins 75A-2 and 75A-3 receivers. Utilizes Schottky diodes and plugs directly into the NBFM adapter socket. Requires cutting of 1 jumper on the mode switch and the rerouting of the BFO output. Also requires a jumper on the mode switch.

Schematic of 75A-2 / 75A-3 provided with necessary modifications indicated.

Price in the United States (except Texas) is \$35.00. Texas residents need to add sales tax which makes the total \$37.89. Canada price \$38.00 (U.S.). Foreign Z Communications by E-Mail for total price.
