

# BONEOLOGY

*Museum Quality Exhibit & Programming*

## TRAVELING EXHIBIT

### Dear Museum Coordinator,

Experience North America's most unique Hands-On Educational (and Entertaining) Program! This hands-on exhibit module will take guest and participants of all ages on an interactive exploratory journey of hippology. Almost everyone thinks they are interacting with Dinosaur bones and are amazed when they learn that it's not. The program can accommodate a variety of needs and group sizes, and with over 25 years in outreach programming experience we guarantee an exceptional experience. Our skeletons have traveled the world and would love to visit with you. Don't miss out on this very edutaining experience!

### What is Dr. Bones Program?

The Dr. Bones Module is an indoor/outdoor...good weather/bad weather... cross-platform program that is designed to bring experiential learning in a fun and interactive way. Participants discover the differences between a paleontologist and an archaeologist while participating in an authentic dig. Guest "Boneologists" examine the process and factors that lead to the discovery of bones while they unearth, analyze, classify and assemble a full size skeleton. Watch as strangers work individually and as a team while they problem solve the puzzle of assembly. Everyone will be amazed at how much fun they having while they learn and understand about form and function by actually handling the bones and joints.

### Multiple Options Available: (On or Off Site)

1. **WORKSHOP CLINIQUE:** Working with a single group unit this module is a "Dig and Build" experience. Program length is approximately 90 minutes long. It is ideal for school/camp groups.
2. **THE BONE SHOW:** A 25 minute interactive hands-on show designed to accommodate multiple groups in one day. Participants learn about anatomy while having their funny bone tickled. The presentation is targeted for kids of all ages. A Great Family show to add to your event.
3. **EXHIBIT MODULE:** A fully interactive display that can be located at one location, or mounted on wheels and moved around. Rather than fixed scheduled presentations, we interact with participants as they come and go. Participants can come and go as they please and stay as long as they like.

### COST:

**More affordable than you think! Training provided!**
