

Hi Chuck,

I enjoyed meeting with you last week. My impression was that you are an energetic, inventive entrepreneur with a lot of great ideas. As far as I could determine, the areas of common interest that RS&H would have with you would be for private development and facilities design with our Corporate & Commercial Program and with the development applications for the explosion resistant building panel system with our Aerospace and Defense (A&D) Program. I have inquired with the A&D Program folks to verify their interest and they have indicated that they are. I gave them your schedule of availability next week and hopefully I will hear back from them shortly.

My schedule next week is pretty full, as I have a project completion deadline next Wednesday (9/13) and I will be out on vacation next Thursday and Friday. As soon as I hear back from my contact in our A&D Program, I'll let you know if and/or when they can meet with you next week.

Regards,

Don
