Timpac Healthcare, an ISO 9001:2008 certified organization offers the Expertise with an Experience of over 38 years in providing solutions to the Medical Fraternity and takes pride in achieving rapid growth whilst exercising ethical practices. Timpac has a strong sales and distribution network with a team of rich experienced exuberant youth, catering to over 6,500 happy customers across India and many abroad. Timpac takes pride in employing the largest pool of trained engineers as Service Experts in the Industry, to ensure that the sales process doesn't only result in a momentary gratifying experience, but a long lasting relationship, between the organization and the client. With the Corporate Head Office in New Delhi, branch offices in Mumbai and representatives in all major cities, Timpac's nation-

wide presence ensures its customers that we are never too far from them.

To gain the long lasting confidence of our clientele, our team follows the motto to offer quality in both sales and after sale service, with the focus towards providing World-class Solutions with the Latest Technology available worldwide, in accordance with the real needs of the customer.

Established as manufacturers of Physiotherapy Equipments, Timpac forayed into Import and Marketing of Obesity Management technology in the Mid-90's, and then swiftly expanded its trading arm to various branches of Aesthetics and Medicine, to become the leading company in the narrow niche that Timpac Specializes in. With Vast Experience, Strong Industry Relationships, Global Exposure and Strategic Alliances with Global Leaders, Timpac offers Complete Solutions and Implementation for:

- Dermatology Clinics
- Cosmetology Clinics/Departments
- Clinical Obesity Management Facilities
- Wellness Clinics & Medi-Spas
- Anti-Aging Clinics
- Timpac maintains its over decade long leadership in the industry by consistently offering more to its clients, whether it is through The International Institute for Training and Research in Aesthetic Wellness (IITRAW), a training academy, with faculties from around the world, offering training programs for young and seasoned professionals. Each endeavor makes Timpac the most trusted resource for most of the leading Doctors, Institutions, and Corporate in the core areas of Timpac's operations.

Consulting and knowledge sharing are the core of Timpac's operations, utilizing every bit of the expertise gained by our experienced consultants in Conceptualization, Implementation, Training and Marketing of complete Projects, understanding the diversity and uniqueness of each project, with customized solutions, keeping in mind Vision of our Clients and the Satisfaction of their Clients.

The new MeDioStar® offers an innovative, easy-to-maintain and expandable modular design with an intuitive user interface, efficient skin cooling and a two-handpiece system.

The new, lightweight and ergonomic Monolith handpieces are setting new standards in aesthetic laser medicine, ensuring maximum stability. The specially developed technology, design and treatment concept featuring a 360° contact skin cooling system as well as exclusively selected materials enables a long service life and absolute safety. There is a suitable solution for every need and numerous possible combinations thanks to the two-handpiece port system. The perfect tool for every user's day-to-day work.

The New MeDioStar® can be equipped with the following Monolith handpieces:

| | Monolith S | Monolith M | Monolith L | Monolith XL |

QUALITY

STATE OF THE ART TECHNOLOGY

The NanoStar® Family comes with a variety of choices of flat-top and fractional handpieces. The OptiBeamII technology guarantees a highly precise beam profile and the fractional handpieces expand the treatment options. *DF* stands for «Deep Fractional» and it's particularly indicated for skin resurfacing and scars procedures. *HC* stands for «High Coverage» and it's particularly indicated for the treatment of photo-ageing and pigmentations.

Advantages

- + Big and clear 10.4 inch LCD touch screen
- + Big buttons and symbols that are clearly visible
- + Dark background for higher contrast and colour brilliance
- + Clear lines and rounded edges, similar to designed device
- + Variety of settings possible for maximum flexibility

OptiBeam II HANDPIECES

SAY NO TO PULSED DYE LASER!

577nm Pro YELLOW LASER

Vascular Diode Laser
multiple applications in dermatology

The newest generation of "vascular" lasers

First argon laser for vascular treatments was introduced by Asclepion in 1984. The new **QuadroStarPRO** will be the first Table-Top-Laser for aesthetic laser treatment, available in four different wavelengths (green, yellow 940 & 980nm).

- + High performance and reliability
- + Maximum for haemoglobin absorption (577 nm)
- + Low melanin absorption for fewer side effects (577 nm)
- + Scanner with integrated skin cooling available (532 nm & 577 nm)
- + Homogeneous beam profile for maximum precision
- + Small, compact, lightweight systems
- + No consumables
- + Transport case available

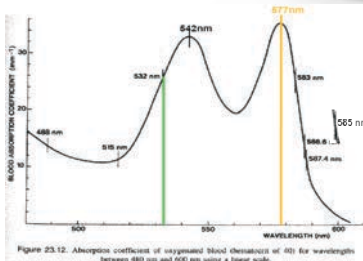

APPLICATION

- Melasma
- Rosacea
- Hyper Pigmentation
- Port-wine stain

INDIAN PATIENT FRIENDLY

NO CONSUMABLE | NO MAINTANANCE

QUADROSTAR PRO

Application - Advantages of Yellow

- Vessels heated to 70°C will get damaged
- Hot blood damages the inner wall of the vessel (intima)
- Very high absorption in blood causes heat very efficiently (with lower fluence)
- If less fluence is needed, shorter pulses are possible, which are additionally more effective for fine vessels

Using the pulse duration of milliseconds with 577nm YELLOW LASER there is no purpura as with the short pulsed Dye lasers

Specifications

- Spot size: 1 mm, Area maximum 15 x 15 mm
- Scan density: **high**
(100%; Spot by Spot; all shapes)
medium
(80%; distance 0.2mm; all shapes except point)

Modular system for vibration-assisted liposuction

Vibration liposuction is a tried-and-tested method for fat removal. With this method, the suction cannula is vibrated axially which, in combination with the suction vacuum, cuts and removes the fatty tissue microscopically and gently. The vibrations enable the surgeon to work with greater precision and the separated fat cells are then easier to suction off. This technique offers advantages for both the surgeon and the patient.

- Gentle and homogenous fat removal
- Time savings
- Less force is required to move the cannula, the surgeon is thus able to work with greater precision.

Liposat Basic

The infiltration pump Liposat® power has been specially developed for tumescent local anaesthesia. The pump rate can be adjusted to the specific application. Once the set volume has been reached, the pump stops automatically.

Vibrasat Power

The vibration drive Vibrasat® power makes it easier to suction away fat thanks to very fast and short longitudinal movements. The process is therefore less traumatic for patients and less tiring for the doctor. The ergonomic form of the hand grip makes working extremely pleasant.

Vacusat Power

The surgical suction device Vacusat® power is an extremely powerful and untiring piece of equipment which is both quick and simple to operate. Thanks to its innovative insulation technology, it is audibly quieter when operated.

UV Comb

308nm Excimer System

Atopic Dermatitis | Vitiligo | Psoriasis | Eczema

Cl atoms and Xe atoms in the sealed handpiece form the unstable XeCl excimer under the action of a high frequency electric field, and this excimer is extremely unstable to a naturally radiate 308nm single wavelength excimer light in the process of transferring from quasi-molecular state into atomic state, which is mainly used for psoriasis, vitiligo and other diseases treatment.

The patented optical power of constant output technology: completely breaks the decreasing rule of optical power with long time use, and really realizes the constant output of optical power. During the effective period of the light source, the output optical power does not decrease, which can ensure the clinical effects.

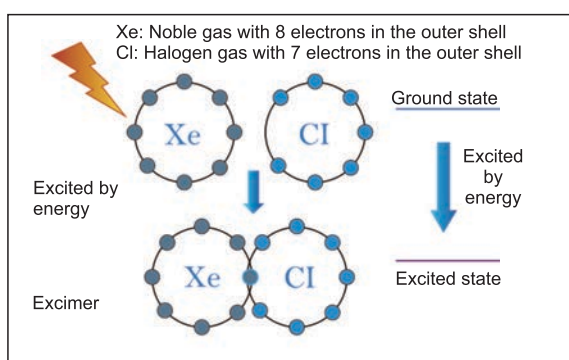

Double handpieces design:

- Two handpieces can be simultaneously perform treatment to improve treatment efficiency and utilization and meet clinical needs;
- Reduce the downtime possibility caused by handpiece life or failure.
- Small, flexible and Low cost
- Consumable control and remote control can support various business models
- 308nm monochromatic excimer light, more safe and effective.

| Voltage | AC 220V/50Hz;AC 110V/60Hz |
| Packing | Aluminum alloy case |

Q-switched Nd:yag Laser System For Tattoo & Pigmentation

Technical Specification:

| | |
|---------------------|---|
| Light Source | Picosecond Q-switch Nd:YAG laser |
| Controlling system | 8.4 inch color touch screen |
| Wavelength | 532nm, 755nm, 1064nm |
| Output Energy | Single Pulse: 532nm 400mJ; 1064nm 800mJ Single Pulse: 532nm 800mJ; 1064nm 1600mJ |
| Energy density(Max) | 1064nm: 15.0; 532nm: 6 |
| Pulse duration | 2000ps |
| Repetition Rate | 1-10Hz adjustable |
| Spot size | 0-10mm adjustable |
| Cooling system | Closed cycle water to air heat exchanger |
| Weight | 24kg |

Fractional CO₂ Laser

RF-activated
CO₂ Fractional laser Combines
Ultra-pulse and
fractional laser technology

| | |
|---------------|---|
| Wavelength | 10,600nm |
| Power Output | 1-40W |
| Laser Type | UltraPulse; CW; Fractional |
| Spot Size | 0.12mm & 1.25mm (adjustable) |
| Spot Density | Up to 102400 dot |
| Scan Size | Up to 20*20mm |
| Scan Shapes | Square; Rectangle; Circle; Triangle; Rhombus; Ellipse; Line |
| Beam Patterns | Standard; Random; Scatter |
| Aiming Beam | 5mW red diode laser, 635nm, adjustable intensity, blink on/off |
| Beam Delivery | Articulated 7-joint arm with up to 360° rotation |
| Cooling | Self-contained, closed cycle |

EXPLORE

Minimally Fractional RF Microneedling
4mm Needle Depth, 60 Watt, Maintenance Free

Invasive & Non-invasive
The Harmony of 2 Way Hand-Piece

Less Pain
Less Down Time
No Side Effect!

APPLICATION

- Fine wrinkle
- Pore
- Scars
- Skin Tightening
- Neck wrinkle

Gone with Explore

- Aging skin (Lifting, Elasticity, Firmness, Anti-Wrinkle)
- Scar Treatment (Acne Scar, Normal Scar, Keloid)
- Acne, Goose bum skin, Striae distensae (Stretch Mark)

Biometric RF - Only invasive RF can combine with stem cell or PRP

Power control - each 0.1 sec control
Explore enables RF pulse time by 0.1sec and can freely control energy delivered area.

HI-QUEEN

High Intensity Focused Ultrasound

Immediate visible effect
just after one treatment.

HIFU

Non-Invasive
Less Pain
Less Down Time
No Side Effect!

Penetrate deep into the SMAS layer without any skin damage. This causes immediate skin tightening and lifting. With time more collagen and elastin are produced throughout all depths resulting in skin rejuvenation and a V shape face.

SPECIFICATIONS HIFU

| | |
|-----------------|---------------------------|

CORTEX Technology

Users : AIIMS, New Delhi & AIIMS Rishikesh

DermaLab® Combo is a compact skin analyzer featuring touch screen operation making daily use easy and intuitive.

DermaLab® Combo is based on our long-term experience in developing and manufacturing scientific skin instrumentation. For the first time it is now possible to combine the classical topical measurements with high resolution cross-sectional in-depth imaging in one single instrument.

DermaLab® Combo offers high precision and reproducibility on all its measuring parameters making it ideal for comparison over time. A built-in client database makes it easy to recall previous recordings and compare with new measurements.

DermaLab® Combo easily integrates into the daily work routine, where it may provide supplementary scientific evidence in support of visual assessment of skin conditions, whether it is in a beauty clinic or salon. As such, the device is ideal for evaluating photoaging and the collagen improvement as a result of rejuvenating procedures as well as the recommendation of specific skin care products.

Ultrasound: Ultrasound skin-age imaging clearly demonstrates the need for treatment and documents treatment efficacy. Ultrasound may also be used for visualizing cellulite and the efficacy of cellulite treatment. **Principle:** Rotating 20 MHz X-tal, 3.7 mm penetration.

Elasticity: The visco-elastic properties of skin are assessed by means of a light weight suction cup. **Principle:** Stress/strain by applied suction cup.

Elasticity

Moisture: Conductivity is a well-known indicator for the water binding capacity of Stratum Corneum - the skin hydration level. Pin probe design facilitates dry skin and scalp applications.

Principle: Conductance, single frequency.

Moisture

Sebum: Sebum is objectively assessed by measuring the translucency of an oil absorbing microporous film material. Offers on-screen step-by-step guidance and strip offset calibration. **Principle:** Translucency of sebum collecting material.

Sebum

Pigmentation: Calculates the melanin and erythema index to provide information about the pigmentation level and reaction to irritants and allergy. **Principle:** Colour detection, reflectance spectrophotometry.

Pigmentation

Transepidermal Water Loss: Transepidermal Water Loss (TEWL) is an established and widely accepted method to accurately assess the skin barrier function. **Principle:** Open chamber, vapour diffusion gradient.

TEWL

Video-scope: The video-scope is an electronic video microscope with 20-50X magnification. With built-in illumination it provides high quality close-up images of skin conditions, which may easily be captured and stored in digital form. **Principle:** CCD, built-in illumination.

DSM III

COLORMETER

2D, Ultra Compact, Ultrasound skin scanner with advanced skin image analysis software

Lipoma.

AVAILABLE WITH ONE PROBE ONLY

PROBE SELECTION:

- 10 MHz, 120 x 1000 pm, 30 mm penetration.
- 20 MHz, high definition, 60 x 150 pm, 13 mm penetration.
- 20 MHz, high sensitivity, 60 x 200 pm, 23 mm penetration.
- 50 MHz, 25 x 60 pm, 3 mm penetration.

SYSTEM SPECIFICATIONS

- Swept gain control, level and profile.
- True broadband system, 12 bit A/D conv.
- Cineloop recording, 100 images.
- Full-featured image analysis package.
- Four simultaneous images.
- Autosave function.
- Real-time scanning with scroll and zoom.
- Meets international regulatory requirements.

DSM III Skin Colormeter combines advanced color sensing technology, high sensitivity and durability with extreme flexibility and ease of operation. Proven and highly sensitive technologies for skin colour detection are built into a handheld and light weight device to form a fully integrated instrument, which is operated by just one button. To facilitate correct positioning on the skin a guiding light illuminates the target area.

Measurements are presented on the integrated display, and may also be sent to a PC or tablet for further spreadsheet processing. For this purpose the DSM III features wireless Bluetooth communication.

It offers read-out of erythema and melanin (E&M) based on the absorbance characteristics of human skin as well as CIEL*a*b* values.

Specifications

- Light source: 2 x high intensity white LED
- Colorsensor: 4 x 16 active elements
- Display: LC-display
- Read-out: E&M (erythema & melanin), CIEL*a*b* (optimised for white LED illumination)
- Operation: One-button control
- Built-in Bluetooth for wireless communication with tablet/ laptop
- Battery: 1 pcs. rechargeable, standby time: 1 month
- Charger: Wireless induction
- Calibration: White calibrator included
- Operation temp.: 10-40 Deg. C

CRYO PRO

Liquid Nitrogen Cryosurgical Equipment

At -196 deg.C liquid nitrogen is the most efficient coolant to be used for cryosurgical treatment. Our CryoPro treatment units as well as the comprehensive accessory program are designed to provide reliable and trouble free operation even after extensive freezing due to the use of high quality materials and careful quality control in all production stages.

In addition to the treatment units we also supply liquid nitrogen storage containers and withdrawal devices to conveniently fill the CryoPro units.

The CryoPro units are available in sizes of 0.5 l (Maxi) and 0.35 l (Mini) and come with a three year world wide warranty against manufacturing and material defects.

ACCESSORIES:

| | | | | | | |
|--------------------|-------------------|----------------|-----------------|-------------|-------|-----------------|
| Closed contact | sharp pointed | 1 mm | | 2 mm | 3 mm | 4 mm |
| probes: | 5 mm | 6 mm | 8 mm | 20 mm | 30 mm | cervical probes |
| Open spray tips: | std. tips A/B/C/D | bent spray | straight spray | | | |
| LN2 storage: | AL dewars | CD dewars | withdrawal tube | roller Base | | |
| Misc. accessories: | lexan cones | neoprene cones | carrying bag | | | |

Contact probes: Miniature sized, gold plated. For tiny to small lesions - e.g. small flat warts, lesions near the eye or on the eyelid.

ACU-GEL

Ultrasound Assisted Dermaelectroporation

- Non-Invasive • Painless • Inexpensive

NEW Application Post Q-Switched Nd:YAG for TATTOO and Pigmentation

TIMPAC ACUGEL is a portable & highly personalized machine. It is completely solid state & very easy to use. It uses a unique form of electroporation alongwith electro mechanical energy which penetrates the tissues very deeply. The energy released into the tissue vibrates mechanically at high frequency for a very small range of movement, at cellular level, the molecules are oscillated about million times a second but for a distance of few millimicrons. The result is electroporation alongwith cellular massage for the cells, improvement in blood circulation, reduction edema. Resultant synergy works much better than electroporation or ultrasound used independently.

APPLICATIONS

- Under Eye Dark Circles,
- Under Eye Bags,
- Facial Rejuvenation
- Lymphatic Drainage
- Penetration of Ingredients to deep dermalayers (electroporation)
- Post Procedure erythema

Under Eye Dark Circles

6 Modes of Operation

- No Carbonization
- Heavy Cutting - Cut with Coagulation
- Very Fine Cutting
- Soft Coagulation
- Forced Coagulation - Fulguration
- Insulated Needle for White Hair

Radiofrequency by Dr. Bipin Deshpande

Scarless Excision of Mole

Virtually scarless excision

Scarless Excision of Actinic Keratosis

Excellent Removal of Warts

Technical Characteristics

| Mode | Maximal Output Power | Crest Factor |
|---------------------------|---|--------------|
| Fine CUT | 70 W | 1.5 |
| Heavy CUT | 100 W | 1.5 |
| Soft COAG | 50 W | 2.0 |
| Forced COAG | 50 W | 2.8 |
| Bi COAG | 80 W | 1.5 |
| Micro Bi COAG | 35 W | 1.5 |
| Operating Frequency [MHz] | 4 | |
| Patient Safety | NEMSY (Neutral Electrode Monitoring System) | |
| Activation | Twin Footswitch and Hand-switch Pencil | |
| Duty Cycle | 10/30 | |
| Safety Class/MDD Class | I/IIb | |
| Applied Parts Type | BF | |
| Dimensions [mm] | 280x150x280 | |
| Weight [kg] | 8.6 | |

Standard Set of Accessories for Dermatology & Plastic Surgery

- 1 reusable finger-switch handle with 3 m cable
- 5 monopolar electrodes
- Reusable earth cable
- 1 bipolar cable 3 m
- 1 bipolar forceps
- 1 twin footswitch
- Face tightening electrode (optional)
- Body tightening electrode (optional)
- Insulating Needle for White Hair (optional)

ALL ACCESSORIES (MADE IN GERMANY) INTERCHANGABLE WITH ELLMAN

 made simple

SKIN DIAGNOSTICS

dermLite

Accurate Diagnostic Leads To Precise Treatment

DL5

World's First Variable Polarization System In A Hybrid Dermatoscope

- Rechargeable, includes charging base
- super practical with 100 mm ruler
- 16x white,
- 4x UV (365nm),
- 4x Pigmentboost,
- 1 torch LED.
- ø32mm 10x
- MCC™ adapter

DL4

World's Best-Selling Dermatoscope

- Polarized & Non-Polarized
- 18 white LEDs (12 Polarized, 6 Non-Polarized), 6 Orange Polarized LEDs
- IceCap™
- Pigment Boost™ Plus
- ø30mm 10x

Accurate Diagnostic Leads To Precise Treatment

DL200 HYBRID

Pocket Dermatoscope

- Polarized & Non-Pol.
- 21 white LEDs (15 pol., 6 non-pol.)
- IceCap™
- PigmentBoost™
- ø25mm 10x
- Longer Battery Life
- Infection Control Caps

DL3N

- 25 mm four-element lens,
- 28 high-powered LEDs and the all-new
- PigmentBoost™ illumination.
- Polarized & Non-Polarized.
- 18 white LEDs (12 pol., 6 non-pol.), 10 orange pol. LEDs
- IceCap™
- PigmentBoost™
- ø25mm 10x

Foto X Plus

- 16.1MP Four Thirds Live MOS Sensor
- Dual Quad-Core TruePic VIII Processor
- UHD 4K30 Recording; Clips Video Mode
- 2.36m-Dot 1.23x Electronic Viewfinder
- 3.0" 1.04m-Dot Tilting Touchscreen LCD
- In-Body 5-Axis Image Stabilization
- 121-Point Contrast-Detect AF System
- Up to 8.6 fps Shooting and ISO 25600
- Digital ED 14-42mm f/3.5-5.6 EZ Lens
- 16GB SDHC Memory Card

Foto II Pro

- Works with any Nikon or Canon full-frame or 2/3 frame DSLR camera (with interchangeable lenses) out of the box
- Unsurpassed edge-to-edge clarity and resolution
- Toggle between polarized and non-polarized illumination via button push or automatically via flash cable
- On-board rechargeable battery
- Integrated zoom with secure zoom lock
- Removable magnetic spacer and removable glass contact plate
