12	Dick Boecker	DAPHNE	203	203	10	14.5	24	52	0.322
13	Jerry Smith	WAVELENGTH	417	267	15	7	24	61	0.259
14	John Anderson	SWELLVILLE	2118	213	10	6	26	42	0.235
15	Peter Peers	KOOZA	159	159	15	1	24	64	0.182

High Point calculation example for ETOILE:

ETOILE competed in 20 races out of possible 26.
ETOILE beat 33 boats out of a maximum possible 82.

The formula is as follows: $(20+33)/(26+82) = 53/108 = 0.491$

NOTE:

The formula factors in the number of races that the boat competed in as well as the number of boats beat.
There are no drops and there is no allowance made for RC duty.
Only boats that actually competed in a given race are factored into the formula.
