

Amenities

We sleep up to six people in our private guest house that offers central heating and cooling. Two bedrooms, each with a queen-size bed and there are two twin-size beds in a non-private area. Linens and towels are provided. One full-sized bathroom. The kitchen features a stove, refrigerator, microwave, coffee maker and toaster. We have plenty of baking ware, dishware and utensils for eating and cooking/barbecuing.

Smart TV (no channels available) and DVD player with a selection of older movies for our TV viewers. Internet is available and you may stream your own movies through your own device if you wish to connect to the Smart TV.

A charcoal BBQ grill is at the guest house. Don't forget to bring your own charcoal. There is an outdoor fire-pit area for your use, please bring your own wood.

We do allow pets. We usually find that people who travel with their pets have pets that are very well trained. However, even the best trained animals can be "animals" when left alone. We appreciate you kenneling your pets if you leave them at the guest house alone. If you do not own a kennel, please let us know before arriving and we will provide one for your use. **Please do not allow your pets on the furniture or beds.**

We look forward to your stay with us and we hope you make yourselves at home.
