

# PROGRAM RESOURCE BOOK

2011 APS•IPPC  
Joint Meeting  
August 6–10  
Honolulu, Hawaii

# BIOREBA

## AgriStrip - Lateral flow tests

Complete kits for fast and easy use in field and greenhouse

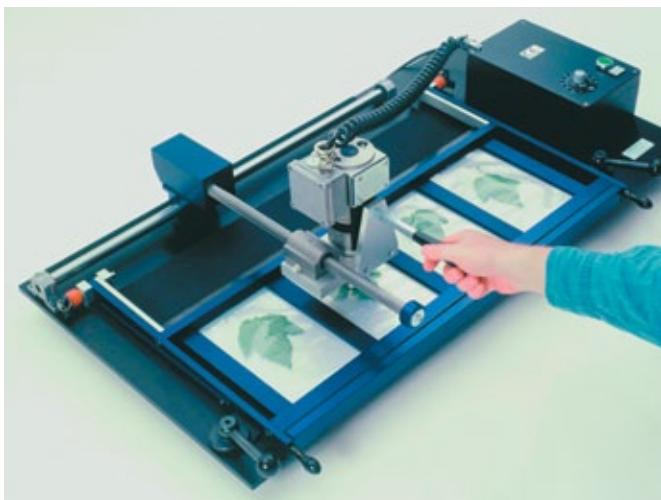

## ELISA tests for plant pathogens

Complete kits, reagents, buffers, microtiter plates and extraction bags for laboratory use

## Equipment

Homex 6 homogenizer and Easy Wash 2000 plate washer for plant diagnostic applications

## NEW! Program Resource Book

We've made some changes! This new Program Resource Book serves as your resource for the meeting - session and poster content, exhibitor information, and recognition. The smaller Program Guide is your key to the program schedule, general information and the exhibit hall floor plan with extra pages to take notes. We hope you find these new formats a convenient way to navigate the meeting.

### The American Phytopathological Society

**(APS)**, is the premier society dedicated to high-quality, innovative plant pathology research. APS is driven by a distinctive community of scientists, whose energy and commitment ensure the global advancement of this critical science. Members belong to receive cutting-edge scientific information and the best networking opportunities. Find out more at [www.apsnet.org](http://www.apsnet.org).

### The International Association for Plant Protection Sciences (IAPPS)

holds it's International Plant Protection Congress (IPPC) every four years. IPPC programs are broadly multidisciplinary with emphasis on integrated pest management (IPM). For 50+ years, IPPCs have provided a forum for plant protection scientists to communicate and discuss important problems and new discoveries related to crop losses due to pests and their management. Visit [www.plantprotection.org](http://www.plantprotection.org) for more information.

# WELCOME TO THE APS-IPPC JOINT MEETING

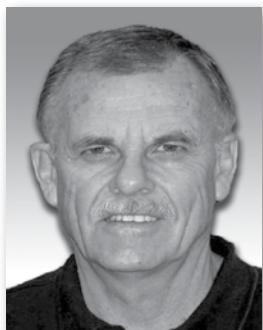

We're so thrilled to be here in Honolulu celebrating the multidisciplinary contributions of two premier professional plant science associations, The American Phytopathological Society (APS) and the International Plant Protection Congress (IPPC). As many as 1,500 attendees from 45 countries are expected to join us here in Hawaii, which is a true testament to your dedication to our science.

The focus this year is on new global initiatives and creating connections with scientists from around the world. The 2011 APS-IPPC Joint Meeting offers a dynamic look into the future of our science, and you will have many opportunities during the next several days to participate in technical, societal, and social activities.

This year's scientific program includes plenary sessions, special sessions, workshops, and technical sessions. More than 1,200 abstracts will be presented as posters and oral technical presentations, which is the highest number of abstracts in years. The extended program also includes educational opportunities where you can attend one of 15 field trips custom-designed for plant scientists or one of 5 premeeting workshops.

We encourage you to take full advantage of your time here. Get involved on every level – attend social gatherings and networking events, and meet the new generation of plant pathologists and researchers. We're glad you're here!

Carol Ishimaru  
*APS President-Elect*

Welcome! On behalf of the Program Committee, we're delighted you have joined us for our first meeting in Honolulu, one that is packed with sessions and networking opportunities that can only happen here in Hawaii.

We're excited that two premier professional plant science associations have joined forces and the APS-IPPC partnership promises new and exciting educational opportunities for all. With more than 45 countries worldwide represented at our meeting, this international and scientific diversity ensures that many unique perspectives will be presented providing you the opportunity to participate in the discussion of the role we as plant protection scientists must play if we are to win the battle against hunger, rural poverty, and global food insecurity.

The 2011 APS-IPPC Joint Meeting highlights efforts to continue moving forward and expanding the boundaries of what our science can be. The joint meeting serves as your chance to come together, network with peers, discuss critical issues in our science, and to get to know each other. It's your link to the latest research and technological developments in global plant protection and helps you come face to face with the top scientists in our field. We hope you make the most of your time here, and return home safely with a renewed vigor and a mind full of new ideas and concepts that you can promote in your home country.

E.A. "Short" Heinrichs  
*IAPPS Secretary General*

## Safety Tips

Do not travel alone – stay in groups and travel in well-lit areas. **Remove name badges when outside the hotel or Convention Center unless you are participating in a meeting event.**

- Do not give your room number out to anyone you do not know and avoid giving out your room number in conversations where strangers may hear you talking.
- Bolt your hotel room door and only open it when you know who is on the other side. (Note: hotel personnel wear uniforms and have identification badges. If in doubt, call hotel security to verify an employee's identity.)
- Do not leave your door ajar if you are going down the hall for ice. Someone may enter when you are not looking.
- Know where the stairs are located in case of a fire (do not use elevators). Also count the number of doors to the nearest exit in case you cannot see in a smoke-filled hallway.
- Valuables, airline tickets, and money should be kept in a hotel safety deposit box or in a room safe, if available.

## Procedures in Case of a Fire

- Try to leave the hotel as quickly as possible. If you cannot, stay in your room and call the operator or security to let them know you are in your room.
- Put your hand on the room door to see if it is hot before opening it. If it is, do not open quickly. Open it just a crack to see what is on the other side and be prepared to slam it shut quickly if necessary.
- If you leave the room, take your room key with you! Shut your room door to keep smoke out. You may have to return if the exit is blocked. Remember the way back to your room as you go to the exit in case you need to return.
- If necessary, drop to your knees to avoid smoke. Tie a wet towel around your nose and mouth to act as a smoke filter. Fold it into a triangle and put the corner in your mouth.
- Do not take the elevator when you smell smoke or if you know that there is a fire in the building.

## FIELD TRIPS (APS Member Organized)

Listed in chronological order.

### Application of Biotechnology to Meet the Challenges of Crop Production in the Tropics

Saturday, August 6, 2011

3:30 a.m. - 9:45 p.m.

**Organizers:** Richard Lee, USDA ARS NCGRCD, Riverside, CA, U.S.A.; Ronald Bransky, University of Florida CREC, Lake Alfred, FL, U.S.A.

**Section:** Plant Pathology-Epidemiology/Ecology/Environmental Biology

**Sponsoring Committees:** Tropical Plant Pathology; APS Postharvest Pathology

Growing crops under tropical conditions presents special challenges. Each tropical crop has unique pathogen and production challenges. This field trip will afford the opportunity to see 14 different tropical crops with scientists providing information on how biotechnology, coupled with sound horticultural practices, is helping maintain production despite the unique challenges of tropical pests and climate. The field trip will include a short visit to the Volcanoes National Park. This field trip takes place on the Big Island. Roundtrip airfare from Honolulu to the Big Island is included in the fee. *Preregistration is required.*

### Fruit, Vegetable, and Ornamental Field Tour

Saturday, August 6, 2011

6:45 a.m. - 9:15 p.m.

**Organizers:** Kevin Ong, Texas AgriLife Cooperative Extension, College Station, TX, U.S.A.; Cristi Palmer, IR-4 Project/Rutgers University, Princeton, NJ, U.S.A.

**Section:** Plant Pathology-Diseases of Plants

**Sponsoring Committees:** Extension; Diseases of Ornamental Plants

Participants of this all-day tour will visit commercial fields as they travel to the Big Island. The focus of the tour will be on diseases of fruits, vegetables, and ornamentals and the solutions implemented by growers to manage these problems. This field trip takes place on Big Island. Roundtrip airfare from Honolulu to the Big Island is included in the fee. *Preregistration is required.*

### Turfgrass Field Tour

Saturday, August 6, 2011

8:00 a.m. - 4:30 p.m.

**Organizers:** Damon Smith, Oklahoma State University, Stillwater, OK, U.S.A.; Brandon Horvath, University of Tennessee, Knoxville, TN, U.S.A.

**Section:** Plant Pathology-Diseases of Plants

**Sponsoring Committee:** Turfgrass Pathology

**Financial Sponsors:** Syngenta

This field tour will highlight the turfgrass challenges associated with various sites in and around Oahu. Possible sites could include golf courses (such as Koolau - the U.S. Golf Association's most difficult rated golf course), important historical sites (such as The National Memorial Cemetery of the Pacific), sports fields (such as Clarence TC Cheng Field and Les Murakami Field at the University of Hawaii), and research sites (such as the University of Hawaii-Manoa Turfgrass Research location). This trip will focus on the impact of these sites to the Hawaiian economy and the

challenges associated with maintaining turfgrass sites in Hawaii. *Preregistration is required.*

### Pre- and Postharvest Diseases of Tropical Fruits

Saturday, August 6, 2011

8:00 a.m. - 5:30 p.m.

**Organizers:** Jari S. Sugano, University of Hawaii, Kaneohe, HI, U.S.A.; Alex Cochran, Syngenta Crop Protection, Greensboro, NC, U.S.A.; Chang-Lin Xiao, Washington State University, Wenatchee, WA, U.S.A.

**Section:** Plant Pathology-Diseases of Plants

**Sponsoring Committees:** Postharvest Pathology; Chemical Control

**Financial Sponsors:** Janssen Pharmaceutica; JBT Corporation; Pace International; Syngenta Crop Protection; Valent

This field trip will tour production fields of pineapple, papaya, banana, and coffee as well as a fruit packinghouse along the famous North Shore of Oahu. Participants will have the opportunity to see production operations and talk with growers and university faculty about pre- and postharvest diseases. *Preregistration is required.*

### Tropical Forest Pathology

Saturday, August 6, 2011

8:00 a.m. - 6:00 p.m.

**Organizers:** Phil Cannon, USDA Forest Service, Valeho, CA, U.S.A.; Janice Uchida, University of Hawaii, Honolulu, HI, U.S.A.

**Section:** Plant Pathology-Diseases of Plants

**Sponsoring Committees:** Forest Pathology; Tropical Plant Pathology; Emerging Diseases and Pathogens

This loop tour of eastern Oahu will feature several tropical forestry diseases. At the Muanawili Research Station, we will see testing of koa clones to Fusarium oxysporum wilt, the rust disease caused by eucalyptus. At the Waimanalo Research station, we will see several tropical tree-crop species and some of the diseases that affect them. *Preregistration is required.*

### Hawaiian Fungal Foray

Tuesday, August 9, 2011

1:00 - 7:30 p.m.

**Organizers:** Amanda Gevens, University of Wisconsin, Madison, WI, U.S.A.; Barry Pryor, University of Arizona, Tucson, AR, U.S.A.

**Section:** Plant Pathology-Diseases of Plants

**Sponsoring Committees:** Mycology; Forest Pathology

Observe, collect, and identify fungi from natural ecosystems located on Oahu. In the afternoon, we will visit collecting sites. Upon conclusion of our field activities, we will go to lab spaces on the University of Hawaii campus to identify and share collections. George Wong and Janice Uchida are handling local arrangements. Tom Ranker, University of Hawaii botany chair has offered use of lab space and microscopes. To facilitate this schedule, Uchida has offered to provide the evening meal. Cost for the meal will be covered by the field trip fee. Participants will be subject to state and federal regulations for movement of any collected samples. *Preregistration is required.*

# WORKSHOPS

Listed in chronological order.

## DNA-Based Pathogen Detection Methods:

### Ralstonia solanacearum, A Case Study

Saturday, August 6, 2011

7:30 a.m. - 4:00 p.m.; Offsite

**Organizer:** Timothy Denny, University of Georgia, Athens, GA, U.S.A.

**Section:** Professionalism/Outreach/Industry/Genetic Engineering

**Sponsoring Committee:** Plant Pathology and Disease Detection, Bacteriology

This hands-on workshop will focus on advanced detection and identification technology for *Ralstonia solanacearum*, the causal agent of bacterial wilt and a quarantine pathogen of global concern. Participants will perform the cutting-edge methods: immunomagnetic separation-PCR; magnetic capture hybridization-PCR; and, Loop-mediated isothermal amplification (LAMP). Application and suitability of these methods on complex samples for laboratory and field testing will be discussed. Location – University of Hawaii campus and is limited to 16 people.

*Preregistration is required.*

## KNOw New Pathogens: Why and How (Improving Infrastructure and Capacity to Predict, Detect, and Respond to New Pest Introductions)–CANCELLED

Saturday, August 6, 2011

8:00 a.m. - 12:00 p.m.; South Pacific 2, Hilton

**Organizer:** Kerry Britton, USDA Forest Service, Arlington, VA, U.S.A.

**Section:** Emerging Pests/Invasive Species

**Sponsoring Committees:** Emerging Diseases and Pathogens; Regulatory Plant Pathology; Forest Pathology; Diagnostics; Plant Pathogen; Disease Detection

Help strengthen the practical application of our science to predict, prevent, detect, and respond to new non-native plant pathogens. A federal interagency group of plant pathologists, working under the auspices of the National Invasive Species Council, examined the national plant pathology infrastructure and there are some serious deficiencies. We want your input. Our draft report makes specific recommendations to improve diagnostic systems, information sharing, research capacity, outreach, and education of the next generation of professional activities is represented. Have you got the right ideas? More importantly, what can be done next to improve the situation? *Preregistration is required.*

## Coordinated Agricultural Projects:

### Making CAPs Work for You!

Saturday, August 6, 2011

1:00 - 3:30 p.m.; South Pacific 1, Hilton

**Organizer:** Nicole Donofrio, University of Delaware, Newark, DE, U.S.A.

**Section:** Plant Pathology-Molecular/Cellular/Plant-Microbe Interactions

**Sponsoring Committee:** Molecular and Cellular Phytopathology

What are coordinated agricultural research projects? In the wake of the restructuring of the USDA-NIFA, it will be imperative for many researchers to learn more about CAPs and how to

integrate their own research into large-scale, “big picture”, comprehensive studies. Hear from speakers from every stage of a CAP grant, as well as a program manager whose programs include CAP-type grants. Topics should include, but not be limited to, managerial and time-commitment aspects of writing a CAP, how to coordinate large groups of researchers, and budgetary considerations, as well as the science driving the CAP (solving “big picture” problems). *Preregistration is required.*

## Contemporary Methods in Population Genetics for Plant Pathology

Saturday, August 6, 2011

1:00 - 4:00 p.m.; 304A

**Organizers:** Erica Goss and Niklaus Grunwald, USDA ARS, Corvallis, OR, U.S.A.

**Section:** Plant Pathology-Epidemiology/Ecology/Environmental Biology

**Sponsoring Committee:** Genetics

Many software packages and programs are available for analyzing population genetic data, but determining the best analysis for your data can be confusing and overwhelming. This workshop will provide an overview of contemporary software for population genetic analysis and will delve into several of the most broadly useful programs, including Bayesian and coalescent-based methods. There will be discussion of appropriate data sets for each program and how to interpret the output. Participants are encouraged to bring a laptop loaded with the specified freely available software to run example analyses. *Preregistration is required.*

## Microbial Collections: Practice and Management

Saturday, August 6, 2011

1:00 - 4:00 p.m.; 304B

**Organizers:** Shuxian Li, USDA ARS, Crop Genetics Research Unit, Stoneville, MS, U.S.A.; Rick Bennett, University of Arkansas, Fayetteville, AR, U.S.A.

**Section:** Professional/Outreach/Industry/Genetic Engineering

**Sponsoring Committees:** APS Collections and Germplasm; APS Mycology

This hands-on workshop will cover the general practical aspects of managing microbial collections. Presentations and demonstrations will be given by experienced curators from fungal, bacterial, and viral collections and a database expert. Topics include protocols for preservation, maintenance, and distribution of fungi; identification, preservation, and shipping bacterial germplasm in the International Collection of Phytopathogenic Bacteria (ICPB), and maintenance and preservation of plant viruses on a budget, as well as an introduction on how to use informatics tools to improve the management of culture collections and associated data. *Preregistration is required.*

## IPM for Feed the Future

Saturday, August 6, 2011

5:30 – 8:30 p.m.; South Pacific 3, Hilton

**Organizers:** R. Muniappan, IPM CRSP, VA Tech, USA; Irmgard Hoeschle-Zeledon, Coordinator, SP-IPM, IITA, Ibadan, Nigeria; E. A. "Short" Heinrichs, IAPPS Secretary General, University of Nebraska, USA

**Sponsors:** IAPPS, IPM CRSP, and SP-IPM

This workshop will have presentations by leading scientists and administrators from each of the following agencies/institutes: U.S. Agency for International Development (USAID), International Agricultural Research Centers (IARCs), Collaborative Research Support Program (CRSP), U.S. Department of Agriculture (USDA), Bill & Melinda Gates Foundation, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), CropLife International, and others. They will review IPM activities of different international programs and recommend IPM technologies that could strengthen the US Government's global "Feed the Future Initiative" for increasing food production, improving nutrition and reducing poverty.

### Program:

Feed the Future Initiative - Role of IPM. Rob Bertram, USAID

Feed the Future Initiative - Role of USDA. Anita Regmi, Senior Advisor, International Office of the USDA Chief Scientist, U.S.A.

Role of IPM in Bill and Melinda Gates Foundation activities.

Prem Warrior, Senior Program Officer, Bill & Melinda Gates Foundation, U.S.A.

Need for plant protection research and technology transfer in tropical crops - A German development cooperation agency viewpoint. Marlene Diekmann, Research Advisor, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), Germany

Need for plant protection research and technology transfer in tropical crops from the viewpoint of a CG Center DG. Bob Zeigler, DG, IRRI, The Philippines

Need for IPM strategies and technology transfer activities in tropical vegetable crops from the viewpoint of the IPM CRSP. S.K. De Datta, Associate Vice President for International Affairs and Director, Office of International Research, Education and Development, Virginia Tech, U.S.A.

Impact of IPM programs in tropical agriculture. George Norton, Department of Agricultural and Applied Economics, Virginia Tech, U.S.A.

What has been done and what needs to be done to solve current and future pest constraints to food production. Richard Sikora, Chair, CGIAR SP-IPM Steering Committee, University of Bonn, Germany, Gebisa Ejeta, World Food Prize winner, Purdue University, U.S.A., Geoff Norton, President, IAPPS, University of Queensland, Australia, Keith Jones, Director, Stewardship and Sustainable Agriculture, CropLife International, Belgium, Sanath Reddy, Senior Economic Growth Advisor, USAID Mission, Indonesia, Daniel Coyne, International Institute of Tropical Agriculture (IITA), Tanzania

Recommendations and action plan.

## Back by Popular Demand... Exclusive APS Foundation Raffle!

iPad2

Kindle

This year, one ticket buys TWO chances.

Your raffle ticket gives you a chance to win either an iPad or a Kindle eReader

The odds are in your favor, only a maximum of 1,000 tickets will be sold during the meeting. Make sure to stop by the APS Foundation booth to buy your tickets, or buy direct from any APS Foundation Board member during the meeting. Proceeds will help support APS Foundation initiatives.

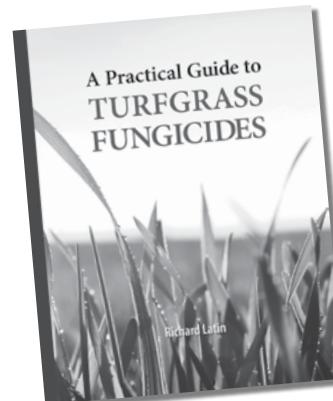

## APS PRESS Book Signing Event

Monday from 3:30 to 4:30 p.m.

Special pricing on this book at the Signing – **SAVE \$30!**

### Meet Rick Latin!

Author of the new bestselling

*"I don't work on turfgrass diseases but I'm going to buy this book. It contains useful information that can be applied across almost any cropping system."*

— Larry Madden,  
Distinguished Professor  
of Plant Protection,  
Ohio State University

# PROGRAM

## SUNDAY, AUGUST 7, 2011

*Listed in alphabetical order by title. Special Sessions listed first followed by Oral Technical Sessions. Find complete details on the meeting website at [www.apsnet.org/meetings/annual/program/Pages](http://www.apsnet.org/meetings/annual/program/Pages)*

### ■ SPECIAL SESSIONS

#### The Developing Crisis, International Movement of Insects and Pathogens in Commercial Trade

1:00 - 4:00 p.m.; 316A

**Section:** Emerging Pests/Invasive Species

**Organizers/Moderators:** Thomas Harrington, Iowa State University, Ames, IA, U.S.A.; James Steadman, University of Nebraska, Lincoln, NE, U.S.A.

**Sponsoring Committees:** APS Forest Pathology; APS Public Policy Board; APS Regulations; APS Office of International Programs; IAPPS

**Financial Sponsors:** The Nature Conservancy; Pioneer Hi-Bred a Dupont Business

- 1:00 p.m. 1-S. You think you have problems? The crisis in Hawaii. C. A. MARTIN (1). (1) Pacific Cooperative Studies Unit, Coordinating Group on Alien Pest Species, Honolulu, HI, U.S.A.  
 1:30 p.m. 2-S. Real and imagined problems in movement of plant pathogens in international seed trade. R. L. DUNKLE (1). (1) American Seed Trade Association, Alexandria, VA, U.S.A.  
 2:00 p.m. 3-S. Introductions of exotic insects and their associated pathogens in solid wood packing material. T. C. HARRINGTON (1). (1) Iowa State University, Ames, IA, U.S.A.  
 2:30 p.m. Break  
 2:45 p.m. 4-S. Flaws in international protocols for preventing entry and spread of plant pathogens via "plants for planting". C. M. BRASIER (1). (1) Forest Research Agency, Farnham, United Kingdom  
 3:15 p.m. 5-S. Progress and pitfalls in developing policies for reducing risks of introductions of exotic forest insects and pathogens. F. T. CAMPBELL (1). (1) The Nature Conservancy, Arlington, VA, U.S.A.  
 3:45 p.m. Discussion

#### International Perspectives on IPM Education for Advancing Sustainable Agricultural Systems

1:00 - 4:00 p.m.; 325AB

**Section:** Professionalism/Outreach /Industry/Genetic Engineering  
**Organizers:** Gary Hein, University of Nebraska, Lincoln, NE, U.S.A.; Robert McGovern and Norm Leppla, University of Florida, Gainesville, FL, U.S.A.

**Moderators:** Gary Hein, University of Nebraska, Lincoln, NE, U.S.A.; Robert McGovern, University of Florida, Gainesville, FL, U.S.A.

**Sponsoring Committee:** APS Extension

- 1:00 p.m. 6-S. Current status of Integrated Pest Management (IPM) Training in universities and other tertiary agricultural training institutions of East Africa. S. KYAMANYWA (1). (1) Makerere University, Kampala, Uganda  
 1:30 p.m. 7-S. IPM education in India: Training farmers through demonstration. N. KAUSHIK (1). (1) TERI, New Delhi, India  
 2:00 p.m. 8-S. Lessons learned in designing IPM education

programs for farmers in Central America. A. RUEDA (1). (1) Zamorano University, Tegucigalpa, Honduras

- 2:30 p.m. Break  
 2:45 p.m. 9-S. Sustainable intensification of crop production: the essential role of IPM & ecosystem-literacy education for smallholder farmers in Asia. J. KETELAAR (1). (1) FAO, Bangkok, Thailand  
 3:15 p.m. 10-S. Expanding educational and career opportunities for international IPM Practitioners. R. J. MC-GOVERN (1), G. L. Hein (2), N. C. Leppla (3). (1) University of Florida-IFAS, Plant Medicine Program, Gainesville, FL, U.S.A.; (2) Doctor of Plant Health Program, University of Nebraska, Lincoln, NE, U.S.A.; (3) University of Florida-IFAS, IPM Florida, Gainesville, FL, U.S.A.  
 3:45 p.m. Discussion

#### Management of Insect-Transmitted Plant Virus Diseases in the Tropics

1:00 - 4:00 p.m.; 323B

**Section:** Diseases of Plants

**Organizers:** Naidu Rayapati, Washington State University, Prosser, WA, U.S.A.; Sue Tolin, Virginia Tech, Blacksburg, VA, U.S.A.

**Moderator:** Sue Tolin, Virginia Tech, Blacksburg, VA, U.S.A.

**Sponsors:** IAPPS; APS Virology; APS Tropical Plant Pathology

**Financial Sponsors:** APS/APHIS Working Group, The Samuel Roberts Noble Foundation, Inc.

- 1:00 p.m. 11-S. The role of epidemiology in the management of insect-transmitted viruses—A tropical perspective. R. A. JONES (1). (1) University of Western Australia, Perth, Other, Australia  
 1:30 p.m. 12-S. Implementation and success of host-free periods for managing tomato-infecting begomoviruses in developing countries. R. L. GILBERTSON (1). (1) University of California Davis, Davis, CA, U.S.A.  
 2:00 p.m. 13-S. Whitefly and *Begomovirus* biology as a tool for their management in a developing country: Guatemala. M. PALMIERI (1). (1) Universidad del Valle de Guatemala, Guatemala  
 2:30 p.m. Break  
 2:45 p.m. 14-S. Whitefly vector populations in relation to virus ecology and management. J. BROWN (1). (1) University of Arizona, Tucson, AZ, U.S.A.  
 3:15 p.m. 15-S. Management of *Peanut bud necrosis virus* disease in tomato in South Asia. R. A. NAIDU (1). (1) Washington State University, Prosser, WA, U.S.A.  
 3:30 p.m. 16-S. Challenges unique to managing viruses in tropical developing countries. S. A. TOLIN (1). (1) Virginia Tech, Blacksburg, VA, U.S.A.  
 3:45 p.m. Discussion

*Special Sessions continued*

## Omics Approaches for the Characterization of Interactions Between Human Enteric Pathogens and Plants: A Plant Pathologists Perspective

1:00 - 4:00 p.m.; 319AB

**Section:** Diseases of Plants

**Organizers:** Kelly Chamberlin, USDA-ARS, Stillwater, OK, U.S.A.; Max Teplitski, University of Florida, Genetics Institute, Gainesville, FL, U.S.A.

**Moderator:** Max Teplitski, University of Florida, Genetics Institute, Gainesville, FL, U.S.A.

**Sponsor:** IAPPS Organizing Committee

**Financial Sponsor:** Center for Produce Safety University of California-Davis

- 2:45 p.m. 37-S. Crop losses in highly populated areas: A global perspective. L. WILLOCQUET (1), A. Nelson (1), A. Sparks (1), A. Laborte (1), S. Savary (1). (1) IRRI, Los Banos, Philippines
- 3:15 p.m. 38-S. Impact of crop loss in the United States. C. A. HOLLIER (1). (1) Louisiana State University Agricultural Center, Baton Rouge, LA, U.S.A.
- 3:45 p.m. Discussion

## ■ ORAL TECHNICAL SESSIONS

### New & Emerging Pests and Diseases

1:00 – 4:00 p.m.; 317A

#### Section: Emerging Pests/Invasive Species

**Moderators:** Kerry Britton, USDA Forest Service, Research & Development, Arlington, VA, U.S.A.; Ebenezer I. Jonathan, Tamil Nadu Agricultural University, Coimbatore, India

- 1:00 p.m. 1-O. Improving the detection of new and emerging pests and diseases through the Plantwise Initiative. S. L. HOBBS (1). (1) CABI, Wallingford, United Kingdom
- 1:15 p.m. 2-O. Pest interceptions on live plants at U.S. ports of entry: A system overwhelmed. K. O. BRITTON (1), J. L. Parke (2), L. J. Garrett (3), F. Lowenstein (4), A. Nuding (5). (1) USDA Forest Service, Research & Development, Arlington, VA, U.S.A.; (2) Oregon State University, Dept. of Botany and Plant Pathology, Corvallis, OR, U.S.A.; (3) USDA-APHIS, PPQ, CPHST, Plant Epidemiology and Risk Assessment Laboratory, Raleigh, NC, U.S.A.; (4) The Nature Conservancy, Arlington, VA, U.S.A.; (5) Western Resource Advocates, Boulder, CO, U.S.A.
- 1:30 p.m. 3-O. Management of papaya mealybug, *Paracoccus marginatus*, through biological control. E. I. JONATHAN (1), S. Suresh (1), M. Kalyanasundaram (1), C. A. Mahalingam (1), P. Karuppuchamy (1), S. Venkatesan (1). (1) Tamil Nadu Agricultural University, Coimbatore, India
- 1:45 p.m. 4-O. Integrated management of invasive mealybugs in brinjal. S. SEETHARAMAN (1), J. Indra (2), G. Ramasamy (3), K. Pandian (3). (1) CPPS, TNAU, Coimbatore, India; (2) TNAU, CPPS, Coimbatore, India; (3) TNAU, Coimbatore, India
- 2:00 p.m. 5-O. Pythium root rot of corn in Japan; Unique symptom climb up the mature stem, and possible drift of the major species in causal *Pythium* flora. K. SUGAWARA (1), T. Tsukiboshi (1), T. Kikawada (1), H. Tamaki (1), S. Mitsuhashi (1), S. Morita (1), I. Okabe (1). (1) National Institute of Livestock & Grassland Science, Nasushiobara, Japan
- 2:15 p.m. 6-O. *Tomato leaf curl Peru virus*: A locally evolved monopartite New World begomovirus. T. A. MELGAREJO (1), T. Kon (1), R. L. Gilbertson (1). (1) Dept. of Plant Pathology, University of California-Davis, Davis, CA, U.S.A.
- 2:30 p.m. Break
- 2:45 p.m. 7-O. A novel M RNA reassortant of *Groundnut ringspot virus* and *Tomato chlorotic spot virus* infecting vegetables in Florida. C. G. Webster (1), S. R. Reitz (2), G. Frantz (3), H. Mellinger (3), K. L. Perry (4), S. ADKINS (1). (1) USDA ARS, Fort Pierce, FL, U.S.A.; (2) USDA ARS, Tallahassee, FL, U.S.A.; (3) Glades Crop Care, Inc., Jupiter, FL, U.S.A.; (4) Cornell University, Ithaca, NY, U.S.A.

- 3:00 p.m. **Pacific Division Talk** 8-O. New species of the toxic fungal endophyte, *Undifilum*, from western United States locoweeds. D. BAUCOM (1), R. Belfon (1), M. Romero (1), R. Creamer (1). (1) New Mexico State University, Las Cruces, NM, U.S.A.

- 3:15 p.m. 9-O. Common ragweed (*Ambrosia artemisiifolia*)—A worldwide problem. T. KOMIVES (1), P. Reisinger (2). (1) Plant Protection Institute, Hungarian Academy of Sciences, Budapest, Hungary; (2) Plant Protection Institute, University of West Hungary, Mosonmagyarovar, Hungary

- 3:30 p.m. 10-O. Biological control of invasive common ragweed, *Ambrosia artemisiifolia* L., with beneficial insect herbivores in China. F. WAN (1), Z. Zhou (1), J. Guo (1), L. Meng (2), B. Li (2), H. Chen (1). (1) Institute of Plant Protection, Chinese Academy of Agricultural Sciences, Beijing, Peoples Rep of China; (2) College of Plant Protection, Nanjing Agricultural University, Nanjing, Peoples Rep of China

- 3:45 p.m. 11-O. A new disease of parsley (*Petroselinum crispum*) in California caused by a fluorescent pseudomonad related to *Pseudomonas viridisflava*. S. J. MAUZEY (1), C. D. Davis (2), O. M. Martins (3), S. T. Koike (4), C. T. Bull (5). (1) California State University, Monterey Bay, Undergraduate Research Opportunities Center, Seaside, CA, U.S.A.; (2) Hartnell College, Salinas, CA, U.S.A.; (3) Embrapa Genetic Resources and Biotechnology, Brasilia, Brazil; (4) University of California-Davis, Salinas, CA, U.S.A.; (5) USDA ARS, Salinas, CA, U.S.A.

### Plant Disease Management Chemical & Biological Control

1:00 – 4:15 p.m.; 317B

#### Section: IPM/Biocontrol/Plant Disease Management

**Moderator:** Bangya Ma, North Carolina State University, Raleigh, NC, U.S.A.

- 1:00 p.m. 12-O. *Bacillus subtilis*, strain QST 713: Soil applications for disease control, crop yield, and quality enhancement. P. WALGENBACH (1), M. Guilhabert (1), D. Warkentin (2), D. Long (3), D. Manker (1). (1) AgraQuest, Inc., Davis, CA, U.S.A.; (2) AgraQuest, Inc., Valdosta, GA, U.S.A.; (3) AgraQuest.com, Atlanta, GA, U.S.A.
- 1:15 p.m. 13-O. Strategies of biological and symbiotic control of citrus variegated chlorosis by endophytic bacteria. P. T. LACAVA (1), C. S. Gai (2), T. A. Miller (3), J. S. Hartung (4), J. Azevedo (2). (1) Federal University of Alfenas - UNIFAL/MG, Alfenas, Brazil; (2) University of São Paulo, Piracicaba, Brazil; (3) University of California-Riverside, Riverside, CA, U.S.A.; (4) USDA-ARS, Beltsville, MD, U.S.A.
- 1:30 p.m. 14-O. Characterization of bacteriophages PT21 and UASP infecting *Ralstonia solanacearum*: A potential biocontrol agent. M. K. PRASANNA KUMAR (1), A. N. A. Khan (2), K. N. Chandrashekhar (3), S. V. Manjunath (4). (1) University of Agricultural Sciences, Mandya, India; (2) University of Agricultural Sciences, Bangalore, India; (3) Division of Biotechnology, Indian Institute of Horticulture Research (ICAR), Hessarghatta, Bangalore, India; (4) Dept. of Plant Pathology, College of Agriculture,

Oral Technical Sessions continued

# **AMERICAN PEAT TECHNOLOGY, LLC**

**BioAPT- the industry standard  
organic microbe carrier**

**BioAPT is available in granular and powdered form**

**BioAPT is composed of reed sedge peat which has been used in the  
Rhizobia inoculant industry for over 70 years**

**BioAPT absorbs moisture quickly and retains that moisture and added  
nutrients over extended periods of time, under adverse conditions**

**The equipment needed for application is produced by all major  
agricultural equipment manufacturers**

**American Peat Technology is a leader in green technology**

**For more information, or to request a free sample, contact**

**Doug Green, President**

**218.927.1888**

**dgreen@americanpeattech.com**

**[www.americanpeattech.com](http://www.americanpeattech.com)**

	University of Agricultural Sciences, GKVK, Bangalore, India	
1:45 p.m.	15-O. Managing potato scab and enhancing tuber yield with low rates of fish emulsion applied as a preplant soil amendment. P. A. ABBASI (1). (1) Agriculture & Agri-Food Canada, London, ON, Canada	
2:00 p.m.	16-O. Responses of <i>Rhizoctonia</i> spp. and <i>Sclerotium hydrophilum</i> to the plant extracts. S. AYE (1), M. Matsumoto (1). (1) Kyushu University, Fukuoka, Japan	
2:15 p.m.	17-O. A novel endophytic biocontrol agent of oomycete pathogens with the activity of plant growth promotion, resistance induction, and nitrogen fixation. F. Bibi (1), E. Chung (2), A. Khan (1), Y. CHUNG (1). (1) Gyeongsang National University, Division of Applied Life Science (BK 21), Plant Molecular Biology and Biotechnology Research Center, Jinju, Korea; (2) JGreen Inc., Dept. of Research & Development, Changnyeong, Korea	
2:30 p.m.	Break	
2:45 p.m.	18-O. Use of silver nanoparticles for control of seedborne diseases. J. Cho (1), J. Thorkelson (1), H. Jeong (1), J. Rho (2), D. Shin (2), Y. JO (1). (1) Texas A&M University, College Station, TX, U.S.A.; (2) Rural Development Administration, Suwon, Korea	
3:00 p.m.	19-O. Systemic nematicidal activity of fluensulfone against the root-knot nematode <i>Meloidogyne incognita</i> on pepper. Y. OKA (1), S. Shuker (1), N. Tkachi (1). (1) Gilat Research Center, M. P. Negev, Israel	
3:15 p.m.	20-O. Relevance of the deposit structure for the biological efficacy of glyphosate as evaluated on four weed species. S. BASI (1), M. Hunsche (2), G. Noga (2). (1) University of Bonn, Bonn, Germany; (2) University of Bonn, INRES-Horticultural Science, Bonn, Germany	
3:30 p.m.	21-O. Glyphosate activity on plant diseases and potential impact on plant health and yield in Roundup Ready cropping systems. F. KOHN (1), G. Baley (1), A. Dias (2), K. Kretzmer (1), S. Metz (1), A. Peper (3). (1) Monsanto Co., St. Louis, MO, U.S.A.; (2) Monsanto Co., Waterman, IL, U.S.A.; (3) Monsanto Co., Pergamino, Argentina	
3:45 p.m.	22-O. Suppression of bacterial panicle blight of rice by pretreatment with various chemical compounds. B. K. SHRESTHA (1), H. S. Karki (1), D. E. Groth (2), M. C. Rush (1), J. H. Ham (1). (1) Louisiana State University, Baton Rouge, LA, U.S.A.; (2) Louisiana State University AgCenter Rice Research Station, Crowley, LA, U.S.A.	
4:00 p.m.	23-O. Evaluation of ningnanmycin for management of dollar spot and anthracnose in turfgrasses. B. MA (1), L. P. Tredway (1). (1) North Carolina State University, Raleigh, NC, U.S.A.	
		induced continuously by resistant maize germplasm. J. CHEN (1). (1) Shanghai Jiaotong University, Shanghai, Peoples Rep of China
1:15 p.m.	25-O. Identifying quantitative trait loci (QTL) for resistance to Fusarium crown rot ( <i>Fusarium pseudograminearum</i> ) in two spring wheat populations. G. POOLE (1), R. Smiley (2), T. C. Paulitz (3), K. Garland-Campbell (3). (1) Washington State University, Pullman, WA, U.S.A.; (2) Oregon State University, Pendleton, OR, U.S.A.; (3) USDA-ARS, Pullman, WA, U.S.A.	
1:30 p.m.	★APS Foundation Awardee 26-O. Identification of a candidate resistance gene to <i>Phakopsora pachyrhizi</i> , the causal agent of soybean rust, in the alternative host kudzu, <i>Pueraria</i> spp. H. M. YOUNG (1), D. Liberti (2), P. Harmon (2), J. J. Marois (1), D. L. Wright (1). (1) University of Florida/NFREC, Quincy, FL, U.S.A.; (2) University of Florida, Gainesville, FL, U.S.A.	
1:45 p.m.	27-O. Linkage block and recombination suppression at the <i>Pi-ta</i> locus at the centromere region of rice chromosome 12. Y. JIA (1), M. H. Jia (1), G. Liu (2). (1) USDA-ARS Dale Bumpers National Rice Research Center, Stuttgart, AR, U.S.A.; (2) Texas A&M University System AgriLife Research and Extension Center, Beaumont, TX, U.S.A.	
2:00 p.m.	28-O. Characterization of the <i>Pi-b</i> rice blast resistance gene in the National Small Grains Collection (NSGC). M. ROYCHOWDHURY (1), Y. Jia (2), M. Jia (2), R. Fjellstrom (2), R. Cartwright (3). (1) University of Arkansas, Stuttgart, AR, U.S.A.; (2) ARS-USDA, Stuttgart, AR, U.S.A.; (3) University of Arkansas, Fayetteville, AR, U.S.A.	
2:15 p.m.	29-O. The rice blast fungus, <i>Magnaporthe oryzae</i> , copes with plant-generated reactive oxygen species through the virulence factor <i>MoHYR1</i> . K. HUANG (1), K. J. Czymmek (1), J. L. Caplan (2), J. A. Sweigard (3), N. M. Donofrio (1). (1) University of Delaware, Newark, DE, U.S.A.; (2) Delaware Biotechnology Institute, Newark, DE, U.S.A.; (3) DuPont Stine-Haskell, Newark, DE, U.S.A.	
2:30 p.m.	Break	
2:45 p.m.	30-O. Small RNAs of <i>Magnaporthe oryzae</i> , and the role of different sRNA biosynthetic genes on pathogenicity. V. RAMAN (1), S. A. Simon (1), A. Romag (1), F. Demirci (1), J. Zhai (1), B. C. Meyers (1), N. M. Donofrio (1). (1) University of Delaware, Newark, DE, U.S.A.	
3:00 p.m.	31-O. The transcription factor Amr1 induces melanin biosynthesis and conidium production but differentially suppresses virulence in <i>Alternaria brassicicola</i> . Y. CHO (1). (1) University of Hawaii-Manoa, Honolulu, HI, U.S.A.	
3:15 p.m.	32-O. Transgenic rice with inducible overproduction of ethylene exhibits broad-spectrum disease resistance. E. E. HELLIWELL (1), Q. Wang (2), Y. Yang (2). (1) Pennsylvania State University, State College, PA, U.S.A.; (2) Pennsylvania State University, University Park, PA, U.S.A.	
3:30 p.m.	★APS Foundation Awardee Pacific Division Talk 33-O. The heritability of virulence to pine in <i>Gibberella circinata</i> . S. L. SLINSKI (1), T. R. Gordon (1). (1) University of California, Davis, CA, U.S.A.	

**Plant Fungal Interactions**

1:00 – 3:45 p.m.; 323C

**Section:** Molecular/Cellular/Plant-Microbe Interactions**Moderator:** Grant Poole, Washington State University, Pullman, WA, U.S.A.1:00 p.m. 24-O. Differential proteins and genes related to *Curvularia lunata* potential virulence variation

# MONDAY, AUGUST 8, 2011

Listed in alphabetical order by title. Special Sessions listed first followed by Oral Technical Sessions. Find complete details on the meeting website at [www.apsnet.org/meetings/annual/program/Pages](http://www.apsnet.org/meetings/annual/program/Pages)

## SPECIAL SESSIONS

### Biology and Molecular Biology of Closteroviruses

8:30 – 11:30 a.m.; 323A

#### Section: Molecular/Cellular/Plant-Microbe Interactions

**Organizers/Moderators:** Naidu Rayapati, Washington State University, Prosser, WA, U.S.A.; Alex Karasev, University of Idaho, Moscow, ID, U.S.A.

**Sponsor:** Virology

**Financial Sponsor:** The Samuel Roberts Noble Foundation, Inc.

8:30 a.m. 39-S. Current status of the molecular biology of closteroviruses. W. O. DAWSON (1). (1) Citrus Research and Education Center, University of Florida, Lake Alfred, FL, U.S.A.

9:15 a.m. 40-S. Closteroviruses infecting pineapple in Hawaii. J. S. HU (1), D. M. Sether (1), M. J. Melzer (1), C. V. Subere (1), K. Dey (1), W. B. Borth (1). (1) University of Hawaii, Honolulu, HI, U.S.A.

9:45 a.m. 41-S. Closteroviruses infecting grapevine. R.A. NAIDU (1). (1) Washington State University, Prosser, WA, U.S.A.

10:00 a.m. Break

10:15 a.m. 41-S. Closteroviruses infecting grapevine. R.A. NAIDU (1). (1) Washington State University, Prosser, WA, U.S.A.

10:30 a.m. 42-S. Novel closteroviruses in small fruit crops. I.E. TZANETAKIS (1). (1) Dept. of Plant Pathology, University of Arkansas, Fayetteville, AR, U.S.A.

11:00 a.m. 43-S. Aphid transmission of Beet yellows virus in a model system. A. V. KARASEV (1), S. Blades (1), A. R. Poplawsky (1). (1) University of Idaho, Moscow, ID, U.S.A.

### International Mycotoxin Issues in a Changing World

8:30 – 11:30 a.m.; 316A

**Section: Epidemiology/Ecology/Environmental Biology of Pathogens**

**Organizers:** Anthony Glenn, USDA, ARS, Russell Research Center, Athens, GA, U.S.A.; Rubella Goswami, North Dakota State University, Fargo, ND, U.S.A.

**Moderators:** Rubella S. Goswami, North Dakota State University, Fargo, ND, U.S.A.; Henry Ngugi, Dept. of Plant Pathology, Pennsylvania State University, Biglerville, PA, U.S.A.

**Sponsors:** Mycotoxicology; Office of International Programs; Tropical Plant Pathology; Mycology; Epidemiology

**Financial Sponsor:** Romer Labs

8:30 a.m. 44-S. Potential strategies for preventing recurrent aflatoxicosis outbreaks in Kenya. H. K. NGUGI (1), C. K. Mutegi (2). (1) Department of Plant Pathology, Pennsylvania State University, Biglerville, PA, U.S.A.; (2) Kenya Agricultural Research Institute, Nairobi, Kenya

9:00 a.m. 45-S. Risk index assessment of aflatoxin contamination of peanut. K.L. BOWEN (1). (1) Dept. Ent. and Plant Pathology, Auburn University, AL, U.S.A.

9:30 a.m. 46-S. Evaluating human exposure to fumonisins in Guatemala and its possible role as a contributing

factor to neural tube defects. J. Gelineau van Waes (1), J. Maddox (1), A. Ashley-Koch (2), S. Gregory (2), O. Torres de Matute (3), K. A. Voss (4), R. T. RILEY (4). (1) Creighton University, Omaha, NE, U.S.A.; (2) Duke University Medical Center, Durham, NC, U.S.A.; (3) Centro de Investigaciones en Nutricion y Salud, Guatemala City, Guatemala; (4) USDA-ARS Toxicology and Mycotoxin Research Unit, Athens, GA, U.S.A.

10:00 a.m. Break

10:15 a.m. 47-S. Mycotoxins in Asia and other countries-2009-2010. K. Naehler (1), I. Rodrigues (1), J. L. RICHARD (2). (1) Biomin Holding GmbH, Herzogenburg, Austria; (2) Romer Labs, Inc., Union, MO, U.S.A.

10:45 a.m. 48-S. Pathogenesis by mycotoxigenic fungi: The tipping points. G. A. PAYNE (1). (1) North Carolina State University, Raleigh, NC, U.S.A.

11:15 a.m. Discussion

### Invasive Weeds as a Threat to Agriculture and Human Health

8:30 – 11:30 a.m.; 324

**Section: Weed Science**

**Organizers/Moderators:** Tamas Komives, Hungarian Academy of Science, Budapest, Hungary; Steve W. Adkins, The University of Queensland, Brisbane, Australia

**Sponsors:** APS/IAPPS and Weed Science

8:30 a.m. 49-S. *Ambrosia* spp.: Weed management and human allergy. T. KOMIVES (1), P. Reisinger (2). (1) Plant Protection Institute, Hungarian Academy of Sciences, Budapest, Hungary; (2) University of West-Hungary, Mosonmagyarovar, Hungary

9:00 a.m. 50-S. The need for weed risk assessment. R. E. LABRADA (1). (1) ex FAO UN, Rome, Italy

9:30 a.m. 51-S. Towards the sustainable management of parthenium weed (*Parthenium hysterophorus* L.) under a changing climate: An international collaborative approach. S. W. ADKINS (1), C. O'Donnell (1), N. Khan (1), T. Nguyen (1), I. Khan (2), A. Shabbir (2), K. Dhileepan (3), D. George (2), Z. Hanif (2), R. Toh (2), A. Belgeri Garcia (2), S. Navie (2), L. Strathie (4), A. McConnachie (4), L. Nigatu (5), G. Hassan (6), G. Nasim (7), W. Mersie (8). (1) The University of Queensland, St. Lucia, Qld, Australia; (2) UQ, BNE, Australia; (3) DEEDI, BNE, Australia; (4) ARC - PPRI, Hilton, Rep of South Africa; (5) Haramaya University, Haramaya, Ethiopia; (6) KPA University, Peshawar, Pakistan; (7) University of the Punjab, Lahore, Pakistan; (8) Virginia State University, Petersburg, VA, U.S.A.

10:00 a.m. Break

10:15 a.m. 52-S. Invasive weeds—A global overview. J. M. DITOMASO (1). (1) University of California- Davis, CA, U.S.A.

10:45 a.m. 53-S. Invasive weeds in the Mediterranean region. T. YAACOBY (1). (1) Plant Protection & Inspection Services, Bet Dagan, Israel

- 11:15 a.m. 54-S. Ability of native insects in Hungary to suppress the spread of common ragweed (*Ambrosia artemisiifolia* L.). Z. BASKY (1). (1) Plant Protection Institute, Hungarian Academy of Sciences, Budapest, Hungary

### IPM and Biological Control of Insect Pests, Plant Pathogens, and Invasive Weeds in the Pacific Islands: Where Are We Heading?

8:30 – 10:00 a.m., 325AB

**Section:** Emerging Pests/Invasive Species

**Organizers:** Roy Masamdu, SPC Land Resources Division, Suva, Fiji Islands; Trevor Jackson, Lincoln Research Centre, AgResearch, Lincoln, New Zealand

**Moderator:** Trevor Jackson, Lincoln Research Centre, AgResearch, Lincoln, New Zealand

- 8:30 a.m. 55-S. Experiences with biocontrol of invasive pests and weeds in the Pacific. R. Masamdu (1), W. Orapa (1), T. A. JACKSON (2). (1) SPC Land Resources Division, Suva, Fiji; (2) Lincoln Research Centre, AgResearch, Lincoln, New Zealand
- 8:45 a.m. 56-S. Containing the rhinoceros beetle outbreak on Guam. A. MOORE (1). (1) University of Guam, Mangilao, Guam
- 9:00 a.m. 57-S. Behavior and management strategies for taro beetles in Pacific Islands. R. T. MASAMDU (1), F. Atumurirava (1). (1) Secretariat of the Pacific Community, Suva, Fiji
- 9:15 a.m. 58-S. Pests of oil palm in Papua New Guinea, with emphasis on West New Britain. C. F. DEWHURST (1). (1) PNG Oil Palm Research Association, Kimbe, New Guinea
- 9:30 a.m. 59-S. Host preferences by *Bactrocera musae* (Tryon) on two banana varieties at different ripening stages. A. N. MARARUAI (1). (1) National Agricultural Research Institute, Port Moresby, New Guinea
- 9:45 a.m. 60-S. Future directions for biological control in the Pacific. T. A. JACKSON (1), R. T. Masamdu (2). (1) AgResearch, Lincoln, New Zealand; (2) SPC Land Resources Division, Suva, Fiji

### Laboratory Methods for Detecting and Characterizing Fungicide Resistance

8:30 – 11:30 a.m.; 319AB

**Section:** IPM/Biocontrol/Plant Disease Management

**Organizers:** Frank Wong, University of California-Riverside, Riverside, CA, U.S.A.; Gerald Holmes, Valent USA Corp., Cary, NC, U.S.A.; Gilberto Olaya, Syngenta Crop Protection, Vero Beach, FL, U.S.A.

**Moderators:** Gerald Holmes, Valent USA Corp., Cary, NC, U.S.A.; Frank Wong, University of California-Riverside, Riverside, CA, U.S.A.

**Sponsors:** APS Pathogen Resistance; APS Chemical Control; APS Industry; North American Fungicide Resistance Action Committee (FRAC)

- 8:30 a.m. 61-S. Fungicide resistance testing and monitoring strategies: Good science and common mistakes. W. F. WILCOX (1). (1) Cornell University, Geneva, NY, U.S.A.
- 9:00 a.m. 62-S. Sampling for detecting fungicide resistance. L. V. MADDEN (1). (1) Ohio State University, Wooster, OH, U.S.A.

- 9:30 a.m. 63-S. Laboratory methods for evaluating resistance in vitro. G. OLAYA (1). (1) Syngenta Crop Protection, Vero Beach, FL, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 64-S. Laboratory methods for evaluating resistance for obligate pathogens. F. P. WONG (1), G. Olaya (2). (1) University of California, Riverside, CA, U.S.A.; (2) Syngenta Crop Protection, Vero Beach, FL, U.S.A.
- 10:45 a.m. 65-S. Molecular methods for fungicide resistance detection. H. SIEROTZKI (1), G. Stammel (2), A. Mehl (3). (1) Syngenta, Stein, Switzerland; (2) BASF, Ludwigshafen, Germany; (3) Bayer, Mohnheim, Germany
- 11:15 a.m. Discussion

### Schroth Faces of the Future in Nematology

8:30 – 11:00 a.m.; 323C

**Section:** Diseases of Plants

**Organizers:** Gilda Rauscher, Pioneer-Dupont, Wilmington, DE, U.S.A.; Teresa Hughes, USDA-ARS, Purdue University, West Lafayette, IN, U.S.A.; Christopher Wallis, USDA-ARS, Parlier, CA, U.S.A.

**Moderator:** Teresa Hughes, USDA-ARS, Purdue University, West Lafayette, IN, U.S.A.

**Sponsor:** Early Career Professionals

- 8:30 a.m. 66-S. The Schroth Faces of the Future symposium—APS Foundation. R. D. MARTYN (1). (1) Purdue University, West Lafayette, IN, U.S.A.
- 8:45 a.m. 67-S. Introduction of the ‘2011 Recipients for Nematology’. T. HUGHES (1). (1) USDA-ARS, Purdue University, West Lafayette, IN, U.S.A.
- 9:00 a.m. 68-S. Chemical ecology and isolation of biologically active compounds from parasitic nematodes. F. KAPLAN (1), H. T. Alborn (1). (1) USDA-ARS, Gainesville, FL, U.S.A.
- 9:30 a.m. 69-S. Teaching and learning plant-parasitic nematode identification. P. AGUDELO (1). (1) Clemson University, Clemson, SC, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 70-S. Dissecting the interactions between *Meloidogyne chitwoodi* and potato – an integrated approach. A. A. ELLING (1). (1) Washington State University, Department of Plant Pathology, Pullman, WA, U.S.A.
- 10:45 a.m. Discussion

### What Else is There? New Genes, Metabolites, and Regulatory Pathways Involved in Biocontrol by Bacteria

8:30 – 11:30 a.m.; 318AB

**Section:** Molecular/Cellular/Plant-Microbe Interactions

**Organizer:** Brian McSpadden Gardener, The Ohio State University-OARDC, Wooster, OH, U.S.A.

**Moderator:** Barry Jacobsen, Montana State University Bozeman, MT, U.S.A.

**Sponsors:** APS Biological Control; APS Bacteriology

- 8:30 a.m. 71-S. Comparative genomic analysis reveals new aspects of the biology and secondary metabolism of biological control strains of *Pseudomonas* spp. J. E. LOPER (1), K. A. Hassan (2), E. W. Davis (1), C. K. Lim (2), I. T. Paulsen (2). (1) USDA-ARS, Corvallis, OR, U.S.A.; (2) Macquarie University, Sydney, Australia

*Special Sessions continued*

- 9:00 a.m. 72-S. Novel pathways revealed in *P. fluorescens* Q2-87 and Q8r1-96. L. S. THOMASHOW (1), D. V. Mavrodi (2), K. A. Hassan (3), I. T. Paulsen (4), J. E. Loper (5), J. R. Alfano (6), D. M. Weller (1). (1) USDA-Agricultural Research Service, Pullman, WA, U.S.A.; (2) Dept. of Plant Pathology, Washington State University, Pullman, WA, U.S.A.; (3) Dept. of Chemistry and Biomolecular Sciences, Macquarie University, Sydney, Australia; (4) Dept. of Chemistry and Biomolecular Sciences, Macquarie University, Sydney, Australia; (5) USDA-Agricultural Research Service, Corvallis, OR, U.S.A.; (6) Center for Plant Science Innovation, University of Nebraska, Lincoln, NE, U.S.A.
- 9:30 a.m. 73-S. What makes *Chromobacterium* tick? New metabolites from a novel biocontrol agent. H. Kim (1), I. Kim (1), B. M. Gardener (2), Y. KIM (1). (1) Chonnam National University, Gwangju, South Korea; (2) The Ohio State University-OARDC, Wooster, OH, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 74-S. Pathogenesis as a mechanism of biological control by *Lysobacter* enzymogenes. D. Y. KOBAYASHI (1), N. Patel (1), B. I. Hillman (1), J. Ravel (2). (1) Rutgers University, New Brunswick, NJ, U.S.A.; (2) University of Maryland School of Medicine, Baltimore, MD, U.S.A.
- 10:45 a.m. 75-S. Pantoea applied genomics to understand and improve biocontrol activity against fire blight. B. DUFFY (1), T. Kamber (1), F. Rezzonico (1), P. Llop (2), C. A. Ishimaru (3), P. Pusey (4), V. O. Stockwell (5), T. H. Smits (1). (1) Agroscope Changins-Wädenswil ACW, Wädenswil, Switzerland; (2) Agroscope Changins-Wädenswil ACW; IVIA-Vallencia Spain, Wädenswil, Switzerland; (3) Dept. of Plant Pathology, University of Minnesota, St. Paul, MN, U.S.A.; (4) USDA-ARS Tree Fruit Research LAB, Wenatchee, WA, U.S.A.; (5) Oregon State University, Dept. of Botany and Plant Pathology, Corvallis, OR, U.S.A.
- 11:15 a.m. Discussion

## ■ ORAL TECHNICAL SESSIONS

### Detection & Diagnosis of Plant Diseases

8:30 – 11:45 a.m.; 323B

#### Section: Diseases of Plants

- Moderator:** Mohammad Babadoost, University of Illinois, Urbana, IL, U.S.A.
- 8:30 a.m. 34-O. Potential of Furrier transform infra-red (FTIR) spectroscopy for differentiation of phytopathogens. A. POMERANTZ (1), A. Salman (2), S. Mordechai (1), M. Hulehal (1). (1) Ben-Gurion University of the Negev, Beer-Sheva, Israel; (2) SCE-Sami Shamoon College of Engineering, Beer-Sheva, Israel
- 8:45 a.m. 35-O. Blue-green and chlorophyll fluorescence-based differentiation between simultaneously occurring N deficiency and pathogen infection in winter wheat. K. Buerling (1), M. HUNSCHE (1), G. Noga (1). (1) University of Bonn, INRES-Horticultural Sciences, Bonn, Germany
- 9:00 a.m. 36-O. Grapevines infected with powdery mildew emit specific volatile organic compounds that

can be utilized for pathogen detection. A. M. SUTHERLAND (1), O. Fiehn (1), K. McCabe (2), R. Wingo (2), W. D. Gubler (1). (1) University of California-Davis, Davis, CA, U.S.A.; (2) Los Alamos National Laboratory, Los Alamos, NM, U.S.A.

- 9:15 a.m. 37-O. Detection, diversity, and molecular characterization of closteroviruses infecting Hawaiian ti (*Cordyline fruticosa* L.). M. MELZER (1), J. Sugano (1), D. Sether (1), W. Borth (1), J. Hu (1). (1) University of Hawaii, Honolulu, HI, U.S.A.
- 9:30 a.m.  38-O. *Alternanthera mosaic virus* identified in clock vine in Florida. A. VITORELI (1), C. A. Baker (2), C. L. Harmon (3). (1) University of Florida Dept. of Plant Pathology Extension Plant Disease Clinic, Gainesville, FL, U.S.A.; (2) Florida Dept. of Agriculture and Consumer Services, Division of Plant Industry, Gainesville, FL, U.S.A.; (3) University of Florida, Dept. of Plant Pathology and Southern Plant Diagnostic Network, Gainesville, FL, U.S.A.
- 9:45 a.m. 39-O. Bacterial spot (*Xanthomonas cucurbitae*): An emerging disease of pumpkin in Illinois. M. BABADOOST (1), A. Ravanlou (2). (1) University of Illinois, Urbana, IL, U.S.A.; (2) Dept. of Crop Sciences, University of Illinois, Urbana, IL, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 40-O. Development of a species-specific PCR assay to identify the cereal cyst nematode *Heterodera filipjevi*. G. YAN (1), R. W. Smiley (1), P. A. Okubara (2). (1) Oregon State University, Columbia Basin Agricultural Research Center, Pendleton, OR, U.S.A.; (2) USDA ARS, Root Disease and Biological Control Research Unit, Pullman, WA, U.S.A.
- 10:30 a.m. 41-O. Application of a real-time PCR assay for detection of eastern filbert blight in hazelnut breeding. T. J. MOLNAR (1), N. Zhang (1). (1) Rutgers University, New Brunswick, NJ, U.S.A.
- 10:45 a.m. 42-O. *Monilinia* species in China—Surprising facts. M. Hu (1), K. D. Cox (2), G. Schnabel (3), C. LUO (1). (1) Huazhong Agricultural University, Wuhan, Peoples Rep of China; (2) Cornell University, Geneva, NY, U.S.A.; (3) Clemson University, Clemson, SC, U.S.A.
- 11:00 a.m. 43-O. Species identification of the causal agent of *Eutypa* dieback of grapevine in northeastern U.S. and southeastern Canadian vineyards. P. E. ROLSHAUSEN (1), K. Baumgartner (2), R. Travadon (3), P. Fujiyoshi (3), N. Mahoney (4), R. Molyneux (5), W. Wilcox (6). (1) University of California, Riverside, CA, U.S.A.; (2) USDA-ARS, Davis, CA, U.S.A.; (3) University of California, Davis, CA, U.S.A.; (4) USDA-ARS, Albany, CA, U.S.A.; (5) University of Hawaii, Hilo, HI, U.S.A.; (6) Cornell University, Geneva, NY, U.S.A.
- 11:15 a.m. 44-O. MALDI-TOF mass spectrometry: Applications for rapid bacterial identification and phylogenetic analysis. J. F. Pothier (1), V. Pflueger (2), D. Ziegler (3), M. Tonolla (4), G. Vogel (3), B. DUFFY (1). (1) Agroscope Changins-Wädenswil ACW, Wädenswil, Switzerland; (2) Agroscope Changins-Wädenswil ACW/Mabritec AG, Riehen, Switzerland; (3) Mabritec AG, Riehen, Switzerland; (4) Istituto Cantonale di Microbiologia, Microbiology Unit, BIVEG, Bellinzona, Switzerland

- 11:30 a.m. 45-O. Development of a qPCR assay for quantification of *Verticillium dahliae* in spinach seed. D. DURESSA (1), G. Rauscher (2), B. Mou (1), R. Hayes (1), S. T. Koike (3), K. Maruthachalam (3), K. V. Subbarao (4), S. J. Klosterman (1). (1) USDA-ARS, Salinas, CA, U.S.A.; (2) Pioneer-Dupont, Wilmington, NC, U.S.A.; (3) University of California-Davis, Salinas, CA, U.S.A.; (4) University of California, Davis, CA, U.S.A.

### Epidemiology—Biology of Pathogens

8:30 – 11:30 a.m.; 317A

**Section:** Epidemiology/Ecology/Environmental Biology of Pathogens

**Moderators:** Peter Ojiambo, North Carolina State University, Raleigh, NC, U.S.A.; Jay Pscheidt, Oregon State University, Corvallis, OR, U.S.A.

- 8:30 a.m. 46-O. Pycnidial development and pycnidiospore germination of Botryosphaeriaceae species as influenced by temperature. L. COSTADONE (1), A. Sutherland (1), W. D. Gubler (1). (1) University of California, Davis, CA, U.S.A.

- 8:45 a.m. ★APS Foundation Awardee 47-O. Identification of a novel fruiting structure produced by *Aspergillus niger* and *A. carbonarius* in grape berries affected by sour rot. C. PISANI (1), W. D. Dubler (1). (1) University of California-Davis, Davis, CA, U.S.A.

- 9:00 a.m. 48-O. Modelling of *Guignardia pseudothecium* maturation and ascospore dispersal in citrus orchards. P. H. FOURIE (1), G. C. Schutte (2), S. Serfontein (3), S. H. Swart (3). (1) Citrus Research International, Stellenbosch, Rep of South Africa; (2) Citrus Research International, Nelspruit, Rep of South Africa; (3) QMS Agriscience, Tzaneen, Rep of South Africa

- 9:15 a.m. 49-O. Temporal and spatial spread of cucurbit downy mildew in the eastern United States. P. OJIAMBO (1), G. Holmes (2). (1) North Carolina State University, Raleigh, NC, U.S.A.; (2) Valent U.S.A. Corporation, Cary, NC, U.S.A.

- 9:30 a.m. 50-O. Epidemiological studies on *Blackberry chlorotic ringspot virus*. B. POUDEL (1), A. G. Laney (1), I. E. Tzanetakis (1). (1) University of Arkansas, Fayetteville, AR, U.S.A.

- 9:45 a.m. 51-O. Differential effects of host plants on accumulation, competition, and transmission of curtoviruses from single and mixed infections. W. M. WINTERMANTEL (1). (1) USDA ARS, Salinas, CA, U.S.A.

10:00 a.m. Break

- 10:15 a.m. 52-O. Molecular typing of *Potato virus Y* isolates from Brazil reveals a history of introduction of necrotic strains. S. B. Galvino-Costa (1), A. D. FIGUEIRA (1), P. S. Geraldino (1), O. V. Nikolaeva (2), A. Karasev (2). (1) Universidade Federal de Lavras, Lavras - MG, Brazil; (2) University of Idaho, Moscow, ID, U.S.A.

- 10:30 a.m. ★APS Foundation Awardee Pacific Division Talk 53-O. The cryptic dimension of host-pathogen interactions: Physiological impacts of *Fusarium circinatum* infection on symptomless *Pinus radiata*. C. L. SWETT (1), T. R. Gordon (1). (1) University of California, Davis, CA, U.S.A.

- 10:45 a.m. 54-O. Disease progress of thousand cankers disease in Oregon. J. PSCHEIDT (1). (1) Oregon State University, Corvallis, OR, U.S.A.
- 11:00 a.m. 55-O. Nature of *Ceratocystis smalleyi*–*Scolytus quadrispinosus* interactions on stems of bitternut hickory with declining crowns. J. JUZWIK (1), M. Banik (2). (1) USDA Forest Service, St. Paul, MN, U.S.A.; (2) USDA Forest Service, Madison, WI, U.S.A.
- 11:15 a.m. Pacific Division Talk 56-O. Ascospore viability and dispersal from pruned branches infected with *Anisogramma anomala*. S. HECKERT (1), J. W. Pscheidt (1), J. K. Stone (1), S. A. Cluskey (1). (1) Oregon State University, Corvallis, OR, U.S.A.

### Fungicide Resistance & Efficacy

8:30 – 11:45 a.m.; 317B

**Section:** IPM/Biocontrol/Plant Disease Management

**Moderators:** Henry Ngugi, Dept. of Plant Pathology, Pennsylvania State University, Biglerville, PA, U.S.A.; Rubella S. Goswami, North Dakota State University, Fargo, ND, U.S.A.

- 8:30 a.m. ★APS Foundation Awardee 57-O. Seasonal distribution of SI fungicide resistance in apple scab populations in Virginia. S. C. MARINE (1), D. G. Schmale (2), K. S. Yoder (1). (1) Virginia Tech, Winchester, VA, U.S.A.; (2) Virginia Tech, Blacksburg, VA, U.S.A.

- 8:45 a.m. 58-O. Multiple resistance phenotypes of *Botrytis cinerea* in apple orchards and effects on control of gray mold in stored apples with postharvest fungicides. Y. KIM (1), C. Xiao (1). (1) Washington State University, TFREC, Wenatchee, WA, U.S.A.

- 9:00 a.m. 59-O. Fungicide sensitivity of *Podosphaera xanthii* and efficacy of fungicides with resistance risk for cucurbit powdery mildew in New York in 2010. M. T. MCGRATH (1), L. K. Hunsberger (1). (1) Cornell University, Riverhead, NY, U.S.A.

- 9:15 a.m. 60-O. Practical resistance to fenhexamid *Botrytis cinerea* isolates from grapevines in New York. S. SAITO (1), L. Cadle-Davidson (2), W. F. Wilcox (1). (1) Cornell University NYSAES, Geneva, NY, U.S.A.; (2) ARS USDA, Geneva, NY, U.S.A.

- 9:30 a.m. 61-O. Development of a PCR-based assay for detection of resistance to QoI fungicides in *Asochyta rabiei*. R. S. GOSWAMI (1), J. A. Delgado (1), T. C. Lynnes (1), S. W. Meinhardt (1), S. G. Markell (1). (1) North Dakota State University, Fargo, ND, U.S.A.

- 9:45 a.m. 62-O. IR-4 project fungicide registration on specialty crops update. D. C. THOMPSON (1). (1) Rutgers University, Princeton, NJ, U.S.A.

10:00 a.m. Break

- 10:15 a.m. 63-O. Evidence for multiple fungicide resistance in field populations of *Venturia inaequalis*. H. K. NGUGI (1), K. D. Cox (2), S. M. Villani (2), W. Köller (2). (1) Dept. of Plant Pathology, Pennsylvania State University, Biglerville, PA, U.S.A.; (2) Dept. of Plant Pathology and Plant-Microbe Biology, Cornell University, Geneva, NY, U.S.A.

- 10:30 a.m. 64-O. Fungicidal efficacy of oxysilver nitrate and sodium diperiodatoargentate (III) for control of seedborne and foliar diseases. M. W. HARDING (1), R. J. Howard (2), M. E. Olson (3). (1) Innovotech

Oral Technical Sessions continued

- Inc., Brooks, AB, Canada; (2) Alberta Agriculture and Rural Development, Brooks, AB, Canada; (3) Innovotech Inc., Edmonton, AB, Canada
- 10:45 a.m. 65-O. Field efficacy of novel fungicides for the control of *Sclerotium cepivorum* in California. A. E. FERRY (1), M. Davis (1). (1) University of California-Davis, Davis, CA, U.S.A.
- 11:00 a.m. 66-O. Effect of presowing soil-incorporated treatments on *Alternaria radicina* in carrot, *Daucus carota*. R.S. Trivedi (1), J. M. TOWNSHEND (2), J. G. Hampton (1), M. V. Jaspers (1), H. J. Ridgway (1).
- (1) Lincoln University, Lincoln, New Zealand; (2) Midlands Seed Ltd., Ashburton, New Zealand
- 11:15 a.m. 67-O. Economic analysis of small plot and on-farm fungicide trials on soybean in Iowa. N. R. BESTOR (1), D. S. Mueller (1), A. E. Robertson (1). (1) Iowa State University, Ames, IA, U.S.A.
- 11:30 a.m. 68-O. Uptake and translocation of penthiopyrad fungicide in wheat leaves and correlation to fungicidal control of key foliar diseases. J. R. PILS (1), S. G. Smith (1), C. P. Shepherd (1), R. M. Geddens (1). (1) DuPont-Crop Protection, Newark, DE, U.S.A.

## TUESDAY, AUGUST 9, 2011

*Listed in alphabetical order by title. Special Sessions listed first followed by Oral Technical Sessions. Find complete details on the meeting website at [www.apsnet.org/meetings/annual/program/Pages](http://www.apsnet.org/meetings/annual/program/Pages)*

### ■ SPECIAL SESSIONS

#### 11th I. E. Melhus Graduate Student Symposium: “Today’s Students Making a Difference in Plant Disease Epidemiology and Disease Management”

8:30 – 11:30 a.m.; 323C

**Section:** Epidemiology/Ecology/Environmental Biology of Pathogens

**Organizer:** Forrest Nutter, Jr., Iowa State University, Ames, IA, U.S.A.

**Moderators:** Forrest Nutter, Jr., Iowa State University, Ames, IA, U.S.A.; Ray Martyn, Purdue University, West Lafayette, IN, U.S.A.; Peter Ojiambo, North Carolina State University, Raleigh, NC, U.S.A.

**Sponsors:** Epidemiology; APS Foundation

**Financial Sponsors:** DuPont Crop Protection; BASF Corp.; Agdia, Inc.; Pioneer Hi-Bred a DuPont Business

8:30 a.m. 76-S. Opening remarks and introduction. F. W. NUTTER, Jr. (1). (1) Iowa State University, Ames, IA, U.S.A.

8:45 a.m. 77-S. The APS Foundation and the I.E. Melhus Graduate Student Symposium: A successful partnership. R. D. MARTYN (1), (1) Purdue University, West Lafayette, IN, U.S.A.

9:00 a.m. 78-S. Climate, weather, and the heterogeneity of Fusarium head blight. A. B. KRISS (1), L. V. Madden (1), P. A. Paul (1), X. Xu (2). (1) The Ohio State University, OARDC, Wooster, OH, U.S.A.; (2) East Malling Research, West Malling, United Kingdom

9:30 a.m. 79-S. Spatial distribution of brown rot symptoms and fine-scale genetic structure of populations of *Monilinia* spp. within and among stone fruit tree canopies. S. E. EVERHART (1), A. Askew (1), L. Seymour (1), I. J. Holb (2), H. Scherm (1). (1) University of Georgia, Athens, GA, U.S.A.; (2) Center for Agricultural Sciences, University of Debrecen, and Plant Protection Institute, Hungarian Academy of Sciences, Debrecen and Budapest, Hungary

10:00 a.m. Break

10:15 a.m. 80-S. Effects of temperature and wetness duration on the sporulation rate of *Phomopsis viticola* on infected grape canes. D. J. ANCO (1), L. V. Madden (1), M. A. Ellis (1). (1) The Ohio State University, OARDC, Wooster, OH, U.S.A.

10:45 a.m. 81-S. Epidemiological analysis of the U.S. and Canadian Plum pox virus eradication programs. A. GOUGHERTY (1), F. W. Nutter (1). (1) Iowa State University, Ames, IA, U.S.A.

11:15 a.m. Closing comments, award certificates.

#### Ag and Food Biosecurity: A Decade of Progress and Reality

8:30 – 11:30 a.m.; 316A

**Section:** Emerging Pests/Invasive Species

**Organizers/Moderators:** Jacqueline Fletcher, Oklahoma State University, Stillwater, OK, U.S.A.; Maria Lodovica Gullino, AGROINNOVA, University of Torino, Torino, Italy

**Sponsors:** IAPPS; APS Emerging Diseases and Pathogens; APS Advisory Committee on Plant Biosecurity

8:30 a.m. 82-S. Crop biosecurity: An international perspective. M. GULLINO (1). (1) Agroinnova-University of Torino, Grugliasco (TO), Italy

9:00 a.m. 83-S. Global insect threats and issues for agricultural biosecurity. J. E. FOSTER (1), O. Youm (1), S. R. Skoda (2). (1) Dept. of Entomology, University of Nebraska-Lincoln, Lincoln, NE, U.S.A.; (2) USDA-ARS-KBUSLIRL, Screwworm Research Unit, Kerrville, TX, U.S.A.

9:30 a.m. 84-S. Food defense: Farm to fork. K. WARRINGER (1). (1) University of Guelph, Guelph, ON, Canada

10:00 a.m. Break

10:15 a.m. 85-S. Microbial forensics: Investigative plant pathology. F. OCHOA-CORONA (1). (1) National Institute for Microbial Forensics & Food and Agricultural Biosecurity, Dept. of Entomology and Plant Pathology, Oklahoma State University, Stillwater, OK, U.S.A.

10:45 a.m. 86-S. The dual use dilemma. J. E. LEACH (1). (1) Colorado State University, Fort Collins, CO, U.S.A.

11:15 a.m. Discussion

## Challenges to the Production and Distribution of Quality Planting Materials, Seed, and Seed Systems for Farmers in Developing Countries

8:30 – 11:30 a.m.; 318AB

**Section:** Professionalism/Outreach/Industry/Genetic Engineering  
**Organizers:** Alethia Brown, DuPont Crop Protection, Newark, DE, U.S.A.; Reginald Young, DuPont Crop Protection, Wilmington, DE, U.S.A.

**Moderator:** Reginald Young, DuPont Crop Protection, Wilmington, DE, U.S.A.

**Sponsor:** IAPPS

- 8:30 a.m. 87-S. Overview of industry's role in the development of quality seeds. W. E. DOLEZAL (1). (1) Pioneer Hi-Bred Intl., Inc., Johnston, IA, U.S.A.  
 9:00 a.m. 88-S. Addressing cereal crops' seed supply challenges in sub Saharan Africa. Y. KEBEDE (1). (1) Bill and Melinda Gates Foundation, Seattle, WA, U.S.A.  
 9:30 a.m. 89-S. Overcoming poor seed systems for clonal crops in developing countries. D. L. COYNE (1), E. Schulte-Geldermann (2). (1) IITA/SP-IPM, Dar es Salaam, Tanzania; (2) CIP/SP-IPM, Nairobi, Kenya  
 10:00 a.m. Break  
 10:15 a.m. 90-S. Development of seed technologies and benefits for Africa. M. TUINSTRA (1), S. Soumana (2), H. Traore (3), M. Kayentao (4), D. Aba (5), O. Ibikunle (6), J. Beitler (7), R. Young (7). (1) Purdue University, West Lafayette, IN, U.S.A.; (2) INRAN, Niamey, Niger; (3) INERA, Ouagadougou, Burkina Faso; (4) IER, Bamako, Mali; (5) Ahmadu Bello University, Zaria, Nigeria; (6) DuPont, Zaria, Nigeria; (7) DuPont Crop Protection, Wilmington, DE, U.S.A.  
 10:45 a.m. 91-S. Seed and seed systems in developing countries and their significance in attaining food security. G. EJETA (1). (1) Purdue University, West Lafayette, IN, U.S.A.  
 11:15 a.m. Discussion

## Fungal Comparative Genomics and the Impact of Next Generation Sequencing

8:30 – 11:30 a.m.; 323A

**Section:** Biology of Plant Pathogens

**Organizers:** Corby Kistler, University of Minnesota/USDA-ARS, St. Paul, MN, U.S.A.; Steve Klosterman, USDA ARS, Salinas, CA, U.S.A.

**Moderator:** Steve Klosterman, USDA ARS, Salinas, CA, U.S.A.

**Sponsors:** Genetics; Molecular and Cellular Phytopathology; Biotechnology

- 8:30 a.m. 92-S. *Mycosphaerella* comparative genomics reveals chromosome dynamics, genome evolution, and stealth pathogenesis. S. B. GOODWIN (1), B. Dhillon (2), S. Ben M'Barek (3), I. V. Grigoriev (4), G. H. Kema (3). (1) USDA-ARS/Purdue University, West Lafayette, IN, U.S.A.; (2) University of British Columbia, Vancouver, BC, Canada; (3) Wageningen University and Research Centre, Plant Research International, Wageningen, Netherlands; (4) Eukaryotic Genomics Group, DOE Joint Genome Institute, Walnut Creek, CA, U.S.A.

9:00 a.m. 93-S. *Verticillium* comparative genomics yields insights into niche adaptation by plant vascular wilt pathogens. S. J. KLOSTERMAN (1), K. V. Subbarao (2), S. Kang (3), P. Veronese (4), S. E. Gold (5), B. P. Thomma (6), Z. Chen (7), B. Henrissat (8), Y. Lee (9), J. Park (9), M. D. Garcia-Pedrajas (10), D. J. Barbara (11), A. Ancheta (1), R. de Jonge (6), P. Santhanam (6), K. Maruthachalam (2), Z. Atallah (12), S. G. Amyotte (13), Z. Paz (5), P. Inderbitzin (2), R. J. Hayes (1), D. I. Heiman (7), S. Young (7), Q. Zeng (7), R. Engels (7), J. Galagan (7), C. Cuomo (7), K. F. Dobinson (14), L. Ma (7). (1) USDA ARS, Salinas, CA, U.S.A.; (2) University of California, Davis, CA, U.S.A.; (3) Pennsylvania State University, University Park, PA, U.S.A.; (4) North Carolina State University, Raleigh, NC, U.S.A.; (5) University of Georgia, Athens, GA, U.S.A.; (6) Wageningen University, Wageningen, Netherlands; (7) Broad Institute, Cambridge, MA, U.S.A.; (8) CNRS, Universites Aix-Marseille, Marseille, France; (9) Seoul National University, Seoul, Korea; (10) Estacion Experimental La Mayora, CSIC, Malaga, Spain; (11) University of Warwick, Warwick, United Kingdom; (12) University of California, Salinas, CA, U.S.A.; (13) University of Western Ontario, London, ON, Canada; (14) Agriculture and Agri-Food Canada, London, ON, Canada

9:30 a.m. 94-S. Genome dynamics of the *Fusarium oxysporum* species complex. L. MA (1), S. Zhou (2), C. Kistler (3). (1) University of Massachusetts Amherst, Plant Soil & Insect Sciences, Amherst, MA, U.S.A.; (2) University of Wisconsin, Madison, WI, U.S.A.; (3) University of Minnesota, St Paul, MN, U.S.A.

10:00 a.m. Break

10:15 a.m. 95-S. New insights into the obligate biotrophic lifestyle of rust fungi through comparative genomics. C. Cuomo (1), L. J. SZABO (2), M. Grabherr (1), E. Mauceli (1), S. Young (1), Q. Zeng (1), S. Sakthikumar (1), A. Bharti (3), A. D. Farmer (3), J. A. Crow (3), T. Ramaraj (3), G. Bakkeren (4), J. Fellers (5), F. Katagiri (6), J. Glazebrook (6), Y. Tsuda (6), T. J. Stoddard (6), K. Tsuda (6), X. Chen (7), C. Yin (8), S. Hulbert (8). (1) Broad Institute, Cambridge, MA, U.S.A.; (2) USDA ARS, St Paul, MN, U.S.A.; (3) National Center for Genomic Research, Santa Fe, NM, U.S.A.; (4) Agriculture and Agri-Food Canada, Summerland, BC, Canada; (5) USDA ARS, Manhattan, KS, U.S.A.; (6) University of Minnesota, St Paul, MN, U.S.A.; (7) USDA ARS, Pullman, WA, U.S.A.; (8) Washington State University, Pullman, WA, U.S.A.

10:45 a.m. 96-S. Discovery of new soybean and soybean rust genes using next generation sequencing. A. TREMBLAY (1), P. Hosseini (1), S. Li (2), N. W. Alkharouf (3), B. F. Matthews (1). (1) USDA-ARS-PSI-SGIL, Beltsville, MD, U.S.A.; (2) USDA-ARS-CGRU, Stoneville, MS, U.S.A.; (3) Towson University, Towson, MD, U.S.A.

11:15 a.m. Discussion

Special Sessions continued

## Innovative Chemical and Biological Approaches to Plant Protection

8:30 – 11:45 a.m.; 324

**Section:** Professionalism/Outreach /Industry/Genetic Engineering  
**Organizer/Moderator:** Noriharu Ken Umetsu, IAPPS/EARC/  
 Otsuka Chemical Co./Tokyo University of Agriculture, Osaka,  
 Japan

**Sponsor:** IAPPS

- 8:30 a.m. 97-S. Chemical and gene technological approaches for plant defense activators to control plant diseases. N. K. UMETSU (1). (1) Otsuka Chemical Co. (Tokyo University of Agriculture), Naruto, Japan
- 8:45 a.m. 98-S. Strigolactones as chemical signals for plant-plant and plant-microbe interactions in the rhizosphere. K. YONEYAMA (1), X. Xie (1), K. Yoneyama (1). (1) Utsunomiya University, Utsunomiya, Japan
- 9:15 a.m. 99-S. Novel technology for termite control based on the dummy-egg carrying behavior. K. MATSUURA (1). (1) Graduate School of Environmental Science, Okayama University, Okayama, Japan
- 9:45 a.m. 100-S. Microorganisms and plant activators as alternatives to chemical fumigants to control soilborne diseases in Japan. T. ARIE (1). (1) Tokyo University of Agriculture and Technology, Fuchu Tokyo, Japan
- 10:00 a.m. Break
- 10:15 a.m. 101-S. Recent development on research and application of novel green pesticides in China:Neonicotinoid insecticides and plant activators as examples. X. QIAN (1). (1) East China University of Science and Technology, Shanghai, PRC Peoples Rep of China
- 10:45 a.m. 102-S. Recent developments in neonicotinoid insecticides for plant protection. I. YAMAMOTO (1), I. Yamamoto (1). (1) Tokyo University of Agriculture, Tokyo, Japan
- 11:15 a.m. 103-S. Enhancement of plant growth and plant growth and plant defence activation by *Bacillus valismortis* EXTN-1 on various crops. K. PARK (1). (1) National Academy of Agricultural Science, Suwon, South Korea

## New Products and Services

8:30 – 11:30 a.m.; 323B

**Section:** IPM-Biocontrol-Plant Disease Management

**Organizer/Moderator:** George Musson, Bayer CropScience, Research Triangle Park, NC, U.S.A.

**Sponsor:** Industry

- 8:30 a.m. 104-S. A novel single-tube nested-PCR kit for sensitive and reliable detection of Citrus Huanglongbing. J. Q. XIA (1). (1) AC Diagnostics, Inc., Fayetteville, AR, U.S.A.
- 8:40 a.m. 105-S. New Family of Cucurbit ELISA Test Kits. K. MCGUIRE (1). (1) EnviroLogix Inc., Portland, ME, U.S.A.
- 8:50 a.m. 106-S. AmplifyRP™ isothermal nucleic acid detection system for plant pathogens. R. C. BOHANNON (1). (1) Agdia, Inc., Elkhart, IN, U.S.A.
- 9:00 a.m. 107-S. AgriStrip-magnetic for PLRV detection. W. BITTERLIN (1). (1) Bioreba AG, Reinach BL1, Switzerland
- 9:10 a.m. 108-S. New uses for Dithane (mancozeb), Quintec (quinoxyfen), and Indar (fenbuconazole). C GALLUP (1). (1) Dow AgroSciences, Indianapolis, IN, U.S.A.

- 9:20 a.m. 109-S. Stratego YLD: A newly launched fungicide in corn and soybeans. J. E. FAJARDO (1). (1) Bayer CropScience, RTP, NC, U.S.A.
- 9:30 a.m. 110-S. MCW-2 (fluensulfone); A new non-systemic nematicide from Makhteshim Agan Industries. C. SCHILLER (1). (1) Makhteshim Agan of North America Inc., Raleigh, NC, U.S.A.
- 9:40 a.m. 111-S. Fontelis™ 1.67 SC ,Vertisan™ 1.67 EC, and Aproach™ 2.08 SC, three new broad-spectrum fungicides from DuPont Crop Protection. M. J. MARTIN (1). (1) DuPont Crop Protection, Columbus, OH, U.S.A.
- 9:50 a.m. 112-S. Sedaxane – a new fungicide AI developed exclusively for seed treatment. M. OOSTENDORP (1). (1) Syngenta Crop Protection, Basel, Switzerland
- 10:00 a.m. Break
- 10:15 a.m. 113-S. Rizolex™ Flowable Fungicide: A New Seed Protectant Product. K. ARTHUR (1). (1) Valent U.S.A. Corporation, Plano, TX, U.S.A.
- 10:25 a.m. 114-S. Update on fungicides from BASF. H. YPEMA (1). (1) BASF Corporation, Raleigh, NC, U.S.A.
- 10:35 a.m. 115-S. ARM Version 9 Software Upgrade. M. KAPPENMAN (1). (1) Gylling Data Management, Inc., Brookings, SD, U.S.A.
- 10:45 a.m. 116-S. 1000 Series Micro Station. C. TURSKI (1). (1) Spectrum Technologies, Inc., Plainfield, IL, U.S.A.
- 10:55 a.m. 117-S. Systec Automated Plate Pourer. B. RICHMAN (1). (1) Microbiology International, Frederick, MD, U.S.A.
- 11:05 a.m. 118-S. The LemmaTec Scanalyzer HTS growth chamber integrated automatic high throughput 3D plant imaging system. J. VANDENHIRTZ (1). (1) LemmaTec, Wuerselen, Germany
- 11:15 a.m. Discussion

## Using Translational Biotechnology to Deploy Disease Resistance Traits in Crop Plants

8:30 – 11:30 a.m.; 319AB

**Section:** Professionalism/Outreach /Industry/Genetic Engineering

**Organizers:** Dennis Halterman, USDA/ARS, Madison, WI, U.S.A.; Yinong Yang, Penn State University, College Park, PA, U.S.A.; Scott Soby, Midwestern University, Glendale, AZ, U.S.A.; Peter Raymond, Ag Sci Consulting, Cottageville, SC, U.S.A.; Dennis Gonsalves, USDA/ARS, Hilo, HI, U.S.A.; Kelly Chambliss, USDA/ARS, Stillwater, OK, U.S.A.

**Moderator:** Dennis Gonsalves, USDA/ARS, Hilo, HI, U.S.A.

**Sponsors:** Biotechnology; Molecular and Cellular Phytopathology; Host Resistance

**Financial Sponsors:** British Society for Plant Pathology, Ag Sci Consulting, Monsanto Vegetable Seeds Division; Two Blades Foundation, Hawaii Crop Improvement Association

- 8:30 a.m. 119-S. An ethical look at integrating new traits using biotechnology—A nonscientist perspective. D. MAGNUS (1). (1) Stanford University, Stanford, CA, U.S.A.
- 9:00 a.m. 120-S. Risk assessment studies: insights into the safety of disease-resistant transgenic horticultural crops. M. F. FUCHS (1). (1) Cornell University, Geneva, NY, U.S.A.
- 9:30 a.m. 121-S. Transgenic squash: The inside story. H. QUEMADA (1). (1) Donald Danforth Plant Science Center, St. Louis, MO, U.S.A.

- 10:00 a.m. Break  
 10:15 a.m. 122-S. A resistance gene from pepper confers effective field resistance to Bacterial Leaf Spot in tomatoes. D. HORVATH (1). (1) Two Blades Foundation, Evanston, IL, U.S.A.  
 10:45 a.m. 123-S. History of the successful introduction of transgenic virus-resistant papaya in Hawaii. D. GONSALVES (1). (1) USDA, Hilo, HI, U.S.A.  
 11:15 a.m. Discussion

## ■ ORAL TECHNICAL SESSIONS

### IPM

8:30 – 11:30 a.m.; 317A

#### Section: IPM/Biocontrol/Plant Disease Management

- Moderators:** Joe Nunez, University of California Cooperative Extension, Bakersfield, CA, U.S.A.; Guido Schnabel, Clemson University, Clemson, SC, U.S.A.
- 8:30 a.m. 69-O. Evaluation of ten leguminous cover crops as cryptic hosts for *Verticillium dahliae*. M. G. LLOYD (1), T. Gordon (1). (1) University of California, Davis, CA, U.S.A.
- 8:45 a.m. 70-O. Increases in snap bean and soybean seedling diseases associated with a chloride salt and changes in the micro-partitioning of taproot calcium. C. H. CANADAY (1), P. Donald (2), A. Mengistu (2). (1) University of Tennessee, Jackson, TN, U.S.A.; (2) Crop Genetics Research Unit, USDA-ARS, Jackson, TN, U.S.A.
- 9:00 a.m. 71-O. Use of plastic and spray mulches to manage insects vectoring plant viruses. J. NUNEZ (1). (1) University of California Cooperative Extension, Bakersfield, CA, U.S.A.
- 9:15 a.m. 72-O. High planting combined with root collar excavation extends life of peach trees on Armillaria root rot-infested replant sites. G. SCHNABEL (1). (1) Clemson University, Clemson, SC, U.S.A.
- 9:30 a.m. 73-O. Mating disruption for *Planococcus ficus* S.: How to successfully initiate a novel sustainable control tool. J. L. MIANO (1), V. C. Becerra (2), M. F. Gonzalez (2). (1) INTA, Luján de Cuyo - Mendoza, Argentina; (2) INTA, Luján de Cuyo, Argentina
- 9:45 a.m. 74-O. PGPR-mediated IPM for tropical vegetables in south India. R. SAMIYAPPAN (1), E. Jonathan (1), S. Mohankumar (1), T. Raguchander (1), G. Karthikeyan (1). (1) TNAU, Coimbatore, India
- 10:00 a.m. Break
- 10:15 a.m. 75-O. Comparing the efficiency of visual scouting, spore trapping systems, and a bioindicator for early detection of *Erysiphe necator* in California vineyards. F. PEDUTO (1), A. M. Sutherland (1), E. K. Hand (1), J. C. Broome (1), P. D. Parikh (1), L. J. Bettiga (2), R. J. Smith (3), W. F. Mahaffee (4), W. D. Gubler (1). (1) University of California, Davis, CA, U.S.A.; (2) UC Cooperative Extension Monterey County, Salinas, CA, U.S.A.; (3) UC Cooperative Extension Sonoma County, Santa Rosa, CA, U.S.A.; (4) USDA-ARS HCRL, Corvallis, OR, U.S.A.
- 10:30 a.m. 76-O. Eradicating grapevine disease with minimal economic impact. M. R. SOSNOWSKI (1), W. F. Wilcox (2), R. W. Emmett (3), T. J. Wicks (1). (1) South Australian Research and Development Institute (SARDI), Adelaide, Australia; (2) Cornell

University, Geneva, NY, U.S.A.; (3) Dept. of Primary Industries, Victoria, Mildura, Australia

- 10:45 a.m. 77-O. Alternative control of citrus black fly, *Aleurocanthus woglumi* Ashby, 1915, in the northeast of Brazil. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil
- 11:00 a.m. 78-O. Comparison of pecan scab predictions in Oklahoma using weather inputs from the National Weather Service, the Oklahoma Mesonet, and onsite-monitoring. A. PAYNE (1), D. L. Smith (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.
- 11:15 a.m. 79-O. Is there any other elixir of life on this planet? V. KURUCHEVE (1). (1) Annamalai University, Chidambaram, India

### Microbial Ecology & Biological Control

8:30 – 11:30 a.m.; 325AB

#### Section: IPM/Biocontrol/Plant Disease Management

- Moderators:** Sebastian Kiewnick, Agroscope Changins, Waedenswil, Switzerland; Dilantha Fernando, University of Manitoba, Winnipeg, MB, Canada

- 8:30 a.m. 80-O. Characterizing microbial communities of potato common scab-suppressive soil using pyrosequencing. N. ROSENZWEIG (1), J. Hao (1). (1) Michigan State University, East Lansing, MI, U.S.A.
- 8:45 a.m. 81-O. Effect of huanglongbing on the structure and functional diversity of microbial communities associated with citrus rhizosphere. P. TRIVEDI (1), Z. He (2), J. D. Van Nostrand (2), J. Zhou (2), G. Albrigo (3), N. Wang (1). (1) Citrus Research and Education Center, Dept. of Microbiology and Cell Science, University of Florida, Lake Alfred, FL, U.S.A.; (2) Dept. of Botany and Microbiology, Institute for Environmental Genomics, University of Oklahoma, Norman, OK, U.S.A.; (3) Citrus Research and Education Center, University of Florida, Lake Alfred, FL, U.S.A.
- 9:00 a.m. 82-O. Marker-assisted selection improves the efficiency of bioprospecting and results in the recovery of novel biocontrol bacteria. J. Park (1), S. Lee (1), J. Lee (1), S. Han (1), J. Kim (1), Y. Kim (3), B. MCSPADDEN GARDENER (3). (1) Chonnam National University, Gwangju, South Korea; (2) Korea Research Institute of Chemical Technology, Daejeon, South Korea; (3) Ohio State University, Wooster, OH, U.S.A.
- 9:15 a.m. 83-O. Isolation of double-stranded RNA mycoviruses in *Macrophomina phaseolina* isolates in Iran. S. SOUZANI (1), B. Mahmoudi (2), M. Hashemi (3), H. Zamanizadeh (1). (1) Dept. of Plant Pathology, Science and Research Branch, Islamic Azad University, Tehran, Iran; (2) Sugar Beet Seed Institute, Karaj, Iran; (3) Seed and Plant Improvement Institute, Karaj, Iran
- 9:30 a.m. 84-O. 454-Pyrosequencing reveals the influence of organic and conventional farming systems on beneficial bacterial communities to enhance plant health. R. Li (1), D. G. FERNANDO (1), T. de Kievit (1), M. Entz (1), E. Khafipour (1), D. Krause (1). (1) University of Manitoba, Winnipeg, MB, Canada

Oral Technical Sessions continued

- 9:45 a.m. 85-O. Community structure of *Aspergillus flavus* and persistence of the atoxigenic strain *A. flavus* AF36 in applied fields. R. JAIME (1), P. J. Cotty (2). (1) University of Arizona, Tucson, AZ, U.S.A.; (2) USDA-ARS, University of Arizona, Tucson, AZ, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 86-O. Forest products protection: From chemical to biological roadways. D. YANG (1). (1) FPInnovations, Quebec City, QC, Canada
- 10:30 a.m. 87-O. Characterization of *Pythium nunn* newly recorded in Japan on antagonistic activity against *P. ultimum* and *P. aphanidermatum*. M. TOJO (1), S. Kobayashi (1), N. Tsujita (1), S. Uzuhashi (2). (1) Osaka Prefecture University, Sakai, Japan; (2) Agriculture & Agri-Food Canada, Saskatoon, SK, Canada
- 10:45 a.m. 88-O. Biocontrol potential and plant growth promotional activity of actinomycetes isolated from various herbal vermicomposts. S. GOPALAKRISHNAN (1), P. Humayun (1), K. Deepthi (1). (1) ICRISAT, Hyderabad, India
- 11:00 a.m. 89-O. Reduction of aflatoxins, cyclopiazonic acid, and fumonisins in corn by biocontrol strains of non-aflatoxigenic *Aspergillus flavus*. H. ABBAS (1), B. Horn (2), M. Weaver (3), X. Jin (3), C. Abel (4), W. T. Shier (5). (1) USDA ARS CG&PRU, Stoneville, MS, U.S.A.; (2) National Peanut Research Laboratory, USDA, ARS, Dawson, GA, U.S.A.; (3) USDA ARS, Biological Control of Pests Research Unit, Stoneville, MS, U.S.A.; (4) USDA-ARS Corn Insects and Crop Genetics Research Unit, Ames, IA, U.S.A.; (5) Dept. of Medicinal Chemistry, University of Minnesota, Minneapolis, MN, U.S.A.
- 11:15 a.m. 90-O. Potential of *Paecilomyces lilacinus* strain 251 to control the root-knot nematode *Meloidogyne enterolobii*, a new quarantine species for the EPPO region. S. KIEWNICK (1). (1) Agroscope Changins, Waedenswil, Switzerland

### Molecular Biology of Plant Viruses

8:30 – 11:15 a.m.; 317B

#### Section: Molecular/Cellular/Plant-Microbe Interactions

**Moderator:** Moderators: Olufemi J. Alabi, Washington State University, Prosser, WA, U.S.A.; Carlos Angel, Div. of Plant Sciences, University of Missouri, Columbia, MO, U.S.A./Centro Nacional de Investigaciones de Café CENICAFE, Chinchiná, Caldas, Colombia

- 8:30 a.m. 91-O. Genetic diversity of *Potato virus Y* and origin of recombinant PVY strains. A. V. KARASEV (1), X. Hu (2), C. J. Brown (1), C. Kerlan (1), O. V. Nikulaeva (1), J. M. Crosslin (3), S. M. Gray (4). (1) University of Idaho, Moscow, ID, U.S.A.; (2) SAIC-Frederick, Inc., Frederick, MD, U.S.A.; (3) USDA-ARS, Prosser, WA, U.S.A.; (4) USDA-ARS, Ithaca, NY, U.S.A.
- 8:45 a.m. 92-O. A novel type of *Potato virus Y* recombinant genome. S. B. GALVINO-COSTA (1), A. R. Figueira (1), X. Hu (2), C. Kerlan (3), A. V. Karasev (3). (1) University of Lavras, Lavras, Brazil; (2) SAIC, Inc., Frederick, MD, U.S.A.; (3) University of Idaho, Moscow, ID, U.S.A.

- 9:00 a.m. 93-O. Systemic infection of coffee plants (*Coffea arabica* L.) by *Tobacco mosaic virus*. C. A. ANGEL (1), A. L. Gaitán (2), J. E. Schoelz (3). (1) Division of Plant Sciences, University of Missouri, Columbia, MO, U.S.A./Centro Nacional de Investigaciones de Café CENICAFE, Chinchiná, Caldas, Colombia; (2) Centro Nacional de Investigaciones de Café - CENICAFE, Chinchiná, Colombia; (3) Division of Plant Sciences, University of Missouri, Columbia, MO, U.S.A.
- 9:15 a.m. ★APS Foundation Awardee 94-O. Usefulness of a high-throughput transient expression system to test virus-derived genetic constructs for resistance against *Grapevine fanleaf virus*. J. E. OLIVER (1), M. Fuchs (1). (1) Cornell University NYSAES, Geneva, NY, U.S.A.
- 9:30 a.m. 95-O. Genome sequence of an unassigned *Citrus tristeza virus* genotypic isolate from Puerto Rico reveals a trifoliate resistance breaking genotype. A. ROY (1), N. Choudhary (1), J. S. Hartung (2), R. H. Bransky (1). (1) University of Florida, Lake Alfred, FL, U.S.A.; (2) USDA-ARS, Beltsville, MD, U.S.A.
- 9:45 a.m. 96-O. Citrus-CTV molecular interactions: What is the host side of the story? H. DODDAPANENI (1), M. Saponari (2), A. Giampetruzzoli (3), G. Loconsole (3), P. Saldarelli (2), R. K. Yokomi (4). (1) Carver Center for Genomics, Dept. of Biology, The University of Iowa, Iowa City, IA, U.S.A.; (2) CNR, Institute of Plant Virology, Bari, Italy; (3) Agriculture Faculty, University of Bari, Bari, Italy; (4) USDA, ARS, Parlier, CA, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. ★APS Foundation Awardee 97-O. A DNA virus in grapevine and its association with vein-clearing and vine decline syndrome. Y. ZHANG (1), K. Singh (1), M. Xu (1), W. Qiu (1). (1) Missouri State University, William H. Darr School of Agriculture, Mountain Grove, MO, U.S.A.
- 10:30 a.m. 98-O. *Grapevine leafroll-associated virus 1* occurs as genetically diverse populations in wine grape cultivars. O. J. ALABI (1), M. Al Rwahnih (2), G. Karthikeyan (3), S. Poojari (1), M. F. Fuchs (4), A. Rowhani (2), R. A. Naidu (1). (1) Washington State University, Prosser, WA, U.S.A.; (2) University of California-Davis, Davis, CA, U.S.A.; (3) Washington State University, IAREC, Prosser, WA, U.S.A.; (4) Cornell University, Geneva, NY, U.S.A.
- 10:45 a.m. ★APS Foundation Awardee 99-O. Engineering *Grapevine fanleaf virus* into a plant expression vector. J. GOTTLÜ (1), E. Vigne (2), C. Keichinger (3), C. Ritzenthaler (3), M. Fuchs (1). (1) Cornell University, Geneva, NY, U.S.A.; (2) INRA, Colmar, France; (3) IBMP, Strasbourg, France
- 11:00 a.m. 100-O. Deep sequencing of small RNAs for virus and viroid identification in tomatoes. K. LING (1), Z. Fei (2), W. P. Wechter (1), A. G. Hernamdez (3). (1) USDA-ARS, Charleston, SC, U.S.A.; (2) USDA, ARS, BTI, Cornell University, Ithaca, NY, U.S.A.; (3) University of Illinois at Urbana-Champaign, Urbana, IL, U.S.A.

## WEDNESDAY, AUGUST 10, 2011 (Morning)

*Listed in alphabetical order by title. Special Sessions listed first followed by Oral Technical Sessions. Find complete details on the meeting website at [www.apsnet.org/meetings/annual/program/Pages](http://www.apsnet.org/meetings/annual/program/Pages)*

### SPECIAL SESSIONS

#### Better Use of Entomopathogenic Microbes in IPM

8:30 – 11:30 a.m.; 323C

**Section:** IPM-Biocontrol-Plant Disease Management

**Organizers:** Trevor Jackson, Lincoln Research Centre, AgResearch, Lincoln, New Zealand; Gerald R. Carner, Clemson University, Clemson, SC, U.S.A.; Muni Muniappan, Virginia Tech, Blacksburg, VA, U.S.A.

**Moderator:** Gerald R. Carner, Clemson University, Clemson, SC, U.S.A.

- 8:30 a.m. 124-S. A bioprotection strategy for greater integration of beneficial microbes into IPM. T. A. JACKSON (1). (1) AgResearch, Lincoln, New Zealand
- 8:45 a.m. 125-S. Release of Beauveria bassiana insecticide does not cause silkworm white muscardine. Z. LI (1). (1) Anhui Agricultural University, Hefei, Anhui, Taiwan Rep of China
- 9:00 a.m. 126-S. Microbial control in Brazil. F. MOSCARDI (1), F. Cunha (1), M. L. Moscardi (1). (1) UEL, Londrina, Brazil
- 9:15 a.m. 127-S. Microbial control in Australian cropping systems. C. HAUXWELL (1). (1) E. H. Graham Centre for Agricultural Innovation, Charles Sturt University, Wagga Wagga, Australia
- 9:30 a.m. 128-S. Making use of microbes in pasture bioprotection. S. M. ZYDENBOS (1), T. A. Jackson (2). (1) AgResearch, Christchurch, New Zealand; (2) AgResearch, Lincoln, New Zealand
- 9:45 a.m. 129-S. Promising new biopesticides for use in microbial control of major pests in African cropping systems. M. TAMO (1), I. Godonou (1), B. James (2), R. Srinivasan (3), J. N. Maniania (4), S. Ekesi (4), S. Nakamura (5), T. Adati (5). (1) IITA, Cotonou, Benin; (2) IITA, Freetown, Sierra Leone; (3) AVRDC, Tainan, Taiwan Rep of China; (4) ICIPE, Nairobi, Kenya; (5) Tokyo University of Agriculture, Tokyo, Japan
- 10:00 a.m. Break
- 10:15 a.m. 130-S. Microbial control of arthropod pests, a key component of IPM programs in Indonesia. Y. M. KUSUMAH (1), G. R. Carner (2). (1) Bogor Agricultural University, Bogor, Indonesia; (2) Clemson University, Clemson, SC, U.S.A.
- 10:30 a.m. 131-S. Plant extracts protect the Nucleopolyhedrovirus of the beet armyworm from breakdown by ultraviolet rays. M. Shapiro (1), S. El Salamouny (2), M. SHEPARD (3). (1) Clemson University, Clemson, SC, U.S.A.; (2) Cairo University, Giza, Egypt; (3) Clemson University, Charleston, SC, U.S.A.
- 10:45 a.m. 132-S. Microbial control in IPM programs for vegetable crops. G. R. CARNER (1). (1) Clemson University, Clemson, SC, U.S.A.
- 11:00 a.m. Discussion

#### Crop Health Management for Food Safety and Agroecosystem Health in Developing Countries

8:30 – 11:30 a.m.; 319AB

**Section:** IPM-Biocontrol-Plant Disease Management

**Organizer:** Irmgard Hoeschle-Zeledon, SP-IPM, c/o International Institute of Tropical Agriculture, Ibadan, Nigeria

**Moderator:** Richard A. Sikora, University of Bonn, Bonn, Germany

**Sponsor:** IPM-Biocontrol

- 8:30 a.m. 133-S. Disseminating good agricultural practices in vegetable production for better human and agroecosystem health. J. WANG (1), G. Luther (1), S. Neave (2), M. Bhattacharai (1), K. Weinberger (1), K. Kriesemer (1). (1) AVRDC-The World Vegetable Center, Tainan, Taiwan Rep of China; (2) AVRDC-The World Vegetable Center, Honiara, Solomon Islands
- 9:00 a.m. 134-S. Advances in integrated aflatoxin management in Africa. R. BANDYOPADHYAY (1), P. J. Cotty (2). (1) International Institute of Tropical Agriculture (IITA), Ibadan, Nigeria; (2) USDA-ARS, Tucson, AZ, U.S.A.
- 9:30 a.m. 135-S. Seeing the unseen - Improving agroecosystem health through sustainable nematode management in smallholder systems. D. L. COYNE (1), I. Hoeschle-Zeledon (2). (1) IITA, Dar es Salaam, Tanzania; (2) IITA, Ibadan, Nigeria
- 9:45 a.m. 136-S. Integrated management of food legume diseases for sustainable rainfed agroecosystem. S. PANDE (1). (1) ICRISAT, Patancheru, India
- 10:00 a.m. Break
- 10:15 a.m. 137-S. Integrated pest management for potato in developing countries: challenges, opportunities and new control strategies. J. E. KROSCHEL (1). (1) International Potato Center, Lima, Peru
- 10:30 a.m. 138-S. Role of insect-resistant transgenic crops for pest management and their impact on environment and food safety. H. C. SHARMA (1(1) International Crops Research Institute for the semi-Arid Tropics (ICRISAT), Patancheru, Hyderabad, India
- 10:45 a.m. 139-S. Harnessing Agro-Ecosystem Resilience in water limited wheat based cropping systems– a major challenge for food security in West Asia and North Africa. J. M. NICOL (1), R. Sikora (2), N. Bolat (3), A. Yahyaoui (4), B. Govaerts (5), A. A. Dababat (6). (1) CIMMYT Int. Mexico/SP-IPM, Mexico; (2) SP-IPM/Bonn University Germany, Bonn, Germany; (3) ANADOLU Institute, Turkish Ministry of Agriculture, Eskisehir, Turkey; (4) ICARDA/SP-IPM, Aleppo, Syrian Arab Republic; (5) CIMMYT Int. Mexico, Mexico; (6) CIMMYT Int. TURKEY/SP-IPM, Turkey
- 11:00 a.m. Discussion

*Special Sessions continued*

## Current Advances of Molecular Plant Pathology in China

8:30 – 11:30 a.m.; 323A

**Organizer/Moderator:** Yulin Jia, USDA ARS DBNRRCC, Stuttgart, AR, U.S.A.

**Sponsor:** Sino-US Plant Pathology Panel

- 8:30 a.m. 140-S. The role of copper in rice–Xanthomonas oryzae interaction. M. Yuan (1), S. WANG (1). (1) Huazhong Agricultural University, Wuhan, PRC Peoples Rep of China
- 9:00 a.m. 141-S. *Arabidopsis-Pseudomonas syringae* interaction provides insight into PAMP-triggered immunity. J. ZHANG (1), J. Zhou (1). (1) National Institute of Biological Sciences, Beijing, Beijing, PRC Peoples Rep of China
- 9:30 a.m. 142-S. Plant defense and geminivirus counter-defense. X. ZHOU (1). (1) Institute of Biotechnology, Zhejiang University, Hangzhou, PRC Peoples Rep of China
- 10:00 a.m. Break
- 10:15 a.m. 143-S. Mycoviruses in *Sclerotinia sclerotiorum*. D. JIANG (1). (1) Huazhong Agricultural University, Wuhan, PRC Peoples Rep of China
- 10:45 a.m. 144-S. Update on interactions between wheat and stripe rust pathogens. X. Wang (1), Y. Fu (1), D. Han (1). (1) College of Plant Protection, Northwest A&F University, Yangling, PRC Peoples Rep of China
- 11:15 a.m. Discussion

## Digital Identification Tools: Their Role in Biosecurity and Pest Management

8:30 – 11:45 a.m.; 318AB

**Section:** Emerging Pests/Invasive Species

**Organizers/Moderators:** Geoff Norton, The University of Queensland, Brisbane, QLD, Australia; Terrence Walters, USDA-APHIS-PPQ CPHST, Fort Collins, CO, U.S.A.

**Sponsors:** IAPPS, APS Diagnostics

- 8:30 a.m. 145-S. Designing, developing, and delivering digital identification tools for plant protection and quarantine. T. W. WALTERS (1). (1) USDA APHIS PPQ CPHST, Fort Collins, CO, U.S.A.
- 9:00 a.m. 146-S. The Pestnet diagnosis service in the South Pacific and Southeast Asia. G. JACKSON (1). (1) Pestnet, Queens Park, NSW, Australia
- 9:30 a.m. 147-S. The role of Q-Bank in supporting plant regulatory agencies. P. BONANTS (1), M. J. Edema (2). (1) Plant Research International, Wageningen, Netherlands; (2) n VWA, Division Plant, Wageningen, Netherlands
- 10:00 a.m. Break
- 10:15 a.m. 148-S. PaDIL - A Virtual Diagnostic tool to assist in plant pest diagnostics. K. L. WALKER (1). (1) Museum Victoria, Melbourne, Australia
- 10:45 a.m. 149-S. Leveraging digital resources and social networks for identification and extension education. J. LAFOREST (1). (1) University of Georgia, Tifton, GA, U.S.A.
- 11:15 a.m. Discussion

## New and Emerging Technologies in Turfgrass Disease Management

8:30 – 11:45 a.m.; 324

**Section:** Diseases of Plants

**Organizer/Moderator:** Damon Smith, Oklahoma State University, Stillwater, OK, U.S.A.

**Sponsor:** Turfgrass Pathology

- 8:30 a.m. 150-S. The history and new advances in Fungicide development for turfgrass disease management. J. KERN (1). (1) UW-Madison Department of Plant Pathology, Madison, WI, U.S.A.
- 9:00 a.m. 151-S. Advances in application technology for turfgrass disease management. M. M. KENNELL (1). (1) Kansas State University, Manhattan, KS, U.S.A.
- 9:30 a.m. 152-S. Turfgrass diagnostics and new, advanced technologies. L. A. Beirn (1), E. N. Njambere (1), N. Zhang (1), B. B. Clarke (1), J. CROUCH (2). (1) Rutgers University, New Brunswick, NJ, U.S.A.; (2) USDA-ARS, Systematic Mycology and Microbiology Laboratory, Beltsville, MD, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 153-S. Enhancing systemic resistance in turfgrass disease management. T. HSIANG (1), P. H. Goodwin (1), A. Cortes-Barco (1), B. Nash (1). (1) University of Guelph, Guelph, ON, Canada
- 10:45 a.m. 154-S. Using molecular tools to improve our knowledge of turfgrass pathogens. N. R. WALKER (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.
- 11:15 a.m. 155-S. Using social media in turfgrass disease management education. J. E. KAMINSKI (1). (1) Pennsylvania State University, University Park, PA, U.S.A.

## Pesticide Resistance in Agriculture—A Global Issue

8:30 – 11:30 a.m.; 316A

**Section:** Professionalism/Outreach /Industry/Genetic Engineering

**Organizers:** Baruch Rubin, The Hebrew University of Jerusalem, Rehovot, Israel; Jim Bone, Dupont, Valdosta, GA, U.S.A.

**Moderator:** Dale Shaner, USDA-ARS, Fort Collins, CO, U.S.A.

**Sponsors:** APS Industry; IAPPS

- 8:30 a.m. 156-S. IRAC global industry leadership to preserve insecticide chemistries through education, maintaining insect susceptibility, and managing insect resistance. J. T. ANDALORO (1), R. Nauen (2). (1) IRAC International - DuPont Company, Stine Research Ctr, Newark, DE, U.S.A.; (2) IRAC International - Bayer CropScience, Monheim, Germany
- 8:45 a.m. 157-S. Fungicide RAC approach to resistance management. A.J. LEADBEATER (1). (1) Syngenta Crop Protection AG, Basel, Switzerland
- 9:00 a.m. 158-S. Herbicide RAC view of resistance. J. K. SOTERES (1). (1) Monsanto Company, St. Louis, MO, U.S.A.
- 9:15 a.m. 159-S. Gene flow and herbicide resistance: lessons learned from herbicide-resistant rice systems. D. GEALY (1), N. Burgos (2). (1) USDA-ARS, DBNRRCC, Stuttgart, AR, U.S.A.; (2) University of Arkansas, Fayetteville, AR, U.S.A.
- 9:30 a.m. 160-S. Herbicide resistance as a threat to dryland farming in the Mediterranean. B. RUBIN (1). (1) Hebrew University of Jerusalem, Faculty of Agriculture, Food and Environment, Rehovot, Israel

- 9:45 a.m. 161-S. ACCase resistance in grasses. J. P. RUIZ-SANTAELLA (1). (1) Bayer.
- 10:00 a.m. Break
- 10:15 a.m. 162-S. Managing glyphosate resistant weeds in dicamba resistant soybeans. P. FENG (1). (1) Monsanto Co, St Louis, MO, U.S.A.
- 10:30 a.m. 163-S. The current state of resistance to Acetohydroxyacid/Acetylactate Synthase Inhibitors. D. SHANER (1). (1) USDA-ARS, Fort Collins, CO, U.S.A.
- 10:45 a.m. Discussion

### Tropical Forest Pathology

8:30 – 11:30 a.m.; 317A

**Section:** Diseases of Plants

- Organizers/Moderators:** Pauline Spaine, USDA APHIS, Riverdale, MD, U.S.A.; Jennifer Juzwik, USDA Forest Service, Northern Research Station, St. Paul, MN, U.S.A.
- Sponsors:** Forest Pathology; Tropical Plant Pathology; Mycology
- 8:30 a.m. 164-S. Diseases of tropical *Eucalyptus* spp.: Growing threats to a critically valuable global forestry resource. M. J. WINGFIELD (1), J. Roux (2), B. Slippers (2), B. Wingfield (2). (1) Forestry and Agricultural Biotechnology Institute (FABI), University of Pretoria, Pretoria, Rep of South Africa; (2) University of Pretoria, Pretoria, Rep of South Africa

- 9:00 a.m. 165-S. Current knowledge of *Eucalyptus* rust in Brazil. A. C. ALFENAS (1), R. N. Graça (1). (1) Federal University of Viçosa, Viçosa, Brazil
- 9:30 a.m. 166-S. Invasion of *Puccinia psidii* into Hawaii, hosts infected, molecular characterization, and pathogenicity tests. J. UCHIDA (1). (1) University of Hawaii at Manoa, Honolulu, HI, U.S.A.

- 10:00 a.m. Break
- 10:15 a.m. 167-S. Disease resistance screening for Koa wilt disease. N. S. Dudley (1), T. Jones (2), R. L. James (3), P. Cannon (4), R. Sneizko (5), I. Rushanaedy (2), D. BORTHAKUR (2). (1) Hawaii Agriculture Research Center, Kunia, HI, U.S.A.; (2) University of Hawaii at Manoa, Dept. of Molecular Biosciences & Bioengineering, Honolulu, HI, U.S.A.; (3) U. S. - 10:45 a.m. 168-S. Decline of *Casuarina equisetifolia* (ironwood) trees on Guam: Symptomatology and explanatory variables. R. L. SCHLUB (1), A. Moore (1), B. Marx (2), K. Schlub (2), L. Kennaway (3), M. Quintanilla (4), M. Putnam (5), Z. Mersha (6). (1) University of Guam, Mangilao, Guam; (2) Louisiana State University, Baton Rouge, LA, U.S.A.; (3) USDA-APHIS-PPQ-CPHST, Fort Collins, CO, U.S.A.; (4) Northern Marianas College, Saipan; (5) Oregon State University, Corvallis, OR, U.S.A.; (6) University of Florida , Homestead, FL, U.S.A.
- 11:00 a.m. 169-S. Decline of *Casuarina equisetifolia* (ironwood) trees on Guam: *Ganoderma* and *Phellinus*. Z. MERSHA (1), M. C. Aime (2), P. Cannon (3), D. Nandwani (4), S. Nelson (5), P. C. Spaine (6), R. L. Schlub (7). (1) University of Florida , Homestead, FL, U.S.A.; (2) Louisiana State University, Baton Rouge, LA, U.S.A.; (3) USDA Forest Service, Vallejo,

- CA, U.S.A.; (4) Northern Marianas College, Saipan; (5) University of Hawaii, Manoa, HI, U.S.A.; (6) USDA/APHIS/BRS, Riverdale, MD, U.S.A.; (7) University of Guam, Mangilao, Guam

11:15 a.m. Discussion

### ■ ORAL TECHNICAL SESSIONS

#### Biology of Plant Pathogens: Fungi

8:30 – 11:30 a.m.; 323B

**Section:** Biology of Plant Pathogens

**Moderator:** Ning Zhang, Rutgers University, New Brunswick, NJ, U.S.A.; Alejandro Ortega-Beltran, University of Arizona, Tucson, AZ, U.S.A.

- 8:30 a.m. 101-O. Evolution of mode of infection in the rice blast fungus and allied species. N. ZHANG (1), S. Zhao (1). (1) Rutgers University, New Brunswick, NJ, U.S.A.
- 8:45 a.m. 102-O. Evidence of genetic diversity and heterothallism in *Sclerotinia homoeocarpa*, the causal agent of dollar spot disease on turfgrass. D. LIBERTI (1), J. A. Rollins (1), P. F. Harmon (1). (1) University of Florida, Gainesville, FL, U.S.A.
- 9:00 a.m. 103-O. Anthracnose disease of *Capsicum* spp. P. W. TAYLOR (1), O. Mongkolporn (2). (1) University of Melbourne, Melbourne, Australia; (2) Kasetsart University, Kamphaeng Saen, Thailand
- 9:15 a.m. 104-O. Correlation of environmental and edaphic factors to the isolation frequency of *Rhizoctonia* and *Chrysosporium* from seashore paspalum. S. J. KAMMERER (1), P. F. Harmon (1). (1) University of Florida, Gainesville, FL, U.S.A.
- 9:30 a.m. 105-O. Aflatoxin-producing fungi in maize fields of Sonora, Mexico, at varying elevations: A three-year study. A. ORTEGA-BELTRAN (1), R. Jaime-Garcia (1), P. J. Cotty (2). (1) University of Arizona, Tucson, AZ, U.S.A.; (2) USDA ARS/University of Arizona, Tucson, AZ, U.S.A.
- 9:45 a.m. 106-O. Determination of presumptive vegetative compatibility groups of *Verticillium dahliae* occurring on sunflower using molecular markers. K. M. ALANANBEH (1), N. C. Gudmestad (1), T. J. Gulya (2), S. Markell (1). (1) North Dakota State University, Fargo, ND, U.S.A.; (2) USDA-ARS NCSL, Fargo, ND, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 107-O. Analyses of nuclear and mitochondrial sequences reveal an ancient split in the evolutionary history of *Verticillium dahliae*. Z. K. ATALLAH (1), K. Maruthachalam (1), L. E. Radmer (2), F. N. Martin (2), S. J. Klosterman (2), K. V. Subbarao (1). (1) University of California-Davis, Salinas, CA, U.S.A.; (2) USDA-ARS, Salinas, CA, U.S.A.
- 10:30 a.m. 108-O. Laurel wilt of avocado: Relationships among disease severity, water conduction, and the spatial distribution of *Raffaelea lauricola*. S. A. INCH (1), R. Ploetz (1). (1) University of Florida, Homestead, FL, U.S.A.
- 10:45 a.m. 109-O. First report of *Raffaelea canadensis* showing laurel wilt disease symptoms on avocado in California. A. ESKALEN (1), V. McDonald (1). (1) University of California, Riverside, CA, U.S.A.

Oral Technical Sessions continued

- 11:00 a.m. 110-O. Interactions between Fusarium root rot pathogens and *Heterodera glycines* on soybean roots. M. DIAZ-ARIAS (1), G. L. Tylka (1), L. Leandro (1), G. Munkvold (1). (1) Iowa State University, Ames, IA, U.S.A.
- 11:15 a.m. **Pacific Division Talk** 111-O. Virulence diversity of international collections of the wheat stripe rust pathogen, *Puccinia striiformis* f. sp. *tritici*. D. SHARMA-POUDYAL (1), X. Chen (2). (1) Washington State University, Pullman, WA, U.S.A.; (2) USDA-ARS, Wheat Genetics, Quality, Physiology, and Disease Research Unit, Pullman, WA, U.S.A.
- Diseases of Horticultural Crops & Forests**  
8:30 – 11:30 a.m., 317B
- Section:** Diseases of Plants
- Moderator:** Sara Thomas, University of Georgia, Athens, GA, U.S.A.
- 8:30 a.m. 112-O. Fungi in Botryosphaeriaceae causing stem blight in the southeast and latent infection in southern highbush blueberry propagative material. A. F. WRIGHT (1). (1) University of Florida, Gainesville, FL, U.S.A.
- 8:45 a.m. 113-O. Calosphaeria canker of sweet cherry in California. F. P. TROUILLAS (1), F. Peduto (1), J. A. Grant (2), W. D. Gubler (1). (1) University of California-Davis, Davis, CA, U.S.A.; (2) University of California-Davis, Stockton, CA, U.S.A.
- 9:00 a.m.  114-O. Pre- and post-anthesis activity of fenbuconazole and triforine against blueberry flower infection by *Monilinia vaccinii-corymbosi*. S. THOMAS (1), H. Scherm (1). (1) University of Georgia, Athens, GA, U.S.A.
- 9:15 a.m. 115-O. Report of chlorotic ringspot disease on peanuts caused by *Tomato yellow fruit ring virus* in Iran. A. GOLNARAGHI (1), R. Pourrahim (2), S. Farzadfar (2), K. Ohshima (3). (1) Dept. of Plant Protection, College of Agriculture and Natural Resources, Science and Research Branch, Islamic Azad University, Tehran, Iran; (2) Dept. of Plant Virology, Iranian Institute of Plant Protection, Tehran, Iran; (3) Laboratory of Plant Virology, Dept. of Applied Biological Sciences, Saga University, Saga, Japan
- 9:30 a.m. 116-O. Comparative study of *Pythium* species causing carrot cavity spot in California and Michigan. X. H. LU (1), R. M. Davis (2), J. J. Hao (1). (1) Michigan State University, East Lansing, MI, U.S.A.; (2) University of California-Davis, Davis, CA, U.S.A.
- 9:45 a.m.  **Pacific Division Talk** 117-O. Prevalence and aggressiveness of *Alternaria solani* and *A. alternata* on potato in the Columbia Basin of the Pacific Northwest. L. S. TYMON (1), D. A. Johnson (1). (1) Washington State University, Pullman, WA, U.S.A.
- 10:00 a.m. Break
- 10:15 a.m. 118-O. Survey of *Potato virus Y* isolates in potato in Chihuahua, Mexico. L. Robles-Hernandez (1), A. C. GONZALEZ-FRANCO (1), J. Hernandez-Huerta (1), T. M. Meacham (2), A. V. Karasev (2). (1) Universidad Autonoma de Chihuahua, Chihuahua, Mexico; (2) University of Idaho, Moscow, ID, U.S.A.
- 10:30 a.m. 119-O. Sexual reproduction of *Pseudoperonospora cubensis*. Y. COHEN (1), A. Rubin (1), M. Galperin (1). (1) Bar-Ilan University, Ramat-Gan, Israel
- 10:45 a.m. 120-O. Blackstain root disease effects on foliar nutrients, chlorophyll content, and internodal growth in ponderosa pine. W. OTROSINA (1), S. Sung (2), J. Kliejunas (3), W. Woodruff (4), P. Spaine (5). (1) USDA Forest Service, Athens, GA, U.S.A.; (2) USDA Forest Service, Pineville, LA, U.S.A.; (3) USDA Forest Service, Kent, WA, U.S.A.; (4) USDA Forest Service, Susanville, CA, U.S.A.; (5) USDA APHIS, Riverdale, MD, U.S.A.
- 11:00 a.m. 121-O. The potency of fungal antagonists to combat root rot in industrial *Acacia mangium* plantation. MUCHARROMAH (1), E. Maria (1), Shintami (1), Junarto (2), S. Oktarina (2). (1) Agriculture College University of Bengkulu, Bengkulu, Indonesia; (2) PT Musi Hutan Persada, South Sumatera, Indonesia
- 11:15 a.m. 122-O. SSR markers closely linked with a major QTL on chromosome 12 associated with resistance to phylotype I strains of *Ralstonia solanacearum* in tomato. J. WANG (1), F. Ho (1), H. Truong (1), S. Huang (1), V. Dittapongpitch (2), N. Hidayati (3). (1) AVRDC-The World Vegetable Center, Shanhua, Tainan, Taiwan Rep of China; (2) East-West Seed Thailand, Amphur Sainoi, Nonthaburi, Thailand; (3) East-West Seed Indonesia, Purwakarta, Indonesia
- Induced Plant Response & Disease Resistance**  
8:30 – 11:00 a.m., 325AB
- Section:** IPM/Biocontrol/Plant Disease Management
- Moderator:** Chandrasekar S. Kousik, U.S. Vegetable Laboratory, USDA, ARS, Charleston, SC, U.S.A.
- 8:30 a.m. 123-O. Using phenotypic markers to identify common beans with two and three rust resistance genes. M. A. PASTOR-CORRALES (1), J. M. Osorno (2), S. G. Markell (2), R. S. Goswami (2). (1) USDA ARS, Beltsville, MD, U.S.A.; (2) North Dakota State University, Fargo, ND, U.S.A.
- 8:45 a.m. 124-O. Resistance of *Brachiaria* genotypes to *Rhizoctonia* spp. E. ALVAREZ (1), M. Latorre (1). (1) CIAT, Cali, Colombia
- 9:00 a.m. 125-O. Sources of resistance to Phytophthora fruit rot in watermelon plant introductions. C. S. KOUSIK (1). (1) U.S. Vegetable Laboratory, USDA, ARS, Charleston, SC, U.S.A.
- 9:15 a.m. 126-O. Components of resistance to *Phytophthora nicotianae* in doubled-haploid lines of tobacco possessing a novel source of resistance. K. R. LANNON (1), D. Shew (1), R. S. Lewis (1). (1) North Carolina State University, Raleigh, NC, U.S.A.
- 9:30 a.m. 127-O. Molecular cloning and characterization of the immunosuppressive protein from the surface coat of *Steinernema glaseri*. H. ZENG (1), D. Qiu (1), X. Yang (1), H. Yang (1). (1) Institute of Plant Protection, Chinese Academy of Agricultural Sciences, Beijing, Peoples Rep of China
- 9:45 a.m. 128-O. Novel heat-stable protein elicitor from *Alternaria tenuissima* activates plants resistance and growth. D. QIU (1), H. Zeng (1), X. Yang (1), L. Guo (1). (1) Institute of Plant Protection, Chinese Academy of Agricultural Sciences, Beijing, Peoples Rep of China
- 10:00 a.m. Break

- 10:15 a.m. 129-O. A new approach to manage phytoplasma diseases: Field treatments with resistance inducers to contain grapevine Bois noir. G. ROMANAZZI (1), S. Murolo (1), L. Landi (1), E. Feliziani (1). (1) Marche Polytechnic University, Ancona, Italy
- 10:30 a.m. 130-O. Identification of small molecule inhibitors against SecA of '*Candidatus Liberibacter asiaticus*' by molecular modeling studies. N. AKULA (1), P.

- Trivedi (1), N. Wang (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 10:45 a.m. 131-O. Effect of vulclic acid produced by *Nimbya alternantherae* on chloroplast function of alligator-weed. M. XIANG (1), L. Wang (1). (1) Zhongkai University of Agriculture & Engineering, Guangzhou, Peoples Rep of China

## WEDNESDAY, AUGUST 10, 2011 (Afternoon)

### ■ SPECIAL SESSIONS

#### Disease Complex Between Nematodes and Other Plant Pathogens

1:00 – 4:00 p.m.; 325AB

**Section:** Diseases of Plants

**Organizer/Moderator:** Koon-Hui Wang, University of Hawaii, Honolulu, HI, U.S.A.

**Sponsors:** Nematology; Soil Microbiology and Root Diseases

- 1:00 p.m. 170-S. The nightmare of plant diseases associated with soybean cyst nematodes. T. L. NIBLACK (1), J. P. Bond (2), G. L. Tylka (3). (1) University of Illinois, Urbana, IL, U.S.A.; (2) Southern Illinois University, Carbondale, IL, U.S.A.; (3) Iowa State University, Ames, IA, U.S.A.
- 1:30 p.m. 171-S. Is it nematode or fungus that causes Mr. Potato to die early? A. E. MACGUIDWIN (1). (1) University of Wisconsin-Madison, Madison, WI, U.S.A.
- 2:00 a.m. 172-S. You think the root-knot nematode is the only culprit? T. L. KIRKPATRICK (1), C. S. Rothrock (2), J. Ma (2). (1) University of Arkansas Southwest Research and Extension Center, Hope, AR, U.S.A.; (2) University of Arkansas, Fayetteville, AR, U.S.A.
- 2:30 p.m. Break
- 2:45 p.m. 173-S. Pine wilt disease: From nematology to quarantine. B. ZHAO (1), R. Li (2), F. Lin (1). (1) Nanjing Forestry University, Nanjing, PRC Peoples Rep of China; (2) Qingdao University, Qingdao, PRC Peoples Rep of China
- 3:15 p.m. 174-S. Viruses transmitted by nematodes: When the germs meet the worms. I. ZASADA (1). (1) USDA-ARS, Corvallis, OR, U.S.A.
- 3:45 p.m. Discussion

#### IPM Program for Vegetable Crops in the Tropics and Opportunities for IPM Graduates

1:00 – 4:00 p.m.; 324

**Section:** IPM-Biocontrol-Plant Disease Management

**Organizers/Moderators:** R. Muniappan, IPM CRSP/ Virginia Tech, Blacksburg, VA, U.S.A.; Merle Shepard, Emeritus Professor of Entomology, Clemson, Charleston, SC, U.S.A.

**Sponsors:** IAPPS, APS Biological Control; APS Integrated Plant Disease Management

- 1:00 p.m. 175-S. IPM program for vegetable crops in Central Asia. K. M. MAREDIA (1). (1) Michigan State University, East Lansing, MI, U.S.A.
- 1:15 p.m. 176-S. IPM tactics for vegetable crops in Indonesia. A. RAUF (1), M. B. Shepard (2), G. R. Carner (3), M. D. Hammig (4). (1) Bogor Agricultural University, Bogor, Indonesia; (2) Coastal Research and

- Education Center, Clemson University, Charleston, SC, U.S.A.; (3) Dept. of Entomology, Soil and Plant Sciences, Clemson University, Clemson, SC, U.S.A.; (4) Dept. of Applied Economics and Statistics, Clemson University, Clemson, SC, U.S.A.
- 1:30 p.m. 177-S. IPM technologies developed for vegetable crops in the Philippines. H. R. RAPUSAS (1), E. A. Parac (1), M. Hammig (3), M. Shepard (3). (1) PhilRice, Science City of Munoz, Nueva Ecija, Philippines; (2) Clemson University, Charleston, SC, U.S.A.
- 1:45 p.m. 178-S. FAO at work: case studies of vegetable integrated pest management and farmer education in Asia. J. KETELAAR (1). (1) FAO, Bangkok, Thailand
- 2:00 p.m. 179-S. IPM packages for vegetable crops in India. C. Durairaj (1), G. Karthikeyan (1), S. Ramakrishnan (2), G. Gajendran (1), D. Dinakaran (1), L. Pugalendhi (1), E. Jonathan (1), R. Samiyappan (1), S. MOHANKUMAR (1), (1) TNAU, Coimbatore, India; (2) Other, Coimbatore, India
- 2:15 p.m. 180-S. Technology transfer of vegetable IPM packages in India. N. KAUSHIK (1). (1) TERI, New Delhi, India
- 2:30 p.m. Break
- 2:45 p.m. 181-S. IPM: Changing the vegetable pest management system in Bangladesh. A.N.R. KARIM (1). (1) IPM CRSP Bangladesh Site, Gazipur, Bangladesh
- 3:00 p.m. 182-S. IPM packages developed for high-value horticultural crops in Latin America and the Caribbean. J. ALWANG (1). (1) Virginia Tech, Blacksburg, VA, U.S.A.
- 3:15 p.m. 183-S. IPM packages developed for vegetable crops in West Africa. D. G. PFEIFFER (1), D. E. Mullins (1), R. L. Gilbertson (2), C. C. Brewster (1), J. Westwood (1), S. A. Miller (3), P. Hipkins (1), G. Mbata (4), K. T. Gamby (5), E. V. Coly (6), D. S. Sall (7), M. K. Osei (8). (1) Virginia Tech, Blacksburg, VA, U.S.A.; (2) University California - Davis, Davis, CA, U.S.A.; (3) Ohio State University, Wooster, OH, U.S.A.; (4) Fort Valley State University, Fort Valley, GA, U.S.A.; (5) Institut d'Economie Rurale, Bamako, Mali; (6) Centre pour le Developpement de l'Horticulture, Dakar, Senegal; (7) Institut Senegalais de Recherches Agricoles, Dakar, Senegal; (8) Crops Research Institute, Kumasi, Ghana
- 3:30 p.m. 184-S. IPM program for vegetable crops in the tropics and opportunities for IPM graduates packages for horticultural crops in Uganda. S. KYAMANYWA (1). (1) Makerere University, Kampala, Uganda

*Special Sessions continued*

- 3:45 p.m. 185-S. Opportunities for graduates of IPM and related areas in international agriculture. S. A. MILLER (1). (1) The Ohio State University OARDC, Wooster, OH, U.S.A.

### MRLs: A Growing Agricultural Export Issue

1:00 – 4:00 p.m.; 323B

**Section:** Professionalism/Outreach /Industry/Genetic Engineering  
**Organizers/Moderators:** Alex Cochran, Syngenta Crop Protection, Granite Bay, CA, U.S.A.; Aaron Hert, Helena Research, CA, U.S.A.

**Sponsor:** Industry

**Financial Sponsor:** Dow AgroSciences

- 1:00 p.m. 186-S. Pesticide maximum residue limits: Why do they matter? G. LUDWIG (1). (1) Almond Board of California, Modesto, CA, U.S.A.  
 1:30 p.m. 187-S. The Pacific Rim Maximum Residue Level (MRL) issues. M. L. MARTIN (1). (1) California Grape & Tree Fruit League, Fresno, CA, U.S.A.  
 2:00 p.m. 188-S. MRLs in Europe—How philosophies differ from the United States. H. B. IRRIG (1). (1) Syngenta Crop Protection, Greensboro, NC, U.S.A.  
 2:30 p.m. Break  
 2:45 p.m. 189-S. MRL Challenges: Tree fruit exports from the Pacific Northwest. D. H. CARTER (1). (1) Northwest Horticultural Council, Yakima, WA, U.S.A.  
 3:15 p.m. Discussion

### Parasitic Weeds—The Drawback of the Hungry World

1:00 – 4:00 p.m.; 316A

**Section:** Weed Science

**Organizer/Moderator:** Yaakov Goldwasser, The Hebrew University of Jerusalem, Rehovot, Israel

**Sponsor:** IAPPS Weed Science

**Financial Sponsors:** FAO; CropLife International

- 1:00 p.m. 190-S. Striga—A formidable challenge to Africa's food security. G. EJETA (1). (1) Purdue University, West Lafayette, IN, U.S.A.  
 1:30 p.m. 191-S. Broomrape management- difficulties and solutions. Y. GOLDWASSER (1). (1) The Hebrew University of Jerusalem, Rehovot, Israel  
 2:00 p.m. 192-S. Selective and non-selective management of field dodder (*Cuscuta campestris*). B. RUBIN (1). (1) Hebrew University of Jerusalem, Rehovot, Israel  
 2:30 p.m. Break  
 2:45 p.m. 193-S. Role of strigolactones in the host-parasite association. K. YONEYAMA (1), X. Xie (1), K. Yoneyama (1). (1) Utsunomiya University, Utsunomiya, Japan  
 3:15 p.m. 194-S. Genomics approaches to parasitic plant research. J. WESTWOOD (1), M. Fernandez-Aparicio (2), G. Kim (2), M. LeBlanc (2), M. Das (2), S. Alford (2), V. Stromberg (2), N. Wickett (3), K. Huang (4), B. Wu (5), J. Yoder (5), M. Timko (4), C. dePamphilis (3). (1) VPI & State Univ, Blacksburg, VA, U.S.A.; (2) Virginia Tech, Blacksburg, VA, U.S.A.; (3) Penn State University, State College, PA, U.S.A.; (4) University of Virginia, Charlottesville, VA, U.S.A.; (5) UC Davis, Davis, CA, U.S.A.  
 3:45 p.m. Discussion

### Role of Fatty Acids and Lipids in Host-Pathogen Interactions

1:00 – 4:00 p.m.; 323A

**Section:** Molecular/Cellular/Plant-Microbe Interactions

**Organizers:** Shaker Kousik, USDA-ARS, Charleston, SC, U.S.A.; Pradeep Kachroo, University of Kentucky, Lexington, KY, U.S.A.; Alemu Mengistu, USDA-ARS, Jackson, TN, U.S.A.

**Moderator:** Shaker Kousik, USDA-ARS, Charleston, SC, U.S.A.  
**Sponsors:** Host Resistance; Molecular and Cellular Phytopathology

- 1:00 p.m. 195-S. The plant defense hormone Jasmonate and its molecular mechanism of action. G. HOWE (1). (1) Michigan State University, East Lansing, MI, U.S.A.  
 1:30 p.m. 196-S. How PI-3-P mediates entry of oomycete, fungal and insect effectors into host cells. B. M. TYLER (1), S. D. Kale (1), V. Antignani (1), J. Vega-Arreguin (1), R. Anderson (1), B. Gu (2), D. G. Capelluto (1), D. Dou (3), E. Feldman (1), A. Rumore (1), F. D. Arredondo (1), R. Hanlon (1), J. Plett (4), R. Aggarwal (5), I. Fudal (6), T. Rouxel (6), F. Martin (4), J. J. Stuart (5), J. M. McDowell (1), C. B. Lawrence (1), W. Shan (2). (1) Virginia Tech, Blacksburg, VA, U.S.A.; (2) NW A&F University, Yangling, PRC Peoples Rep of China; (3) Nanjing Agricultural University, Nanjing, PRC PRC Peoples Rep of China; (4) Centre INRA de Nancy, Champenoux, France; (5) Purdue University, West Lafayette, IN, U.S.A.; (6) INRA-Bioger, Campus AgroParisTech, Thiverval-Grignon, France  
 2:00 p.m. 197-S. Role of glycerolipid metabolism in plant systemic immunity. A. KACHROO (1), B. Chanda (1), Y. Xia (1), M. K. Mandal (1), K. Yu (1), K. Sekine (1), Q. Gao (1), D. Selote (1), D. Navarre (2), P. Kachroo (1). (1) University of Kentucky, Lexington, KY, U.S.A.; (2) USDA-ARS, Washington State University, Prosser, WA, U.S.A.  
 2:30 p.m. Break  
 2:45 p.m. 198-S. Lipid-mediated cross-talk between plant hosts and fungal pathogens. M.V. KOLOMIETS (1), X. Gao (1), Y. Park (1), S. Christensen (1), E. Borrego (1), Y. Yan (1), N. Keller (2). (1) Texas A&M University, College Station, TX, U.S.A.; (2) University of Wisconsin-Madison, Madison, WI, U.S.A.  
 3:15 p.m. 199-S. Chemical ecology of plant-parasite interactions. C. M. DE MORAES (1), M. C. Mescher (1). (1) The Pennsylvania State University, University Park, PA, U.S.A.  
 3:45 p.m. Discussion

### Technology Outlook: Detection Innovations and Successes

1:00 – 4:00 p.m.; 319AB

**Section:** Diseases of Plants

**Organizers/Moderators:** Clarissa Maroon-Lango and Jorge Abad, USDA APHIS PPQ PGQP, Beltsville, MD, U.S.A.; Laurene Levy, USDA APHIS PPQ CPHST, Beltsville, MD, U.S.A.

**Sponsors:** Plant Pathogen and Disease Detection; Emerging Diseases and Pathogens; Diagnostics

**Financial Sponsor:** USDA-APHIS-PPQ

- 1:00 p.m. 200-S. Deployment of DNA arrays in plant pathogen detection. C. A. LEVESQUE (1). (1) Agriculture and

- Agri-Food Canada, Ottawa, ON, Canada
- 1:30 p.m. 201-S. *iPhyClassifier*: an interactive online tool for phytoplasma identification and classification. Y. Zhao (1), W. WEI (1), I. Lee (1), J. Shao (1), X. Suo (2), R. E. Davis (1). (1) MPPL-ARS-USDA, Beltsville, MD, U.S.A.; (2) NBC-DOI, Herndon, VA, U.S.A.
- 2:00 p.m. 202-S. Using surface plasmon resonance (SPR) technology to detect quarantine plant pathogens. R. DI (1). (1) Rutgers University, New Brunswick, NJ, U.S.A.
- 2:30 p.m. Break
- 2:45 p.m. 203-S. The quest for unknown viruses in plants by siRNA deep sequencing. J. F. KREUZE (1), W. J. Cuellar (1). (1) International Potato Center (CIP), Lima, Peru
- 3:15 p.m. 204-S. The use of isothermal DNA amplification (NEAR) in plant disease diagnostics. T. R. Spenlinhauer (1), S. Judice (1), P. Lampton (1), J. Hardingham (1), M. Estock (1), S. Kovacs (1), G. Hoyos (1), T. K. McFadd (1), B. O. PARKER (1). (1) EnviroLogix Inc, Portland, ME, U.S.A.
- 3:45 p.m. Discussion

### **Wheat Blast—A Potential Threat to Global Wheat Production**

1:00 – 4:00 p.m.; 323C

**Section:** Emerging Pests/Invasive Species

**Organizer/Moderator:** Gary Peterson, USDA ARS Foreign Disease-Weed Science Research Unit, Fort Detrick, MD, U.S.A.

**Sponsor:** APS Regulatory Plant Pathology; APS Emerging Diseases and Pathogens

**Financial Sponsor:** British Society for Plant Pathology, Brazilian Agricultural Research Corporation, LABEX-USA, USDA APHIS PPQ

1:00 p.m. 205-S. Resistance among US wheat (*Triticum aestivum*) cultivars to the wheat pathotype of *Magnaporthe oryzae*. C. D. CRUZ (1), W. Bockus (1), K. Pedley (2), G. Peterson (2), J. Stack (1), X. Tang (1), B. Valent (1). (1) Kansas State University, Manhattan, KS, U.S.A.; (2) USDA-ARS, Fort Detrick, MD, U.S.A.

1:30 p.m. 206-S. An international perspective on wheat blast. E. DUVEILLER (1), D. Hodson (2), K. Sonder (1), A. von Tiedemann (3). (1) CIMMYT, Mexico D.F., Mexico; (2) Food and Agriculture Organization, Rome, Italy; (3) Georg-August-University of Göttingen, Göttingen, Germany

2:00 p.m. 207-S. A “de novo” origin for the wheat-adapted populations of *Magnaporthe oryzae* in Southern Brazil and levels of gene flow 20 years after the first epidemics. P. C. CERESINI (1), J. L. Maciel (2), L. Kohn (3), M. Levy (4), B. A. McDonald (5). (1) UNESP University of Sao Paulo State - Campus de Ilha Solteira, Ilha Solteira, Brazil; (2) EMBRAPA Trigo, Passo Fundo, Brazil; (3) University of Toronto, Mississauga, ON, Canada; (4) Purdue University, Dept. of Biological Sciences, West Lafayette, IN, U.S.A.; (5) ETH Zurich - Swiss Federal Institute of Technology, IBZ - Institute of Integrative Biology - Plant Pathology, Zurich, Switzerland

2:30 p.m. Break

2:45 p.m. 208-S. Risk mapping wheat blast potential in Brazil.

- J. C. FERNANDES (1), W. Pavan (2). (1) Embrapa, Passo Fundo, Brazil; (2) University of Passo Fundo, Passo Fundo, Brazil
- 3:15 p.m. 209-S. Cellular and molecular defence responses of wheat to *Magnaporthe* species. H. A. TUFAN (1), G. R. McGrann (1), R. MacCormack (1), L. A. Boyd (1). (1) John Innes Centre, Norwich, United Kingdom
- 3:45 p.m. Discussion

## **ORAL TECHNICAL SESSIONS**

### **Entomology & Insect Vectors**

1:00 – 3:30 p.m.; 317B

**Section:** Entomology

**Moderator:** Robin Ross, Acadian Sea Plants Limited, Monroe, NC, U.S.A.

1:00 p.m. 132-O. Further spread of and domination by *Bemisia tabaci* biotype Q on field crops in China. Y. ZHANG (1), H. Pan (1). (1) Institute of Vegetables and Flowers, Beijing, PRC Peoples Rep of China

1:15 p.m. 133-O. Overseas migration affects the status of insecticide resistance in domestic populations of the small brown planthopper, *Laodelphax striatellus*. S. SANADA-MORIMURA (1), S. Sakamoto (2), R. Ohtsu (3), A. Otuka (1), M. Matsumura (1). (1) National Agricultural Research Center for Kyushu Okinawa Region, Koshi, Japan; (2) Kumamoto Prefectural Agricultural Research Center, Koshi, Japan; (3) Nagasaki Plant Protection Station, Isahaya, Japan

1:30 p.m. 134-O. Resistance selection and risk assessment of fenpropidrin against *Panonychus citri* (Acari: Tetranychidae). J. WANG (1), H. He (1), W. Dou (1), H. Liu (1), Z. Zhao (1). (1) Southwest University, Chongqing, Peoples Rep of China

1:45 p.m. 135-O. A commercial extract of the brown seaweed *Ascophyllum nodosum* suppresses thrips in peppers, cucumbers, and hass avocados. W. Neily (1), D. Holden (2), R. E. ROSS (3). (1) Acadian Seaplants Limited, Clemensport, NS, Canada; (2) Holden Research and Consulting, Camarillo, CA, U.S.A.; (3) Acadian Sea Plants Limited, Monroe, NC, U.S.A.

2:00 p.m. 136-O. Transmission of the opportunistic cotton (*Gossypium hirsutum* L.) boll pathogen *Pantoea agglomerans* by the brown stink bug (*Euschistus servus* Say). E. G. MEDRANO (1), J. F. Esquivel (2), A. A. Bell (1). (1) USDA-ARS Cotton Pathology Research Unit, College Station, TX, U.S.A.; (2) USDA-ARS Areawide Pest Management Research Unit, College Station, TX, U.S.A.

2:15 a.m. 137-O. Effect of barley chromosome addition to wheat on the preference and performance of the migratory locust *Locusta migratoria* (Orthoptera: Acrididae). M. TOKUDA (1), S. Tanaka (2), K. Harano (2), K. Kawaura (3), Y. Ogihara (3). (1) Kyushu University, Fukuoka, Japan; (2) National Institute of Agrobiological Sciences at Ohwashi, Tsukuba, Japan; (3) Kihara Institute for Biological Research, Yokohama City University, Yokohama, Japan

2:30 p.m. Break

*Oral Technical Sessions continued*

- 2:45 p.m. 139-O. Seasonal variation of '*Candidatus Liberibacter asiaticus*' in citrus branches and in vector, *Diaphorina citri*, in central Florida sweet orange groves. V. PARKUNAN (1), T. Ebert (1), N. Wang (1), M. Rogers (1), M. Dewdney (1). (1) University of Florida Citrus Research and Education Center, Lake Alfred, FL, U.S.A.
- 3:00 p.m. 140-O. *Raspberry latent virus* a plant reovirus that is aphid transmitted in a replicative persistent manner. D. F. QUITO-ALVA (1), R. R. Martin (2). (1) Oregon State University, Corvallis, OR, U.S.A.; (2) USDA ARS, Corvallis, OR, U.S.A.
- 3:15 p.m. 141-O. Localization of *Banana bunchy top virus* within the aphid vector, *Pentalonia nigronervosa*, as revealed by immunofluorescence, TEM, and PCR assays. A. Bressan (1), S. WATANABE (2). (1) University of Hawaii, Honolulu, HI, U.S.A.
- Molecular Biology of Bacteria & Nematodes**
- 1:00 – 4:00 p.m.; 317A
- Section:** Molecular/Cellular/Plant-Microbe Interactions
- Moderator:** Jonathan Jacobs, University of Wisconsin, Madison, WI, U.S.A.; Leonard Nunney, University of California-Riverside, Riverside, CA, U.S.A.
- 1:00 p.m. 142-O. Comparative genomic analysis of *Xanthomonas axonopodis* pv. *citrumelo* strain FL-1195 and closely related bacteria. N. JALAN (1), V. Aritua (1), N. Wang (2). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 1:15 p.m. 143-O. Identification of genes involved in biofilm formation using an EZ-Tn5 mutant library of *Xanthomonas citri* subsp. *citri* strain 306. J. LI (1), N. Wang (2). (1) University of Florida, Lake Alfred, FL, U.S.A.; (2) Citrus Research and Education Center, Dept. of Microbiology and Cell Science, University of Florida, Lake Alfred, FL, U.S.A.
- 1:30 p.m. 144-O. Genome-wide identification of virulence factors of citrus canker pathogen *Xanthomonas citri* subsp. *citri* using a transposon mutagenesis strategy. Q. YAN (1), N. Wang (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 1:45 p.m. 145-O. Functional characterization of the PidS/PidR two-component regulatory system of *Burkholderia glumae*. H. S. KARKI (1), I. K. Barphagha (1), J. H. Ham (1). (1) Louisiana State University, Baton Rouge, LA, U.S.A.
- 2:00 p.m. 146-O. The host-specific virulence activity of *Ralstonia solanacearum* type three effector PopS. J. M. JACOBS (1), A. Milling (1), B. Remenant (1), C. Allen (1). (1) University of Wisconsin, Madison, WI, U.S.A.
- 2:15 p.m. 147-O. Characterization of the *occF* gene associated with antifungal activity of occidiofungin produced by *Burkholderia contaminans* strain MS14. K. Chen (1), L. Smith (2), A. Liu (1), A. Ravichandran (2), G. Gu (1), S. M. Baird (1), S. LU (1). (1) Mississippi State University, Mississippi State, MS, U.S.A.; (2) Texas A&M University, College Station, TX, U.S.A.
- 2:30 p.m. Break
- 2:45 p.m. 148-O. Understanding cellular and molecular interactions between the rice blast fungus and a putative biocontrol bacterium. S. MATHIONI (1), J. Caplan (2), N. Patel (3), K. J. Czymmek (1), R. F. Sullivan (4), D. Y. Kobayashi (3), N. M. Donofrio (1). (1) University of Delaware, Newark, DE, U.S.A.; (2) Delaware Biotechnology Institute, Newark, DE, U.S.A.; (3) Rutgers University, New Brunswick, NJ, U.S.A.; (4) Aberdeen Proving Ground (U.S. Army), Aberdeen, MD, U.S.A.
- 3:00 p.m. 149-O. Homologous recombination and the invasion of a new plant host by the pathogenic bacterium, *Xylella fastidiosa*. L. NUNNEY (1). (1) University of California-Riverside, Riverside, CA, U.S.A.
- 3:15 p.m. 150-O. Adapting synthetic gene circuits for plant-based detection of pathogen indicators: A test case. L. R. TRIPPLETT (1), K. J. Morey (1), K. D. Albrecht (1), M. Ionescu (2), J. E. Leach (1), S. E. Lindow (2), N. A. Tisserat (1), J. I. Medford (1). (1) Colorado State University, Fort Collins, CO, U.S.A.; (2) University of California-Berkeley, Berkeley, CA, U.S.A.
- 3:30 p.m. 151-O. Root-knot nematode genomes encode suites of plant peptide hormone mimics. P. M. DIGENNARO (1), E. H. Scholl (1), J. P. Cromer (1), C. H. Opperman (1), D. M. Bird (1). (1) North Carolina State University, Raleigh, NC, U.S.A.
- 3:45 p.m. 152-O. Innate response in tissue-cultured *Anthurium andraeanum* against *Radopholus similis*. Y. MAKIMOTO (1), B. Sipes (1). (1) University of Hawaii at Manoa, Honolulu, HI, U.S.A.
- Pathogen Population Genetics**
- 1:00 – 4:15 p.m.; 318AB
- Section:** Epidemiology/Ecology/Environmental Biology of Pathogens
- Moderators:** Kendra Baumgartner, USDA ARS, Davis, CA, U.S.A.; Kirk Broders, University of New Hampshire, Durham, NH, U.S.A.
- 1:00 p.m. 153-O. Diversity of the mating type locus in *Sclerotinia sclerotiorum* in relation to formation of apothecia. P. CHITRAMPALAM (1), P. Inderbitzin (1), K. V. Subbarao (1). (1) University of California, Davis, CA, U.S.A.
- 1:15 p.m.  154-O. Genotypic diversity of *Verticillium dahliae* impacting potato and mint. J. K. DUNG (1), T. L. Peever (1), D. A. Johnson (1). (1) Washington State University, Pullman, WA, U.S.A.
- 1:30 p.m. 155-O. Development of microsatellite markers for population genetic analysis of *Waitea circinata* var. *circinata*. E. N. NJAMBERE (1), F. Wong (2), B. B. Clarke (1), N. Zhang (1). (1) Rutgers University, New Brunswick, NJ, U.S.A.; (2) University of California, Riverside, Riverside, CA, U.S.A.
- 1:45 p.m. 156-O. Effects of plant growth regulators on a DMI-insensitive *Sclerotinia homoeocarpa* population. K. Campbell-Nelson (1), J. Popko (1), G. JUNG (1). (1) University of Massachusetts, Amherst, MA, U.S.A.
- 2:00 p.m. 157-O. Two newly detected populations of *Fusarium graminearum* in the United States. L. R. GALE (1), E. A. Milus (2), S. K. Stangeland (1), M. W. Haas (1), H. C. Kistler (3). (1) University of Minnesota, St. Paul, MN, U.S.A.; (2) University of Arkansas, Fayetteville, AR, U.S.A.; (3) USDA ARS - Cereal Disease Lab, St. Paul, MN, U.S.A.
- 2:15 p.m. **Pacific Division Talk** 158-O. Fusarium head blight in southeastern Idaho. K. M. BISSONNETTE (1), J.

- M. Marshall (1). (1) University of Idaho, Idaho Falls, ID, U.S.A.  
 2:30 p.m. Break  
 2:45 p.m. **Pacific Division Talk** 159-O. Genetic diversity and population differentiation of *Sclerotinia sclerotiorum* collected from canola in China and in United States. R. N. ATTANAYAKE (1), D. H. Jiang (2), M. L. del Río (3), W. Chen (4). (1) Washington State University, Pullman, WA, U.S.A.; (2) Huazhong Agricultural University, Wuhan, Peoples Rep of China; (3) North Dakota State University , Fargo, ND, U.S.A.; (4) USDA - ARS, Pullman, WA, U.S.A.  
 3:00 p.m. 160-O. Clonal and sexual dispersal of *Armillaria mellea* in an ornamental landscape. R. TRAVADON (1), P. Fujiyoshi (2), M. E. Smith (3), G. W. Douhan (4), D. M. Rizzo (1), K. Baumgartner (2). (1) University of California, Davis, CA, U.S.A.; (2) USDA-ARS, Davis, CA, U.S.A.; (3) Duke University, Durham, NC, U.S.A.; (4) University of California, Riverside, CA, U.S.A.  
 3:15 p.m. 161-O. The genetic structure of *Pseudoperonospora cubensis* global populations. L. QUESADA-OCAMPO (1), L. Granke (1), J. Olsen (1), H. Gutting (1), F. Runge (2), M. Thines (2), A. Lebeda (3), M. Hausbeck (1). (1) Michigan State University, East Lansing, MI, U.S.A.; (2) University of Hohenheim, Hohenheim, Germany; (3) Palacky University in Olomouc, Faculty of Science, Dept. of Botany, Olomouc-Holice, Czech Republic  
 3:30 p.m. 162-O. Population genetic structure of *Phytophthora cinnamomi* associated with Phytophthora root rot of avocado (*Persea americana*) within California. D. PAGLIACCIA (1), B. McKee (1), E. Pond (1), G. W. Douhan (1). (1) University of California-Riverside, Riverside, CA, U.S.A.  
 3:45 p.m. 163-O. Population genetics of *Eutypa lata* in the major grape-growing regions of the world and historical patterns of viticulture. K. BAUMGARTNER (1), R. Travadon (2), P. Rolshausen (3), D. Gubler (2), M. Sosnowski (4), P. Lecomte (5), F. Halleen (6), J. Peros (7). (1) USDA ARS, Davis, CA, U.S.A.; (2) Dept. of Plant Pathology, University of California, Davis, CA, U.S.A.; (3) Dept. of Plant Pathology and Microbiology, University of California, Riverside, CA, U.S.A.; (4) South Australian Research and Development Institute, Adelaide, Australia; (5) INRA, UMR Santé Végétale, Villeneuve d'Ornon, France; (6) ARC Infruitec-Nietvoorbij, Stellenbosch, Rep of South Africa; (7) INRA, UMR DIAPC, Montpellier, France  
 4:00 p.m. 164-O. Population structure of *Ophiognomonia clavigignenti-juglandacearum* reveals multiple introductions of the butternut canker fungus into North America. K. BRODERS (1), L. Barbison (2), G. Boland (2). (1) University of New Hampshire, Durham, NH, U.S.A.; (2) University of Guelph, Guelph, ON, Canada

ISBN 978-0-89054-360-0

**Virus and Virus-Like Diseases of Pome and Stone Fruits**

Edited by  
Ahmed Hadidi, Marina Barba,  
Thierry Candresse, and Wilhelm Jeckmann

**GENOME-ENABLED ANALYSIS OF PLANT-PATHOGEN INTERACTIONS**

Edited by  
Thomas Wolpert, Tomonori Shirasaki, Alan Collmer,  
Kanoya Akimitsu, and Jane Glazebrook

### Shop APS PRESS in the Exhibit Hall!

Sunday .....	4:30 – 6:30 p.m.
Monday .....	9:00 a.m. – 7:00 p.m.
Tuesday .....	7:30 a.m. – 4:30 p.m.
Wednesday .....	8:00 – 11 a.m.

## Growing together

For nearly half a century, Conviron has been helping agricultural researchers advance their science. As a leader in controlled environment systems, our standard and custom solutions can be found in many of the largest and most prestigious corporate, government, and academic institutions around the world. With Conviron as your research partner, you can rest assured that you'll always have solutions tailored to meet your research needs.

For more information on our growing selection of products and services, contact one of our sales representatives today at **1-800-363-6451** or visit us online at [www.conviron.com](http://www.conviron.com)

# POSTERS

## POSTER SCHEDULE AND POSTER TITLES BY CATEGORY

### Poster Viewing Hours

**Sunday, August 7**

12:00 – 3:00 p.m.      Poster Set-up  
4:30 – 8:00 p.m.      Poster Viewing

**Monday, August 8**

7:30 a.m. – 8:00 p.m.      Poster Viewing  
4:00 - 5:30 p.m.      *Even-numbered poster authors present*  
5:30 - 7:00 p.m.      *Odd-numbered poster authors present*

**Tuesday, August 9**

7:30 a.m. – 8:00 p.m.      Poster Viewing

**Wednesday, August 10**

8:00 – 10:00 a.m.      Poster Take-down

### 2011 APS-IPPC Joint Meeting Poster Categories

Poster Categories	Poster numbers	Poster Categories	Poster numbers
<b>Biology of Plant Pathogens</b>		Nematodes	499 – 503
Bacteria - Systematics/Evolution/Ecology	1 – 16	Pathogen - Vector Interactions	504 – 510
Fungi - Systematics/Evolution/Ecology	17 – 51	Phyllosphere/Rhizosphere Microbiology and Ecology	511 – 528
Nematodes - Systematics/Evolution/Ecology	52 – 57	Population Genetics	529 – 552
Phytoplasmas/Spiroplasmas/Fastidious Prokaryotes	58 – 66	Virology	553 – 557
Postharvest Pathology and Mycotoxicology	67 – 75		
Viruses - Systematics/Evolution/Ecology	76 – 90	<b>IPM/Biocontrol/Plant Disease Management</b>	
		Insects/Nematodes	558 – 578
<b>Diseases of Plants</b>		IPM	579 – 586
Crop Loss Assessment	91 – 97	IPM: Biocides and Chemical Control	587 – 615
Disease Detection and Diagnosis	98 – 174	PDM: Field and Row Crops	616 – 630
Diseases - Cereals, Field, and Fiber Crops	175 – 225	PDM: Fruits, Nuts	631 – 682
Diseases - Fruits and Nuts	226 – 261	PDM: GMOS	683 – 688

## BIOLOGY OF PLANT PATHOGENS

### Bacteria: Systematics/Evolution/Ecology

- 1-P Genetic diversity of environmental and clinical strains of the *Enterobacter cloacae* complex determined by multilocus phylogenetic and genome analyses. J. L. HUMANN (1), A. A. Bates (1), J. E. Pena (1), M. Wildung (1), J. C. Drew (2), T. L. Peever (1), D. Main (1), E. Trippett (2), B. K. Schroeder (1). (1) Washington State University, Pullman, WA, U.S.A.; (2) University of Florida, Gainesville, FL, U.S.A.
- 2-P Colonization of tomato seedlings by bioluminescent *Clavibacter michiganensis* subsp. *michiganensis* under different humidity regimes. X. XU (1), G. Rajashekara (1), P. A. Paul (1), S. A. Miller (1). (1) Ohio State University, Wooster, OH, U.S.A.
- 3-P A common scab-resistant potato cultivar is not explained by pathogen growth in soil or window of infectivity. L. A. WANNER (1), X. Qu (2), B. J. Christ (2). (1) USDA ARS, Beltsville, MD, U.S.A.; (2) Pennsylvania State University, University Park, PA, U.S.A.
- 4-P Assembly of the draft genome of *Xanthomonas axonopodis* pv. *dieffenbachiae* strain V108LRUH1, a bioluminescent strain highly virulent on anthurium. G. MARRERO (1), K. L. Schneider (1), A. M. Alvarez (1), G. G. Presting (1). (1) University of Hawaii at Manoa, Honolulu, HI, U.S.A.
- 5-P Diversity and population dynamics of *Xanthomonas axonopodis* pv. *manihotis* in Colombia from 2008 to 2010. C. A. TRUJILLO (1), S. Restrepo (1), C. E. López (2), A. J. Bernal (1). (1) Universidad de Los Andes, Bogotá, Colombia; (2) Universidad Nacional, Sede Bogotá, Bogotá, Colombia
- 6-P RIFdb: An online database for the classification of plant-associated bacteria using the computationally derived RIF marker. K. L. SCHNEIDER (1), G. Marrero (1), A. M. Alvarez (1), G. G. Presting (1). (1) University of Hawaii at Manoa, Honolulu, HI, U.S.A.
- 6a-P Influence of *Pythium aphanidermatum*, *P. irregularare*, and *P. cryptotrichum* on the bacterial community in recycled irrigated water. M. L. BURGOS-GARAY (1), G. W. Moorman (1). (1) Penn State, University Park, PA, U.S.A.
- 7-P PCR-based detection, by use of degenerate primers, of an *EngA* cellulase gene in *Xanthomonas sacchari* from asymptomatic sugarcane. L. Kuykendall (1), F. Davenport (2), J. Y. Shao (3), C. J. MAROON-LANGO (4). (1) National Germplasm Resources Lab & Molecular Plant Pathology Laboratory, USDA ARS, BARC-West, Beltsville, MD, U.S.A.; (2) National Germplasm Resources Lab, USDA ARS, BARC-West, Beltsville, MD, U.S.A.; (3) Molecular Plant Pathology Laboratory, USDA ARS, BARC-West, Beltsville, MD, U.S.A.; (4) USDA APHIS PPQ PHP Plant Germplasm Quarantine Program, Beltsville, MD, U.S.A.
- 8-P A new model for races of *Xanthomonas campestris* pv. *campestris*. A. N. Ignatov (1), E. Mazurin (2), F. Djalilov (2), E. Matveeva (1), D. G. LUSTER (3), N. W. Schaad (3). (1) Russian Research Institute of Phytopathology, Bolshie Vyazemy, Russia; (2) Russian State Agricultural University, Moscow, Russia; (3) USDA, ARS, Foreign Disease-Weed Science Research Unit, Fort Detrick, MD, U.S.A.
- 9-P Generic diversity of antagonistic *Bacillus subtilis* against citrus canker bacteria. T. HUANG (1), C. Chen (1), Y. Lee (1), B. Hwang (2), D. Tzeng (1), K. Tzeng (1). (1) National Chung-Hsing University, Taichung, Taiwan; (2) China Medical University, Taichung, Taiwan
- 10-P Plasmid content of *Erwinia amylovora* isolates from orchards in Washington and Oregon. A. B. Carey (1), P. Pusey (2), T. J. Smith (3), J. E. Loper (4), V. STOCKWELL (1). (1) Oregon State University, Corvallis, OR, U.S.A.; (2) USDA ARS, Wenatchee, WA, U.S.A.; (3) Washington State University, Wenatchee, WA, U.S.A.; (4) USDA ARS, Corvallis, OR, U.S.A.
- 11-P Comparative genomics of *Salmonella enterica* serovar Weltevreden plant and animal isolates. K. Brankatschk (1), T. H. Smits (1), A. Goessmann (2), B. DUFFY (3). (1) Agroscope Changins-Wädenswil ACW, Wädenswil, Switzerland; (2) CeBiTec, University of Bielefeld, Bielefeld, Germany; (3) Swiss Federal Research Station, Wädenswil, Switzerland
- 12-P Expression of the cloned IS53 transposase promoter from *Pseudomonas savastanoi* under stress conditions. T. R. CERVONE (1), S. D. Soby (1). (1) Midwestern University-Arizona, Glendale, AZ, U.S.A.
- 13-P Effect of the localization of *Acidovorax citrulli* in watermelon seeds on pathogen detection. M. Vernaiz (1), B. DUTTA (1), A. Castro Sparks (1), R. Walcott (1). (1) University of Georgia, Athens, GA, U.S.A.
- 14-P *Erwinia tracheiphila* colonization of cantaloupe fruits through flower inoculation. D. Gautam (1), L. MA (1), B. Bruton (2), J. Fletcher (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.; (2) USDA ARS, Lane, OK, U.S.A.
- 15-P A functional 3-hydroxy-2-butanone pathway is required for virulence in *Pectobacterium carotovorum* subsp. *carotovorum*. M. MARQUEZ-VILLAVICENCIO (1), B. Weber (1), R. A. Witherell (1), A. O. Charkowski (1). (1) University of Wisconsin, Madison, WI, U.S.A.
- 16-P Evolution of the '*Ca. Liberibacter asiaticus*' genome for and intracellular lifestyle. J. S. HARTUNG (1), J. Shao (1), L. D. Kuykendall (1). (1) USDA ARS MPPL, Beltsville, MD, U.S.A.

- 162-P Detection of *Pyrenophora teres* in conidia and barley seed by PCR, a technique for rapid diagnosis of infestation. R. T. LARTEY (1), T. Caesar-TonThat (1), K. Ghoshroy (2), R. G. Evans (1), A. J. Caesar (1), S. Hanson (1), U. M. Sainju (1). (1) USDA ARS, Sidney, MT, U.S.A.; (2) Division of Science, Mathematics and Engineering, University of South Carolina, Sumter, SC, U.S.A.
- 163-P Identification of *Fusarium oxysporum* f. sp. *lycopersici* and *Fusarium oxysporum* f. sp. *radicis lycopersici* using specific primer. S. PIRAHESH (1), H. Zamanizadeh (1), S. Rezaee (1), B. Morid (2), S. Hajmansoor (1). (1) Dept. of Plant Pathology, College of Agriculture and Natural Resources, Science and Research Branch, Islamic Azad University, Tehran, Iran; (2) Dept. of Plant Protection, College of Agriculture, Takestan Branch, Islamic Azad University, Takestan, Iran
- 164-P Detection and distribution of root-lesion nematodes (Pratylenchidae) on fruit trees in northeast regions of Iran. A. TALE ZARI (1), F. Khozeini (2), S. Barouti (3), H. Zamanizadeh (1). (1) Dept. of Plant Pathology, College of Agriculture and Natural Resources, Science and Research Branch, Islamic Azad University, Tehran, Iran; (2) Plant Protection Organization, Ministry of Jihad Agriculture, Tehran, Iran; (3) Dept. of

165-P	Nematology Research, Iranian Research Institute of Plant Protection, Tehran, Iran	of <i>E. coli</i> O157:H7 and <i>Salmonella</i> spp. from fresh produce. J. HUR (1). (1) Kangwon National University, Chuncheon, Korea
166-P	Rapid immuno-test combined with magnetic bead technology for on-site detection of <i>Potato leafroll virus</i> . D. Altenbach (1), W. BITTERLIN (1). (1) BIOREBA AG, Reinach BL, Switzerland	Development of a multivariate matrix to trace <i>Clavibacter michiganensis</i> subsp. <i>michiganensis</i> through tomato greenhouse operations. M. L. LEWIS IVEY (1), S. A. Miller (1), F. Baysal-Gurel (1), X. Xu (1), M. E. Bledsoe (2). (1) Ohio State University, Wooster, OH, U.S.A.; (2) Village Farms International, Inc., Heathrow, FL, U.S.A.
167-P	Characterization of <i>Tomato necrotic spot virus</i> (ToNSV), a new <i>Ibarvirus</i> species infecting processing tomatoes in the Central Valley of California. O. BATUMAN (1), L. Chen (1), R. L. Gilbertson (1). (1) University of California, Davis, CA, U.S.A.	Genome-enabled primer design to distinguish geographic origin of <i>Xanthomonas oryzae</i> pvs. <i>oryzicola</i> and <i>oryzae</i> . V. Verdier (1), L. R. TRIPPLETT (1), R. Corral (1), J. E. Leach (1). (1) Colorado State University, Fort Collins, CO, U.S.A.
168-P	Simultaneous detection and differentiation of four sweet potato potyviruses by one-step RT-PCR. F. LI (1), R. Zuo (2), D. Xu (1), J. Abad (3), R. Li (1). (1) USDA-ARS, Beltsville, MD, U.S.A.; (2) Yunnan Agricultural University, Kunming, Peoples Republic of China; (3) USDA-APHIS, Beltsville, MD, U.S.A.	Plant diseases monitoring system based on Web GIS in Jeonnam Province, Korea. S. KO (1), Y. Lee (2), B. Kang (3), D. Choi (3), D. Kim (3), H. Kim (3), I. Oh (4), H. Shim (5). (1) Jeonnam Agricultural Research and Extension Services, Jeonnam Province, Korea; (2) Rural Development Administration, Suwon, Korea; (3) Jeollanamdo Agricultural Research and Extension Services, Naju, Korea; (4) National of Crop Science, Suwon, Korea; (5) National Academy of Agricultural Science, Suwon, Korea
169-P	Nuclear magnetic resonance for nondestructive imaging of belowground damage caused by <i>Heterodera schachtii</i> and <i>Rhizoctonia solani</i> on sugar beet. C. Hillnhütter (1), R. SIKORA (1), E. Oerke (1), D. van Dusschoten (2). (1) Institute of Crop Science and Resource Conservation (INRES), Bonn, Germany; (2) ICG-3: Phytosphere, Jülich, Germany	Identification of phytopathogenic fungi associated with giant miscanthus in Mississippi. M. GILLEY (1), M. Tomaso-Peterson (1). (1) Mississippi State University, Mississippi State, MS, U.S.A.
170-P	Multiplex detection of <i>Phytophthora</i> : Padlock probe-based universal detection multiplex array (PUMA). P. J. BONANTS (1), K. Gaszczyk (2), O. Mendes (1), E. Verstappen (1), C. D. Schoen (1). (1) Plant Research International, Wageningen, Netherlands; (2) Forest Research Institute, Raszyn, Poland	Proteins associated with aflatoxin-resistance are identified and characterized towards candidacy for breeding markers. R. BROWN (1), Z. Chen (2), M. Warburton (3), M. Luo (4), A. Menkir (5), A. Fakhoury (6), D. Bhatnagar (1). (1) USDA ARS SRRC, New Orleans, LA, U.S.A.; (2) Louisiana State University, Baton Rouge, LA, U.S.A.; (3) USDA-ARS, Mississippi State, MS, U.S.A.; (4) Louisiana State University Agricultural Center, Baton Rouge, LA, U.S.A.; (5) International Institute of Tropical Agriculture, Ibadan, Nigeria; (6) Southern Illinois University, Carbondale, IL, U.S.A.
171-P	Evaluation and adaptation of CANARY technology for rapid detection of plant pathogens. Z. LIU (1), K. Rappaport (1), H. Bowman (1), E. Twieg (1), V. Mavrodieva (1), L. Levy (1). (1) USDA-APHIS-PPQ-CPHST-NPGBL, Beltsville, MD, U.S.A.	★ <small>APS Foundation Awardee</small> The role of mycotoxins produced by <i>Fusarium verticillioides</i> and <i>Fusarium graminearum</i> in maize seedling infection. T. BRUNS (1), R. Proctor (2), G. Munkvold (1). (1) Iowa State University, Ames, IA, U.S.A.; (2) USDA, Peoria, IL, U.S.A.
171a-P	Validation of real-time PCR assays for bioforensic detection of model plant pathogens. M. James (1), T. Blagden (1), I. Moncrief (1), J. P. Burans (2), K. Schneider (2), J. FLETCHER (1). (1) Dept. of Entomology and Plant Pathology, Oklahoma State University, Stillwater, OK, U.S.A.; (2) National Biodefense Analysis and Countermeasures Center, Fort Detrick, MD, U.S.A.	Fungicide seed treatments to manage seedling blight of faba bean in Alberta, Canada, 2010. K. CHANG (1), S. HWANG (1), R. Conner (2), B. Gossen (3), S. Strelkov (4), D. McLaren (5), G. Turnbull (1). (1) Alberta Agriculture & Rural Development, Edmonton, AB, Canada; (2) Agriculture & Agri-Food Canada, Morden, AB, Canada; (3) Agriculture & Agri-Food Canada, Saskatoon, SK, Canada; (4) University of Alberta, Edmonton, AB, Canada; (5) Agriculture & Agri-Food Canada, Brandon, MB, Canada
171b-P	Establishment of a foundational federal-academic partnership for the enhancement of forensic plant pathology. T. Blagden (1), K. Schneider (2), J. Burans (2), M. James (1), I. Moncrief (1), J. FLETCHER (1). (1) Dept. of Entomology and Plant Pathology, Oklahoma State University, Stillwater, OK, U.S.A.; (2) National Biodefense Analysis and Countermeasures Center, Fort Detrick, MD, U.S.A.	Impact of clubroot resistance on root hair infection, disease severity, and growth of canola in soil inoculated with <i>Plasmodiophora brassicae</i> . S. HWANG (1), H. U. Ahmed (1), Q. Zhou (1), S. E. Strelkov (2), B. D. Gossen (3), G. Peng (3), G. D. Turnbull (1). (1) Alberta Agriculture and Rural Development, Edmonton, AB, Canada; (2) University of Alberta, Edmonton, AB, Canada; (3) Agriculture & Agri-Food Canada Research Centre, Saskatoon, SK, Canada
172-P	Development of a PCR-based assay for QoI resistance monitoring in the pecan scab pathogen, <i>Fusicladium effusum</i> . H. F. Avenot (1), K. J. Lewis (2), T. B. Brenneman (2), K. L. STEVENSON (2). (1) University of Georgia, Griffin, GA, U.S.A.; (2) University of Georgia, Tifton, GA, U.S.A.	Impact of nitrogen rate and variety selection on disease
173-P	Multiplex PCR assay for the simultaneous detection

- 404-P Susceptibility to nucleopolyhedrovirus and mitochondrial DNA sequence variation among different geographic populations of *Ectropis oblique* Pount. Q. XIAO (1), Y. Xi (1), J. Fu (1), K. Yin (1). (1) Tea Research Institute of China, Hangzhou, Peoples Republic of China
- 405-P Green leaf volatile-induced direct defenses against insect herbivores. J. ENGELBERTH (1), M. Engelberth (1), F. Contreras (1), N. White (1). (1) University of Texas, San Antonio, TX, U.S.A.
- 406-P WITHDRAWN
- 407-P The effects of temperature on the development of *Amblyseius barkeri* (Hughes) (Acar:Phytoseiidae). H. LIU (1), J. Wang (2), Z. Wang (2). (1) Southwest University, Chongqing, Peoples Republic of China; (2) College of Plant Protection, Southwest University, Chongqing, Peoples Republic of China
- 408-P Synergy in biorational insecticides used on collard greens, *Brassica oleracea*, infested with diamondback

- moth, *Plutella xylostella*. M. C. FLANERY (1), H. O. Sintim (1), C. W. Raczkowski (1), B. N. Dingha (1), L. E. Jackai (1). (1) North Carolina Agricultural and Technical State University, Greensboro, NC, U.S.A.
- 409-P Efficacy of silk channel injections with insecticides for management of Lepidopteran pests of sweet corn. A. N. SPARKS (1), L. Gadal (2), X. Ni (3). (1) University of Georgia Cooperative Extension, Tifton, GA, U.S.A.; (2) Monsanto-Dekalb, Montpellier, France; (3) USDA-ARS, Crops Genetics and Breeding Research Unit, Tifton, GA, U.S.A.
- 410-P Comparative studies of acetylcholinesterase purified from various field populations of *Bactrocera dorsalis* (Diptera: Tephritidae). X. Wang (1), G. Shen (1), W. DOU (1), Z. Zhao (1), J. Wang (1). (1) Southwest University, Chongqing, Peoples Republic of China
- 411-P Cultural control of maize wallaby-ear symptom: Damage avoidance by earlier planting of forage maize. K. MATSUKURA (1), M. Matsumura (1). (1) National Agricultural Research Center for Kyushu Okinawa Region, Koshi, Kumamoto, Japan
- 412-P Development of mtCOI PCR primers with 5' AT-rich flaps for rapid identification of high-consequence *Bemisia tabaci*. S. ANDREASON (1), J. Brown (2), J. Fletcher (1), F. Ochoa-Corona (1), A. Wayadande (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.; (2) The University of Arizona, Tucson, AZ, U.S.A.
- 413-P Insecticidal activity of cantharidin against *Plutella xylostella* and its toxicological mechanism in Lepidopteran cells. W. JINZHONG (1), M. Linlin (2), Z. Zhiyong (3), S. Shuling (2), Z. Minzhao (2), Z. Aihuan (2), Z. Pengfei (2), H. Shaodong (2). (1) Beijing University of Agriculture, Beijing Key Laboratory of New Technology of Agricultural Application, Beijing, Peoples Republic of China; (2) College of Plant Science and Technology, Beijing University of Agriculture, Beijing, Peoples Republic of China; (3) Beijing Key Laboratory of New Technology of Agricultural Application, Beijing University of Agriculture, Beijing, Peoples Republic of China
- 414-P Accessing phosphoglucose isomerase: A gene with potential links to fitness and invasibility of the leafroller *Epiphyas postvittana* (Lepidoptera). S. HE (1), K. F. Armstrong (2). (1) Yunnan Agricultural University, Kunming, Peoples Republic of China; (2) Bio-protection Research Centre, Lincoln University, Christchurch, New Zealand
- 414a-P Identification and differentiation of gall midge species from West Africa. F. NWILENE (1), A. Onasanya (1), A. Togola (1), M. Ukwungwu (2), A. Hamadoun (3), D. Dakouo (4), N. Woin (5), B. Malick (4), S. Nacro (4), C. James (6). (1) Africa Rice Center, Cotonou, Benin; (2) National Cereals Research Institute (NCRI), Nigeria; (3) IER/CRRA, Sikasso, Mali; (4) INERA Station de Farako-Ba, Bobo-Dioulasso, Burkina Faso; (5) Institut de Recherche Agricole pour le Développement (IRAD), Cameroon; (6) Rokupr Rice Research Station, Freetown, Sierra Leone
- 415-P Pesticidal activities of *Hyptis suaveolens* in pest management. O. O. OLOTUAH (1). (1) Adekunle Ajasin University, Akungba-Akoko, Nigeria
- 416-P Characterizing whitefly species and/or biotypes vectoring geminiviruses on peppers in Indonesia.

417-P	S. RAMASAMY (1), Y. Hsu (1), M. Lin (1), A. Dibiyantoro (2). (1) AVRDC-The World Vegetable Center, Shanhua, Taiwan; (2) AVRDC-The World Vegetable Center, Kota Tegal, Indonesia	
418-P	Effect of alternative products on mortality of adults of citrus black fly <i>Aleurocanthus woglumi</i> Ashby, 1915 on leaves of orange trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
419-P	Effect of concentrations of detergent on mortality of adults of citrus black fly <i>Aleurocanthus woglumi</i> Ashby, 1915 on leaves of orange trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
420-P	Efficiency of concentrations of detergent on mortality of adults of citrus black fly <i>Aleurocanthus woglumi</i> on leaves of tangerine trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
421-P	Efficiency of concentrations of orange peel oil on mortality of adults of citrus black fly <i>Aleurocanthus woglumi</i> on leaves of tangerine trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
422-P	Effect of concentrations of orange peel oil on mortality of adults of citrus black fly <i>Aleurocanthus woglumi</i> Ashby, 1915 on leaves of orange trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
423-P	Effect of alternative products on mortality of 4th instar larvae (pupas) of citrus black fly <i>Aleurocanthus woglumi</i> on leaves of orange trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
424-P	Effect of alternative products on mortality of 2nd and 3rd instar larvae of citrus black fly <i>Aleurocanthus woglumi</i> on leaves of orange trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
425-P	Effect of concentrations of orange oil on mortality of 2nd and 3rd instar larvae of citrus black fly <i>Aleurocanthus woglumi</i> on leaves of lemon trees. R. A. CARVALHO (1). (1) EMEPA-PB, João Pessoa, Brazil	
426-P	Development of an electronic-nose technology for the rapid detection and discrimination of subterranean termites within wood in service. A. WILSON (1), C. S. Oberle (1). (1) USDA Forest Service, Stoneville, MS, U.S.A.	
427-P	Seasonal synchrony between pheromone trap catches of the bean bug, <i>Riptortus pedestris</i> , and the timing of invasion into soybean fields. N. ENDO (1), T. Wada (1), R. Sasaki (2). (1) National Agricultural Research Center for Kyushu Okinawa Region, Koshi, Japan; (2) Fuji Flavor Co., Ltd., Hamura, Japan	
428-P	The occurrence and management of brown planthopper, <i>Nilaparvata lugens</i> (Stål), in Korea. Y. SONG (1). (1) Gyeongsang National University, Jinju, South Korea	
429-P	Integration of balanced crop nutrition and chlorpyrifos in management of coffee berry borer, <i>Hypothenemus hampei</i> (Coleoptera: Scolytidae) in Kenya. H. M. MUGO (1). (1) Coffee Research Foundation, Ruiru, Kenya	
430-P	Red palm weevil, <i>Rhynchophorus ferrugineus</i> (Olivier), the worst invasive pest of palms. A. M. AJLAN (1), K. A. Alhudaib (1), J. R. Faleiro (2), K. S. Abdulsalam (1). (1) King Faisal University, Hofuf, Saudi Arabia;	
431-P	(2) FAO Project, National Date Palm Research Centre, King Faisal University, Hofuf, Saudi Arabia Radar observations of the migration of <i>Nilaparvata lugens</i> S. (Delphacidae) in southern China. C. JIANG (1), D. Cheng (1). (1) State Key Laboratory of Biology of Plant Disease and Insect Pests, Institute of Plant Protection, Chinese Academy of Agricultural Sciences, Beijing, Peoples Republic of China	
432-P	Analysis on population sources of the first generation <i>Loxostege sticticalis</i> L. (Lepidoptera: Pyralidae) moth in China. Y. Zhang (1), L. WEN (2), D. Cheng (1). (1) State Key Laboratory for Biology of Plant Disease and Insect Pests, Institute of Plant Protection, Chinese Academy of Agricultural Sciences, Beijing, Peoples Republic of China; (2) Institute of Plant Protection, Chinese Academy of Agricultural Sciences, China Society of Plant Protection, Beijing, Peoples Republic of China	
433-P	Gut bacterial communities in the <i>Bactrocera dorsalis</i> and their luring activities on host. H. Wang (1), H. ZHANG (1). (1) Huazhong Agricultural University, Wuhan, Peoples Republic of China	
434-P	House fly regurgitation spots may be a source of <i>E. coli</i> O157:H7 contamination of leafy greens. L. Wasala (1), J. Talley (1), J. Fletcher (1), A. WAYADANDE (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.	
435-P	Grape hosts infested with glassy-winged sharpshooters produce volatile compounds which may attract egg parasitoids. C. WALLIS (1), R. Krugner (1), S. Walsle (1). (1) USDA ARS, Parlier, CA, U.S.A.	
436-P	Effect of barley chromosome addition on the susceptibility of wheat to feeding by gall-inducing leafhopper, <i>Cicadulina bipunctata</i> (Hemiptera: Cicadellidae). S. KUMASHIRO (1), K. Matsukura (2), K. Kawaura (3), M. Matsumura (2), Y. Ogihara (3), M. Tokuda (1). - 486-P Temporal dispersal patterns of *Sclerotinia sclerotiorum* ascospores during canola flowering. I. S. QANDAH (1), L. E. del Rio Mendoza (2). (1) Monsanto Co., Spencer, IA, U.S.A.; (2) North Dakota State University, Fargo, ND, U.S.A.
- 487-P Effect of postinoculation relative humidity on peanut infection by *Sclerotinia minor*. M. J. Brown (1), H. A. MELOUK (2), R. M. Hunger (1). (1) Dept. of Entomology and Plant Pathology, Oklahoma State University, Stillwater, OK, U.S.A.; (2) USDA-ARS, Dept. of Entomology and Plant Pathology, Oklahoma State University, Stillwater, OK, U.S.A.
- 488-P Scale-dependent landscape epidemiology. P. SKELSEY (1). (1) Kansas State University, Manhattan, KS, U.S.A.
- 489-P Systemic resistance phenomena from an evolutionary perspective. G. REYNOLDS (1), T. R. Gordon (1), N. McRoberts (1). (1) University of California, Davis, CA, U.S.A.
- 489a-P Fumigation and fungicide effects and qualitative and quantitative analysis of *Pythium*, *Fusarium*, and *Rhizoctonia* on strawberry roots. B. LIU (1), J. Sun (1), K. Peeden (1), J. Driver (1), F. Louws (1). (1) North Carolina State University, Raleigh, NC, U.S.A.
- 489a-P Early warning method and system for cucumber diseases in solar greenhouses. X. Yang (1), M. LI (1), C. Sun (1), J. Qian (1), Z. Ji (1), C. Zhao (1). (1) China National Engineering Research Center for Information Technology in Agriculture (NERCITA), Beijing, Peoples Republic of China
- 490-P Revisiting flag leaf-based foliar fungicide application thresholds for *Stagonospora nodorum* blotch management in soft red winter wheat. K. T. Willyerd (1), C. Bradley (2), S. Conley (3), P. Esker (3), L. Madden (1), K. Wise (4), P. PAUL (1). (1) Ohio State University, Wooster, OH, U.S.A.; (2) University of Illinois, Urbana, IL, U.S.A.; (3) University of Wisconsin, Madison, WI, U.S.A.; (4) Purdue University, West Lafayette, IN, U.S.A.
- 491-P Effect of UV-A and UV-B on airborne conidia concentrations of *Erysiphe necator* in eastern Washington. H. YAN (1), M. Nelson (1), G. Grove (1). (1) Washington State University, Irrigated Agriculture Research and Extension Center, Prosser, WA, U.S.A.
- 492-P The time-lagged effects on the relationship between weather variables and airborne spore concentration of *Erysiphe necator*. H. YAN (1), Q. Liu (1), M. Nelson (1), G. Grove (1). (1) Washington State University, Irrigated Agriculture Research and Extension Center, Prosser, WA, U.S.A.

**Climate Change**

- 493-P Potential impact of climate change over the occurrence of black spot of papaya in State of the Espírito Santo. W. C. Jesus Junior (1), W. B. MORAES (1), W. B. Moraes (2), F. C. Cosmi (1), R. A. Cecílio (1), F. R. Alves (1). (1) Federal University of Espírito Santo, Alegre, Brazil; (2) State University Paulista "Julio de Mesquita Filho", Alegre, Brazil

- 494-P Impact of global climate change over the geographic distribution of *Ceratocystis fimbriata* of eucalyptus in Brazil. W. C. JESUS JUNIOR (1), W. B. Moraes (1), R. A. Cecílio (1), J. Macedo Pezzopane (1), W. B. Moraes (2). (1) Federal University of Espírito Santo, Alegre, Brazil; (2) State University Paulista "Julio de Mesquita Filho", Alegre, Brazil

- 495-P An analysis of plant disease and vector threats under future climates. K. J. FINLAY (1), J. E. Luck (1), S. Chakraborty (2), F. Constable (3), A. Freeman (4), W. Griffiths (4), G. Hollaway (4), P. Melloy (5), N. Nancarrow (1), P. Trebicki (4). (1) Dept. of Primary Industries Victoria, Melbourne, Australia; (2) CSIRO, Brisbane, Australia; (3) Dept. of Primary Industries, Melbourne, Australia; (4) Dept. of Primary Industries Victoria, Horsham, Australia; (5) University of Queensland, Brisbane, Australia

- 496-P Spatial characterization of favorable climate conditions for soybean rust progress on current and future scenarios in Brazil. R. A. Rodrigues (1), F. X. VALE (2), W. C. Jesus (3), W. B. Moraes (3), E. N. Moreira (4). (1) Universidade Federal de Viçosa, Departamento de Engenharia Agrícola, Viçosa, Brazil; (2) Universidade Federal De Vicos, Vicos, Brazil; (3) Universidade Federal do Espírito Santo, Alegre, Brazil; (4) Universidade Federal de Viçosa, Departamento de Fitopatologia, Vicos, Brazil

- 497-P Use of an integrated system for disease monitoring and forecasting of wheat stripe rust in China. X. LI (1), J. Zeng (2), W. Liu (2). (1) Iowa State University, Ames, IA, U.S.A.; (2) National Agro-Tech Extension and Service Center, Beijing, Peoples Republic of China

**Ecology**

- 498-P Fungal communities on strawberry roots and in soils amended with mustard meal (MM). J. SUN (1), B. Liu (2), K. A. Peeden (2), J. G. Driver (2), F. J. Louws (2). (1) North Carolina State University, Cary, NC, U.S.A.; (2) North Carolina State University, Raleigh, NC, U.S.A.

**Nematodes**

- 499-P Spatial distribution of soybean cyst nematode in research plots. S. POROMARTO (1), L. E. del Rio Mendoza (1), B. D. Nelson (1). (1) Plant Pathology, North Dakota State University, Fargo, ND, U.S.A.
- 500-P Distribution and population density of tea root lesion nematode (*Pratylenchus loosi*) in Iran. A. HOSSEINKHAH CHOSHALI (1), A. Seraji (2), S. Rezaee (1), A. Shirinfekr (2). (1) Dept. of Plant Pathology, College of Agriculture and Natural Resources, Science and Research Branch, Islamic Azad University, Tehran, Iran; (2) Tea Research Institute of Iran, Lahijan, Iran
- 501-P Unavailable
- 502-P Projected distribution and severity of clubroot of canola in the Canadian prairies. T. K. TURKINGTON (1), H. Klein-Gebbinck (2), O. O. Olfert (3), R. M. Weiss (3), D. J. Kriticos (4), H. R. Kutcher (5), K. C. Falk (3), S. E. Strelkov (6). (1) Agriculture & Agri-Food Canada, Lacombe, AB, Canada; (2) Agriculture & Agri-Food Canada, Beaverlodge, AB, Canada; (3) Agriculture & Agri-Food Canada, Saskatoon, SK, Canada; (4) CSIRO Ecosystem Sciences, Canberra, ACT, Australia; (5) Agriculture & Agri-Food Canada, Melfort, SK, Canada; (6) University of Alberta, Edmonton, AB, Canada
- 503-P Role of rhizosphere microbial communities and nematodes in SDS development and/or suppressiveness in soybean cultivated fields. A. Y. SROUR (1), K. Islam (1), S. Mansouri (1), J. Bond (1), L. Leandro (2), D. Malwick (3), A. M. Fakhoury (1). (1) Southern Illinois University, Carbondale, IL, U.S.A.; (2) Iowa State University, Ames, IA, U.S.A.; (3) University of Minnesota, St. Paul, MN, U.S.A.

**Pathogen-Vector Interactions**

- 504-P WITHDRAWN
- 505-P Importance of vector movement on the epidemiology of a complex of mite-transmitted wheat viruses. G. L. HEIN (1), A. R. Stilwell (1), D. Rundquist (1). (1) University of Nebraska, Lincoln, NE, U.S.A.
- 506-P Influence of *Maize mosaic virus* on the fitness and wing morphology of *Peregrinus maidis* (Hemiptera: Delphacidae). C. H. HIGASHI (1), A. Bressan (1). (1) University of Hawaii, Honolulu, HI, U.S.A.
- 507-P Dissecting the mode of transmission of *Maize chlorotic mottle virus* by the corn thrips, *Frankliniella williamsi*. D. CABANAS (1), A. Bressan (1). (1) University of Hawaii, Honolulu, HI, U.S.A.
- 508-P Exploring the insect vector-virus interactome using co-immunoprecipitation coupled to mass spectrometry. S. GRAY (1), M. Cilia (1), K. Howe (1), T. Fish (1), T. Thannhauser (1). (1) USDA ARS, Ithaca, NY, U.S.A.
- 509-P Limited effects of foliar insecticidal treatments on the spread of grapevine leafroll disease. T. Jones (1), M. NITA (2), T. Mekuria (3), R. A. Naidu (3). (1) Virginia Tech, AHS AREC, Winchester, VA, U.S.A.; (2) Virginia Tech, Winchester, VA, U.S.A.; (3) Washington State University, Irrigated Agriculture Research and Extension Center, Prosser, WA, U.S.A.
- 510-P Agent-based model of plant virus-host-vector interactions. B. HADI (1), L. Osborne (1). (1) South Dakota State University, Brookings, SD, U.S.A.

**Phyllosphere/Rhizosphere Microbiology and Ecology**

- 511-P A network of field trials to test the susceptibility of rice mega-varieties to sheath blight. N. F. MAGCULIA (1), S. Savary (1), J. S. Lore (2), J. Kumar (3), S. Singh (4), A. Karthikeyan (5). (1) International Rice Research Institute, Los Baños, Laguna, Philippines; (2) Punjab Agricultural University, Dept. of Plant Pathology, Ludhiana, India; (3) G.B. Pant University of Agriculture and Technology, Dept. of Plant Pathology, Pantnagar, India; (4) Maharashtra Hybrid Seeds Company Limited (Mahyco), Hyderabad, India; (5) Tamil Nadu Agricultural University, Dept. of Plant Pathology, Aduthurai, Tamil Nadu, India
- 512-P Are plant communities shaped by fungal root endophytes? V. REININGER (1), C. R. Grünig (1), T. N. Sieber (1). (1) ETH Zürich, Zürich, Switzerland
- 513-P Fungal and bacterial diversity differ in their responses to fallow period in the Bolivian highlands. L. GOMEZ-MONTANO (1), A. Jumpponen (1), M. A. Gonzales (2), J. Cusicanqui (3), C. Valdivia (4), P. Motavalli (4), M. Herman (1), K. A. Garrett (1). (1) Kansas State University, Manhattan, KS, U.S.A.; (2) Fundacion PROINPA, La Paz, Bolivia; (3) Universidad Mayor de San Andres, La Paz, Bolivia; (4) University of Missouri, Columbia, MO, U.S.A.
- 514-P Competitive interactions between the biocontrol fungus *Trichoderma harzianum* and *Fusarium solani* f. sp. *pisi* in soil. T. Kim (1), G. R. KNUDSEN (1). (1) University of Idaho, Moscow, ID, U.S.A.
- 515-P Sporulation dynamics of *Spilocaea oleagina* and timing of olive leaf spot infection in the orchard. J. L. HENRIQUEZ (1), P. A. Alarcon (1), P. A. Paez (1). (1) University of Chile, Santiago, Chile
- 516-P Suppression of *Fusarium* spp. in tissue culture (TC) banana established in field soils inoculated with commercial biological products. A. M. KAVOO (1), S. Okoth (2), R. Mukhongo (1), E. Mwangi (1), J. Jefwa (1). (1) CIAT-TSBE, Nairobi, Kenya; (2) University of Nairobi, School of Physical and Biological Sciences, Nairobi, Kenya
- 517-P Characterization of the fungal community in the tomato phyllosphere. S. Debenport (1), E. van der Knaap (1), B. MCSPADDEN GARDENER (1). (1) The Ohio State University, OARDC, Wooster, OH, U.S.A.
- 518-P Epiphytic populations and the effect of UV light on *Cladosporium* spp. found on blueberries. B. A. LATORRE (1), H. Chuaqui (1), S. Rojas (1), R. Torres (1), G. A. Diaz (1). (1) Pontificia Universidad Católica de Chile, Santiago, Chile
- 519-P Survival potential of *Phytophthora infestans* sporangia in relation to meteorological factors. M. OLANYA (1), R. Larkin (1), H. Zhongqi (1), S. Jain (2). (1) USDA ARS, Orono, ME, U.S.A.; (2) University of Maine, Orono, ME, U.S.A.
- 520-P Role of soybean seed exudates in cultivar resistance to *Pythium aphanidermatum*. M. V. AVANZATO (1), J. C. Rupe (1). (1) University of Arkansas, Fayetteville, AR, U.S.A.
- 521-P Suppressiveness to *Phytophthora infestans* infection in potato tubers by Andean soils from three provinces of Ecuador. D. Villamarín (1), G. Orquera (1), C. Mogrovejo (1), C. D. Garzon (2), J. Molineros (2),

- 522-P G. A. Forbes (3), A. Koch (1), M. BENITEZ (1). (1) Escuela Politécnica del Ejercito - ESPE, Quito, Ecuador; (2) Oklahoma State University, Stillwater, OK, U.S.A.; (3) International Potato Center, Lima, Peru
- 523-P Characterization of microbial populations from *P. infestans* suppressive Andean soils in Ecuador. G. Orquera (1), C. Mogrovejo (1), D. Villamarín (1), F. Jarrin (2), C. D. Garzon (3), J. Molineros (3), G. A. Forbes (4), A. Koch (1), M. BENITEZ (1). (1) Escuela Politecnica del Ejercito - ESPE, Quito, Ecuador; (2) International Potato Center, Quito, Ecuador; (3) Oklahoma State University, Stillwater, OK, U.S.A.; (4) International Potato Center, Lima, Peru
- 524-P Volatile-mediated plant growth promotion by *Fusarium oxysporum*. V. BITAS (1), S. Kang (1), J. H. Tumlinson (1), K. M. Bitas (1), N. McCartney (1). (1) Pennsylvania State University, University Park, PA, U.S.A.
- 525-P Severity risk spatial model for *Phytophthora* diseases in woody ornamental nurseries in southern middle Tennessee. K. Kilbourne (1), M. T. MMBAGA (2), R. Harrison (1). (1) Tennessee State University, Nashville, TN, U.S.A.; (2) Tennessee State University School of Agriculture and Consumer Sciences, McMinnville, TN, U.S.A.
- 526-P The ectomycorrhizal fungus, *Sebacina vermifera*, imparts drought tolerance to the bioenergy crop switchgrass (*Panicum virgatum* L.). S. R. GHIMIRE (1). (1) The Samuel Roberts Noble Foundation, Ardmore, OK, U.S.A.
- 527-P Effect of microbial diversity on soil fungistasis, disease suppression, and colonization by biological control agents. F. SCALA (1), G. Bonanomi (1), M. Capodilupo (1), M. Cennicola (1), M. Lorito (1). (1) University of Naples "Federico II", Portici, Italy
- 528-P The impact of plant pathogens on post-weed biocontrol restoration. A. CAESAR (1), T. Caesar-Ton That (1). (1) USDA ARS, Sidney, MT, U.S.A.
- 529-P Vegetative compatibility group (VCG) characterization of *Fusarium oxysporum* f. sp. *cubense* in Asia. A. B. MOLINA (1), A. Viljoen (2), W. O'Neil (3), D. Mostert (2), C. Hermanto (4), R. Thangavelu (5), C. Chao (6), N. Masdek (7), V. O. Sinohin (1). (1) Bioversity International, Los Banos, Philippines; (2) University of Stellenbosch, Stellenbosch, Southwest Africa; (3) Agri-Science Queensland, DEEDI, Brisbane, Australia; (4) Indonesian Tropical Fruits Research Institute, Solok, Indonesia; (5) National Research Center for Banana, ICAR, Trichy, India; (6) Taiwan Banana Research Institute, Pintung, Taiwan; (7) Malaysian Agricultural Research Institute, Serdang, Malaysia
- Population Genetics**
- 529-P Genetic diversity of *Fusarium verticillioides* isolated from corn in Iran. M. KARIMI DEHKORDI (1), M. Javan-Nikkhah (2), B. Morid (3), V. Rahjoo (4), S. Hajmansoor (1). (1) Dept. of Plant Pathology, College of Agriculture and Natural Resources, Science and Research Branch, Islamic Azad University, Tehran, Iran; (2) Dept. of Plant Protection, Faculty of Agriculture, University of Tehran, Karaj, Iran; (3) College of Agriculture, Takestan Branch, Islamic Azad University, Takestan, Iran; (4) Maize & Forage Crops Research Dept., Seed & Plant Improvement Institute, Karaj, Iran
- 530-P Analysis of the association between *Fusarium verticillioides* isolates isolated from rice and corn in Iran. M. KARIMI DEHKORDI (1), M. Javan-Nikkhah (2), B. Morid (3), H. Zamanizadeh (1), S. Hajmansoor (1). (1) Dept. of Plant Pathology, College of Agriculture and Natural Resources, Science and Research Branch, Islamic Azad University, Tehran, Iran; (2) Dept. of Plant Protection, Faculty of Agriculture, University of Tehran, Karaj, Iran; (3) Dept. of Plant Protection, College of Agriculture, Takestan Branch, Islamic Azad University, Takestan, Iran
- 531-P Genome-wide identification and characterization of microsatellite markers in *Anisogramma anomala*. G. CAI (1), C. Leadbetter (1), T. Molnar (1), B. I. Hillman (1). (1) Rutgers University, New Brunswick, NJ, U.S.A.
- 532-P Characterization of endophytic microflora colonizing wood tissues of healthy and esca-diseased vines. E. BRUEZ (1), J. Vallance (1), J. Gerbore (1), P. Lecomte (1), L. Guérin-Dubrana (1), P. Rey (1). (1) UMR Santé et Agroécologie du Vignoble 1065, Villenave d'Ornon, France
- 533-P Detection of *Phomopsis sclerotioroides* in commercial cucurbit field soil by a nested time-release PCR-based technique. H. FURUYA (1), S. Ito (2), E. Sato (1), T. Ito (1), T. Toda (1), S. Fuji (1). (1) Dept. of Biological Production Science, Akita Prefectural University, Akita, Japan; (2) Akita Plant Protection Office, Akita, Japan
- 534-P Population structure and genetic diversity of *Sclerotinia minor* from peanut research plots in Oklahoma. P. A. GARRIDO (1), S. Dobhal (1), F. J. Flores (1), C. G. Rodriguez (2), K. Blough (1), H. Melouk (3), C. D. Garzon (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.; (2) Escuela Politecnica del Ejercito, Sangolqui, Ecuador; (3) USDA-ARS, Stillwater, OK, U.S.A.
- 535-P Genetic characterization and distribution of mating type genes in *Sclerotinia homoeocarpa* populations. A. I. PUTMAN (1), I. Carbone (1), L. P. Tredway (1). (1) North Carolina State University, Raleigh, NC, U.S.A.
- 536-P Development and characterization of microsatellite markers for *Sclerotinia homoeocarpa*. A. I. PUTMAN (1), I. Carbone (1), L. P. Tredway (1). (1) North Carolina State University, Raleigh, NC, U.S.A.
- 537-P Genetic diversity and temporal dynamics of *Venturia inaequalis* populations following two apple scab epidemics in Pennsylvania. M. JIMENEZ-GASCO (1), L. Zhang (1), H. K. Ngugi (2). (1) Pennsylvania State University, University Park, PA, U.S.A.; (2) Pennsylvania State University, Biglerville, PA, U.S.A.
- 538-P Molecular identification of *Galactomyces* species and population structure of the two postharvest sour rot pathogens of fruit crops in California. A. McKay (1), H. FORSTER (2), N. Nguyen (1), J. Adaskaveg (1). (1) University of California, Riverside, CA, U.S.A.; (2) University of California, Davis, CA, U.S.A.
- 539-P Diversity of vegetative compatibility groups in Michigan populations of the chestnut blight fungus, *Cryphonectria parasitica*, 1996 to 2009. J. C. Springer (1), M. T. Chansler (2), A. L. Davelos Baines (3),

	A. M. JAROSZ (2). (1) Michigan State University, Lansing, MI, U.S.A.; (2) Michigan State University, East Lansing, MI, U.S.A.; (3) University of Wisconsin, LaCrosse, WI, U.S.A.		HOGG (1), E. V. Chamberlin (1), A. T. Dyer (1). (1) Montana State University, Bozeman, MT, U.S.A.
540-P	Virulence variability and genetic diversity among <i>Cochliobolus sativus</i> isolates recovered from barley and wheat in North Dakota. S. ALI (1), S. Zhong (1), K. D. Puri (1). (1) North Dakota State University, Fargo, ND, U.S.A.	550-P	Investigating the genetic structure of <i>Phytophthora capsici</i> populations. L. QUESADA-OCAMPO (1), L. Granke (1), M. Mercier (1), J. Olsen (1), M. Hausbeck (1). (1) Michigan State University, East Lansing, MI, U.S.A.
541-P	Species diversity, phylogeny and genetic structure of begomovirus populations infecting leguminous weeds in northeastern Brazil. S. J. Silva (1), G. P. Castillo-Urquiza (1), B. T. Hora-Junior (1), I. P. Assunção (2), G. S. Lima (2), G. Pio-Ribeiro (3), E. S. Mizubuti (1), F. M. ZERBINI (1). - 652-P Grower implementation of LAMP PCR to initiate grape powdery mildew fungicide program based on inoculum detection. W. MAHAFFEE (1), G. Grove (2), D. Martin (1), A. Albrecht (3). (1) USDA ARS HCRL, Corvallis, OR, U.S.A.; (2) Washington State University, Irrigated Agriculture Research and Extension Center, Prosser, WA, U.S.A.; (3) Dept. of Botany and Plant Pathology, Oregon State University, Corvallis, OR, U.S.A.
- 653-P Development of loop-mediated isothermal amplification (LAMP) assays for the detection of *Plum pox virus*. Y. Gao (1), M. LI (2), J. Wang (1). (1) Beijing University of Agriculture, Beijing, Peoples Republic of China; (2) Chinese Academy of Inspection & Quarantine, Beijing, Peoples Republic of China
- 654-P Epiphytic yeasts for biocontrol of *Botrytis cinerea* on table grapes cv. Thompson seedless. X. Sepúlveda (1), M. VARGAS (1), N. Zapata (1), J. Berrios (1), L. Zuñiga (1). (1) Universidad de Concepción, Chillán, Chile
- 655-P Siderophore loci in *Agrobacterium vitis* strain F25 are associated with its ability to provide biological control of grape crown gall. S. KAEWNUM (1). (1) Cornell University, Geneva, NY, U.S.A.
- 656-P Antibiosis by *Pantoea agglomerans* biocontrol strain E325 against *Erwinia amylovora* on apple flower stigmas. P. PUSEY (1), V. O. Stockwell (2), C. L. Reardon (3), T. H. Smits (4), B. Duffy (4). (1) USDA ARS, Wenatchee, WA, U.S.A.; (2) Dept. of Botany and Plant Pathology, Oregon State University, Corvallis, OR, U.S.A.; (3) USDA-ARS, The Columbia Plateau Conservation Research Center, Adams, OR, U.S.A.; (4) Swiss Federal Research Station, Agroscope Changins-Wadenwil ACW, Wadenswil, Switzerland
- 657-P Inhibitory effects of *Bacillus amyloliquefaciens* and *Paenibacillus polymyxa* on *Botrytis cinerea* causing gray rot of grapes. J. L. HENRIQUEZ (1), B. K. Schroeder (2), D. Riquelme (1), P. A. Alarcon (1). (1) University of Chile, Santiago, Chile; (2) Washington State University, Pullman, WA, U.S.A.
- 658-P *Pantoea agglomerans* fire blight biocontrol strain-and species-specific real-time PCR tools to monitor environmental impact and behavior in orchards. A.
- BRAUN-KIEWNICK (1), A. Lehmann (1), T. H. Smits (1), B. Duffy (2). (1) Agroscope Changins-Wadenwil ACW, Wadenswil, Switzerland; (2) Swiss Federal Research Station, Wadenswil, Switzerland
- 659-P Powdery mildew biological control agents exhibit endophytic characteristics. L. Mackasmie (1), M. T. MMBAGA (2), R. J. Sauve (1). (1) Tennessee State University, Nashville, TN, U.S.A.; (2) Tennessee State University School of Agriculture and Consumer Sciences, McMinnville, TN, U.S.A.
- 660-P Yearly variation in the development of current season needle necrosis on noble, Nordmann, and Turkish fir Christmas trees in the U.S. Pacific Northwest. G. CHASTAGNER (1), K. Riley (1), C. Landgren (2). (1) Washington State University, Puyallup, WA, U.S.A.; (2) Oregon State University, Aurora, OR, U.S.A.
- 661-P A new endophytic fungus from *Citrus medica* var. *sarcodactylis* and its application on controlling damping-off and anthracnose of *Brassica rapa*. W. CHUNG (1), M. Ho (1), W. Chung (2). (1) National Chung Hsing University, Taichung, Taiwan; (2) Taiwan Seed Improvement and Propagation Station, Taichung, Taiwan
- 662-P Characterization of QoI-resistant isolates in *Alternaria alternata* causing Alternaria brown spot in citrus. B. VEGA (1), D. Liberti (2), P. F. Harmon (2), M. M. Dewdney (1). (1) University of Florida, Lake Alfred, FL, U.S.A.; (2) University of Florida, Gainesville, FL, U.S.A.
- 663-P Survey of *Erwinia amylovora*, causal agent of fire blight, from apple and pear orchards in Utah for streptomycin resistance. C. Nischwitz (1), C. DHIMAN (1). (1) Utah State University, Logan, UT, U.S.A.
- 664-P Evaluation of phosphite to control scab on pecan in the southeastern United States. C. H. BOCK (1), T. B. Brenneman (2), M. W. Hotchkiss (1), B. W. Wood (1). (1) USDA-ARS-SEFTNRL, Byron, GA, U.S.A.; (2) University of Georgia, Tifton, GA, U.S.A.
- 665-P Vermicompost tea for control of *Phytophthora nicotianae* in pineapple. B. S. SIPES (1), G. Taniguchi (1), T. Radovich (1). (1) University of Hawaii at Manoa, Honolulu, HI, U.S.A.
- 666-P Screening taro (*Colocasia esculenta*) for resistance to taro leaf blight (TLB) using a detached-leaf disc bioassay and marker-assisted selection. A. BROWN (1), S. C. Miyasaka (2), M. Shintaku (1). (1) University of Hawaii-Hilo, Hilo, HI, U.S.A.; (2) University of Hawaii-Manoa, Hilo, HI, U.S.A.
- 667-P Detection of *Ralstonia solanacearum* in Hawaiian field soils and evaluation of composts for suppressing pathogen populations. S. A. MOTOMURA (1), A. Read (2), N. Q. Arancon (3), S. C. Miyasaka (4), M. Shintaku (3). (1) University of Hawaii, Hilo, HI, U.S.A.; (2) Monsanto, Cambridge, MA, U.S.A.; (3) University of Hawaii-Hilo, Hilo, HI, U.S.A.; (4) University of Hawaii-Manoa, Hilo, HI, U.S.A.
- 668-P The effect of imazalil on *Colletotrichum gloeosporioides* isolated from avocado (*Persea americana*) fruit. D. NIETO-ANGEL (1), M. A. Cruz-Hernández (1), L. A. Aguilar-Pérez (1), F. M. Lara-Viveros (1), R. García-Velasco (2). (1) Colegio de Postgraduados, Montecillo, Mexico; (2) Universidad Autónoma del Estado de México, Montecillo, Mexico

- 669-P Management of diseased leaves with black sigatoka to reduce the disease severity in banana Grand Nain. M. OROZCO-SANTOS (1), G. Manzo-Sánchez (2), S. Guzmán-González (2), L. Martínez-Bolaños (3), B. Canto-Canché (4). (1) INIFAP, Tecoman, Colima, Mexico; (2) Universidad de Colima-FCBA, Tecomán, Colima, Mexico; (3) Universidad Autónoma Chapingo, Chapingo, Texcoco, Mexico; (4) CICY, Mérida, Yucatán, Mexico
- 670-P Cherry leaf spot disease management in ornamental flowering cherry. J. O. Joshua (1), M. T. MMBAGA (2), L. Mackasmiel (3). (1) Tennessee State University, Nashville, TN, U.S.A.; (2) Tennessee State University Research Center, McMinnville, TN, U.S.A.; (3) Tennessee State University School of Agriculture and Consumer Sciences, McMinnville, TN, U.S.A.
- 671-P  Screening of a Valencia peanut core collection for resistance to *Sclerotinia sclerotiorum*. B. SMYTHE (1), S. Sanogo (1), N. Puppala (1), S. Thomas (1), R. Steiner (1). (1) New Mexico State University, Las Cruces, NM, U.S.A.
- 672-P Management of Sclerotinia blight of peanut in Texas: An integrated approach. J. WOODWARD (1), S. Russell (2), T. Baughman (3). (1) Texas AgriLife Extension Service, Lubbock, TX, U.S.A.; (2) Texas Tech University, Lubbock, TX, U.S.A.; (3) Texas AgriLife Extension Service, Vernon, TX, U.S.A.
- 673-P Studies on *Peanut bud necrosis virus* affecting tomato in India. K. GANDHI (1), V. Pandian (1), S. K. Manoranjitham (1), G. Chandrasekar (1), R. Samiyapan (1), E. I. Jonathan (1), R. A. Naidu (2). (1) Tamil Nadu Agricultural University, Coimbatore, India; (2) Washington State University, Prosser, WA, U.S.A.
- 674-P Functional biodiversity: Study of the raspberry bush—*Rubus idaeus* (Rosaceae). C. HERVE (1), D. Jean Claude (1), P. Richard (2). (1) Chambre d'Agriculture de la Corrèze, Brive, France; (2) Joseph Fourier University, Grenoble, France
- 675-P Industry-wide assessment of methyl bromide alternatives and sting nematode management in Florida strawberry. J. W. NOLING (1), A. W. Schumann (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 676-P Large-scale demonstration trialing of drip fumigants in Florida strawberry. J. W. NOLING (1), M. Cody (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 677-P Effect of bed height and soil amendments on survival of southern highbush blueberry cultivars in *Phytophthora* spp.-infested soils in Mississippi. B. J. SMITH (1). (1) USDA ARS, Southern Horticultural Lab, Poplarville, MS, U.S.A.
- 678-P Micro-biota associated with wild and cultivated strawberry and their potential use as biological control agents for strawberry black root rot. A. TORRES-BARRAGAN (1), P. Tran (1), K. A. Peeden (1), F. J. Louws (1). (1) North Carolina State University, Raleigh, NC, U.S.A.
- 679-P Active manipulation of resident biology to suppress *Macrophomina phaseolina* in strawberry. M. MAZZOLA (1). (1) USDA ARS, Wenatchee, WA, U.S.A.
- 680-P The Strawberry Advisory System: A forecast system for control of anthracnose and Botrytis fruit rots. N. A. PERES (1), S. MacKenzie (1), C. W. Fraisse (2), W. Pavan (2). (1) University of Florida, Wimauma, FL, U.S.A.; (2) University of Florida, Gainesville, FL, U.S.A.
- 681-P Management of strawberry anthracnose fruit rot in North Carolina with reduced fungicide spray schedules. M. E. CARNES (1), M. Rahman (1), F. J. Louws (1). (1) North Carolina State University, Raleigh, NC, U.S.A.
- 682-P Increased strawberry production in Florida over a generation is associated with adoption of favorable arthropod management practices. J. F. PRICE (1). (1) University of Florida, Bradenton, FL, U.S.A.

### PDM: GMOs

- 683-P Establishment of a TMV-based transient expression system for AMPs in plants and their in planta/in vitro activity against compatible pathogens. K. H. SHAH (1), H. Bohlmann (1). (1) Institute of Plant Protection (IPS), University of Natural Resources and Life Sciences, Vienna, Austria
- 684-P Construction and function analysis of *Trichoderma* transformant with *Metarhizium anisopliae* genes against insects. J. CHEN (1). (1) Shanghai Jiaotong University, Shanghai, Peoples Republic of China
- 685-P Generation of broad-spectrum resistance in transgenic tobacco and tomato plants against distinct *Tospovirus* species of different serogroups. J. PENG (1), T. Chen (2), S. Yeh (3). (1) Tainan District Agricultural Research and Extension Station, Council of Agriculture, Tainan, Taiwan; (2) Dept. of Biotechnology, Asia University, Taichung, Taiwan; (3) Dept. of Plant Pathology, National Chung Hsing University, Taichung, Taiwan
- 686-P De novo-generated eIF4E resistance genes protect potato from infection by *Potato virus Y*. S. GRAY (1), J. Cavatorta (2), M. Jahn (3). (1) USDA ARS, Ithaca, NY, U.S.A.; (2) Cornell University, Ithaca, NY, U.S.A.; (3) University of Wisconsin, Madison, WI, U.S.A.
- 687-P *Agrobacterium*-mediated transformation of sugarcane with the anti-apoptotic gene CED-9 confers abiotic stress tolerance. M. F. MOLINA (1), M. D. Molina Risco (1), M. B. Dickman (1). (1) Texas A&M University, College Station, TX, U.S.A.
- 688-P Development of an in vitro multiplication method of sugarcane transgenic lines to improve stress tolerance screening. M. D. MOLINA RISCO (1), M. F. Molina (1), M. B. Dickman (1). (1) Texas A&M University, College Station, TX, U.S.A.

### PDM: Host Resistance

- 689-P Transgenic plants expressing antimicrobial lactoferrin protein are resistant to *Rhizoctonia solani*. D. K. LAKSHMAN (1), T. C. Nguyen (2), J. Han (2), L. C. Galvez (2), A. Mitra (2). (1) USDA ARS, Beltsville, MD, U.S.A.; (2) University of Nebraska, Lincoln, NE, U.S.A.
- 690-P Field resistance of selected banana cultivars against tropical race 4 of *Fusarium oxysporum* f. sp. *cubense* in the Philippines. A. B. MOLINA (1), E. G. Fabregar (2), E. G. Ramillete (2), V. O. Sinohin (1), A. Viljoen (3). (1) Bioversity International, Los Banos, Philippines; (2) Lapanday Fruits Development Corp, Davao, Philippines; (3) University of Stellenbosch, Stellenbosch, Southwest Africa

- 691-P Engineering resistance in cotton by RNAi-mediated silencing of parasitism genes of *Meloidogyne incognita*. N. GOKTE-NARKHEDKAR (1), K. Bhanare (1), P. Nawarkar (1), M. K. Meshram (1). (1) Central Institute for Cotton Research, Nagpur, India
- 692-P Linkage analysis of soybean Phytophthora root rot resistance loci on chromosome 13. A. GUNADI (1), A. Roberts (1), A. Dorrance (1), S. Berry (1). (1) Dept. of Plant Pathology, The Ohio State University, OARDC, Wooster, OH, U.S.A.
- 693-P Identification of quantitative trait loci conferring partial resistance to *Phytophthora sojae* in soybean PI 427106. S. LEE (1), M. Mian (2), H. Wang (3), L. McHale (4), C. Sneller (1), A. Dorrance (3). (1) Dept. of Horticulture and Crop Science, The Ohio State University, Wooster, OH, U.S.A.; (2) Corn and Soybean Unit, USDA-ARS, Wooster, OH, U.S.A.; (3) Dept. of Plant Pathology, The Ohio State University, Wooster, OH, U.S.A.; (4) Dept. of Horticulture and Crop Science, The Ohio State University, Columbus, OH, U.S.A.
- 693a-P Identification of soybean accessions with resistance to Phomopsis seed decay: Joint effort from USDA and university scientists. S. LI (1), P. Chen (2), J. C. Rupe (2), A. Wrather (3), G. Sciumbato (4), J. Smith (1), R. Nelson (5). (1) USDA-ARS, Crop Genetics Research Unit (CGRU), Stoneville, MS, U.S.A.; (2) University of Arkansas, Fayetteville, AR, U.S.A.; (3) University of Missouri, Portageville, MO, U.S.A.; (4) University of Mississippi, Stoneville, MS, U.S.A.; (5) USDA-ARS, Soybean/Maize Germplasm, Pathology, Genetics Research Unit, Urbana, IL, U.S.A.
- 693b-P University of Arkansas Soybean Disease Screening Project. M. J. EMERSON (1), W. S. Monfort (1), A. G. Carroll (1). (1) University of Arkansas, Lonoke, AR, U.S.A.
- 693c-P Mapping partial resistance to *Fusarium graminearum* in 'Conrad' soybean. M. L. ELLIS (1), H. Wang (2), P. A. Paul (2), A. E. Dorrance (2). (1) Ohio State University, Wooster, OH, U.S.A.; (2) Ohio State University, OARDC, Wooster, OH, U.S.A.
- 693d-P Mapping partial resistance to *Pythium irregularare* in the soybean accession PI 424354. M. L. ELLIS (1), P. A. Paul (2), S. K. St. Martin (3), A. E. Dorrance (2). (1) Ohio State University, Wooster, OH, U.S.A.; (2) Ohio State University, OARDC, Wooster, OH, U.S.A.; (3) Ohio State University, Columbus, OH, U.S.A.
- PDM: Ornamentals**
- 694-P Use of real-time and nested PCR to detect *Phytophthora ramorum* in infested nursery container mixes and soils. G. COLBURN (1), S. Jeffers (2). (1) Clemson University, Pendleton, SC, U.S.A.; (2) Clemson University, Clemson, SC, U.S.A.
- 695-P Factors influencing efficacy of plastic shelters for control of bacterial blight of lilac. V. O. STOCKWELL (1), B. T. Shaffer (2), M. D. Henkels (2), J. W. Pscheidt (1), J. E. Loper (2). (1) Oregon State University, Corvallis, OR, U.S.A.; (2) USDA-ARS, Corvallis, OR, U.S.A.
- 696-P Partial saturation of potted ornamentals reduces Pythium root rot on flooded floor greenhouses. W. H. ELMER (1), M. P. Gent (1), R. L. McAvoy (2). (1) The Connecticut Agricultural Experiment Station, New Haven, CT, U.S.A.; (2) University of Connecticut, Storrs, CT, U.S.A.
- PDM: Postharvest Diseases**
- 697-P Effect glucorafano isolated of broccoli florets on the germination of *Colletotrichum gloeosporioides* spores. F. M. Lara-Viveros (1), D. NIETO-ANGEL (1), C. Nava-Diaz (1), L. A. Aguilar-Pérez (1), N. Landero-Valenzuela (1). (1) Colegio de Postgraduados, Montecillo, Mexico
- 698-P Effect of fungicides on the control of postharvest diseases in papaya fruits. M. OROZCO-SANTOS (1), K. García-Mariscal (1), D. Nieto-Angel (2), J. Velázquez-Monreal (1), J. Vázquez-Jiménez (1), M. Robles-González (1). (1) INIFAP, Tecomán, Colima, Mexico; (2) Colegio de Postgraduados, Texcoco, Mexico
- 699-P Phylogenetic background of Japanese *B. cinerea* isolates resistant to benzimidazoles, dicarboximides, and other fungicides. M. FUJIMURA (1), S. Banno (1), I. Yamaguchi (1). (1) Toyo University, Gunma, Japan
- 700-P Effect glucorafano isolated of broccoli florets on the germination of *Rhizopus stolonifer* spores. D. NIETO-ANGEL (1), F. M. Lara-Viveros (1), N. Landero-Valenzuela (1), R. García-Velasco (2), T. H. Rebouças (3). (1) Colegio de Postgraduados, Montecillo, Mexico; (2) Universidad Autónoma del Estado de México, Tenancingo, Mexico; (3) Universidade Estadual do Sudoeste da Bahia, Vitoria da Conquista, BA, Brazil
- 701-P Postharvest control of gray mold of blackberry caused by *Botrytis cinerea* with preharvest applications of fungicides in Michoacan México. A. REBOLLAR-ALVITER (1), O. Roldán-Nestor (2), H. V. Silva-Rojas (3), I. López-Cruz (4), J. Boyzo-Marín (5). (1) Universidad Autónoma Chapingo, Morelia, Michoacan, Mexico; (2) Posgrado en Protección Vegetal, Departamento de Parasitología Universidad Autónoma Chapingo, Chapingo, Mexico; (3) Laboratotio de Biotecnología de Semillas, Colegio de Postgraduados, Montecillo, Texcoco, Mexico; (4) Centro Regional Morelia, Universidad Autónoma Chapingo, Morela, Michoacan, Mexico; (5) Instituto Tecnológico del Valle de Morelia, Morelia, Michoacan, Mexico
- 702-P Cloning glucanase and chitinase genes from antagonistic yeasts for postharvest disease control. M. GULLINO (1), D. Spadaro (1), D. Zhang (1), A. Garibaldi (1). (1) Centro Agroinnova-University of Torino, Grugliasco Torino, Italy
- 703-P Selecting antagonists for control of postharvest brown rot of stone fruits originating from latent infections. W. J. JANISIEWICZ (1), R. S. Pimenta (2), W. M. Jurick II (3). (1) USDA ARS AFRS, Kearneysville, WV, U.S.A.; (2) Universidade Federal do Tocantins (UFT), Palmas, Brazil; (3) Food Quality Laboratory, USDA-ARS, Beltsville, MD, U.S.A.
- PDM: Small Grains**
- 704-P Construction of recombinant fluorescent *Pseudomonas* spp. for suppression of soilborne pathogens. J. ZHANG (1), L. S. Thomashow (2), O. V. Mavrodi (3), D. M. Weller (2), D. V. Mavrodi (3). (1) State Key

- 705-P Laboratory of Agricultural Microbiology, Huazhong Agricultural University, Wuhan, Peoples Republic of China; (2) USDA ARS, Pullman, WA, U.S.A.; (3) Washington State University, Pullman, WA, U.S.A. QTL mapping of resistance genes for eyespot of wheat in *Aegilops longissima*. H. SHENG (1), D. R. See (2), T. D. Murray (1). (1) Plant Pathology, Washington State University, Pullman, WA, U.S.A.; (2) USDA-ARS, Western Wheat Quality Laboratory, Pullman, WA, U.S.A.
- 706-P Resistance to race TTKSK of *Puccinia graminis* f. sp. *tritici* in tetraploid wheat. P. D. OLIVERA FIRPO (1), Y. Jin (2), A. Badebo (3), S. Xu (4), D. Klindworth (4). (1) University of Minnesota, St. Paul, MN, U.S.A.; (2) USDA-ARS Cereal Disease Laboratory and Dept. of Plant Pathology, University of Minnesota, St. Paul, MN, U.S.A.; (3) Ethiopian Institute of Agricultural Research, Debre Zeit, Ethiopia; (4) USDA-ARS, Fargo, ND, U.S.A.
- 707-P Interaction between powdery mildew (*Blumeria graminis*) and triticale (xTriticosecale) in Germany as a model for pathosystem analysis. K. FLATH (1). (1) Julius Kühn-Institut, Federal Research Centre for Cultivated Plants, Kleinmachnow, Germany
- 708-P Continued deployment of moderate resistance to Cephalosporium stripe in Kansas winter wheat cultivars. W. W. BOCKUS (1), M. A. Davis (1), A. K. Fritz (1), J. Martin (2). (1) Kansas State University, Manhattan, KS, U.S.A.; (2) Kansas State University, Hays, KS, U.S.A.
- 709-P Phenotyping *Yr17* resistance in wheat to stripe rust and *Yr17* virulence in *Puccinia striiformis*. E. Milus (1), K. LEE (1). (1) University of Arkansas, Fayetteville, AR, U.S.A.
- 710-P Reduced infection of wheat spikelets inoculated with ascospores of *Gibberella zeae* in the presence of fungal mating pheromone peptides. G. Y. YUEN (1), C. C. Jochum (1), N. W. Gross (2), J. T. English (2), J. F. Leslie (3). (1) University of Nebraska, Lincoln, NE, U.S.A.; (2) University of Missouri, Columbia, MO, U.S.A.; (3) Kansas State University, Manhattan, KS, U.S.A.
- 711-P IPM programs for winter wheat in Oklahoma: A team approach to manage insects, diseases, and weeds. T. A. ROYER (1), K. L. Giles (1), N. C. Elliott (2), R. L. Hunger (1), B. F. Carver (1), J. T. Edwards (1), J. Armstrong (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.; (2) USDA ARS, Stillwater, OK, U.S.A.
- 712-P The impact of fungicide and herbicide timing on barley leaf disease severity, weed management, and crop productivity. T. K. TURKINGTON (1), H. R. Kutcher (2), K. Xi (3), K. N. Harker (1), J. T. O'Donovan (1), E. N. Johnson (4). (1) Agriculture & Agri-Food Canada, Lacombe, AB, Canada; (2) Agriculture & Agri-Food Canada, Melfort, SK, Canada; (3) Alberta Agriculture and Rural Development, Lacombe, AB, Canada; (4) Agriculture & Agri-Food Canada, Scott, SK, Canada
- 713-P Search for the volatiles of *Bacillus cereus* C1L involved in the induction of systemic disease resistance and plant growth promotion. C. Huang (1), H. Yang (1), C. Tsai (1), C. CHEN (1). (1) National Taiwan University, Taipei, Taiwan Republic of China
- 714-P New method for establishing a network of operational warning of Septoria leaf blotch disease in winter wheat. M. EL JARROUDI (1), F. Giraud (2), P. Delfosse (3), L. Kouadio (1), L. Hoffmann (3), H. Maraite (4), B. Tychon (1). (1) Université de Liège, Arlon, Belgium; (2) Staphyt/BIORIZON, Martillac, France; (3) Centre de Recherches Publics Gabriel Lippmann, Belvaux, Luxembourg; (4) Earth & Life Institute, Université Catholique de Louvain (UCL), Louvain-la-Neuve, Belgium
- 715-P Results of long-term trials to control diseases in cereal crops. M. JAHN (1). (1) Julius Kuehn Institute, Federal Research Centre for Cultivated Plants, Kleinmachnow, Germany
- 716-P Efficacy of pre-flag leaf emergence foliar fungicide application for *Stagonospora nodorum* blotch management in soft red winter wheat. K. T. Willyerd (1), C. Bradley (2), S. Conley (3), P. Esker (3), L. Madden (1), K. Wise (4), P. PAUL (1). (1) Ohio State University, Wooster, OH, U.S.A.; (2) University of Illinois, Urbana, IL, U.S.A.; (3) University of Wisconsin, Madison, WI, U.S.A.; (4) Purdue University, West Lafayette, IN, U.S.A.
- 717-P Survival and natural biological control of *Sclerotinia sclerotiorum* sclerotia in alfalfa seed production. L. D. PORTER (1), D. B. Walsh (2), R. A. Boydston (1), K. O'Donnell (3). (1) USDA ARS, Prosser, WA, U.S.A.; (2) Washington State University, Prosser, WA, U.S.A.; (3) USDA-ARS, Peoria, IL, U.S.A.
- 718-P Fungicide application on disease resistant wheat: Is the response what you would expect? B. R. OLSON (1), R. M. Hunger (1), J. T. Edwards (2). (1) Oklahoma State University, Dept. of Entomology and Plant Pathology, Stillwater, OK, U.S.A.; (2) Oklahoma State University, Dept. of Plant and Soil Sciences, Stillwater, OK, U.S.A.
- 719-P Biological control of Fusarium head blight in wheat caused by *Gibberella zeae*—A two-year, multilocation study. G. Y. YUEN (1), C. C. Jochum (1), S. A. Halley (2), L. E. Sweets (3), W. W. Kirk (4), D. A. Schisler (5). (1) University of Nebraska, Lincoln, NE, U.S.A.; (2) North Dakota State University, Langdon Research Extension Center, Langdon, NE, U.S.A.; (3) University of Missouri, Columbia, MO, U.S.A.; (4) Michigan State University, East Lansing, MI, U.S.A.; (5) USDA ARS MWA NCAUR, Peoria, IL, U.S.A.
- 720-P  Ecology of *Bacillus amyloliquefaciens* on wheat florets in relation to biological control of Fusarium head blight. J. CRANE (1), G. Bergstrom (1), D. Gibson (2). (1) Cornell University, Ithaca, NY, U.S.A.; (2) USDA-ARS, Cornell University, Ithaca, NY, U.S.A.
- 721-P Basis for inhibition of *Pyrenophora teres* by *Laetisaria arvalis*, a scanning and transmission electron microscopic study. R. T. LARTEY (1), K. Ghoshroy (2), T. Caesar-Ton That (1), R. G. Evans (1), S. Ghoshroy (3). (1) USDA ARS, Sidney, MT, U.S.A.; (2) Division of Science, Mathematics and Engineering, University of South Carolina, Sumter, SC, U.S.A.; (3) Electron Microscopy Center and Biological Sciences, University of South Carolina, Columbia, SC, U.S.A.
- 722-P Silicon and its interaction with fungicide on the control of anthracnose in susceptible and resistant sorghum lines. R. S. Resende (1), F. A. RODRIGUES (1), R. V.

723-P	Costa (2), D. D. Silva (2). (1) Universidade Federal de Viçosa, Departamento de Fitopatologia, Viçosa, Brazil; (2) Embrapa Milho e Sorgo, Sete Lagoas, Brazil Concentration and cultivar effects on efficacy of ACM941-CL01 biofungicide in controlling Fusarium head blight of wheat. A. XUE (1), Y. Chen (2), H. Voldeng (2), G. Fedak (2). (1) Eastern Cereal and Oilseed Research Centre, Ottawa, ON, Canada; (2) Eastern Cereal and Oilseed Research Centre (ECORC), Agriculture & Agri-Food Canada, Ottawa, ON, Canada	Y. QIYUN (1), X. Wuming (1), Z. Jingxin (1), W. Hui (2), Z. Xiaoyuan (1), C. Zhiqiang (2). (1) Plant Protection Research Institute, Guangdong Academy of Agricultural Sciences, Guangzhou, China, Guangzhou, Peoples Republic of China; (2) National Engineering Research Center of Plant Space-Induced Breeding, South China Agricultural University, Guangzhou, Peoples Republic of China
724-P	Coinoculation of wheat with <i>Triticum mosaic virus</i> and <i>Wheat streak mosaic virus</i> exacerbates loss of fresh and dry matter. E. Z. BYAMUKAMA (1), S. Tatineni (2), G. L. Hein (3), S. N. Wegulo (1). 824-P	Responsiveness of <i>Striga</i> -susceptible and <i>Striga</i> -resistant sorghum genotypes to soil phosphorus and arbuscular mycorrhizal fungi. A. B. LEYTEM (1), J. L. Parke (1). (1) Oregon State University, Corvallis, OR, U.S.A.	834-P	Evaluation of <i>Mycosphaerella polygoni-cuspidati</i> for classical biological control of Japanese knotweed ( <i>Fallopia japonica</i> ). D. KUROSE (1), N. Furuya (2), D. H. Djeddour (3), H. C. Evans (3), S. Tushima (1), K. Tsuchiya (2). (1) National Institute for Agro-Environmental Sciences, Tsukuba, Japan; (2) Kyushu University, Fukuoka, Japan; (3) CABI Europe-UK, Egham, United Kingdom  The SA and ET signaling pathways mediate tomato resistance to bacterial wilt at cool temperatures.
			A. MILLING (1), C. Allen (1). (1) University of Wisconsin, Madison, WI, U.S.A.
825-P	Optimization of RNA isolation and qRT-PCR strategies to monitor microbial gene expression in soil. A. NOVINSKAK (1), V. J. Gadkar (1), M. Filion (1). (1) University of Moncton, Moncton, NB, Canada	835-P	AWR effector proteins from <i>R. solanacearum</i> play a role in virulence and plant recognition. M. SOLÉ (1), O. Mith (2), K. Sohn (3), S. Genin (4), M. Valls (1). (1) Dept. Genètica, Universitat de Barcelona, Barcelona, Spain; (2) Université Paul Sabatier, Toulouse, France; (3) The Sainsbury Laboratory, John Innes Center, Norwich, United Kingdom; (4) Laboratoire des Interactions Plantes Micro-organismes (LIPM), INRA/CNRS, Toulouse, France
826-P	Implication of phenazine-1-carboxylic acid production by <i>Pseudomonas</i> sp. LBUM223 in the biocontrol of <i>S. scabiei</i> causing common scab of potato. T. ARSENEAULT (1), C. Goyer (2), V. J. Gadkar (1), M. Filion (1). (1) University of Moncton, Moncton, NB, Canada; (2) Agriculture & Agri-Food Canada, Fredericton, NB, Canada	836-P	Monitoring behaviors of <i>Ralstonia solanacearum</i> cells by GFP labeling during infection process to plant cells. M. FUJIE (1), R. Isozaki (1), H. Kajita (1), H. Takamoto (1), T. Kawasaki (1), T. Yamada (1). (1) Hiroshima University, Higashi-Hiroshima, Japan
827-P	The plant growth-promoting rhizobacterium <i>Bacillus cereus</i> AR156 induces resistance in <i>Arabidopsis thaliana</i> and tomato. D. NIU (1), H. Liu (1), J. Guo (1). (1) Dept. of Plant Pathology, College of Plant Protection, Nanjing Agricultural University, Nanjing, Peoples Republic of China	837-P	Implication of antibiosis in the biocontrol of <i>Clavibacter michiganensis</i> causing bacterial wilt and canker of tomato by <i>Pseudomonas</i> spp. C. Lanteigne (1), V. J. Gadkar (1), A. Novinskak (1), T. Wallon (2), M. FILION (1). (1) University of Moncton, Moncton, NB, Canada; (2) Université de Sherbrooke, Sherbrooke, QC, Canada
828-P	The effect of phase variation on the interaction of <i>Salmonella enterica</i> sv. <i>typhimurium</i> with tomatoes. W. ZARAGOZA (1), M. Teplitski (1). (1) University of Florida, Gainesville, FL, U.S.A.	838-P	Evaluation of <i>Arabidopsis thaliana</i> as a model host for <i>Xylella fastidiosa</i> . E. ROGERS (1). (1) USDA ARS SJVASC, Parlier, CA, U.S.A.
829-P	High throughput screens reveal <i>Salmonella</i> behaviors required for persistence in tomatoes. M. TEPLITSKI (1), J. Noel (1), M. McClelland (2), E. Creary (1), A. Alagely (1). (1) University of Florida, Gainesville, FL, U.S.A.; (2) University of California, Irvine, CA, U.S.A.	838a-P	PemK toxin encoded by the <i>Xylella fastidiosa</i> IncP-1 plasmid pXF-RIV11 is a ribonuclease. M. LEE (1), E. E. Rogers (1), D. C. Stenger (1). (1) USDA-ARS, Parlier, CA, U.S.A.
830-P	Antimicrobial lipopeptide iturin induce systemic resistance of <i>Arabidopsis thaliana</i> . Y. Kurosawa (1), K. Higuchi (1), E. Miwa (1), K. YOKOTA (1). (1) Tokyo University of Agriculture, Tokyo, Japan	839-P	Characterization of a single chemosensory gene cluster in <i>Xylella fastidiosa</i> Pierce's disease pathogen of grape. D. ATHINUWAT (1), P. Mowery (2), C. Galvani (2), L. Cursino (2), H. C. Hoch (3), T. J. Burr (3). (1) Thammasat University/Dept. of Agricultural Technology, Muang District, Thailand; (2) Hobart & William Smith Colleges/Dept. of Biology, Geneva, NY, U.S.A.; (3) Cornell University/Dept. of Plant Pathology and Plant-Microbe Biology, Geneva, NY, U.S.A.
831-P	Application of bioinformatics to study type III effector signals. N. POTNIS (1), J. F. Figueiredo (1), L. Zhou (1), D. J. Norman (2), J. B. Jones (1). (1) University of Florida, Gainesville, FL, U.S.A.; (2) University of Florida, Apopka, FL, U.S.A.	840-P	The role of lipopolysaccharide in virulence and host specificity of <i>Xylella fastidiosa</i> . J. COLBURN-CLIFFORD (1), M. C. Roper (1). (1) University of California, Riverside, CA, U.S.A.
832-P	Extracellular trapping of bacteria in plant defense responses: Dynamics and specificity. G. CURLANGO-RIVERA (1), Z. Xiong (2), J. O. Kessler (3), M. C. Hawes (4). (1) School of Plant Sciences, University of Arizona, Tucson, AZ, U.S.A.; (2) School of Plant Sciences and BIO5 Institute, University of Arizona, Tucson, AZ, U.S.A.; (3) Dept. of Physics, University of Arizona, Tucson, AZ, U.S.A.; (4) Soil, Water and	841-P	Metabolic profiling of xylem sap from Pierce's disease-resistant and -susceptible grapevines. P. LIU (1), H.

- Lin (2), M. A. Walker (3). (1) China Agricultural University, Beijing, Peoples Republic of China; (2) USDA ARS PWA, Parlier, CA, U.S.A.; (3) University of California, Davis, CA, U.S.A.
- 842-P Proteomic analysis of grapevines in response to *Xylella fastidiosa* infection. H. LIN (1), L. Yang (2), E. L. Civerolo (3), M. A. Walker (4). (1) USDA ARS PWA, Parlier, CA, U.S.A.; (2) Agricultural College, Guangxi University, Nanning, Peoples Republic of China; (3) USDA-ARS, Parlier, CA, U.S.A.; (4) University of California, Davis, CA, U.S.A.
- 843-P Improving PCR-based detection of *Xylella fastidiosa* in blueberry with a cost-effective DNA extraction procedure. R. CHRISTIANO (1), H. Scherm (1). (1) University of Georgia, Athens, GA, U.S.A.
- 844-P Biological characteristics regulated by *algU* in *Xylella fastidiosa*. X. SHI (1), D. A. Cooksey (2). (1) Cornell University, Geneva, NY, U.S.A.; (2) University of California Riverside, CA, U.S.A.
- 845-P *Xylella fastidiosa* infection of grapevines affects host secondary metabolite and defense-related protein levels within xylem. C. WALLIS (1), M. S. Sisterson (1). (1) USDA ARS, Parlier, CA, U.S.A.
- 846-P  Construction of plasmid-based expression vectors for the production of recombinant proteins in *Xylella fastidiosa*. J. WARREN (1), G. Kasun (1), B. Kirkpatrick (1). (1) University of California, Davis, CA, U.S.A.
- 847-P Characterization of orthologs of Ax21 and two, two-component regulatory systems, phoPQ and colRS, in *Xylella fastidiosa*. B. PIERCE (1), S. Han (1), B. Kirkpatrick (1), P. Ronald (1). (1) University of California, Davis, CA, U.S.A.
- 848-P Expression of hemolysin (exotoxin) of '*Candidatus Liberibacter asiaticus*' in citrus using *Citrus tristeza virus* vector. S. HAJERI (1), Y. Duan (2), S. Gowda (1). (1) Citrus Research and Education Center/Institute of Food and Agricultural Sciences, UF, Lake Alfred, FL, U.S.A.; (2) U.S. Horticultural Research Laboratory, Fort Pierce, FL, U.S.A.
- 849-P Metagenomic analysis of '*Candidatus Liberibacter asiaticus*' in naturally populated psyllids (*Diaphorina citri*) using BAC libraries. L. ZHOU (1), C. Armstrong (2), C. A. Powell (3), Y. Duan (2). (1) Horticulture Research Laboratory, Fort Pierce, FL, U.S.A.; (2) USDA-ARS-USHRL, Fort Pierce, FL, U.S.A.; (3) University of Florida, IFAS-IRREC, Fort Pierce, FL, U.S.A.
- 850-P Characterization of the host defense response induced by the flagellin protein of '*Candidatus Liberibacter asiaticus*'. H. Zou (1), Y. DUAN (2), S. Gowda (1), C. A. Powell (3), G. Chen (4). (1) Citrus Research and Education Center, University of Florida, Institute of Food and Agricultural Sciences, Lake Alfred, FL, Lake Alfred, FL, U.S.A.; (2) USDA-ARS-USHRL, Fort Pierce, FL, U.S.A.; (3) University of Florida, IFAS-IRREC, Fort Pierce, FL, U.S.A.; (4) Shanghai Jiaotong University, Dept. of Environment Resources, Shanghai, Peoples Republic of China
- 851-P Comparative analysis of the host response of citrus leaf, stem, and root tissues to infection by '*Candidatus Liberibacter asiaticus*'. A. A. VALENTE (1), N. Wang (2). (1) University of Florida, Lake Alfred, FL, U.S.A.; (2) Citrus Research and Education Center, Dept. of Microbiology and Cell Science, University of Florida, Lake Alfred, FL, U.S.A.
- 852-P A tomato model system to study citrus huanglongbing. K. L. MANJUNATH (1), C. Ramadugu (2), G. Kund (3), J. Trumble (3), R. F. Lee (1). (1) National Clonal Germplasm Repository for Citrus and Dates, USDA-ARS, Riverside, CA, U.S.A.; (2) Dept. of Botany and Plant Sciences, University of California, Riverside, CA, U.S.A.; (3) Dept. of Entomology, University of California, Riverside, CA, U.S.A.
- 853-P Analysis of citrus huanglongbing-associated '*Candidatus Liberibacter*' strains from Pakistan. C. RAMADUGU (1), K. L. Manjunath (2), M. F. Razi (3), I. A. Khan (3), M. Roose (4), R. F. Lee (5). (1) Dept. of Botany and Plant Sciences, University of California, Riverside, CA, U.S.A.; (2) National Clonal Germplasm Repository for Citrus and Dates, USDA-ARS, Riverside, CA, U.S.A.; (3) University of Agriculture, Faisalabad, Pakistan; (4) University of California, Riverside, CA, U.S.A.; (5) National Clonal Repository for Citrus and Dates, USDA-ARS, Riverside, CA, U.S.A.
- 854-P Identification of potential virulence genes of '*Candidatus Liberibacter asiaticus*' differentially expressed in citrus and psyllids, using real-time PCR. A. SREEDHARAN (1), S. Wei (1), N. Wang (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 855-P Production of single chain antibodies against '*Ca. Liberibacter asiaticus*'. Q. Yuan (1), R. Jordan (2), R. H. Bransky (3), O. Minenkova (4), J. HARTUNG (1). (1) USDA ARS MPPL, Beltsville, MD, U.S.A.; (2) USDA ARS FNPRU, Beltsville, MD, U.S.A.; (3) University of Florida, Lake Alfred, FL, U.S.A.; (4) Sigma tau Pharmaceuticals, Rome, Italy
- 856-P Characterization of the DSF-mediated quorum-sensing regulon of *Xanthomonas citri* subsp. *citri*. Y. GUO (1), N. Wang (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 857-P Cassava's immunity suppression mediated by type III effectors of *Xanthomonas axonopodis* pv. *manihotis*. P. A. REYES CALDAS (1), S. Restrepo (1), A. J. Bernal (1). (1) Universidad de Los Andes, Bogotá D.C., Colombia
- 858-P Citrus cybrid response to biotic stress caused by *Xanthomonas citri* subsp. *citri*. M. I. FRANCIS (1), A. Peña (1), J. W. Grosser (1), J. H. Graham (1). (1) University of Florida, Institute of Food and Agricultural Sciences CREC, Lake Alfred, FL, U.S.A.
- 859-P Complete genome sequence of the stone fruit pathogen *Xanthomonas arboricola* pv. *pruni*. J. F. Pothier (1), T. H. Smits (1), J. Blom (2), F. Vorhoelter (2), A. Goessmann (2), A. Puehler (2), B. DUFFY (1). (1) Agroscope Changins-Wädenswil ACW, Wädenswil, Switzerland; (2) CeBiTec, University of Bielefeld, Bielefeld, Germany
- 860-P LuxR homolog XagR of *Xanthomonas axonopodis* pv. *glycines* is solubilized only in the soybean plant and contributes to the infection process. T. CHATNAPARAT (1), S. Prathuangwong (2), M. Ionescu (3), S. E. Lindow (3). (1) Kasetsart University, Chatuchack, Bangkok, Thailand; (2) Kasetsart University, Bangkok, Thailand; (3) University of California, Berkeley, CA, U.S.A.

- 861-P Double *fliD* and *xagP* mutants of *Xanthomonas axonopodis* pv. *glycines* and their roles on host and nonhost plant. W. Chuaboon (1), T. J. BURR (2), S. Prathuangwong (3). (1) Kasetsart University, Chatuchack, Bangkok, Thailand; (2) Cornell University, Geneva, NY, U.S.A.; (3) Kasetsart University, Bangkok, Thailand
- 862-P Early activation of defense genes in kumquat by the citrus canker pathogen. V. J. FEBRES (1), A. A. Khalaf (1), Q. Shi (1), F. G. Gmitter (2), G. A. Moore (1). (1) University of Florida, Gainesville, FL, U.S.A.; (2) University of Florida, Lake Alfred, FL, U.S.A.
- 863-P Comparative host response of grapefruit and alemow to narrow and broad-host-range strains of *Xanthomonas citri* subsp. *citri*. E. G. JOHNSON (1), S. Mony (1), N. Wang (1), J. H. Graham (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 864-P Characterization of the roles of the putative secreted protein-encoding XAC1496 in the growth and pathogenesis of *Xanthomonas citri* subsp. *citri*. X. HU (1), Q. Yan (1), N. Wang (1). (1) University of Florida, Lake Alfred, FL, U.S.A.
- 865-P RpfG interaction in *Xanthomonas axonopodis* pv. *manihotis*. M. RESTREPO BENAVIDES (1), S. Restrepo Restrepo (1), A. J. Bernal Giraldo (1). (1) Universidad de Los Andes, Bogota, Colombia
- 866-P Diversity of TonB-dependent outer-membrane proteins in plant-associated strains of *Pseudomonas fluorescens*. S. L. HARTNEY (1), S. Mazurier (2), P. Lemanceau (2), J. E. Loper (3). (1) Oregon State University, Corvallis, OR, U.S.A.; (2) INRA, Universite de Bourgogne, UMR1229 'Microbiologie du Sol et de l'Environnement', Dijon, France; (3) USDA-ARS HCRL, Corvallis, OR, U.S.A.
- 867-P Endophytic colonization and induced resistance by *Pseudomonas aeruginosa* strain UPMP3. M. WONG (1), S. Hamid (1), S. Meon (1), S. Abdullah (1). (1) Universiti Putra Malaysia, Serdang, Selangor, Malaysia
- 868-P A multifunctional role for the type IV pilus in the bacterial biological control agent *Lysobacter enzymogenes*. N. Patel (1), M. Cornejo (1), D. Lambert (1), A. Craig (1), B. I. Hillman (1), D. Y. KOBAYASHI (1). (1) Rutgers University, New Brunswick, NJ, U.S.A.
- 869-P The iron responsive sigma factor, AcsS, responsible for regulation of achromobactin biosynthesis in *Pseudomonas syringae* pv. *syringae* B728a. J. W. Greenwald (1), C. J. Greenwald (1), B. J. Philmus (1), T. P. Begley (1), D. C. GROSS (1). (1) Texas A&M University, College Station, TX, U.S.A.
- 870-P Complete genomes of plant growth-promoting rhizobacteria *Pseudomonas fluorescens* strains Q8r1-96 and Q2-87. D. MAVRODI (1), K. Hassan (2), O. Mavrodi (1), I. Paulsen (2), J. Loper (3), D. Weller (4), L. Thomashow (4). (1) Dept. of Plant Pathology, Washington State University, Pullman, WA, U.S.A.; (2) Dept. of Chemistry and Biomolecular Sciences, Macquarie University, Sydney, Australia; (3) USDA ARS, Horticultural Crops Research Laboratory, Corvallis, OR, U.S.A.; (4) USDA ARS, Root Disease and Biological Control Research Unit, Pullman, WA, U.S.A.
- 871-P Role of *rsmA* in virulence of phytotoxin-producing pathovars of *Pseudomonas syringae*. H. Kong (1), D. ROBERTS (2), C. Patterson (2), S. Kuehn (3), S. Heeb (3), D. Lakshman (2), J. Lydon (4). (1) FDA, Rockville, MD, U.S.A.; (2) USDA Sustainable Agricultural Systems Laboratory, Beltsville, MD, U.S.A.; (3) School of Molecular Medical Sciences, University of Nottingham, Nottingham, United Kingdom; (4) USDA National Program Staff, Beltsville, MD, U.S.A.
- 872-P Spontaneous Gac mutants in *Pseudomonas* biological control strains: Are they cheaters or mutualists? W. W. Driscoll (1), L. S. Pierson (2), E. A. PIERSON (3). (1) Ecology and Evolutionary Biology Dept., University of Arizona, Tucson, AZ, U.S.A.; (2) Dept. of Plant Pathology and Microbiology, Texas A&M University, College Station, TX, U.S.A.; (3) Dept. of Horticultural Sciences, Texas A&M University, College Station, TX, U.S.A.
- 873-P Characterization of novel genes involved in *Erwinia amylovora* pathogenesis. R. R. MCNALLY (1), Y. F. Zhao (2), G. W. Sundin (1). (1) Dept. of Plant Pathology, Michigan State University, East Lansing, MI, U.S.A.; (2) University of Illinois, Urbana, IL, U.S.A.
- 874-P ★APS Foundation Awardee The role of an oxidative stress sensor in the oxidative stress response, virulence, and host colonization of *Pantoea stewartii* subsp. *stewartii*. L. P. BURBANK (1), M. Roper (1). (1) University of California, Riverside, CA, U.S.A.
- 874a-P Quorum sensing directly controls the Hrp regulatory cascade and the Gac/Rsm signal transduction pathway in the gall-forming *Pantoea agglomerans*. M. Panjel (1), L. Chalupowicz (2), G. Sessa (1), S. Manulis-Sasson (2), I. BARASH (3). (1) Dept. of Molecular Biology and Ecology of Plants, Tel-Aviv University, Tel-Aviv, Israel; (2) Dept. of Plant Pathology and Weed Research, ARO, Volcani Center, Bet Dagan, Israel; (3) Tel-Aviv University, Tel-Aviv, Israel
- 875-P Genome-wide identification of genes regulated by RcsB and RcsC in *Erwinia amylovora*. D. WANG (1), B. Calla (1), M. Qi (1), S. Korban (1), S. Clough (2), G. Sundin (3), I. Toth (4), Y. Zhao (1). (1) University of Illinois, Urbana, IL, U.S.A.; (2) USDA-ARS, Urbana, IL, U.S.A.; (3) Michigan State University, East Lansing, MI, U.S.A.; (4) Plant Pathology Program, Scottish Crop Research Institute, Scotland, United Kingdom
- 876-P ★APS Foundation Awardee Identification of type III secretion inhibitors in *Erwinia amylovora*, the causal agent of fire blight of apple and pear. F. YANG (1), Y. Zhao (1). (1) University of Illinois, Urbana, IL, U.S.A.
- 877-P ★APS Foundation Awardee Effect of EnvZ/OmpR and GrrS/GrrA systems on *Erwinia amylovora* virulence. W. LI (1), Y. Zhao (1). (1) University of Illinois, Urbana, IL, U.S.A.
- 878-P The SlyA/MarR family regulator Hor regulates HrpL regulon T3SS genes in a HrpL independent manner. L. Zou (1), Q. Zeng (2), H. Lin (3), E. Biddle (2), G. Chen (1), C. YANG (2). (1) Shanghai Jiao Tong University, Shanghai, Peoples Republic of China; (2) University of Wisconsin, Milwaukee, WI, U.S.A.; (3) Zhejiang A & F University, Lin'an, Peoples Republic of China
- 879-P Induction of grape tissue necrosis and tobacco leaf HR by *Agrobacterium vitis* requires a polyketide synthase and a nonribosomal peptide synthase. T. Burr (1), D. ZHENG (1). (1) Cornell University, Geneva, NY, U.S.A.

879a-P	Identification of biochemical function of <i>Agrobacterium</i> T-complex recruiting protein VBP. D. Gao (1), M. GUO (1), C. Liang (1). (1) College of Bioscience and Biotechnology, Yangzhou University, Yangzhou City, Jiangsu, Peoples Republic of China	887-P	What we can learn from high similarities of molecular mechanisms between barley host and nonhost resistances to <i>Blumeria graminis</i> . T. Zhang (1), J. Huan (1), J. Huang (1), J. Shi (1), M. Cheng (1), W. Kuang (1), W. DONG (1). (1) Huazhong Agricultural University, Wuhan, Peoples Republic of China
<b>Fungi</b>			
880-P	Potassium phosphite protects European beech ( <i>Fagus sylvatica</i> ) seedlings against <i>Phytophthora plurivora</i> . R. DALIO (1), F. Fleischmann (1), W. Osswald (1). (1) Technical University of Munich, Freising, Germany	888-P	Meta-analysis of <i>Solanum</i> resistance gene analogs—Towards a comprehensive catalog of <i>R</i> -gene alleles for research and crop improvement. J. M. BRADEEN (1), E. A. Quirin (1), H. Mann (1), R. S. Meyer (2), A. Litt (2). (1) University of Minnesota, St. Paul, MN, U.S.A.; (2) New York Botanical Garden, Bronx, NY, U.S.A.
881-P	Non-host plant defense against multiple genera of fungal pathogens—Initiated with DNase signals released by the pathogen. L. A. HADWIGER (1), K. Druffel (1), J. Humann (1), C. Holloway (1). (1) Washington State University, Pullman, WA, U.S.A.	889-P	The effect of biological control practices on inducible defense genes and metabolic genes in field-cultivated potato plants. E. R. CHAMPACO (1), S. Tavantzis (1), R. P. Larkin (2), B. de los Reyes (1). (1) University of Maine, Orono, ME, U.S.A.; (2) USDA-ARS, Orono, ME, U.S.A.
882-P	Assessment of resistance pathways induced in <i>Arabidopsis thaliana</i> by hypovirulent <i>Rhizoctonia</i> spp. isolates. B. Sneh (1), M. Sharon (2), S. FREEMAN (2). (1) Tel Aviv University, Tel Aviv, Israel; (2) Agricultural Research Organization, The Volcani Center, Bet Dagan, Israel	890-P	The CRT1 family participates in four distinct layers of immunity against a wide range of pathogens in <i>Arabidopsis</i> . P. MANOSALVA (1), H. Kang (1), P. Liu (1), H. Choi (1), D. Klessig (1). (1) Boyce Thompson Institute for Plant Research, Ithaca, NY, U.S.A.
883-P	Transcriptome analysis of a wheat cultivar infected by different chemotypes of <i>Fusarium graminearum</i> . D. G. FERNANDO (1), K. Al-Taweel (1), A. Brule-Babel (1). (1) University of Manitoba, Winnipeg, MB, Canada	891-P	Partial biochemical characterization of caspase 3-like activity involved in <i>Solanum tuberosum</i> - <i>P. infestans</i> interaction. M. B. FERNÁNDEZ (1), G. R. Daleo (1), M. G. Guevara (1). (1) Universidad Nacional de Mar del Plata/IIB-CONICET, Mar del Plata, Argentina
883a-P	Application of the 2-cyanoacetamide method for spectrophotometric assay of cellulase enzyme activity. W. M. JURICK II (1), I. Vico (2), V. L. Gaskins (2), B. D. Whitaker (2), K. A. Peter (2), W. J. Janisiewicz (3), W. S. Conway (2). (1) USDA ARS, Food Quality Laboratory, Beltsville, MD, U.S.A.; (2) USDA-ARS, Beltsville, MD, U.S.A.; (3) USDA-ARS, Kearneysville, WV, U.S.A.	892-P	Identification of a soybean G-protein coupled receptor and its role in plant defense responses. B. CALLA (1), D. Neece (2), L. Blahut-Beatty (3), L. Koziol (3), D. Simmonds (3), S. Clough (2). (1) University of Illinois, Urbana, IL, U.S.A.; (2) USDA, ARS, Urbana, IL, U.S.A.; (3) Agriculture & Agri-Food Canada, Ottawa, ON, Canada
884-P	The genome of <i>Arachis hypogaea</i> : Genetic linkage map will aid the whole genome sequence assembly. B. GUO (1), H. Qin (2), S. Feng (3), C. Chen (4), A. Culbreath (3), X. Zhang (5), C. Holbrook (6), P. Ozias-Akins (7), X. Liang (8). (1) USDA ARS CPMRU, Tifton, GA, U.S.A.; (2) Hubei Academy of Agricultural Sciences, Cash Crop Research Institute, Wuhan, Peoples Republic of China; (3) University of Georgia, Dept. of Plant Pathology, Tifton, GA, U.S.A.; (4) USDA, ARS, National Peanut Research Laboratory, Dawson, GA, U.S.A.; (5) Henan Academy of Agricultural Sciences, Peanut Research Unit, Zhengzhou, Peoples Republic of China; (6) USDA, ARS, Crop Genetics and Breeding Research Unit, Tifton, GA, U.S.A.; (7) University of Georgia, Dept. of Horticulture, Tifton, GA, U.S.A.; (8) Guangdong Academy of Agricultural Sciences, Institute of Crop Sciences, Guangzhou, Peoples Republic of China	893-P	Rice OsERF9 is involved in responses to biotic and abiotic stresses. D. Liu (1), X. Chen (1), J. Liu (1), Z. GUO (1). (1) China Agricultural University, Beijing, Peoples Republic of China
885-P	Potassium phosphite blocks root colonization of <i>Phytophthora plurivora</i> in the phloem of <i>Fagus sylvatica</i> seedlings. R. J. DALIO (1), F. Fleischmann (1), W. Osswald (1). (1) Technical University of Munich, Freising, Germany	894-P	Suppression of plant cell death and immunity by a family of <i>Magnaporthe oryzae</i> zinc-finger effectors. W. Liu (1), Q. Wang (1), Y. YANG (1). (1) Penn State University, University Park, PA, U.S.A.
886-P	Cytological alterations in <i>Gibberella zeae</i> germlings induced by combinatorially selected defense peptides. N. W. GROSS (1), J. E. Schoelz (1), F. J. Schmidt (1), J. T. English (1). (1) University of Missouri, Columbia, MO, U.S.A.	895-P	Multiple copies of genes encoding endoglucanase inhibitor proteins are harbored in an 85kB region of potato genome. R. JONES (1). (1) USDA ARS, Beltsville, MD, U.S.A.
		896-P	★APS Foundation Awarded Antifungal compounds in ripe fruit from a resistant blueberry cultivar suppress infection by <i>Colletotrichum acutatum</i> . T. D. MILES (1), M. G. Nair (1), C. Vandervoort (1), A. M. C. Schilder (1). (1) Michigan State University, East Lansing, MI, U.S.A.
		897-P	The effect of plant activators on salinity-induced predisposition in tomato to Phytophthora root rot and bacterial speck disease. M. F. Pye (1), F. Hakuno (2), J. D. MacDonald (1), R. M. BOSTOCK (1). (1) University of California, Davis, CA, U.S.A.; (2) Nihon Nohyaku Co., Ltd., Tokyo, Japan
		898-P	Comparative expression analysis of genes encoding pectin methylesterase enzymes in <i>Phytophthora infestans</i> during infection of <i>Solanum tuberosum</i> . M. D. OSPINA-GIRALDO (1), C. Mingora (1). (1) Lafayette College, Easton, PA, U.S.A.

- 899-P Variation in copy number, expression, and sequence of *Avr1a/avr1a* among populations of the oomycete plant pathogen, *Phytophthora sojae*. D. WICKRAMASINGHE (1), S. Stewart (2), A. Robertson (2), A. Dorrance (1). (1) Dept. of Plant Pathology, Ohio State University, Wooster, OH, U.S.A.; (2) Dept. of Plant Pathology, Iowa State University, Ames, IA, U.S.A.
- 900-P Screening of the World *Phytophthora* Collection for viruses. D. M. MATHEWS (1), D. Gu (1), B. S. Johnston (1), M. D. Coffey (1). (1) University of California, Riverside, CA, U.S.A.
- 901-P Presence of the potato late blight resistance gene *Rpi-blb1* does not promote adaptive parasitism of *Phytophthora infestans*. D. HALTERMAN (1), G. Middleton (1). (1) USDA, ARS, Madison, WI, U.S.A.
- 902-P Localization of *Phytophthora plurivora* effector protein citricolin in *Fagus sylvatica* roots by light and fluorescence laser scanning microscopy. R. J. DALIO (1), F. Fleischmann (1), W. Osswald (1). (1) Technical University of Munich, Freising, Germany
- 903-P  RNA-seq analysis of potato tuber transcriptome dynamics in response to the late blight pathogen *Phytophthora infestans*. L. GAO (1), Z. Tu (2), F. Katagiri (3), J. M. Braden (1). (1) Dept. of Plant Pathology, University of Minnesota, St. Paul, MN, U.S.A.; (2) Minnesota Supercomputing Institute, University of Minnesota, Minneapolis, MN, U.S.A.; (3) Dept. of Plant Biology & Microbial and Plant Genomics Institute, University of Minnesota, St. Paul, MN, U.S.A.
- 904-P Custom transcription factors for manipulation of gene expression in *Phytophthora infestans*. K. ANDREEVA (1), H. Judelson (1). (1) University of California, Riverside, CA, U.S.A.
- 905-P  Comparison of genes underlying two QTL conferring partial resistance to *Phytophthora sojae* from resistant and susceptible soybean genotypes. H. WANG (1), A. Wijeratne (2), S. Wijeratne (2), S. K. St. Martin (3), A. E. Dorrance (1). (1) Dept. of Plant Pathology, The Ohio State University, Wooster, OH, U.S.A.; (2) Molecular and Cellular Imaging Center, OARDC, Wooster, OH, U.S.A.; (3) Dept. of Horticulture and Crop Science, The Ohio State University, Columbus, OH, U.S.A.
- 906-P  Mapping soybean QTL conferring resistance to *Phytophthora sojae* through different phenotypic methods and assessment of their contribution to yield. H. WANG (1), S. K. St. Martin (2), A. E. Dorrance (1). (1) Dept. of Plant Pathology, The Ohio State University, Wooster, OH, U.S.A.; (2) Dept. of Horticulture and Crop Science, The Ohio State University, Columbus, OH, U.S.A.
- 907-P *Fusarium virguliforme* genes and pathways involved in the development of sudden death syndrome in soybean. S. MANSOURI (1), B. H. Bluhm (2), J. P. Bond (1), A. M. Fakhoury (1). (1) Southern Illinois University, Carbondale, IL, U.S.A.; (2) University of Arkansas, Fayetteville, AR, U.S.A.
- 908-P  *Fvfr1* in *Fusarium virguliforme* affects the development of SDS in soybean. K. T. ISLAM (1), S. Mansouri (1), J. Bond (1), A. Fakhoury (1). (1) Southern Illinois University, Carbondale, IL, U.S.A.
- 909-P Soybean susceptible leaves response to *Fusarium virguliforme* toxin in a manner resembling an incompatible interaction. O. RADWAN (1), S. J. Clough (2). (1) Dept. of Crop Sciences, University of Illinois, Urbana, IL, U.S.A.; (2) Dept. of Crop Sciences and USDA-ARS, Urbana, IL, U.S.A.
- 910-P Defining the interactome underlying sudden death syndrome of soybean. J. B. RIDENOUR (1), T. Kazi (2), A. M. Fakhoury (2), B. H. Bluhm (1). (1) University of Arkansas, Fayetteville, AR, U.S.A.; (2) Southern Illinois University, Carbondale, IL, U.S.A.
- 910a-P  Analysis of gene expression during infection of field pea roots by *Fusarium graminearum*. K. CHITTEM (1), W. Yajima (1), R. S. Goswami (1). (1) North Dakota State University, Fargo, ND, U.S.A.
- 911-P *Fusarium verticillioides* infection of maize seedlings and the corresponding movement of fungus, fumonisins, and biomarkers of exposure. N. C. ZITOMER (1), T. T. Baldwin (2), A. E. Glenn (3), C. W. Bacon (1), R. T. Riley (4). (1) USDA ARS, Athens, GA, U.S.A.; (2) USDA, Athens, GA, U.S.A.; (3) USDA, ARS, Richard B. Russell Research Center, Toxicology & Mycotoxin Research Unit, Athens, GA, U.S.A.; (4) USDA-ARS Toxicology and Mycotoxin Research Unit, Athens, GA, U.S.A.
- 912-P Gene expression profiling in *Phytophthora phaseoli* during the infection of lima bean. S. G. KUNJETI (1), N. M. Donofrio (1), G. F. Nancy (1), A. G. Marsh (1), S. Kunjeti (1), B. C. Meyers (1), T. A. Evans (1). (1) University of Delaware, Newark, DE, U.S.A.
- 913-P Characterization of VvBsl-1 a R2R3-MYB transcription factor involved in response to *Botrytis cinerea* infection in *Vitis vinifera*. J. SERRANO-ACEVEDO (1), P. Arce-Johnson (1). (1) Pontificia Universidad Católica de Chile, Santiago, Chile
- 914-P  Deciphering the putative role of *AoMDV1* in ochratoxin A biosynthesis in *Aspergillus ochraceus*. K. EL MOUNADI (1), A. M. Fakhoury (1). (1) Southern Illinois University, Carbondale, IL, U.S.A.
- 915-P Identifying *Macrophomina phaseolina* genes involved in phytotoxin phaseolinone production using cDNA-AFLP analysis. N. AZARMANESH (1), M. Saini (1), J. Bond (1), A. M. Fakhoury (1). (1) Southern Illinois University, Carbondale, IL, U.S.A.
- 916-P The identification and characterization of genes involved in foliar infection of maize by *Cercospora zeae-maydis*. R. L. HIRSCH (1), B. H. Bluhm (1). (1) University of Arkansas, Fayetteville, AR, U.S.A.
- 917-P Functional characterization of two genes involved in cercosporin biosynthesis in *Cercospora kikuchii*. A. K. CHANDA (1), Z. Chen (1), R. W. Schneider (1). (1) Louisiana State University, Baton Rouge, LA, U.S.A.
- 918-P The dynamics of ABA biosynthesis by *Cercospora zeae-maydis*. W. DORLEKU (1), B. H. Bluhm (1). (1) University of Arkansas, Fayetteville, AR, U.S.A.
- 919-P Pathogenic *Embellisia astragali* on *Astragalus adsurgens* is very closely related to locoweed endophyte. Y. LI (1), R. Creamer (2), D. Baucom (2), Z. Nan (1). (1) College of Pastoral Agriculture Science and Technology, Lanzhou University, Lanzhou, Peoples Republic of China; (2) Entomology, Plant Pathology and Weed Science, New Mexico State University, Las Cruces, NM, U.S.A.

920-P	Colonization of spinach ( <i>Spinacia oleracea</i> L.) by GFP-tagged <i>Verticillium dahliae</i> . K. MARUTHACHALAM (1), S. J. Klosterman (2), K. V. Subbarao (3). (1) University of California, Salinas, CA, U.S.A.; (2) USDA-ARS, Salinas, CA, U.S.A.; (3) University of California, Davis, CA, U.S.A.	931-P	Albany, CA, U.S.A. Molecular and biochemical characterization of resistance to <i>Botrytis cinerea</i> among the Solanaceae. J. E. SMITH (1), B. G. Mengesha (2), T. D. Mengiste (2), B. H. Bluhm (1). (1) University of Arkansas, Fayetteville, AR, U.S.A.; (2) Purdue University, West Lafayette, IN, U.S.A.
921-P	Comparison of endophytic <i>Undifilum</i> DNA and swainsonine content on locoweeds. J. ACHATA BOTTGER (1), R. Creamer (1), D. Gardner (2). (1) New Mexico State University, Las Cruces, NM, U.S.A.; (2) USDA-ARS, Logan, UT, U.S.A.	932-P	Pathogenicity analysis of secretory protein of the rice blast fungus and interaction study using rice cell suspension culture. X. ZHOU (1). (1) Yunnan Academy of Agricultural Sciences, Kunming, Peoples Republic of China
922-P	Detection and localization of <i>Undifilum oxytropis</i> fungi in locoweed tissues. R. REYNA (1). (1) New Mexico State University, Las Cruces, NM, U.S.A.	933-P	Functional analyses of two acetyl coenzyme A synthetases in the ascomycete <i>Gibberella zae</i> . S. Lee (1), H. SON (1), J. Lee (2), K. Min (1), K. Choi (3), J. Kim (3), Y. Lee (1). (1) Dept. of Agricultural Biotechnology and Center for Fungal Pathogenesis, Seoul National University, Seoul, South Korea; (2) Dept. of Applied Biology, Dong-A University, Busan, South Korea; (3) Biological Function Research Team, Korea Research Institute of Chemical Technology, Daejeon, South Korea
923-P	Morphological, pathological, and molecular characterization of lupin anthracnose and its relationship with tamarillo anthracnose in Ecuadorian Andes. C. E. FALCONI (1), A. S. van Heusden (2). (1) ESPE University, Sangolqui, Pichincha, Quito, Ecuador; (2) Wageningen UR, Wageningen, Netherlands	934-P	The phenomics of rice blast: Using extensive nutritional profiling to understand how the devastating plant pathogen <i>Magnaporthe oryzae</i> causes disease. C. QUISPE (1), A. Seng (1), H. Do (1), R. Wilson (1). (1) University of Nebraska, Lincoln, NE, U.S.A.
924-P	★APS Foundation Awardee Protein extraction methods and proteomic analysis of the locoweed filamentous fungus <i>Undifilum oxytropis</i> . H. LI (1), O. Holguin (1), T. Schaub (1), R. Creamer (1). (1) New Mexico State University, Las Cruces, NM, U.S.A.	935-P	Rice chitinase gene contributes to rice sheath blight disease resistance. S. LEE (1), J. Snelling (2), S. Han (1), J. Park (1), J. Leach (2). (1) National Academy of Agricultural Science, Suwon, South Korea; (2) Colorado State University, Fort Collins, CO, U.S.A.
925-P	Development of a PCR-RFLP method to rapidly identify common entomopathogenic fungi infecting soybean aphid. R. M. RITSON (1), A. Robertson (1), M. O'Neal (1). (1) Iowa State University, Ames, IA, U.S.A.	936-P	Formation of chlamydospore-like structure in the ascomycete fungus <i>Gibberella zae</i> . H. SON (1), J. Lee (2), Y. Lee (1). (1) Dept. of Agricultural Biotechnology and Center for Fungal Pathogenesis, Seoul National University, Seoul, South Korea; (2) Dept. of Applied Biology, Dong-A University, Busan, South Korea
926-P	Discovery of key pathogenesis-associated genes among predicted transcription factors in the plant-pathogenic fungus, <i>Alternaria brassicicola</i> . A. SRIVASTAVA (1). (1) University of Hawaii at Manoa, Honolulu, HI, U.S.A.	937-P	<i>PCG1</i> encodes a novel splicing factor that is essential for pathogenesis in <i>Magnaporthe oryzae</i> . J. YANG (1), W. Wang (1), L. Kong (1), W. Zhao (1), M. Xue (1), J. Sun (1), X. Chen (1), D. Wang (1), R. Wang (1), Y. Zhang (1), J. Xu (2), Y. Peng (1). (1) China Agricultural University, Beijing, Peoples Republic of China; (2) Purdue University, West Lafayette, IN, U.S.A.
926.a-P	Pathogenic and genetic diversity in <i>Alternaria brassicae</i> and <i>Alternaria brassicicola</i> causing black leaf spot of cauliflower in India. P. SHARMA (1), S. Deep (1), S. Gothandapani (1), M. Sharma (1), P. Kalia (2), P. Chowdappa (3). (1) Plant Pathology, Indian Agricultural Research Institute, New Delhi, India; (2) Vegetable Science Division, Indian Agricultural Research Institute, New Delhi, India; (3) Indian Institute of Horticultural Research, Bangalore, India	938-P	<i>Pcg2</i> , a novel pathogenicity gene in <i>Magnaporthe oryzae</i> encodes a transcription factor that activates and represses expression of distinct genes. D. WANG (1), X. Ma (1), J. Yang (1), M. Xue (1), X. Chen (1), W. Zhao (1), Y. Peng (1). (1) China Agricultural University, Beijing, Peoples Republic of China
927-P	Genome sequencing and analysis of <i>Anisogramma anomala</i> , the causal agent of eastern filbert blight. G. CAI (1), C. Leadbetter (1), T. Molnar (1), B. I. Hillman (1). (1) Rutgers University, New Brunswick, NJ, U.S.A.	939-P	PacC-mediated adaptation to alkaline pH is critical for developing infection hyphae in penetrated plant cells in <i>Magnaporthe oryzae</i> . Y. PENG (1), X. Chen (1), J. Yang (1), M. Xue (1), D. Wang (1), J. Huang (1), Z. Peng (1), J. Xu (2). (1) China Agricultural University, Beijing, Peoples Republic of China; (2) Purdue University, West Lafayette, IN, U.S.A.
928-P	Microarray reveals the role of auxin in mediating the interactions between <i>Macrophomina phaseolina</i> and <i>Medicago truncatula</i> . B. SHUAI (1), K. Mah (1), T. Doerksen (1). (1) Wichita State University, Wichita, KS, U.S.A.	940-P	Assembling and exploring the <i>Cochliobolus miyabeanus</i> genome of a strain pathogenic on wild rice ( <i>Zizania palustris</i> ). C. V. CASTELL-MILLER (1), Z. Tu (2), C. P. Vance (1), D. A. Samac (1). (1) ARS-USDA Plant Science Research Unit, St. Paul, MN, U.S.A.;
929-P	Comparative genomics of a lucerne and nonlucerne isolate of <i>Verticillium albo-atrum</i> . M. T. KASSON (1), D. D. Davis (1), L. R. Kasson (1), S. C. Schuster (1), F. Zhao (2). (1) Pennsylvania State University, University Park, PA, U.S.A.; (2) Beijing Institutes of Life Science, Chinese Academy of Sciences, Beijing, Peoples Republic of China		
930-P	Molecular analysis of fumonisin biosynthetic genes in nontoxicogenic <i>Aspergillus niger</i> strains. J. D. PALUMBO (1), T. L. O'Keeffe (1). (1) USDA ARS WRRC,		

- 941-P (2) University of Minnesota Supercomputing Institute, Minneapolis, MN, U.S.A.  
*Sclerotinia sclerotiorum* utilizes oxalic acid to hijack defenses and manipulate the host redox environment. M. KABBAGE (1), B. Williams (1), H. Kim (1), M. B. Dickman (1). (1) Texas A&M University, College Station, TX, U.S.A.
- 942-P Multiplex PCR for four *Sclerotinia* species. A. W. Abd-Elmagid (1), P. GARRIDO (1), R. M. Hunger (1), H. A. Melouk (2), M. Arif (1), C. D. Garzon (1). (1) Dept. of Entomology and Plant Pathology, Oklahoma State University, Stillwater, OK, U.S.A.; (2) USDA-ARS, Dept. Entomology and Plant Pathology, Oklahoma State University, Stillwater, OK, U.S.A.
- 943-P Mycoviruses that infect plant pathogen *Sclerotinia sclerotiorum*. D. JIANG (1), X. Yu (1), H. Liu (1), B. Li (1), J. Xie (1), R. Liu (1), L. Liu (1), X. Sun (1), J. Xie (1), J. Cheng (1), Y. Fu (1), G. Li (1). (1) Hauzhang Agricultural University, Wuhan, Peoples Republic of China
- 944-P Comparative transcriptome analysis in *Sclerotinia sclerotiorum* and *S. trifoliorum* by 454 titanium RNA sequencing. D. QIU (1), G. Vandemark (2), W. Chen (2). (1) Washington State University, Pullman, WA, U.S.A.; (2) USDA ARS, Pullman, WA, U.S.A.
- 945-P Comparative analyses of endogenous smazl RNAs in *Sclerotinia sclerotiorum* and *S. trifoliorum*. D. QIU (1), G. Vandemark (2), W. Chen (2). (1) Washington State University, Pullman, WA, U.S.A.; (2) USDA ARS, Pullman, WA, U.S.A.
- 946-P Oxalate-minus mutants of *Sclerotinia sclerotiorum* via random mutagenesis retain pathogenicity. X. LIANGSHENG (1), M. Xiang (1), D. White (1), W. Chen (2). (1) Washington State University, Pullman, WA, U.S.A.; (2) USDA ARS, Pullman, WA, U.S.A.
- 947-P Random T-DNA mutagenesis identifies a Cu-Zn-superoxide dismutase gene as a virulence factor of *Sclerotinia sclerotiorum*. X. LIANGSHENG (1), W. Chen (2). (1) Washington State University, Pullman, WA, U.S.A.; (2) USDA ARS, Pullman, WA, U.S.A.
- 948-P Association mapping of stem rot resistance in a world collection of *Brassica napus*. S. GYAWALI (1), L. Buchwaldt (1), M. Harrington (1), I. Parkin (1), D. Bekkaoui (1), J. Poon (1), K. Horner (1), E. Higgins (1), D. D. Hegedus (1). (1) Agriculture & Agri-Food Canada, Saskatoon, SK, Canada
- 949-P  Identifying genes differentially expressed during early interactions between the stem rot fungus (*Sclerotium rolfsii*) and peanut (*Arachis hypogaea*). A. JOGI (1), S. Gold (1). (1) University of Georgia, Athens, GA, U.S.A.
- 950-P Protein photocleavers chrysophanol and pachybasin involved in *Trichoderma*'s biocontrol mechanism. S. LIU (1), K. Chang (2), Z. Wei (1), C. Lo (3), K. Peng (2). (1) Da-Yeh University, Changhua, Taiwan; (2) National Dong-Hwa University, Hualien, Taiwan; (3) National Formosa University of Science and Technology, Yunlin, Taiwan
- 951-P Proteomic and biochemical analysis of heat shock responses in *Trichoderma* species. R. D. PRASAD (1), V. Dinesh Kumar (1), P. Sowmya (1), T. Navaneetha (1). (1) Directorate of Oilseeds Research, Hyderabad, India
- 952-P An effector of *Puccinia striiformis* f. sp. *tritici* is expressed in haustoria and required for avirulence on wheat cultivar carrying resistance gene YrTr. C. YIN (1), A. Wan (1), X. Chen (1), S. Hulbert (1). (1) Washington State University, Pullman, WA, U.S.A.
- 953-P The *Rpg5* NBS-LRR-STPK gene and a second NBS-LRR gene are required together for *rpg4*-mediated wheat stem rust resistance in barley. R. BRUEGGEMAN (1), M. Acevedo (1), T. Gross (1). (1) North Dakota State University, Fargo, ND, U.S.A.
- 954-P Novel rust resistance in wheat (*Triticum aestivum* L.). J. B. CAMPBELL (1), M. J. Giroux (1), Y. Jin (2), X. Chen (3), L. Huang (1). (1) Montana State University, Dept. of Plant Sciences and Plant Pathology, Bozeman, MT, U.S.A.; (2) USDA-ARS Cereal Disease Laboratory and Dept. of Plant Pathology, University of Minnesota, St. Paul, MN, U.S.A.; (3) USDA-ARS Wheat Genetics, Physiology, Quality, and Disease Research Unit, and Dept. of Plant Pathology, Washington State University, Pullman, WA, U.S.A.
- 955-P Functional analysis of Asian soybean rust resistance pathways using virus-induced gene silencing. K. F. PEDLEY (1), A. K. Pandey (2), M. D. Kendrick (3), C. Zhang (4), M. A. Graham (5), S. A. Whitham (4), J. H. Hill (4). (1) USDA ARS FDWSRU, Fort Detrick, MD, U.S.A.; (2) USDA ARS, Iowa State University, Fort Detrick, MD, U.S.A.; (3) USDA ARS, Fort Detrick, MD, U.S.A.; (4) Iowa State University, Ames, IA, U.S.A.; (5) USDA ARS, Ames, IA, U.S.A.
- 956-P Differences in responses and protein profiles of soybean near-isogenic lines (NILs) to *Phakopsora pachyrhizi* inoculation. M. C. GANIGER (1), D. R. Walker (2), Z. Chen (1). (1) Louisiana State University, Baton Rouge, LA, U.S.A.; (2) USDA-ARS Soybean/Maize Germplasm, Pathology, and Genetics Research Unit, Urbana, IL, U.S.A.
- 957-P Comparison of the ergot alkaloid synthesis (EAS) gene cluster among clavicipitaceous fungi. S. FLOREA (1), J. Pan (1), C. Young (2), D. G. Panaccione (3), C. L. Schardl (1). (1) University of Kentucky, Dept. of Plant Pathology, Lexington, KY, U.S.A.; (2) The Samuel Roberts Noble Foundation, Forage Improvement Division, Ardmore, OK, U.S.A.; (3) West Virginia University, Division of Plant & Soil Sciences, Morgantown, WV, U.S.A.
- 958-P Ergot alkaloid gene expression studies in a grass-endophyte association. S. FLOREA (1), P. Mulinti (2), D. G. Panaccione (2), C. L. Schardl (1). (1) University of Kentucky, Dept. of Plant Pathology, Lexington, KY, U.S.A.; (2) West Virginia University, Division of Plant & Soil Sciences, Morgantown, WV, U.S.A.
- 959-P Identification and characterization of fungal endophytes from a Greek tall fescue collection. J. TAKACH (1), S. Mittal (1), A. Hopkins (1), C. Young (1). (1) The Samuel Roberts Noble Foundation, Ardmore, OK, U.S.A.
- 960-P *Grosmannia clavigera*, a mountain pine beetle-associated pathogen, has efficient ABC transporters for excreting monoterpenes or their derivatives. Y. WANG (1), S. DiGuistini (1), L. Lim (1), T. Wang (1), J. Bohlmann (1), C. Breuil (1). (1) University of British Columbia, Vancouver, BC, Canada
- 961-P Genome and transcriptome analysis of *Geosmithia*

		<i>morbida</i> . M. M. ZERILLO (1), K. Woeste (2), J. Snelling (1), N. Tisserat (1). (1) Colorado State University, Fort Collins, CO, U.S.A.; (2) Dept. of Forestry and Natural Resources/Purdue University, West Lafayette, IN, U.S.A.	
		<b>Nematodes</b>	
962-P		Alteration of host gene silencing during root-knot nematode infection. E. K. WALSH (1), C. G. Taylor (1). (1) Ohio State University, OARDC, Wooster, OH, U.S.A.	971-P Influence of defective RNAs of <i>Tomato black ring virus</i> on symptoms expression. N. BORODYNKO (1), B. Hasiow-Jaroszewska (1), H. Pospieszny (1). (1) Institute of Plant Protection-National Research Institute, Poznan, Poland
963-P		QTL analysis for transgressive resistance to root-knot nematode in a cotton RIL population derived from interspecific susceptible parents ( <i>Gossypium</i> spp.). C. WANG (1), T. R. Mullens (1), M. Ulloa (2), P. A. Roberts (1). (1) University of California, Riverside, CA, U.S.A.; (2) USDA-ARS, Western Integrated Cropping Systems Research Unit, Shafter, CA, U.S.A.	972-P Development of an efficient system for assessing gene function in the cotton plant using virus-induced gene silencing (VIGS). J. BROWN (1), Z. He (1), C. Hernandez-Zepeda (1). (1) University of Arizona, Tucson, AZ, U.S.A.
		<b>Viruses</b>	973-P Characterization of a coupled termination-reinitiation strategy for downstream ORF translation in <i>victoriviruses</i> (family <i>Totiviridae</i> ). H. LI (1), W. M. Havens (1), M. L. Nibert (2), S. A. Ghabrial (1). (1) Plant Pathology Dept., University of Kentucky, Lexington, KY, U.S.A.; (2) Dept. of Microbiology and Molecular Genetics, Harvard Medical School, Boston, MA, U.S.A.
964-P		The generation of <i>Pepino mosaic virus</i> infectious clones; investigating the link between genotype and phenotype. C. DUFF-FARRIER (1), N. Boonham (2), G. D. Foster (1). (1) University of Bristol, Bristol, United Kingdom; (2) Dept. for Environment, Food and Rural Affairs, York, United Kingdom	974-P Production of both carboxy-c-terminal coat protein forms of <i>Lolium latent virus</i> is required for efficient systemic movement. A. Vaira (1), H. Lim (2), R. A. Owens (3), M. M. Dienelt (4), M. D. Reinsel (4), J. HAMMOND (4). (1) CNR, Istituto di Virologia Vegetale, Torino, Italy; (2) Chungnam National University, Daejeon, South Korea; (3) USDA-ARS MPPL, Beltsville, MD, U.S.A.; (4) USDA-ARS FNPRU, Beltsville, MD, U.S.A.
964a-P		Transcriptional regulation of complementary sense genes in geminiviruses. G. SUNTER (1), J. Guerrero (1). (1) University of Texas, San Antonio, TX, U.S.A.	975-P Identification of an RNA silencing suppressor encoded by <i>Southern rice black-streaked dwarf virus S6</i> . Q. XU (1), Y. Lu (1), J. Zhang (1), R. Xiong (1), Y. Zhou (1). (1) Institute of Plant Protection, Jiangsu Academy of Agricultural Sciences, Nanjing, Peoples Republic of China
965-P		Functional analysis of NSs and NSm genes of <i>Impatiens necrotic spot virus</i> found in Salinas Valley, California. Y. KUO (1), S. T. Koike (2), R. L. Gilbertson (1). (1) University of California, Davis, CA, U.S.A.; (2) University of California-Davis, Salinas, CA, U.S.A.	976-P Detection of <i>Grapevine leafroll-associated virus 7</i> using real-time qRT-PCR and conventional RT-PCR. M. AL RWAHNIH (1), F. Osman (1), M. R. Sudarshana (2), J. K. Uyemoto (2), A. Rowhani (1). (1) Dept. of Plant Pathology, University of California, Davis, CA, U.S.A.; (2) USDA-ARS, University of California, Davis, CA, U.S.A.
966-P		The <i>Nicotiana benthamiana</i> Hsp-alpha protein (NbHsp- $\alpha$ ) interacts with the movement protein of the bipartite begomovirus <i>Bean dwarf mosaic virus</i> . M. PARK (1), Y. Seo (2), R. L. Gilbertson (1). (1) University of California, Davis, CA, U.S.A.; (2) Seoul National University, Seoul, Korea	977-P A preliminary account of the sanitary status of <i>Prunus</i> species in the National Clonal Germplasm Repository. F. OSMAN (1), M. Al Rwanih (1), T. Pitman (2), F. Cordero (1), J. Preece (3), D. Golino (1). (1) Dept. of Plant Pathology, University of California, Davis, CA, U.S.A.; (2) Foundation Plant Services, University of California, Davis, CA, U.S.A.; (3) National Clonal Germplasm Repository, USDA-ARS, Davis, CA, U.S.A.
967-P		A nonstructural, p17 protein of <i>Potato leafroll virus</i> colocalizes in plant phloem tissue with virus capsid protein. S. EID (1), J. S. Durrin (1), O. V. Nikolaeva (1), A. Karasev (1). (1) University of Idaho, Moscow, ID, U.S.A.	978-P Probe the interaction between SCMV PIPO with maize protein. D. Liu (1), M. Li (2), Y. Zhang (2), Z. Fan (1). (1) China Agriculture University, Beijing, Peoples Republic of China; (2) Chinese Academy of Inspection & Quarantine, Beijing, Peoples Republic of China
968-P		Genetic-based population analysis of the nucleocapsid protein of <i>Tomato spotted wilt virus</i> isolates in New Mexico. J. M. French (1), N. Goldberg (2), S. Hanson (2), J. RANDALL (2). (1) New Mexico State University Cooperative Extension, Las Cruces, NM, U.S.A.; (2) New Mexico State University, Las Cruces, NM, U.S.A.	979-P Protein-protein interaction of <i>Cucurbit aphid-borne yellows virus</i> using yeast two-hybrid system and bimolecular fluorescence complementation. X. Chen (1), H. Xiang (2), C. Han (2), D. Li (3), J. Yu (3), Y. CHENG (1). (1) Dept. of Pomology, China Agricultural University, Beijing, Peoples Republic of China; (2) Dept. of Plant Pathology, China Agricultural University, Beijing, Peoples Republic of China
969-P		Tradeoffs between host adaptation and vector transmission of <i>Soybean dwarf virus</i> . B. TIAN (1), W. L. Schneider (2), F. E. Gildow (1). (1) Dept. of Plant Pathology, The Pennsylvania State University, State College, PA, U.S.A.; (2) Foreign Disease-Weed Science Research Unit, USDA-ARS, Fort Detrick, MD, U.S.A.	
970-P		Genetic and biological variability of <i>Pepino mosaic virus</i> isolates infecting tomato plants. B. HASIOW-JAROSZEWSKA (1), N. Borodynko (1), H. Pospieszny (1). (1) Institute of Plant Protection-	

980-P	China; (3) State Key Laboratory for Agrobiotechnology, College of Biological Sciences, China Agricultural University, Beijing, Peoples Republic of China	990-P	Soybean Research, Wooster, OH, U.S.A.; (2) Dept. Plant Pathology, Ohio State University OARDC, Wooster, OH, U.S.A.
981-P	Generation and affinities with antigen of single-chain variable fragment antibody against <i>Odontoglossum ringspot virus</i> from phage display library. Y. Y. Fu (1), Y. C. Ping (1), C. H. FUNG (2). (1) National Chia Yi University (NCYU), Chia-yi, Taiwan; (2) TNDAIS, Chia-yi, Taiwan	991-P	Analysis of the <i>Frankliniella occidentalis</i> proteome and differentially expressed proteins in response to <i>Tomato spotted wilt virus</i> infection. I. E. BADILLO-VARGAS (1), D. Rotenberg (1), Y. Hiromasa (2), J. M. Tomich (2), A. E. Whitfield (1). (1) Kansas State University, Dept. of Plant Pathology, Manhattan, KS, U.S.A.; (2) Kansas State University, Dept. of Biochemistry and Biotechnology Core/Proteomics Facilities, Manhattan, KS, U.S.A.
982-P	Discovery the new synthesized of PTGS-related small RNAs by an ultrasensitive silicon nanowire field-effect transister and next-generation sequence. S. LIN (1), K. Chen (2), Y. Chiu (1), L. Wang (1), K. Lee (2), Y. Chen (2). (1) Institute of Biotechnology, National Taiwan University, Taipei, Taiwan; (2) Institute of Atomic and Molecular Sciences, Academia Sinica, Taipei, Taiwan	992-P	Effects of grapevine leafroll disease on berry anthocyanins and other flavonoids in a wine grape cultivar. L. R. GUTHA (1), L. F. Casassa (1), M. Mireles (1), J. F. Harbertson (1), R. A. Naidu (1). (1) Washington State University, Prosser, WA, U.S.A.
983-P	Identification of the critical factors for mechanical transmissibility of <i>Tomato leaf curl New Delhi virus</i> . C. Chan (1), H. Chang (2), H. Ku (1), F. JAN (2). (1) Dept. of Agronomy, National Chung Hsing University, Taichung, Taiwan; (2) Dept. of Plant Pathology, National Chung Hsing University, Taichung, Taiwan	993-P	The land plant-specific NbPSL1IP protein plays a key role in plant antiviral defense by interacting with <i>Potato virus X</i> RNAs and proteins. S. CHO (1), W. Cho (1), S. Park (1), H. Choi (2), K. Kim (1). (1) Seoul National University, Seoul, Korea; (2) Rural Development Administration, Suwon, Korea
984-P	Interrelationships among SA, MeSA, lipids, and light in systemic acquired resistance (SAR). D. F. KLESSIG (1), P. Liu (1), C. Von Dahl (1), S. Park (1). (1) Boyce Thompson Institute for Plant Research, Ithaca, NY, U.S.A.	994-P	Alteration of gene expression profile in maize infected with a double-stranded RNA fijivirus associated with symptom development. M. Jia (1), Y. Li (1), L. Lei (1), T. Zhou (1), D. Di (2), H. Miao (2), Z. FAN (1). (1) Plant Pathology Dept., China Agricultural University, Beijing, Peoples Republic of China; (2) Plant Protection Institute, Hebei Academy of Agricultural Sciences, Baoding, Peoples Republic of China
985-P	Development of a <i>Tobacco streak virus</i> (TSV)-based gene silencing vector for soybean seed development. S. JOSSEY (1), A. K. Singh (2), S. A. Ghabrial (2), L. L. Domier (3). (1) Dept. of Crop Sciences, University of Illinois, Urbana, IL, U.S.A.; (2) Plant Pathology Dept., University of Kentucky, Lexington, KY, U.S.A.; (3) USDA ARS, Dept. of Crop Sciences, University of Illinois, Urbana, IL, U.S.A.	995-P	A critical amino acid of 6K2 protein of <i>Papaya ringspot virus</i> for inducing wilting symptom on papaya plants. S. YEH (1), K. Chen (2), H. Cheng (2). (1) National Chung Hsing University, Taichung, Taiwan; (2) Dept. of Plant Pathology, National Chung Hsing University, Taichung, Taiwan
986-P	Characterization of a rare <i>Plum pox virus</i> W isolate found in germplasm illegally carried to the United States. V. MAVRODIEVA (1), K. Williams (1), S. Negi (1), L. Levy (1). (1) USDA APHIS PPQ CPHST, Beltsville, MD, U.S.A.	996-P	Solving the problem of sequence homology-independent breakdown of transgenic resistance by disarming viral gene silencing suppressor. S. YEH (1), Y. Kung (1). (1) Dept. of Plant Pathology, National Chung Hsing University, Taichung, Taiwan
987-P	Requirements of different regions of the 5' nontranslated region in replication of <i>Grapevine leafroll-associated virus</i> 3. S. JARUGULA (1), S. Gowda (2), S. Poojari (1), W. O. Dawson (2), R. A. Naidu (1). (1) Irrigated Agriculture Research and Extension Center, Dept. of Plant Pathology, Washington State University, Prosser, WA, U.S.A.; (2) Citrus Research and Education Center, University of Florida, Lake Alfred, FL, U.S.A.	997-P	Copackaging of genomic RNAs and virion accumulation are controlled by the N-terminus of the <i>Red clover necrotic mosaic virus</i> capsid protein. S. Park (1), T. L. Sit (2), K. Kim (1), S. A. LOMMEL (2). (1) Seoul National University, Seoul, Korea; (2) North Carolina State University, Raleigh, NC, U.S.A.
988-P	A highly sensitive and robust single-tube nested PCR assay for the detection of <i>Pineapple mealybug wilt associated virus</i> (PMWaV-2). K. K. DEY (1), W. Borth (1), M. Melzer (1), D. Sether (1), J. Hu (1). (1) University of Hawaii, Honolulu, HI, U.S.A.	998-P	Optimization of <i>Maize fine streak virus</i> (MFSV) protein expression in <i>Drosophila</i> S2 cells. F. CISNEROS (1), M. Redinbaugh (2). (1) The Ohio State University, Wooster, OH, U.S.A.; (2) USDA, ARS, The Ohio State University, Wooster, OH, U.S.A.
989-P	Curtovirus quantification and species differentiation within mixed infections through real-time PCR. S. A. PEINADO (1). (1) New Mexico State University, Las Cruces, NM, U.S.A.	999-P	Deletion of the N terminus of <i>Papaya ringspot virus</i> larger coat protein disrupt viral systemic infection. C. CHIANG (1), Z. Wu (1), B. Lin (1), H. Bau (2), K. Chen (3), T. Yu (1), S. Yeh (3). (1) Dept. of Molecular Biotechnology, Da-Yeh University, Changhua, Taiwan; (2) Dept. of Biotechnology, TransWorld University, Yunlin, Taiwan; (3) Dept. of Plant Pathology, National Chung Hsing University, Taichung, Taiwan
	Responses of maize ( <i>Zea mays</i> L.) near-isogenic lines carrying <i>Wsm1</i> , <i>Wsm2</i> , and <i>Wsm3</i> to three viruses in the <i>Potyviridae</i> . M. G. REDINBAUGH (1), M. W. Jones (1), E. C. Boyd (2). (1) USDA ARS Corn and		Roles of NtERF5 in N-gene mediated TMV resistance. J. YOON (1), S. Choi (2), P. Palukaitis (1). (1) Seoul

- 1000-P Women's University, Seoul, South Korea; (2) National Institute of Horticultural & Herbal Science (NIHHS), Rural Development Administration, Suwon, South Korea BBWV2-resistant transgenic *Nicotiana benthamiana* expressing a virus-derived hairpin RNA. J. Yoon (1), S. CHOI (2), E. Baek (1), P. Palukaitis (1). (1) Seoul Women's University, Seoul, South Korea; (2) National Institute of Horticultural & Herbal Science (NIHHS), Rural Development Administration, Suwon, South Korea
- 1001-P Effects of pesticide treatments on SABP2-mediated systemic acquired resistance in plants. D. KUMAR (1), J. P. Yuh (1), A. Dotson (1), D. Harper (1). (1) East Tennessee State University, Johnson City, TN, U.S.A.
- 1002-P Virus-like particles of *Maize rayado fino virus*, *Cucumber mosaic virus*, and *Lolium latent virus* as chemical bio-conjugate substrates. A. Natilla (1), L. G. Nemchinov (1), A. Vaira (2), J. Hammond (3), R. W. HAMMOND (1). (1) USDA ARS PSI MPPL, Beltsville, MD, U.S.A.; (2) CNR, Istituto di Virologia Vegetale, Torino, Italy; (3) Floral & Nursery Plants Research Unit, U.S. National Arboretum, USDA-ARS, Beltsville, MD, U.S.A.
- 1003-P **★APS Foundation Awardee** Characterizing in planta expression of G<sub>N</sub>-S, a soluble form of *Tomato spotted wilt virus* G<sub>N</sub> glycoprotein. M. MONTERO-ASTÚA (1), A. E. Whitfield (1). (1) Kansas State University, Manhattan, KS, U.S.A.
- 1004-P Characterization of silencing suppressor activity of NSs from *Iris yellow spot virus* (genus *Tospovirus*). P. K. Sharma (1), K. DRUFFEL (1), N. Mitter (2), H. R. Pappu (1). (1) Washington State University, Pullman, WA, U.S.A.; (2) Queensland Alliance for Agriculture and Food Innovation, The University of Queensland, Brisbane, Australia
- 1005-P Evaluating artificial microRNAs for engineering resistance against tospoviruses. N. MITTER (1), K. Chua (1), S. Bag (2), K. Druffel (2), R. Mitchell (3), H. R. Pappu (2). (1) Queensland Alliance for Agriculture and Food Innovation, The University of Queensland, Brisbane, Australia; (2) Washington State University, Pullman, WA, U.S.A.; (3) Dept. of Employment, Economic Development and Innovation, St. Lucia, Australia
- 1006-P Biological characterization of distinct strains of *Iris yellow spot virus* (genus *Tospovirus*). S. BAG (1), C. S. Cramer (2), H. F. Schwartz (3), H. R. Pappu (1). (1) Washington State University, Pullman, WA, U.S.A.; (2) Dept. of Plant and Environmental Sciences, New Mexico State University, Las Cruces, NM, U.S.A.; (3) Dept. of Bioagricultural Sciences and Pest Management, Colorado State University, Ft. Collins, CO, U.S.A.
- 1007-P Characterization of small RNAs derived from *Tomato spotted wilt virus* infection by deep sequencing. V. Koundal (1), N. MITTER (2), S. Williams (3), H. R. Pappu (1). (1) Washington State University, Pullman, WA, U.S.A.; (2) Queensland Alliance for Agriculture and Food Innovation, The University of Queensland, Brisbane, Australia; (3) Queensland Facility for Advanced Bioinformatics, The University of Queensland, Brisbane, Australia
- 1008-P Genetic complementation between two viruses in an otherwise restrictive host. S. BAG (1), N. Mitter (2), H. R. Pappu (1). (1) Washington State University, Pullman, WA, U.S.A.; (2) Queensland Alliance for Agriculture and Food Innovation, the University of Queensland, Brisbane, Australia
- 1009-P The effect of *Potato virus S* infection on late blight severity in selected potato genotypes. Y. LIN (1), D. A. Johnson (1), H. R. Pappu (1). (1) Washington State University, Pullman, WA, U.S.A.
- 1010-P Identification and characterization of promoter elements from plant pararetroviruses from dahlia (*Dahlia variabilis*). C. V. ALMEYDA (1), H. R. Pappu (1). (1) Washington State University, Pullman, WA, U.S.A.
- 1011-P Diversity in *Cotton leaf curl virus* (CLCuV) isolates prevalent in northwestern India in light of the breakdown of CLCuV resistance in cotton. P. K. CHAKRABARTY (1), S. V. Sable (2), V. Koundal (3), B. Kalbande (1), D. Monga (4), R. Soni (4), H. R. Pappu (3). (1) Central Institute for Cotton Research, Nagpur, Maharashtra, India; (2) Central Institute for Cotton Research, Nagpur, India; (3) Washington State University, Pullman, WA, U.S.A.; (4) Central Institute for Cotton Research, Sirsa, Haryana, India
- 1012-P Functional analysis of the *Cucumber mosaic virus 2b* protein. K. Nemes (1), Á. Gellért (2), E. Balázs (2), K. SALÁNKI (1). (1) Agricultural Biotechnology Center, Godollo, Hungary; (2) Agricultural Research Institute of the Hungarian Academy of Sciences, Applied Genomics Dept., Martonvasar, Hungary
- 1013-P Coat protein expression strategy of *Oat blue dwarf virus*. M. C. EDWARDS (1), J. J. Weiland (1). (1) USDA ARS, Fargo, ND, U.S.A.
- 1014-P Validation of a single nucleotide polymorphism genotyping method for *Wheat streak mosaic virus*. S. ROGERS (1), M. Payton (1), R. Allen (1), U. Melcher (1), J. Fletcher (1). (1) Oklahoma State University, Stillwater, OK, U.S.A.
- 1015-P Geminiviral (PHYVV and PepGMV) and cucumoviral (CMV) co-infection in chili pepper fields: The *AC1* gene in PepGMV with a mutation with aminoacid change. S. FRAIRE (1), M. Recendez-Alvarado (1), J. Carrillo-Tripp (2), R. Rivera-Bustamante (3), M. Alvarado-Rodríguez (4). (1) Universidad Autónoma de Zacatecas, Guadalupe, Zacatecas, Mexico; (2) CINVESTAV-IPN Campus Guanajuato, Irapuato, Mexico; (3) CINVESTAV-IPN Campus Guanajuato, Irapuato, Gto., Mexico; (4) Universidad Autónoma de Zacatecas, Zacatecas, Zac., Mexico

## APS Elected and Appointed Officers, Representatives, and Committees for 2011

These listings reflect current appointments as of June 1, 2011. For up-to-date listings following the annual meeting, please refer to APSnet.

### **APS Council**

President: J. L. Sherwood  
 President-Elect: C. A. Ishimaru  
 Vice President: M. J. Boehm  
 Immediate Past President: B. J. Christ  
 Internal Communications Officer (ICO): D. T. Beadle  
 ICO-Elect: D. M. Gadoury  
 Treasurer: R. C. Rowe  
 Senior Councilor-at-Large: C. T. Bull  
 Intermediate Councilor-at-Large: A. E. Dorrance  
 Junior Councilor-at-Large: W. F. Mahaffee  
 Divisional Councilor: D. G. Schmale  
 Publications Councilor: T. P. Keinath  
 Executive Vice President: S. C. Nelson

**Annual Meetings Board (AMB)** (fnaSPB): Director: S. T. Adkins. Program Chair: C. A. Ishimaru. Vice Chair: M. J. Boehm. Section Chairs: J. L. Beckerman, A. O. Charkowski, M. B. Dickman, P. Esker, A. P. Hert, P. S. Ojiambo, Workshops Chair: J. W. Buck. Members: A. B. Baudoin, C. T. Bull

**Auxiliary Meetings Board (AXMB)**: Director: G. C. Bergstrom. Director-Elect: A. R. Bennett. Members: K. S. Arthur, J. W. Buck, S. H. Hulbert, S. A. Miller, A. E. Robertson, K. L. Smith, K. V. Subbarao

**Awards and Honors Committee**: Chair: S. M. Coakley. Immediate Past Chair: D. M. Weller. Members: S. B. Goodwin, M. K. Hausbeck, N. P. Keller, S. A. Lommel, H. Scherm

**Divisional Forum**: Chair: G. W. Sundin, Divisional Councilor: D. G. Schmale. Members: J. E. Adaskaveg, T. B. Brenneman, W. H. Elmer, K. L. Everts, M. M. Roca, J. C. Rupe

**Executive Committee**: Chair: J. L. Sherwood. Members: D. T. Beadle, M. J. Boehm, C. T. Bull, C. A. Ishimaru, B. J. Christ, S. C. Nelson, R. C. Rowe,

**Financial Advisory Committee**: Chair: R. C. Rowe, Members: J. E. Adaskaveg, M. J. Boehm, M. L. Daughtrey, C. A. Ishimaru, J. C. Rupe

**Foundation-Board of Directors**: Chair: R. D. Martyn. Treasurer R. C. Rowe, Members: A. M. Alvarez, J. Amador, R. J. Cook, L. E. Datnoff, S. M. Douglas, T. D. Murray, A. H. Tally. Ex-Officio: K. R. Lannon

**Leadership Institute**: Cochairs: R. M. Bostock, C. D. Smart. Members: L. M. Ciuffetti, M. M. Kennelly, W. Schneider, J. E. Schoelz, E. C. Tedford, L. P. Tredway

**Nominations**: Chair: J. D. MacDonald. Members: C. T. Bull, A. O. Charkowski, D. H. Gent, R. S. Goswami, T. K. Mitchell, G. P. Munkvold, B. D. Olson, J. C. Rupe

**Office of Electronic Communications (OEC)**: Director: D. M. Eastburn. APSnet Feature Editor: G. D. Franc. Members: A. M. Brunings, D. A. Glawe, S. Kang, J. M. Marshall, K. J. Martin, G. Rauscher, Ex-Officio: A. B. Baudoin

**Office of Industry Relations (OIR)**: Director: B. D. Olson. Members: J. R. Bloomberg, A. Cochran, G. J. Holmes, C. L. Kohls, D. G. Ouimette, M. R. Schwarz, V. J. Spadafora, R. Van Haren. Industry Liaison: J. L. Chaky. Sustaining Associates Chair: D. Myhaver

**Office of International Programs Advisory Board (OIP)**: Director: S. A. Miller. Library Assistance Coordinator: M. Babadoost. Members: J. E. Bowman, J. K. Brown, M. M. Kennelly, J. H. McBeath, M. D. Ospina-Giraldo, M. A. Pastor-Corrales, A. C. Schilder, J. R. Steadman. Ex-Officio: R. J. Cook

**Office of Public Relations and Outreach (OPRO)**: Director: M. L. Elliott. Members: R. H. Bransky, N. M. Donofrio, T. Durham, M. A. Grabowski, E. W. Honeycutt, A. B. Kriss, J. Q. Liu, K. Ong, K. T. Schneider. Ex-Officio, APSnet Feature Editor: G. D. Franc. Ex-Officio: B. J. Christ, J. E. Leach

**Phytopathology News Advisory**: Editor-in-Chief: D. J. Jardine. Members: A. E. Dorrance, H. A. Olson, D. G. Schmale III, A. U. Tenuta

**Publications Board**: Chair: T. P. Keinath. Members: A. B. Baudoin, M. J. Boehm, M. L. Daughtrey, R. M. Davis, D. M. Eastburn, N. Grunwald, D. J. Jardine, G. Stacey, N. A. Tisserat, F. P. Wong

**Public Policy Board (PPB)**: Chair: J. E. Leach. Members: J. D. Barak, A. R. Bennett, M. J. Boehm, T. C. Harrington, P. T. Himmel, C. A. Ishimaru, J. P. Mueller, J. L. Sherwood, J. R. Steadman. Ex-Officio: M. L. Elliott. Interns: M. L. Lewis Ivey, M. Kabbage. DC Rep: K. A. Eversole

**Visioning Forum**: Cochairs: C. C. Mundt, L. L. Kinkel. Members: C. Allen, W. E. Dolezal, C. E. De Jensen, S. E. Gold, N. Grunwald, R. P. Kaiser, S. Kamoun, F. J. Louws, K. Ong, P. A. Paul, L. J. Vaillancourt, F. P. Wong

### **APS Ad Hoc Committees**

**Annual Meeting Models**: Chair: A. E. Dorrance. Members: J. E. Adaskaveg, J. C. Beinapff, C. Cowger, C. A. Ishimaru, D. J. Jardine, R. P. Kaiser, W. F. Mahaffee, J. W. Moyer, J. E. Takach

**Committee on Innovation and Entrepreneurship**: Cochairs: A. R. Chase, F. P. Wong. Members: G. E. Harman, G. J. Holmes, T. K. Mitchell, J. M. Russo, D. G. Schmale, H. Scherm, L. J. Stowell, C. L. Swett, L. R. Triplett. Consulting Member: M. A. Mellano

**APS-CSPP Working Group**: Chair: Y. Jia. Members: J. H. McBeath, Y-L. Peng, G-L Wang, Y. Yang

**ISF Collaboration on Codification of Plant Races/Strains**: Chair: P. T. Himmel. Members: W. E. Dolezal, L. J. du Toit, V. Grimault, C. J. Kurowski, J. Mizicko, G. A. Pederson, R. Ranganathan, C. M. Sandlin, K. van Ettekenoven, E. Vivoda, K. M. Webb. Consulting Members: R. L. Dunkle, A. W. LaVigne

**Manual of Operations 2011**: Chair: D. T. Beadle. Members: M. E. Daub, D. M. Gadoury, R. C. Gergerich, J. E. Loper

### **Special Committees**

**APS Advisory Committee on Plant Biosecurity**: Chair: J. P. Stack. Members: K. O. Britton, W. E. Dolezal, M. A. Draper, J. Fletcher, S. Kim, C. Levesque, D. G. Luster, R. D. Martyn, M. H. Royer, K. T. Schneider, J. L. Sherwood, K. L. Smith

**APS-PMN Oversight**: Chair: K. L. Ivors. JEC Representatives: R. D. Martyn, B. D. Olson. Members: J. E. Kaminski, C. L. Palmer, N. A. Tisserat

**Emerging Diseases and Pathogens**: Chair: D. G. Luster. Members: A. M. Alvarez, A. R. Bennett, P. H. Berger, M. R. Bonde, J. K. Brown, R. Bulluck, V. D. Damsteegt, J. Fletcher, N. Grunwald, J. Hammond, J. S. Hartung, D. M. Huber, C. A. Ishimaru, G. Kulda, A. Levesque, L. Levy, L. V. Madden, C. W. Magill, R. R. Martin, D. C. McGee, F. W. Nutter, M. E. Palm, N. W. Schaad, J. L. Sherwood, D. R. Smith, J. P. Stack, S. A. Tolins, A. T. Tschanz, A. K. Vidaver, W. M. Wintermantel, G. C. Wisler, X. Yang

### **Editorial Boards**

**APS Press**: Editor-in-Chief: M. L. Daughtrey. Associate Editor-in-Chief: T. C. Pauly. Acquisitions Editors: D. M. Benson, L. V. Madden. Senior Editors: C. Allen, J. K. Brown, L. E. Datnoff, F. M. Dugan, D. M. Eastburn, J. H. Graham, S. T. Koike, G. P. Munkvold, M. E. Palm-Hernandez. Ex-Officio (non-voting): R. C. Rowe

**Education Center-Plant Health Instructor**: Editor-in-Chief: A. B. Baudoin. Senior Editors: W. W. Bockus, P. D. Brune, T. A. Evans, S. E. Gold, W.-B. Shim, N. Shishkoff, C. D. Smart, K. L. Stevenson. Associate Editors: L. F. S. Leandro, L. I. Santamaría

**MPMI**: Editor-in-Chief: G. Stacey. Senior Editors: J. R. Alfano, G. A. Beatie, J. P. Carr, B. Ding, B. N. Kunkel, M. Lorito, J. M. McDowell, T. P. Nuernberger, U. Paszkowski, S. Robatzek, D. Roby, M. J. Sadowsky, K. Shirasu, G. Smart, K. Szczeglowski. Associate Editors: G. Berg, J. Boch, A. Brachmann, T. C. Charles, G. L. Coaker, E. Cytrin, B. Day, D. Desveaux, A. DiPietro, A. Heese, L. Johnson, P. Kachroo, M. Kawaguchi, K. Kazan, B. Kemmerling, D. Mackey, P. Mergaert, K. Minamsawa, M. Mitchum, P. Moffett, P. van West, A. Viterbo, J. Zhou, C. Zipfel

**Phytopathology**: Editor-in-Chief: N. Grunwald. Senior Editors: T. B. Adhikari, V. C. Blok, C. M. Deom, B. K. Duffy, D. H. Gent, S. B. Goodwin, R. C. Hamelin, A. V. Karasev, N. McRoberts, T. L. Peever, J. J. Polashock, B. M. Pryor, S. S. Savary, G. W. Sundin, W. W. Turechek. Associate Editors: J. Crouch, N. M. Donofrio, G. W. Douhan, L. J. du Toit, K. J. Evans,

E.W. Jackson, E. Jacquot, M. Jimenez-Gasco, R. W. Jones, S. T. Koike, W. Ma, W. F. Mahaffee, A. L. Mila, T. K. Mitchell, E. S. G. Mizubuti, O. P. Pruvost, N.A. Rayapati, S. Restrepo, H. Sanfacon, J. B. Scott, B. Sipes, I. E. Tzanetakis, C. M. Vera Cruz, L. A. Wanner, S. L. Woo, F. Workneh, X. Xu, and Y. Zhao

**Plant Disease:** *Editor-in-Chief:* R. M. Davis. *Focus Editor:* Thor Kommedahl. *Senior Editors:* K. Baumgartner, R. H. Bralsky, J. W. Buck, A. O. Charkowski, J. C. Correll, C. Cowger, L. J. du Toit, M. L. Gleason, R. M. Harveson, B. D. Nelson, S. J. Pethybridge, M. K. Romberg, E. N. Rosskopf, G. Schnabel, J. J. Stapleton, C. A. Strausbaugh, I. E. Tzanetakis, Feature Editor: J. J. Farrar. *Disease Notes Assigning Editors:* J. Hao, B. M. Wu. *Associate Editors:* B. J. Aegeerter, M. E. L. Burrows, K. D. Cox, A. T. Dyer, A. Elling, A. Eskalen, C. D. Garzon, D. H. Gent, S. F. Hanson, C. Hong, M. M. Kennelly, M. F. R. Khan, S. M. Marek, M. R. Miles, S.C. Nelson, P. A. Paul, D. G. Schmale III, C. D. Smart, K. C. Steddom, C. Y. Warfield, C. Y. Warfield, L. Willocquet, C. Xiao, L. E. Yakabe

**Plant Disease Management Reports:** *Editor-in-Chief:* F. P. Wong. *Section Editors:* K.D. Cox, J. R. Glass, M.. R. Khan, C. S. Kousik, D. B. Langston, J. C. Mertely, J. S. Miller, B. D. Olson, D. G. Ouimette, G. B. Padgett, S. L. Rideout, H. J. Scheck, K. W. Seebold, M. Tomaso-Peterson, K. A. Wise, C. A. Wyenandt. *Assigning Editors:* C. M. Becker, J. L. Beckerman, D. R. Cooley, P. F. Harmon, A. Henn, C. R. Hollingsworth, T. A. Jackson, C. S. Johnson, R. C. Kemerait, R. P. Larkin, C. Y. Warfield

**Plant Health Progress:** *Editor-in-Chief:* N. A. Tisserat. *Senior Editors:* D. M. Ferrin, C. M. Ocamb, G. B. Padgett, J. W. Pscheidt, P.D. Roberts, J. P. Stack, N. R. Walker. *Associate Editor:* S. T. Koike

#### Affiliate Representatives:

*American Association for the Advancement of Science:* D. G. Gilchrist; *Coalition on Funding Agricultural Research:* J. L. Sherwood; *Intl Society for Plant Pathology:* T. A. Evans. *Members:* J. H. Andrews, M. Babadoost, A. R. Bennett, L. A. Calvert, K. F. Cardwell, J. C. Correll, J. H. McBeath, S. A. Miller, R. C. Ploetz. *Intl Union of Microbiological Societies:* C. T. Bull; *Mycological Society of America:* C. M. Stiles; *National Council for Science and the Environment:* J. J. Marois; *PlantingScience:* A. B. Baudoin, K. Ong, *Society of Envn Toxicology and Chemistry:* M. Simini; *Society of Nematologists:* T. L. Niblack

#### Historian:

P. D. Peterson

#### APS General Policy Committees

*Collections and Germplasm:* *Chair:* S. Li. *Immediate Past Chair:* K. McCluskey. *Vice Chair:* A. Bennett. *Members:* N. Abou-Zeid, M. G. Bakker, M. D. Bandla, M. Chen, W. E. Dolezal, F. M. Dugan, K. A. Eversole, D. R. Fravel, J. B. Jones, M. L. Miller, T. Reid, A. Sechler, M. S. Torres, A. Wiest

*Committee for Diversity and Equality:* *Chair:* L. Ma. *Immediate Past Chair:* M. Luisa Burgos. *Vice Chair:* R. S. Goswami. *Members:* F. Baysal-Gurel, A. M. Brunings, C. T. Bull, R. Bulluck, S. Y. Elateek, P. L. Fashing, A. Gambhir, L. E. Hanson, M. C. Hayslett, E. Hernandez, D. M. Hinton, S. Lunden, K. J. Martin, F. M. Mathew, S. J. Mauzey, S. A. Masurek, R. Melanson, R. L. Melnick, V. Parkunan, A. M. Poleatewich, P. Rojas, D. Serrano, A. Terry, M. S. Torres, C. H. Walkinshaw, N. A. Ward, W. Wechter, A. Wen, A. E. Whitfield, D. Xavier, L. Zhang

*Early Career Professionals:* *Chair:* T. J. Hughes. *Immediate Past Chair:* G. Rauscher. *Vice Chair:* C. M. Wallis. *Members:* O. Batuman, F. Baysal-Gurel, K. D. Broders, R. Bulluck, E. Z. Byamukama, C. E. Jahn, Y. Li, J. Marelli, D. A. McDuffee, T. K. Mitchell, E. A. Moya, K. Janor Owens, V. Parkunan, S. Restrepo, K. T. Schneider, B. K. Scholz-Schroeder, K. L. Schroeder, V. Sengoda Gounder, A. Terry, M. Xiang

*Extension:* *Chair:* B. K. Gugino. *Immediate Past Chair:* K. W. Seebold. *Vice Chair:* L. E. Osborne. *Members:* B. J. Aegeerter, T. W. Allen, S. S. Arcibal, C. J. Balbalian, M. M. Dewdney, H. R. Dillard, A. E. Dorrance, K. L. Everts, D. M. Ferrin, A. E. Ferry, A. J. Gevens, R. M. Harveson, J. Carol Himmelstein, A. Coleen Hodges, R. M. Hunger, K. L. Ivors, T. A. Jackson, Y. Jo, R. C. Kemerait, M. F. R. Khan, J. L. Koenig, C. Lapaire Harmon, D. K. Malvick, S. G. Markell, M. T. McGrath, K. A. McGuire, R. Melanson, J. C. Mertely, O. T. Neher, S. C. Nelson, K. Ong, V. Parkunan, E. E. Pfeifer, S. L. Rideout, A. E. Robertson, G. E. Ruhl, K. C. Steddom, A. U. Tenuta, S. J. Vasquez, N. A. Ward, K. A. Wise, C. A. Wyenandt

*Graduate Student:* *Chair:* K. R. Lannon. *Immediate Past Chair:* H. A. Olson.

*Vice Chair:* J. M. Jacobs. *Members:* M. Abdelkarim, S. S. Arcibal, T. Baldwin, S. J. Bardsley, R. Bittner, O. Burbano-Figueroa, M. Luisa Burgos, E. Campoverde, A. K. Chanda, C. Chen, J. S. Clark, B. L. Dalsing, J. Daniels, S. Y. Elateek, M. Lee Ellis, K. Fiedler, V. Gupta, S. Hill, J. Hu, J. C. Jirak, S. G. Kunjeti, K. Liberator, C. Mattupalli, S. A. Masurek, R. Melanson, A. F. Morris, M. M. Moyer, K. L. Ness, K. N. Neufeld, R. Noar, J. Patel, A. F. Payne, E. E. Pfeifer, I. Power, R. Raudales Banegas, T. Reid, M. Soledad Benitez, A. Terry, S. Thomas, B. Tian, L. R. Triplett, M. C. Velez, A. L. Vu, P. Wallace, N. A. Ward, L. P. Wasala, A. Watson, D. Xavier, Z. Zhang, C. R. Zumpetta

*Industry:* *Chair:* J. L. Chaky. *Chair-Elect:* G. H. Musson. *Immediate Past Chair:* A. P. Hert. *Vice Chair:* C. A. Gallup. *Members:* D. T. Beadle, M. A. Bhatti, W. E. Dolezal, K. A. Eversole, J. E. Fajardo, J. Fletcher, L. Fought, G. J. Holmes, E. W. Honeycutt, R. Joost, R. P. Kaiser, P. J. Kuhn, D. A. McDuffee, D. McKenzie, C. B. Meador, H. Mellinger, P. Morrow, H. Morton, J. P. Mueller, D. Myhaver, B. D. Olson, P. M. Rogers, B. E. Ruden, C. T. Schiller, V. Spadafora, E. C. Tedford, D. C. Thompson, R. S. Whitson, K. R. Whitten Buxton

*Regulatory Plant Pathology:* *Chair:* N. K. Osterbauer. *Immediate Past Chair:* T. S. Schubert. *Vice Chair:* C. S. Thomas. *Members:* P. Abad, F. M. Assis Filho, P. H. Berger, T. N. Boratynski, L. G. Brown, R. Bulluck, C. Chung, S. Hill, C. R. Hollingsworth, D. A. Johnson, M. J. Kenney, K. L. Kosta, K. W. Kromroy, R. T. Lartey, P. I. Lewis, M. L. Lewis Ivey, C. J. Maroon-Lango, J. M. McKemy, A. F. Morris, S. W. Mullis, G. L. Peterson, E. V. Podlechis, J. J. Qiu, T. Reid, S. Rizvi, T. Seeland, E. S. Serrano, G. K. Smith, S. Thomas, M. G. Tiffany, J. C. Trolinger, A. T. Tschanz. *Nominees:* S. Inch, A. K. Pathan

*Teaching:* *Chair:* M. Skaria. *Immediate Past Chair:* C. R. Little. *Vice Chair:* J. E. Woodward. *Members:* K. Bastas, T. E. Chase, M. Chen, S. Durairaj, D. M. Eastburn, S. D. Ellis, D. M. Gadoury, B. D. Geary, F. E. Gildow, M. Jimenez-Gasco, M. D. Ospina-Giraldo, B. H. Ownley, A. M. Poleatewich, T. Reid, K. T. Willyerd

#### APS Subject Matter Committees

*Bacteriology:* *Chair:* Y. Zhao. *Immediate Past Chair:* M. Roper. *Vice Chair:* N. Wang. *Members:* T. B. Adhikari, C. Allen, A. M. Alvarez, V. Ancona, P. Basu Thakur, G. A. Beattie, S. V. Beer, F. Behlau, C. T. Bull, P. Champouiseau, A. O. Charkowski, K. Chen, J. Chen, T. A. Coutinho, J. Daniels, L. De La Fuente, T. P. Denny, M. M. Dewdney, S. M. Dossey, S. Durairaj, J. Figueiredo, L. Fleites, Z. Flores, F. F. Garces, J. W. Greenwald, G. Gu, Y. Guo, J. Ham, A. P. Hert, A. Huerta, J. M. Jacobs, N. Jalani, E. G. Johnson, J. B. Jones, H. S. Karki, L. M. Keith, D. Y. Kobayashi, S. A. Lee, S. Li, Q. Liu, S. Lu, M. Marquez Villavicencio, B. B. McSpadden Gardener, F. Meng, G. OKeefe, J. Palumbo, M. L. Paret, G. David Peckham, E. Postnikova, N. Potnis, G. De Rebello, A. R. Records, T. Reid, P. Rott, N. W. Schaad, D. Selimi, F. Smith, S. Soby, A. Sreedharan, L. R. Triplett, P. Trivedi, H. Tseng, L. A. Wanner, A. C. Wayadande, A. Mohamed Zaid, S. Zhang, C. R. Zumpetta

*Biological Control:* *Chair:* M. A. Weaver. *Immediate Past Chair:* X. Jin. *Vice Chair:* Y. Huang. *Members:* H. K. Abbas, N. Abou-Zeid, M. G. Bakker, F. Baysal-Gurel, C. Cao, J. J. Cascino, S. Chen, S. A. Conaway, D. R. Fravel, E. Hernandez, R. Jaime, P. Ji, D. Lakshman, R. P. Larkin, R. G. Linderman, S. Lu, B. B. McSpadden Gardener, R. L. Melnick, E. A. Moya, O. T. Neher, J. Park, A. M. Poleatewich, B. M. Pryor, X. Rong, S. Francis Shamoun, F. Smith, B. Spakes Richter, A. Tohamy, G. S. Tomimatsu, W. Wechter, J. Yu, G. Y. Yuen, A. Mohamed Zaid, S. Zhang

*Biotechnology:* *Chair:* D. A. Halterman. *Immediate Past Chair:* Y. Yang. *Vice Chair:* P. J. Raymond. *Members:* M. A. Bhatti, S. Chaluvadi, K. Chen, X. Chen, V. R. Correa, C. Maria De La Torre Cuba, S. Durairaj, J. Figueiredo, L. Fleites, G. Gu, L. Guo, L. R. Gutha, S. F. Hanson, E. E. Hellwell, B. Karakkat, S. J. Klosterman, S. G. Kunjeti, J. Liu, J. Marelli, A. F. Morris, E. Ng, P. Obilo, W. O. Okunowo, A. Pashaei, W. Pipatpongpinyo, N. Potnis, A. Rahman, G. De Rebello, M. Roca, A. Edith Rodriguez Estrada, G. Shirsekar, S. Soby, P. Songkumarn, G. S. Tomimatsu, N. A. Weinsetel, W. Wight, S. Zhang

*Chemical Control:* *Chair:* G. J. Holmes. *Immediate Past Chair:* A. Cochran. *Vice Chair:* C. T. Schiller. *Members:* J. E. Adaskaveg, H. F. Avenot, M. Babadoost, D. R. Cooley, C. D. Cruz, J. E. Fajardo, H. C. Forster, L. Fought, J. A. Frank, C. D. Garzon, U. U. Gisi, B. K. Gugino, N. I. Khan, M. F. R. Khan, Y. Kim, C. L. Kohls, X. Li, H. Morton, G. H. Musson,

B. D. Olson, A. K. Pathan, J. W. Pscheidt, G. Qiao, M. Rahman, S. L. Rideout, B. E. Ruden, P. G. Sanderson, J. Silveira Baggio, V. Spadafora, A. H. Tally, E. C. Tedford, A. Terry, A. Thomas, D. C. Thompson, C. A. Wyenandt, C. Xiao, Y. Yin

**Crop Loss Assessment and Risk Evaluation (CARE): Chair:** L. G. Brown. **Immediate Past Chair:** L. Willocquet. **Vice Chair:** K. L. Bowen. **Members:** A. N. Awurum, C. H. Bock, E. Z. Byamukama, P. Esker, A. Ficke, D. H. Gent, C. A. Hollier, A. B. Kriss, D. L. Long, X. Lu, L. V. Madden, N. McRoberts, O. Modesto Olanya, M. Nita, F. W. Nutter, K. J. Odenbach, P. V. Oudemans, S. Parker, P. A. Paul, S. J. Pethybridge, W. F. Pfender, P. J. Raymond, S. S. Savary, A. Westphal, J. L. Woods

**Diagnostics:** **Chair:** M. Williamson. **Immediate Past Chair:** C. D. Garzon. **Vice Chair:** E. W. Honeycutt. **Members:** F. M. Assis Filho, C. J. Balbalian, F. Baysal-Gurel, J. M. Byrne, J. L. Chaky, P. B. de Sa, S. M. Dobesh, B. Aurora Edmunds, C. K. Evans, H. M. Fouly, A. Coleen Hodges, E. W. Honeycutt, G. P. Hoyos, W. Kaneshiro Sueno, S. Kim, U. C. Kodira, S. T. Koike, R. Kubota, J. H. LaForest, L. Levy, Y. Li, M. F. Licha, S. A. McBride, B. L. Meiring, T. Mekuria, D. D. Miller, O. Mor, M. K. Nakhlha, P. R. Northover, J. L. O'Mara, J. H. Payne, K. K. Rane, G. E. Ruhl, M. Serdani, R. Singh, N. J. Taylor, M. S. Torres, A. M. Vitoreli, A. Vrient, I. Wagara, J. Q. Xia

**Diseases of Ornamental Plants:** **Chair:** A. J. Palmateer. **Immediate Past Chair:** C. L. Palmer. **Vice Chair:** D. M. Ferrin. **Members:** D. Benson, A. R. Chase, J. H. Dobbs, W. Dong, B. Aurora Edmunds, J. L. Hall, K. L. Ivors, K. E. Kalmowitz, C. R. Krause, J. S. Lamborn, Y. Li, R. G. Linderman, W. F. Mahaffee, B. L. Meiring, M. T. Mmbaga, K. K. Rane, B. Rao, C. A. Smith, K. C. Steddom, N. J. Taylor, A. Vrient

**Epidemiology:** **Chair:** P. Sande Ojiambo. **Immediate Past Chair:** A. L. Mila. **Vice Chair:** H. K. Ngugi. **Members:** D. J. Anco, L. G. Brown, E. Z. Byamukama, N. P. Castilla, X. Chen, K. Chiang, D. R. Cooley, P. Esker, D. M. Gadoury, E. M. Goss, A. B. Kriss, Y. Li, S. Livingston, M. M. Moyer, K. J. Odenbach, S. J. Pethybridge, W. F. Pfender, V. Phlion, T. Reid, J. Salgado, L. Turoop, M. W. Wallhead, K. T. Willyerd. **Nominee:** N. Fernandez Magculia

**Forest Pathology:** **Chair:** J. J. Bronson. **Immediate Past Chair:** P. C. Spaine. **Vice Chair:** I. Meadows. **Members:** D. N. Appel, C. J. Balbalian, K. O. Britton, G. A. Chastagner, M. Chen, S. J. Frankel, E. M. Goheen, E. M. Hansen, L. M. Haugen, M. T. Kasson, M. Kim, G. Laflamme, W. L. MacDonald, D. Noshad, S. W. Oak, J. G. O'Brien, W. J. Otrosina, B. A. Perez, T. Reid, D. M. Rizzo, S. Francis Shamoun, P. W. Sherwood, W. C. Shortle, R. A. Snieszko, B. Spakes Richter, C. S. Thomas, N. A. Tisserat, M. C. Velez, Y. Wu, P. J. Zambino. **Nominee:** A. K. Pathan

**Genetics:** **Chair:** E. M. Goss. **Immediate Past Chair:** S. Zhong. **Vice Chair:** S. J. Klosterman. **Members:** T. B. Adhikari, S. Amyotte, P. J. Balint-Kurti, R. G. Bhat, M. Luisa Burgos, W. Chen, X. Chen, K. F. Dobinson, T. L. Friesen, S. L. Giannaria, N. Grunwald, B. Guo, R. Hernandez-Martinez, M. Jimenez-Gasco, B. Karakkat, H. Kistler, S. Li, L. Ma, X. Mao, T. Reid, J. Xu, K. A. Zeller, L. Zhang

**Host Resistance:** **Chair:** A. Mengistu. **Immediate Past Chair:** K. M. Webb. **Vice Chair:** C. S. Kousik. **Members:** T. B. Adhikari, P. J. Balint-Kurti, R. G. Bhat, R. L. Brown, E. Campoverde, M. L. Carson, W. Chen, X. Chen, Z. Chen, C. Chung, X. Gao, F. F. Garces, N. W. Gross, D. A. Halterman, R. M. Hunger, R. Joost, S. G. Kunjeti, S. Li, Y. Li, E. A. Milus, O. Mor, M. Ortega, M. A. Pastor-Corrales, J. B. Rasmussen, G. Rauscher, M. G. Redinbaugh, J. C. Rupe, P. W. Sherwood, R. A. Snieszko, G. M. Tabor, P. Uribe, C. M. Vera Cruz, P. Veronese, A. Westphal, C. Xie, Y. Yang

**Integrated Plant Disease Management:** **Chair:** P. D. Roberts. **Immediate Past Chair:** S. Sanogo. **Vice Chair:** P. Ji. **Members:** A. Adesemoye, H. F. Avenot, F. Baysal-Gurel, E. Z. Byamukama, M. Chen, D. H. Gent, C. S. Kousik, C. R. Krause, S. Monfort, O. T. Neher, M. L. Paret, G. Qiao, A. Tohamy, G. E. Vallad, I. Wagara, J. E. Woodward, A. Mohamed Zaid, S. Zhang, X. Zhou. **Nominee:** N. Fernandez Magculia

**Molecular and Cellular Phytopathology:** **Chair:** N. M. Donofrio. **Immediate Past Chair:** D. A. Halterman. **Vice Chair:** S. R. Uppalapati. **Members:** T. B. Adhikari, B. H. Bluhm, M. D. Bolton, O. Burbano-Figueroa, A. K. Chanda, Y. Chen, L. M. Ciuffetti, V. R. Correa, C. Maria De La Torre Cuba, S. Ding, M. Lee Ellis, J. Figueiredo, X. Gao, C. D. Garzon, L. Guo, L. A. Hadwiger, D. Kumar, D. Lakshman, J. Liu, S. Lunden, L. Ma, S. M. Marek, R. Melanson, T. K. Mitchell, M. Mukherjee, M. Ortega, F. Qu, T.

Reid, K. Jane Riggs, W. Shim, G. Shirsekar, D. Kumar Singh, P. Songkumarn, P. Uribe, H. Wang, D. Wickramasinghe, R. P. Wise, T. J. Wolpert, Q. Xiang, Y. Yang, X. Yang, X. Zhou

**Mycology:** **Chair:** T. E. Chase. **Immediate Past Chair:** A. J. Gevens. **Vice Chair:** B. M. Pryor. **Members:** G. Z. Abad, M. Abril, R. G. Bhat, K. D. Broders, W. L. Bruckart, M. Chen, M. Chen, K. E. Damann, J. C. Dianese, F. M. Dugan, D. M. Eastburn, M. Lee Ellis, Z. Fan, D. L. Funnell-Harris, D. A. Glawe, N. W. Gross, L. Guo, L. E. Hanson, G. W. Hudler, P. Inderbitzin, S. A. Jordan, M. Karunakaran, H. Kistler, D. Lakshman, C. Lapaire Harmon, S. Li, S. Livingston, S. R. May, J. Morales Osorio, E. Nyaga Njambere, R. Noar, M. Ortega, K. Rappaport, R. Ren, L. Ma Rodriguez-Salamanca, L. Ines Santamaría, M. Skaria, C. M. Stiles, R. R. Sweany, M. S. Torres, A. M. Vitoreli, M. W. Wallhead, A. Wan, B. M. Wu, J. Xu, H. M. Young, S. Zhong

**Mycotoxicology:** **Chair:** H. K. Abbas. **Immediate Past Chair:** A. E. Glenn. **Vice Chair:** S. Monfort. **Members:** T. W. Allen, C. W. Bacon, T. Baldwin, R. Bandyopadhyay, B. H. Bluhm, R. L. Brown, T. E. Chase, Z. Chen, P. J. Cotty, K. E. Damann, A. E. Desjardins, R. Dill-Macky, M. D. Doubledee, A. M. Fakhoury, D. L. Funnell-Harris, N. P. Garber, S. Gold, R. S. Goswami, B. Guo, L. Guo, S. Herrero, D. M. Hinton, R. L. Hirsch, P. Horevaj, R. Jaime, H. Kim, M. V. Kolomiets, G. Kuldaau, S. Mansouri, H. L. Mehl, T. J. Michailides, G. G. Moore, M. Mukherjee, G. P. Munkvold, R. Noar, A. Ortega-Beltran, E. R. Palencia, J. Palumbo, G. A. Payne, F. Plasencia, C. Probst, R. H. Proctor, J. Ridener, A. Schaafsma, W. Shim, S. Uppala, C. P. Woloshuk, I. E. Yates, N. C. Zitomer

**Nematology:** **Chair:** K. Wang. **Immediate Past Chair:** A. D. Ziems. **Vice Chair:** I. A. Zasada. **Members:** J. Becker, G. W. Bird, J. P. Bond, R. Bulluck, W. Dong, A. Elling, R. N. Huettel, J. Ma, A. E. MacGuidwin, T. L. Niblack, V. Parkunan, L. A. Payan, B. S. Sipes, F. M. Vera-Solis, D. Xavier

**Pathogen Resistance:** **Chair:** C. A. Wyenandt. **Immediate Past Chair:** F. P. Wong. **Vice Chair:** M. M. Dewdney. **Members:** T. W. Allen, J. L. Beckerman, M. J. Boehm, T. Chandgoyal, K. D. Cox, A. K. Culbreath, O. Fajolu, W. D. Gubler, B. K. Gugino, P. F. Harmon, K. L. Ivors, L. Kanetis, D. B. Langston, S. Livingston, J. Ma, M. T. McGrath, H. Morton, G. H. Musson, G. Olaya, B. D. Olson, N. Peres, B. E. Ruden, K. L. Stevenson, W. L. Wiebe, W. F. Wilcox, Q. Xiang

**Phyllosphere Microbiology:** **Chair:** V. O. Stockwell. **Immediate Past Chair:** S. A. Lee. **Vice Chair:** J. H. J. Leveau. **Members:** P. J. Balint-Kurti, S. J. Bardsley, S. D. Cohen, J. H. Graham, J. Carol Himmelstein, W. F. Mahaffee, G. W. Sundin, M. S. Torres, V. Toussaint, N. A. Ward, A. Wen

**Plant Pathogen and Disease Detection:** **Chair:** C. J. Maroon-Lango. **Immediate Past Chair:** M. K. Nakhlha. **Vice Chair:** M. R. Sudarshana. **Members:** J. A. Abad, B. Agindotan, R. N. Attanayake, N. B. Bajet, K. Bastas, F. Baysal-Gurel, T. C. Creswell, T. P. Denny, M. D. Doubledee, S. Durairaj, H. M. Fouly, R. K. Genger, S. Glucksman, L. E. Hanson, D. R. Henderson, L. A. Jones, M. Karunakaran, S. Khayyat Binazir, R. Kubota, L. Levy, M. F. Licha, Z. Liu, S. Livingston, D. G. Luster, J. Ma, S. K. Marquardt, F. N. Martin, R. R. Martin, S. J. Mauzey, V. A. Mavrodieva, S. R. May, T. Mekuria, O. Mor, S. W. Mullis, S. Negi, E. Nyaga Njambere, H. R. Pappu, V. Parkunan, K. F. Pedley, D. D. Picton, G. Qiao, D. Quito Avila, N. A. Rayapati, S. Rizvi, R. K. Sampangi, D. Sherman, B. B. Shew, R. Singh, J. P. Stack, P. Sudarshana, J. Sun, B. Tadesse, M. G. Tiffany, I. Wagara, C. A. Webb, J. Xia. **Nominees:** S. Inch, N. Fernandez Magculia

**Postharvest Pathology:** **Chair:** C. Xiao. **Vice Chair:** W. M. Jurick. **Members:** J. E. Adaskaveg, J. A. Bartz, R. S. Bounds, P. D. Brune, B. D. Bruton, A. Cochran, W. S. Conway, H. C. Forster, B. J. Jacobsen, W. J. Janisiewicz, C. M. Jewell, Y. Kim, C. L. Kohls, M. J. Mahovic, T. J. Michailides, A. M. Poleatewich, D. B. Prusky, T. Reid, P. G. Sanderson, P. L. Sholberg, J. L. Smilanick, D. Sugar, I. Vico, Y. Yin

**Seed Pathology:** **Chair:** S. A. Heuchelin. **Vice Chair:** G. P. Munkvold. **Members:** A. C. Alcalá, K. S. Arthur, F. M. Assis Filho, A. N. Awurum, N. B. Bajet, H. Bouzar, A. C. Castro, W. Chen, Q. L. Chen, A. Cochran, K. Cochran, S. De la Fuente van Bentem, W. E. Dolezal, B. Dutta, D. S. Egel, A. Fessehaie, R. L. Gilbertson, Y. Ha, G. Hiddink, P. T. Himmel, S. Z. Islam, K. Johnson, N. I. Khan, S. Kim, S. Kim, U. C. Kodira, H. Koenraadt, C. J. Kurowski, D. Lakshman, S. Li, M. E. May, H. Morton, G. Olaya, M. Pagani, L. D. Porter, T. Reid, J. C. Rupe, R. K. Sampangi, C. M. Sandlin, M. Scandiani, T. Seeland, L. M. Shepherd, J. Soto-Arias, A. Terry, D. L. Thomas, D. L. Thomas, S. Thomas, A. B. Thornton, M. S. Torres, J. C. Trolinger, C. M. Vera Cruz, E. Vivoda, P. Vredenbregt, A. Vrient, A. L. Vu,

I. Wagara, R. R. Walcott, S. L. Walker, S. K. Walker, W. L. Wiebe, L. P. Woudt, H. L. Ypema, X. Zheng. *Nominee:* S. Parker

*Soil Microbiology and Root Diseases:* *Chair:* G. E. Weiland. *Immediate Past Chair:* J. Hao. *Vice Chair:* C. D. Garzon. *Members:* Z. Atallah, T. T. Barasubiyi, F. Baysal-Gurel, K. D. Broders, G. T. Browne, R. Bulluck, S. Durairaj, L. E. Hanson, A. Huerta, T. J. Hughes, P. Ji, M. Karunakaran, D. A. Kluepfel, R. G. Linderman, F. J. Louws, L. Ma, J. C. Mertely, S. M. C. Njoroge, L. Ines Santamaria, B. Spakes Richter, M. E. Stanghellini, A. Terry, S. R. Uppalapati, M. C. Velez, L. A. Wanner, W. Wechter, A. Westphal, B. M. Wu, M. J. Wunsch, L. E. Yakabe, X. Zhou

*Tropical Plant Pathology:* *Chair:* C. A. Angel. *Immediate Past Chair:* R. F. Lee. *Vice Chair:* O. J. Alabi. *Members:* S. S. Arcibal, T. T. Barasubiyi, R. H. Bransky, A. O. Charkowski, R. A. Coelho Netto, C. D. Cruz, V. D. Damsteegt, C. M. Herron, J. M. Jacobs, L. M. Keith, D. Myhaver, R. Noar, I. Power, R. Raudales Banegas, T. Reid, M. Roca, M. Soledad Benitez, A. Thomas, I. Wagara. *Nominee:* S. Inch

*Turfgrass Pathology:* *Chair:* D. L. Smith. *Immediate Past Chair:* J. Patrick Kerns. *Vice Chair:* B. J. Horvath. *Members:* M. L. Agnew, T. D. Blunt, G. T. Cooper, M. Cutulle, P. F. Harmon, Y. Jo, K. E. Kalmowitz, J. E. Kaminski, R. J. Keese, J. L. Koenig, R. Latin, Y. Li, S. B. Martin, L. Miller, D. Mosdell, A. M. Orshinsky, D. H. Perry, B. Rao, T. Reid, M. Tomaso-Peterson, M. S. Torres, L. P. Tredway, R. L. Wick, F. P. Wong, N. Zhang

*Vector-Pathogen Complexes:* *Chair:* J. K. Brown. *Vice Chair:* A. C. Wayadande. *Members:* S. T. Adkins, R. P. P. Almeida, E. A. Ammar, E. A. Backus, J. D. Barak, R. H. Bransky, V. D. Damsteegt, J. Figueiredo, F. E. Gildow, E. G. Johnson, A. G. Laney, R. F. Lee, S. W. Mullis, B. Poudel, D. Quito Avila, N. A. Rayapati, M. G. Redinbaugh, P. Rojas, W. Schneider, C. Stafford, L. R. Stewart, I. E. Tzanetakis, D. E. Ullman, N. Wang, S. E. Webb, A. E. Whitfield, W. M. Wintermantel, R. K. Yokomi, A. Mohamed Zaid, Y. Zhao, J. Zhou

*Virology:* *Chair:* R. W. Hammond. *Immediate Past Chair:* N. A. Rayapati. *Vice Chair:* L. R. Stewart. *Members:* J. A. Abad, R. Acosta-Leal, S. T. Adkins, B. Agindotan, M. Al Rwahnih, O. J. Alabi, A. Ali, C. V. Almeyda, C. A. Angel, F. M. Assis Filho, I. Badillo-Vargas, O. Batuman, O. Batuman, B. Blades, J. K. Brown, E. Campoverde, F. M. Cisneros, V. D. Damsteegt, C. Maria De La Torre Cuba, S. Eid, F. F. Garces, L. R. Gutha, M. R. Hajimorad, J. Hammond, S. F. Hanson, J. S. Hu, S. Jarugula, R. L. Jordan, A. C. Kaye, A. G. Laney, R. T. Lartey, L. Levy, K. Ling, S. Lunden, C. J. Maroon-Lango, N. Mehle, T. Mekuria, U. K. Melcher, S. W. Mullis, B. Murthy Vemulapati, H. R. Pappu, S. Poojari, B. Poudel, F. Qu, D. Quito Avila, S. Rabindran, N. A. Rayapati, N. L. Robertson, D. Rotenberg, S. Sabanadzovic, R. K. Sampangi, W. Schneider, J. E. Schoelz, V. Sengoda Gounder, M. R. Sudarshana, B. Tian, I. E. Tzanetakis, A. C. Wayadande, C. G. Webster, G. Wei, J. F. White, A. E. Whitfield, W. M. Wintermantel, J. Zhou

# 2011 APS-IPPC JOINT MEETING EXHIBITORS

Representatives from leading industry suppliers will be at this year's meeting to answer questions and share information on products and services. Exhibitors are listed as of April 22, 2011. Visit [www.apsnet.org/meet](http://www.apsnet.org/meet) for updates. Floor plan can be found in the Program Guide and on the Mobile App.

- 104 AC Diagnostics, Inc. (ACDI)**  
1131 W. Cato Springs Road, Fayetteville, AR 72701;  
Phone: +1.479.595.0320 or +1.479.251.1960;  
Fax: +1.479.251.1791; Web: [www.acdiainc.com](http://www.acdiainc.com). ACDI, a leading diagnostic company, provides high-quality diagnostic products with affordable rates. ACDI offers ELISA reagents/kits for testing more than 300 plant pathogens and new product immunocapture PCR kits. They also provide testing services and contract research for customer requirements.
- 100/201 Agdia, Inc.**  
30380 County Road 6, Elkhart, IN 46514;  
Phone: +1.574.264.2615 or 1.800.622.4342;  
Fax: +1.574.206.9360; E-mail: [info@agdia.com](mailto:info@agdia.com);  
Web: [www.agdia.com](http://www.agdia.com). For 30 years, Agdia, Inc. has provided the agricultural industry with testing solutions to assist in the diagnosis and management of disease-causing plant pathogens. Agdia offers the most comprehensive line of testing options in the industry, including ELISA, ImmunoStrip on-site test kits, molecular diagnostics, and a full-service testing services laboratory. Today, Agdia remains committed to providing industry-leading products and services so that all sizes of growing operations, worldwide, can be more confident at growing healthy and profitable crops. The Agdia team looks forward to meeting with you at our booth to learn more about your diagnostic needs. We are also always available to meet with you outside exhibit hours.
- 313 American Peat Technology LLC**  
1132 Airpark Drive, Aitkin, MN 56431; Phone: +1.218.927.7888 or +1.218.831.3893; Fax: +1.218.927.3272; Web: [www.AmericanPeatTech.com](http://www.AmericanPeatTech.com). American Peat Technology (APT) is a leader in the manufacturing of microbial carriers using reed sedge peat. APT is a leading supplier of media for the rhizobia/soybean inoculant industry. Product is available in granular and powdered forms, has superior shelf life, and has proven to be an excellent microbe carrier.
- 205 APS 2012 Annual Meeting**  
3340 Pilot Knob Road, St. Paul, MN 55121;  
Phone: +1.651.454.7250; Fax: +1.651.454.0766;  
Web: [www.apsnet.org](http://www.apsnet.org). Get a look at everything Providence, Rhode Island, U.S.A. can offer you during the 2012 APS Annual Meeting. Pick up some information to plan your stay in historic and beautiful Providence, and be sure to mark your calendars to join APS again August 4-8, 2012.
- 214 APS Diagnostics**  
127 Noble Research Center, Stillwater, OK 74078;  
Phone: +1.405.744.9947; Fax: +1.405.744.6039.  
Diagnostics Jeopardy: Have fun with your knowledge of plant diseases. Play individually or together with colleagues.
- 216 APS Office of Public Relations and Outreach (OPRO)**  
3340 Pilot Knob Road, St. Paul, MN 55121;  
Phone: +1.651.454.7250; Fax: +1.651.454.0766;  
Web: [www.apsnet.org](http://www.apsnet.org). OPRO's mission is to educate the public on matters related to plant health and plant diseases and demonstrate the value of plant pathology to society. Stop by the OPRO booth view the new plant pathology Career Poster and banner available to members, and to learn about Planting-Sciences.org, see the 2011 video contest winners, and discover how social media can help spread the word about plant pathology.
- 218 APS Public Policy Board (PPB)**  
3340 Pilot Knob Road, St. Paul, MN 55121;  
Phone: +1.651.454.7250; Fax: +1.651.454.0766;  
Web: [www.apsnet.org](http://www.apsnet.org). The PPB provides scientific input on public policy issues to the policy makers and agency personnel, advocates for increased funding for agricultural research, extension, and education, and works with other scientific organizations and coalitions to increase the awareness of the science of plant pathology. Stop by the PPB booth to Become Engaged and discover how easy it is to bring awareness to your members of congress of the importance of maintaining funding for plant pathology related programs.
- 112/213 BASF Corporation**  
26 Davis Drive, P.O. Box 13528, Research Triangle Park, NC 27709; Phone: +1.919.547.2000;  
Fax: +1.919.547.2488; Web: [www.bASF.com/usa](http://www.bASF.com/usa). The BASF agricultural products portfolio includes Cabrio, Caramba, Headline, Headline AMP, Endura, Forum, Twinline, and Pristine fungicides in agricultural production; Charter and Stamina fungicides in seed treatment; and Insignia, Emerald, Trinity, and Pageant fungicides in turf or ornamentals. These products feature the active ingredients pyraclostrobin, boscalid, dimethomorph, metconazole, or triticonazole.
- 200/301 Bayer CropScience**  
2 T. W. Alexander Drive, Research Triangle Park, NC 27709; Phone: +1.919.549.2000; Fax: +1.919.549.2778; Web: [www.bayercropscienceus.com](http://www.bayercropscienceus.com). Bayer CropScience is one of the world's leading innovative crop science companies in the areas of crop protection, seeds, and plant biotechnology. Bayer CropScience offers an outstanding range of products and support for modern sustainable agriculture and for nonagricultural applications. Crop protection products to be highlighted at the exhibit include Stratego YLD, Votivo, Luna brands, Adament, Proceed, Proline, Prosaro, and Scala.

EXHIBITION

- 221 BigC**  
Suite 116, 20655 S. Western Avenue, Torrance, CA 90501; Phone: +1.310.618.9990;  
Fax: +1.310.618.9996; Web: [www.bigc.com](http://www.bigc.com). Bigc.com offers the portable Dino-Lite digital microscope that provides high-quality microscopy video interfacing to PC with clear and steady imaging and 10X-200X magnification. The included software, DinoCapture, makes it easy and convenient to capture snapshots, take video, manipulate images, and save and e-mail discoveries.
- 220 Bio Chambers Incorporated**  
477 Jarvis Avenue, Winnipeg, MB R2W 3A8, Canada; Phone: +1.204.589.8900; Fax: +1.204.582.1024; E-mail: [info@biochambers](mailto:info@biochambers); Web: [www.biochambers.com](http://www.biochambers.com). See a live demonstration of how easy it is for us to provide technical support for our growth chambers and rooms in your facility! Visit our booth to tell us your needs and pick up information on our popular products.
- 305 BIOREBA AG/Eurofins STA Laboratories**  
1821 Vista View Drive, Longmont, CO 80504; Phone: +1.303.651.6417 or +1.408.846.9964; Fax: +1.303.772.4003; Web: [www.stalabs.com/BIOREBA\\_AG\\_Products/BIOREBA\\_AG\\_Products.php](http://www.stalabs.com/BIOREBA_AG_Products/BIOREBA_AG_Products.php). Eurofins STA Laboratories and BIOREBA AG are partners in providing agro-diagnostic products and services for results you can trust. Eurofins STA Laboratories, a leading independent diagnostic laboratory, is the exclusive distributor of BIOREBA products in the United States. Eurofins STA offers effective seed quality, plant pathogen diagnosis, and disease eradication services for agricultural industries. BIOREBA's R&D laboratory develops and produces reagents and complete ready-to-use kits for the detection of plant pathogens.
- 114 British Society for Plant Pathology**  
Marlborough House, Basingstoke Road, Reading RG7 1AG, United Kingdom; Phone: +44 1603 450286; E-mail: [publicity@bspp.org.uk](mailto:publicity@bspp.org.uk); Web: [www.bspp.org.uk](http://www.bspp.org.uk). The British Society for Plant Pathology supports the professional interests of plant pathologists worldwide. We publish articles in the high-quality journals: *Molecular Plant Pathology* and *Plant Pathology* (no page charges, except color). Members can apply for travel awards, short-term visiting fellowships, summer student funds, and conference support.
- 317 Burkard Manufacturing Co. Ltd., UK**  
Unit 7, Woodcock Hill Industrial Estate, Rickmansworth, Hertsfordshire WD3 1PJ, United Kingdom; Phone: +44 1923 773134; Fax: +44 1923 774790; E-mail: [sales@burkard.co.uk](mailto:sales@burkard.co.uk); Web: [www.burkard.co.uk](http://www.burkard.co.uk). Burkard Manufacturing Co. Ltd., UK, will display an apparatus for plant pathology together with new instruments for field and laboratory applications utilizing microtiter wells for immunological evaluation. Apparatus for sampling from ground and plant foliage will be on view. Details of our complete range will be available and our representative will answer any enquiries during the meeting.
- 206 CABI**  
Nosworthy Way, Wallingford, Oxfordshire OX10 8DE, United Kingdom; Phone +44 (0) 1491 832111; Fax: +44 (0) 1491 833508; Web: [www.cabi.org](http://www.cabi.org). CABI is a leading not-for-profit publisher with 100 years of experience in scientific information provision. CABI is committed to providing high-value scholarly databases, compendia, and books to meet the needs of the scientific community, including the world-renowned CAB Abstracts database.
- 203 Campbell Scientific**  
815 West 1800 North, Logan, UT 84321; Phone: +1.435.753.2342; Fax: +1.435.750.9540; Web: [www.campbellsci.com](http://www.campbellsci.com).
- 116 Conviron**  
590 Berry Street, Winnipeg, MB R3H 0R9, Canada; Phone: +1.204.786.6451; Fax: +1.204.786.7736; E-mail: [info@conviron.com](mailto:info@conviron.com); Web: [www.conviron.com](http://www.conviron.com). Conviron is a global supplier of controlled environment systems for plant science research. We offer an extensive product portfolio of single and multitier chambers and rooms as well as research greenhouses, much of which is customized to a client's specific requirements. To help ensure project success, we also offer specialized services from early-stage engineering and design through installation, project commissioning, and on-going maintenance and support.
- 106 Dow AgroSciences LLC**  
9330 Zionsville Road, Indianapolis, IN 46268-1054; Phone: +1.317.337.1000; Web: [www.dowagro.com](http://www.dowagro.com). Dow AgroSciences LLC, based in Indianapolis, IN, is a top-tier agricultural company that combines the power of science and technology with the "human element" to constantly improve what is essential to human progress. Dow AgroSciences provides innovative technologies for crop protection, pest and vegetation management, seeds, traits, and agricultural biotechnology to serve the world's growing population.
- 208/309 DuPont Crop Protection**  
P.O. Box 30, Newark, DE 19714; Phone: +1.302.366.5704; Web: [www2.dupont.com/Agriculture/en\\_US](http://www2.dupont.com/Agriculture/en_US). DuPont's mission in agriculture is to deliver global nutrition through higher, better-quality crop yields and healthier foods, while developing solutions to help meet the world's energy needs. To help meet these goals, DuPont Crop Protection continues to develop and bring to the market new fungicides, such as penthiopyrad, proquinazid, and picoxystrobin.
- 108/209 EnviroLogix Inc.**  
500 Riverside Industrial Parkway, Portland, ME 04103; Phone: +1.866.408.4597; Fax: +1.207.797.7533; E-mail: [info@envirlogix.com](mailto:info@envirlogix.com); Web: [www.envirologix.com](http://www.envirologix.com). EnviroLogix Inc. develops immunoassay (ELISA) and DNA-based (DNAble) test kits for detection of multiple plant pathogens and GMO events. Product lines also include mycotoxin and toxin test kits. EnviroLogix specializes in custom assay development using ELISA and DNAble technologies, leading the

- horticultural market in cutting-edge rapid diagnostic development.**
- 202 Environmental Growth Chambers**  
510 East Washington Street, Chagrin Falls, OH 44022; Phone: +1.800.321.6854; Fax: +1.440.247.8710; Web: [www.ecg.com](http://www.ecg.com). Environmental Growth Chambers has the largest selection of produce chambers, lighted and refrigerated biological incubators, shelf-lighted rooms, gas exchange chambers, hydroponics systems, day-lit chambers, and root zone cabinets. Stop by and discuss your requirements.
- 102 Gylling Data Management, Inc.**  
405 Martin Boulevard, Brookings, SD 57006; Phone: +1.605.693.4150; Web: [www.gdmdata.com](http://www.gdmdata.com). Research management software since 1982. Use ARM software to establish, manage, analyze, and report information for crop protection research trials. Summary Across Trials for multirtrial summarization. Psion Workabout Pro data collector with enhanced rating shell for your data collection. ARM Germplasm Manager is for germplasm improvement projects and crop performance trials.
- 204 IAPPS (International Association for the Plant Protection Sciences)**  
6517 S. 19th St., Lincoln, NE 68512; Phone +1 402.805.4748; Web: [www.plantprotection.org/](http://www.plantprotection.org/); Blog: <http://iapps2010.wordpress.com>. Professional association for the plant protection sciences consisting of entomologists, plant pathologists, weed scientists, nematologists, economists, IPM practitioners, agricultural development and technology transfer specialists and plant protection administrators. Sponsor of the International Plant Protection Congress and the Crop Protection journal.
- 307 LemnaTec**  
18 Schumanstr., Wuerselen 52416, Germany; Phone: +49 2405 4126-12; Fax: +49 2405 4126-26; Web: [www.lemnatec.com](http://www.lemnatec.com). LemnaTec's team of scientists develops hard- and software solutions for plant phenomics, high-throughput and high-content screening of plants, seedlings, insects, and other organisms and for the automated evaluation of bio tests in ecotoxicology. Digital images are primarily taken by the Scanalyzer systems PL, HTS, and 3D, all set up in a modular design. Using advanced LemnaTec image-processing algorithms, every visible parameter (e.g., color, shape, size, and architecture) is subsequently measured and correlated with experimental records (e.g., genetic data). Our aim is to visualize and analyze the biology beyond human vision.
- 120 Microbiology International**  
5111 Pegasus Court, Suite H, Frederick, MD 21704; Phone: 1.800.396.4276; Fax: +1.301.662.8096; Web: [www.800ezmicro.com](http://www.800ezmicro.com). Our new automated plate pouring instrument offers flexibility and reliability
- never before seen. Prepare up to 120 L of plant media in a single instrument in less than 2 hours and dispense into any container in seconds. Leading agroscience companies use our instruments to save time and money.
- 219 N.A. Cobb Foundation**  
P.O. Box 311, Marceline, MO 64658; Phone: +1.660.256.3331; Fax: +1.660.256.3331; Web: [www.nemotologists.org](http://www.nemotologists.org).
- 303 National Plant Diagnostic Network (NPDN)**  
107 CIPS, Michigan State University, East Lansing, MI 48824; Phone: +1.517.353.8624; Fax: +1.517.353.1781; E-mail: [hammersr@anr.msu.edu](mailto:hammersr@anr.msu.edu); Web: [www.npdn.org](http://www.npdn.org). NPDN is a consortium of plant diagnostic facilities at land-grant universities and several state departments of agriculture. NPDN's mission is to facilitate early detection of plant pathogens and pests through education, perform rapid and accurate diagnoses, and support response through partnerships.
- 212 Natural Industries**  
6223 Theall Road, Houston, TX 77066; Phone: +1.281.580.1643; Fax: +1.281.580.4163; Web: [www.naturalindustries.com](http://www.naturalindustries.com). Natural Industries manufactures beneficial microorganisms for the agriculture, horticulture, and retail markets. The flagship product Actinovate was registered in 2004 with the EPA for control of root diseases such as *Pythium*, *Phytophthora*, and others. Actinovate is also labeled for foliar use against diseases such as powdery mildew, *Botrytis*, and aerial *Sclerotinia*.
- 315 Percival Scientific, Inc.**  
505 Research Dr., Perry, IA 50220; Phone: +1.515.465.9363; Fax: +1.515.465.9364; Web: [www.percival-scientific.com](http://www.percival-scientific.com).
- 321 Spectrum Technologies, Inc.**  
12360 S. Industrial Drive E., Plainfield, IL 60585; Phone: 1.800.248.8873 or +1.815.436.4440; Fax: +1.815.436.4460; E-mail: [info@specmeters.com](mailto:info@specmeters.com); Web: [www.specmeters.com](http://www.specmeters.com). Spectrum offers affordable devices to measure nutrient levels, soil qualities, light, weather, and other factors affecting plant growth. Our WatchDog weather stations and data loggers make it easy to record weather events and conditions. More than 15,000 customers count on Spectrum's easy-to-use, dependable technology for their growing needs.
- 319 Springer**  
233 Spring Street, New York, NY 10013; Phone: +1.212.460.1500 or 1.800.777.4643; Fax: +1.212.460.1575; E-mail: [service-ny@springer.com](mailto:service-ny@springer.com); Web: [www.springer.com](http://www.springer.com). Springer is a major publisher of books and journals in Life Sciences. Please stop by our booth to order books at a special conference discount and take a closer look at sample issues of journals. Staff will be on hand to answer any questions you might have about publishing with Springer.

# Introducing Our Newest Family of QualiPlate™ Kits...

- **FAST**  
Two-hour Protocol
- **RELIABLE**  
Pre-coated and Fully Validated
- **CONVENIENT**  
Run Three Tests on One Sample

Your Partner  
in Diagnostics.

**ENVIROLOGIX™**  
*Putting Science to the Test*

[www.envirologix.com](http://www.envirologix.com)  
866-408-4597

**DNAble**  
*Rapid On-Site DNA Detection*

Get your DNAble  
tomato at  
**BOOTH 108-209**

AmplifyRP™

Real-time and conventional  
PCR

## Get results faster with AmplifyRP™

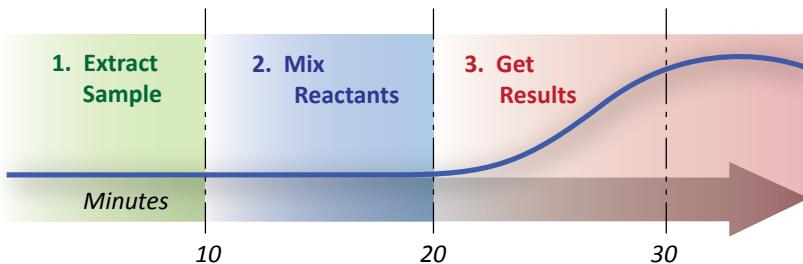

Introducing the future of ultra-rapid, portable DNA amplification technology for plant pathogens.

Leave the extraction columns and the expensive equipment in the lab. AmplifyRP™ can get you DNA or RNA results without the need for complicated extractions or thermocycling.

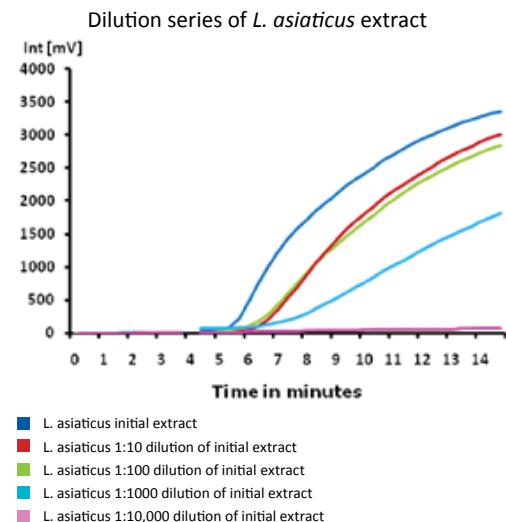

AmplifyRP sensitivities rival those of most PCR assays, yet can be done from sample prep to results in under 30 minutes.

### Using AmplifyRP is simple!

Stop by our booth and learn how AmplifyRP can simplify your DNA testing process.

 **agdia**<sup>®</sup>  
Test with confidence.

Visit us at booth # 100 / 201  
for a demo and more information.
