

T-2000

Cure Composite

CHEMICAL NAME: Composite of latex additives

PHYSICAL FORM: Liquid aqueous dispersion

PRODUCT SPECIFICATIONS

METHODS

Solids, %	52.0 - 54.0	WI-SCC-040
Viscosity, cps	1000 - 3000	WI-VDC-070
Particle Size, microns	0 - 5.0	WI-PSC-300
pH	9.0 - 10.0	WI-PHC-010

PRODUCT DESCRIPTION:

T-2000 is a composite of essential ingredients necessary for the accelerated vulcanization of latex compounds. The ingredients are milled to a fine particle size for maximum activity. The recommended use level is 2.0 – 3.0 dry parts of T-2000 to one hundred dry parts of Natural rubber latex; however for testing in other latices, it is suggested that lab testing evaluation be performed for acceptable performance levels.

STORAGE AND HANDLING:

Containers should be kept tightly closed; avoid direct sources of heat or sunlight when possible. Make sure the part drum is used quickly and that all stock is rotated on a first-in, first-out basis. Protect from freezing. Store at 40 – 90 deg F. Contents should be stirred using mechanical agitation prior to use. Shelf life expected one year from date of manufacture provided the material is stored at proper temperatures and containers remain tightly closed.
