LOCATION:

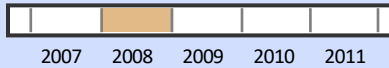

Maple Creek, SK

CLIENT:

Town of Maple Creek

PROJECT TIMELINE:

OUR ROLE:

Prime Consultant

PROJECT TYPE: Design and Construction Administration

PROJECT DESCRIPTION:

The Town of Maple Creek's main sewage lift station required replacement in 2008. In addition to providing a new structure and wet well, the lift station was moved across the CPR railway line. High groundwater conditions, aging pipe infrastructure, and a railway bore, all contributed to the complexity of the project.

SERVICES WE PROVIDED:

We provided prime consultant services for the project design, construction administration, and survey layout.
