Subject: RVs

I would like to voice my support of any ordinance that prohibits RVs in driveways. We have people in our neighborhood with RVs and families living in the RVs, complete with illegal wires running from the house to get electricity. It really makes the neighborhood look trashy. I realize there is a vocal component of people in favor of it, so I wanted to be sure you knew that there are some of us opposed. The reason they want to be able to keep the RVs is because they charge rent to families living in them.
