- Speeds Up to 450 feet per minute
- 5 Simultaneous functions per camera
  - 2-Text Boxes
  - 1-Image/Shape Widget
  - 2-Barcodes
- Database Verification
- Read & Print
- Image Retention

## Digital Printing Integrity

*"On The Fly"* with  
Vision Inspection Technologies

Through a partnership with Vision Inspection Technologies, TPS Group is proud to offer the VT400 Print Integrity System. With up to 4 cameras mounted directly on your digital imaging system, the VT400 offers you piece of mind by monitoring your digital output for data integrity, barcode verification, version confirmation, and print quality.

The real value of the VT400 comes from the ability to record and track data, eliminate waste, commitment to quality, and the certainty that comes from knowing that each piece of output is exactly the way it should be.

Use the VT400 on Security Documents, Transactional Statements, Explanation of Benefits, Form code Verification, Read and Print, IMB Tracking, Database Verification, and many other versatile applications.
