

ADI

beam seating

Let your imagination create the ideal combination!

The Beam Seating series was designed to accept a broad range of already existing ADI seats and arms. This flexibility makes it easy to custom build spaces with a wide selection of styles. From the modern look of polished aluminum on the Voila to the classic wood shell of the Clover or the knit back on the Tact - the beam seating has you covered.

The beam modules may be assembled in line, angled or bolted to the floor. Corner, regular or cantilever tables may be added to the ensemble. Arms can be installed in between the seats/tables and at the ends, as needed. Beam Seating models come with 3 leg options, 9 powder coat paint finishes and 4 laminate table tops.

Combined with infinite fabric offerings and a variety of seat and back options, creative combinations are only limited by your imagination.

Beams and Legs

Dimensions

Beam Seating modules are available in 4 different sizes, made to accommodate all seats, tables, arms and legs offered in this series. Two or three seater beams, with a respective capacity of 1,000 lbs and 1,500 lbs are also available.

Metal finish

All metal surfaces are powder coated. The following finishes are available. Finishes from the ADI finish card may also be specified.

Other finishes available upon request

Legs

3 leg options are available on all beam sizes.

Tables

Table (19"x19"x1") / **BT**

Cantilever Table (19"x19"x1") / **BHT**

Corner Table (30"x30"x1") / **BCT**

Laminate Tops

Other laminates available upon request
