Let Experience be Your Guide

IT PROFESSIONAL - CAMPBELL, CALIFORNIA

WEBCO HR, Inc. is seeking an IT Professional for one of our clients located in Campbell, California.

SUMMARY:

Builds hardware and software intelligence into solar energy installations, making them more efficient, more manageable, and safer. By maximizing the energy output of each individual module,

We are looking for a qualified IT Professional that will install and maintain computer systems and networks aiming for the highest functionality. You will also "train" users of the systems to make appropriate and safe usage of the IT infrastructure.

The goal is to build and maintain updated and efficient computer systems and networks to optimize the role of technology on business sustainability.

A successful IT Professional must have a thorough knowledge of computer software and hardware and a variety of internet applications, networks and operating systems. The ideal candidate will also have great troubleshooting abilities and attention to detail.

RESPONSIBILITIES:

- Set up workstations with computers and necessary peripheral devices (routers, printers etc.)
- Check computer hardware (HDD, mouses, keyboards etc.) to ensure functionality.
- Install and configure appropriate software and functions according to specifications.
- Develop and maintain local networks in ways that optimize performance.
- Ensure security and privacy of networks and computer systems.
- Provide orientation and guidance to users on how to operate new software and computer equipment.
- Organize and schedule upgrades and maintenance without deterring others from completing their work.
- Perform troubleshooting to diagnose and resolve problems (repair or replace parts, debugging etc.).
- Maintain records/logs of repairs and fixes and maintenance schedule.
- Identify computer or network equipment shortages and place orders

REQUIREMENTS:

- Proven 3-5 years experience as IT Professional or relevant position.
- Excellent diagnostic and problem solving skills.

- Excellent communication skills.
- Outstanding organizational and time-management skills.
- In depth understanding of diverse computer systems and networks.
- Good knowledge of internet security and data privacy principles.
- Degree in Computer Science, engineering or relevant field.
- Project management skills.
- Certification as IT Professional will be an advantage (e.g. CompTIA A+, Microsoft Certified IT Professional).

COMPENSATION:

- Base Salary
- Full Benefits

COMPANY:

Our client is the worldwide leader in Flex MLPE (Module Level Power Electronics) with innovative solutions that significantly enhance safety, increase energy production, and decrease operating costs of photovoltaic (PV) systems. Their TS4 platform maximizes the benefit of PV systems and provides customers with the most scalable, versatile, and reliable MLPE solution available.

They were founded in Silicon Valley in 2007 to accelerate the adoption of solar energy worldwide. Their systems operate on 7 continents and produce gigawatt hours of reliable, clean, affordable and safe solar energy daily.

The company needs top-notch individuals with a passion for solving complex problems and bringing renewable energy to the masses. Members of the team enjoy rewarding salaries, excellent benefits, an uninhibited work culture, and the satisfaction of helping to reduce the world's dependency on fossil fuels. They work hard knowing the results will impact the affordability, reliability, and safety of clean and renewable energy systems.

The company builds hardware and software intelligence into solar PV energy installations, making them more efficient, more manageable, and safer. By maximizing the energy output of each individual PV module, their advanced balance of system products deliver lower cost of ownership and faster return on investment for existing and new solar installations.
