

Request for proposal to transport recycle trailer from Montville transfer station to the Unity Area Regional Recycling Center located on Leonard Rd. in Thorndike

THE BID DEADLINE IS JANUARY 11TH, 2021

Scope of work:

1. Provide a towing vehicle capable of towing a single axel trailer weighing up to 6,000 lb. Trailer requires 2" ball and hitch height should be approximately 17 ½" high to top of ball.
2. To pick up loaded trailer at the Montville transfer station and haul to the UARRC on Leonard Rd. in Thorndike. This would be once per week usually on Thursdays.
3. Help the attendants there unload recycling.
4. Transport trailer back to Montville transfer station and back into garage. The total round trip is approximately 28 miles and the total time required is usually less than 2 hrs.
6. Trailer does not have brakes. Trailer requires either 4 pin flat or 7 pin round electric connector.
7. We are looking for a bid price per trip.
8. **NOTE:** *I have done this twice with my 2019 GMC Sierra 1500 with a 5.3L V8 and 6 speed automatic transmission. The trailer tows quite easily and I had no braking problems. I suspect the usual weight being towed will be no more than 6,000 lb. but that is an estimate. My truck just happens to have a maximum towing capacity of 9,200 lbs. and handled the trailer quite easily. Bob Price 1st selectperson*

9. **Note:** Please email bid to Montville@fairpoint.ent or mail to :
