## ERA TORQ – BTC TORSIONAL CASING RINGS

ERA TORQ branded BTC casing rings have been designed and manufactured with casing string rotational applications in mind.

Using only API 5CT compliant materials ERA are able to supply across the full range of BTC sizes from 4.5" to 20".

Our one size ring height design ensures that all BTC connections will be made up correctly within triangle positional limits.

Our one size ring height design also ensures that our clients are not left with excess and unusable stock after project completion.

Our one size ring height design ensures zero waste for our clients.

Installation tools are not required as our rings are manufactured to the finest tolerances within the API coupling design criteria and can be hand installed at rig site.

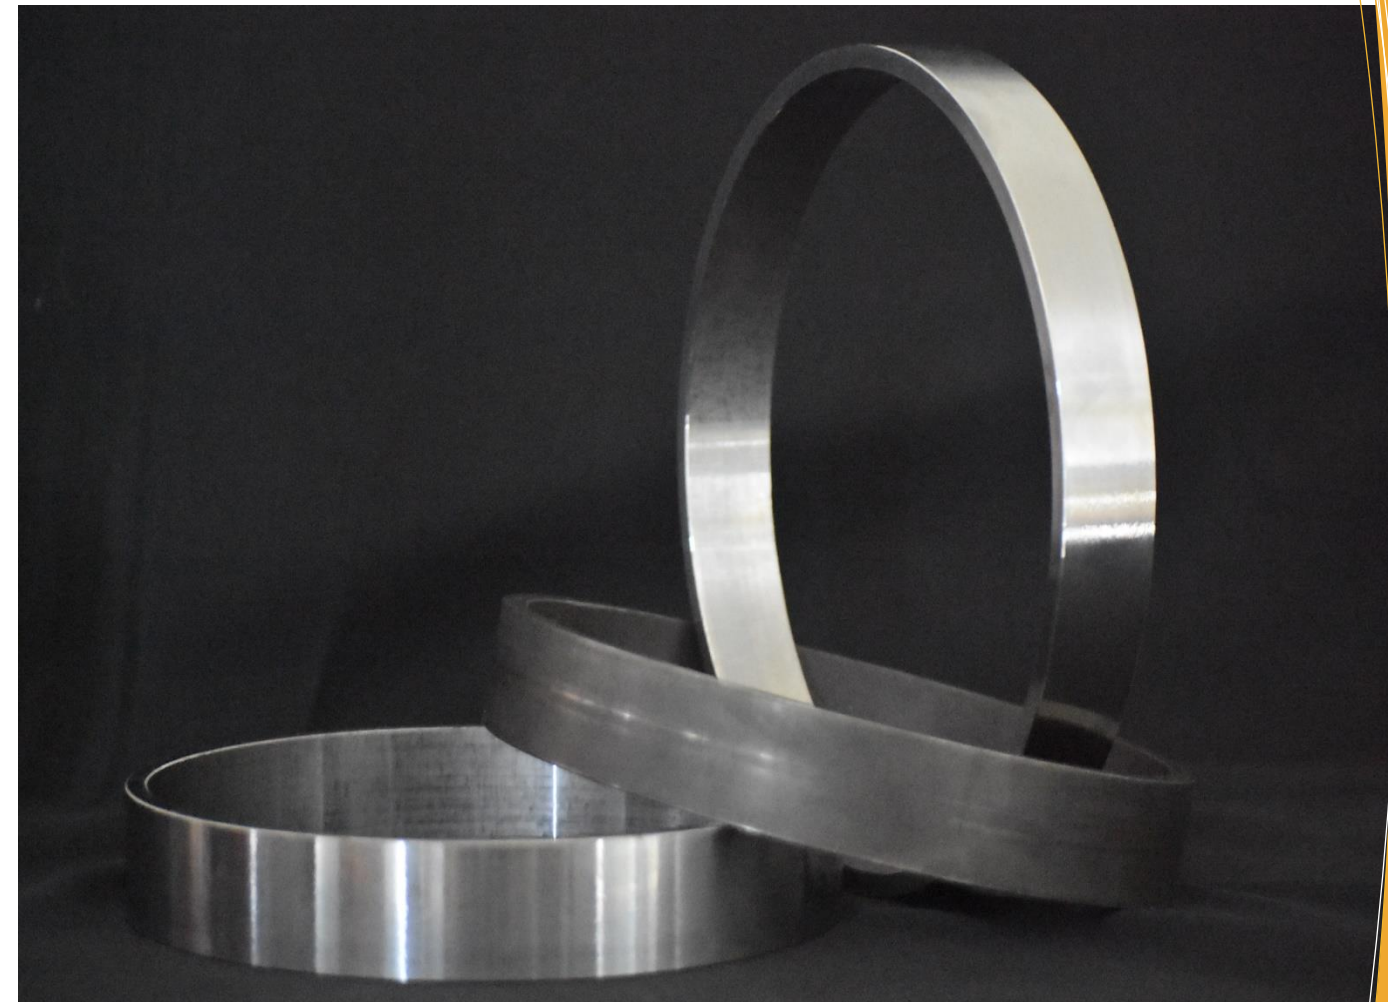

Our cost effective manufacturing locations allow us to meet client budgetary requirements with the most cost effective and technically competent mix of high torque capability products and on time delivery.

Our high torque capacities also allow for large safety margins in design so that our clients are safe in the knowledge that every component that enters the wellbore is fully functional, tested and compliant to standards and performance expectations.

As one component of our ERA ROTATIONAL SOLUTIONS package the ERA TORQ range is designed to exceed your BTC connection requirements.

ERA TorQ

# ERA TORQ at work for you

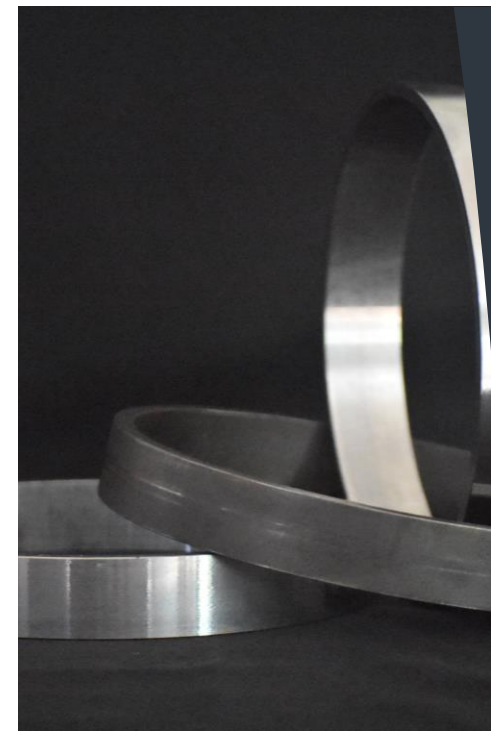

## DESIGN AND PERFORMANCE FEATURES

- Cost effective
- Materials confirm to API 5CT
- Materials phosphate coated
- High torque capacity
- No special installation tools
- All sizes and grades of BTC
- Improves API connection strength
- Improves torsional connection parameters
- Full traceability to API materials specifications

Finding the right torque ring that provides you with full confidence in the harshest of applications is often difficult. ERA TORQ is specifically designed for CWD, REAMING and all casing rotation applications.

In fact with its single piece design it is manufactured from the very same size and grade of API certified casing that you will run in hole.

Our cost effective manufacturing and adherence to close tolerances ensures easy field installation.

CWD APPLICATIONS  
LINER DRILLING  
CASING REAMING  
CASING ROTATION  
ENHANCED FLOW PATH  
INCREASED TORSIONAL  
STRENGTH  
INCREASED  
CONNECTION STRENGTH  
REDUCED CONNECTION  
EROSION

TECHNOLOGY AND PRODUCTION  
A TOTAL END TO END SOLUTION.

## APPLICATIONS AND ADVANTAGES

- THE MOST COST EFFECTIVE SOLUTION ON THE MARKET
- HIGH TORQUE CAPACITY
- MATERIALS COMPLIANCE TO API 5CT
- CASING WHILE DRILLING WITH BTC
- CASING REAMING WITH BTC
- MINOR ROTATION WITH BTC
- EXTENDED REACH WELL TRAJECTORY
- HORIZONTAL TRAJECTORY WITH ROTATION
- J SECTION IN BTC CONNECTION IS CLOSED
- IMPROVES FLUID FLOW DYNAMICS
- REDUCES J SECTION EROSION LONG TERM
- INDEPENDENTLY TESTED

## PRODUCTION CAPACITY

- 100,000 + UNITS PER YEAR CAPABILITY
- CERTIFIED API RAW MATERIALS ONLY

## COMPARISON TO INDUSTRY LEADING BRANDS

ERA TORQ range of torsional BTC casing rings are the most cost effective product on the market at this time.

Our production capacity and low cost manufacturing base enables us to bring real pricing to our clients with zero loss in technical performance.

We are able to ship globally from our home base in Sattahip, Thailand.
