

Bio-Flex

Connective Tissue Support with BioCell Collagen®†

Clinical Applications

- Gives Joints Nutritional Support
- Help Repair Cartilage, Ligaments
- Supports Lubrication & Free Movement
- Supports Joints Healthy Function *

Bio-Flex is a nutrients complex with BioCell Collagen designed to provide ideal nutritional support for joint health. BioCell Collagen® is a concentrated source of bioavailable, hydrolyzed collagen type II, chondroitin sulfate, and Hyaluronic acid.

All Adaptogen Research Formulas Meet or Exceed cGMP Quality

Discussion

Joints, cartilage, ligaments, tendons and synovial fluid (which surrounds and lubricates joints) undergo a continuous but slow natural regeneration process. This process can be affected by many factors, including diet, activity levels, hormones, stress, aging, immune status, gut health, toxin loads and certain medications. Individuals who experience excessive wear and tear on the joints or who find that the aging process is affecting joint function may benefit from the unique joint-supporting compounds in Bio-Flex, as well as supplemental amounts of certain nutrients above that which they would typically get from food alone.

Bio-Flex includes:

BioCell Collagen® is a concentrated source of bioavailable, hydrolyzed collagen type II, Chondroitin sulfate, and Hyaluronic acid. A patented process produces a low molecular weight mixture of components that are easily absorbed and readily available for use in the body to protect connective tissues, promote cartilage synthesis, support repair, and improve the overall appearance of the skin.*

Collagen type II, the most abundant protein found in joint cartilage, helps support new cartilage synthesis and quenches free radicals in joint tissue. Hyaluronic acid is an important nourishing agent that helps to retain the natural moisture content of skin tissue and joint fluids.*

Chondroitin sulfate supports synthesis of cartilage tissue and inhibits cartilage-degrading enzymes.*

OptiMSM®, a sulfur and methyl donor, supports joint structure and comfort.*

Vitamin C is required for hydroxylation, a biochemical process required for cartilage synthesis.*

Allergy Statement

Free of the following common allergens: milk/casein, eggs, fish, shellfish, tree nuts, peanuts, wheat, gluten, and soybeans. Contains no artificial colors, flavors, or preservatives.

Two capsules twice daily supplies approximately 1 g of collagen type II protein, 400 mg of Chondroitin sulfate, 200 mg of Hyaluronic acid, and 1 g of OptiMSM®.
