

*Taking super-sized ideas and turning them into beautifully hand-crafted reality!*

# Your dream furniture: if you can draw it, we can make it!

How Bespoke Pine n Oak in King's Lynn can create and handcraft the unique piece of stunning furniture you've been looking for...

**T**he combination of Kevin Berry's long experience in the timber trade and the traditional craftsmanship of his fellow director Carl Ingram means Bespoke Pine n Oak can make high quality furniture of any size in any style to fit any room – which is good news for people looking for something truly unique, and whose dreams run to the more unusual.

Only this month, for example, Bespoke Pine n Oak were commissioned by a couple who'd been unable to find a piece of furniture they'd spent over a year looking for – a custom-made oak bed large enough to suit their equally spacious home.

"It was quite a challenge because any kind of standard-sized

bed would have been totally lost in the customers' enormous bedroom," says Carl. "We had to create something that would be in keeping to the style of the home, be in proportion to the room – and be a pleasure to sleep in!"

The result – designed and crafted in Bespoke Pine n Oak's on-site workshops in the centre of King's Lynn – is a stunning piece of furniture that gives a new meaning to super-sized and is a fitting tribute to the quality of Carl's carpentry skills.

Measuring 8ft long by 7ft wide, the finished bed stands a full 5ft high at the

headboard (left) and features impressive 6-inch oak posts. Bespoke Pine n

Oak also built four 3ft wide drawers into the base of the bedframe for a vast amount of storage space.

It looks fantastic – and thanks to a specially ordered, custom-made and heavy-duty mattress that measures no less than 7ft by 6ft 6ins – it will also ensure years and years of very sweet dreams.

If you're looking for top quality, individually made and solid timber furniture of any description, look no further than Bespoke Pine n Oak. No matter how difficult you think your specific requirements might be, and regardless of odd-shaped rooms or uneven floors, Kevin and Carl can help turn your dreams and desires into breathtaking handcrafted reality.
