Scuba Gear Check List:

Other Dive Gear Items To Consider:

- **Gloves are not allowed on this trip.**
- **Consider getting a UV dive light as your back up light for the night dives.**
- **Bring a second dive mask. We are diving multiple times each day. A second mask allows you to change where the pressure points are on your face.**
- **Please Please Please bring a back up computer. We are diving multiple times a day. If you computer fails you will either need to sit out 24 hours. We prefer you have your own, but we do have some for rent. Just let Captain Jim know.**
- **Bring an underwater Camera or Go Pro**
- **Your dive gear will be set up when we arrive at the boat and stay set up for the entire week. You dont need to bring any mesh carry bags for your gear**
- **We will have scuba gear parts on the boat. However if you use a specialty item like an Inflator Hose integrated Octo, or a computer with a special hose. Consider bringing a spare part. We may not have these specialty items on the boat.**
- **Do you get cold easily. Consider bringing a light weight lavacore hood. It will really make a difference.**
