

# NEX

Networked Entertainment eXperience

Pioneer's NEX or Networked Entertainment eXperience line of receivers features an innovative and powerful new user interface which is responsive and highly customizable.

The five NEX models are designed especially for today's smartphone-driven lifestyle, bridging the gap between smartphone tethered products like Pioneer's revolutionary AppRadio® and traditional multimedia receivers.

## SMARTPHONE CONNECTIVITY

**Apple CarPlay™** is the smarter, safer and more fun way to use your iPhone® in the car. Apple CarPlay gives iPhone users an incredibly intuitive way to make calls, use Maps, listen to music and access messages with just a word or a touch.

**Android Auto™** extends the Android platform into the car in a way that's purpose-built for driving and automatically brings you useful information, and organizes it into simple cards that appear just when they're needed. It's designed to minimize distraction so you can stay focused on the road.

Not all Android devices are compatible with AppRadio Mode. Visit [pioneerelectronics.com/android](http://pioneerelectronics.com/android) for a complete list of compatible devices.
