- ☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- ☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- ☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- ☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

**Item 8.01 Other Events.**

Cyberlux Corporation (the “Company”) has entered into negotiations with Lightolier, a Royal Philips Electronics (NYSE:PHG, AEX:PHI) company, regarding the licensing of the Company’s Scattered Photon Extraction <sup>TM</sup> technology. On April 3, the Company was contacted by a Lightolier senior executive requesting an RFQ for licensing our proprietary Scattered Photon Extraction <sup>TM</sup> technology. On April 29, the Company formally delivered a term sheet defining the terms and conditions of the technology licensing agreement, including the annual royalty rate, the product royalty rate and the time period of the technology license associated with this transaction.

Developed by the Lighting Research Center of Rensselaer Polytechnic Institute, the Scattered Photon Extraction <sup>TM</sup> technology optically maximizes the light output from a traditional light emitting diode (LED), which produces light when a solid-state material emits a photon through a phosphor downconversion material to create white and multi-color light. As much as 60% of the light produced in the phosphor is reflected back toward the solid-state material where the photon is reabsorbed rather than emitted outward to provide useful illumination. Scattered Photon Extraction <sup>TM</sup> technology has produced a 33% increase in efficiency when compared to the current state of the art LED efficiency.

## **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
