INTRODUCING:

ULTIMATE COLLABORATION TOOL

Don't let your competitors gain the technological edge. Get assistance with bringing team members together like never before with the Ultimate Collaboration Tool.

What is Ultimate Collaboration Tool? The Ultimate Collaboration tool is the internet! Utilize the internet to store, view and edit your documents.   Take collaboration to another level. Set up an online document that users can add mark ups to in real time or individually any time. Invite team members to view and edit these files all the while controlling their permissions. You are able to digitally track the actual individual who is inputting the information - who did what, who signed off on an item and when. This will dramatically improve quality control and tracking capabilities for your project/documents.

Eliminate the need to print plans by setting up a digital plan room allowing documents to be accessed by all team members all at once. Store, edit and mark up plan documents on the same file the entire team is. Collaborate on the same PDF together in real time, or separately on your own time.

The Ultimate Collaboration tool can enable collaboration reducing schedules by 33% and increasing productivity by 60%.

Assign a specific color mark up to each team member to clearly identify who is making which comment. Notice the side bar tracking each comment and mark up.   You cant move or change others comments which helps keep the process organized and clean.
