Why Upgrade to Digital TV?

- Improve your facility's image
- Easily add general information channels
- Allow residents to enjoy their favorite programs in HD

Here is some great news...

Until now, senior living and skilled nursing facilities had to settle for poor-quality analog video or choose expensive, complicated HD solutions.

Fortunately, leading content providers are now approving ZeeVee modulators for digital video distribution over existing coaxial cabling. Our equipment works with virtually any HDTV, so upgrading your headend is simple. Just connect HD video sources to our modulators and distribute video over the existing RF network — there's no rewiring involved.

*U.S. Seniors watch more TV than anyone else in the world. Does your property offer the shows they want, in HDTV, with closed captioning?**

*"The heaviest users of traditional TV are adults 65+ (47 hours 33 minutes per week)"
Nielsen, State of the Media Trends in TV Viewing, 2011

Benefits of Digital Video Over Existing Coax

- Affordable and simple
- Compatible with any HDTV
- Flexible — Digital SD and HD Options Available
- Assign all content — television programming and/or community information — as HDTV channels

Analog

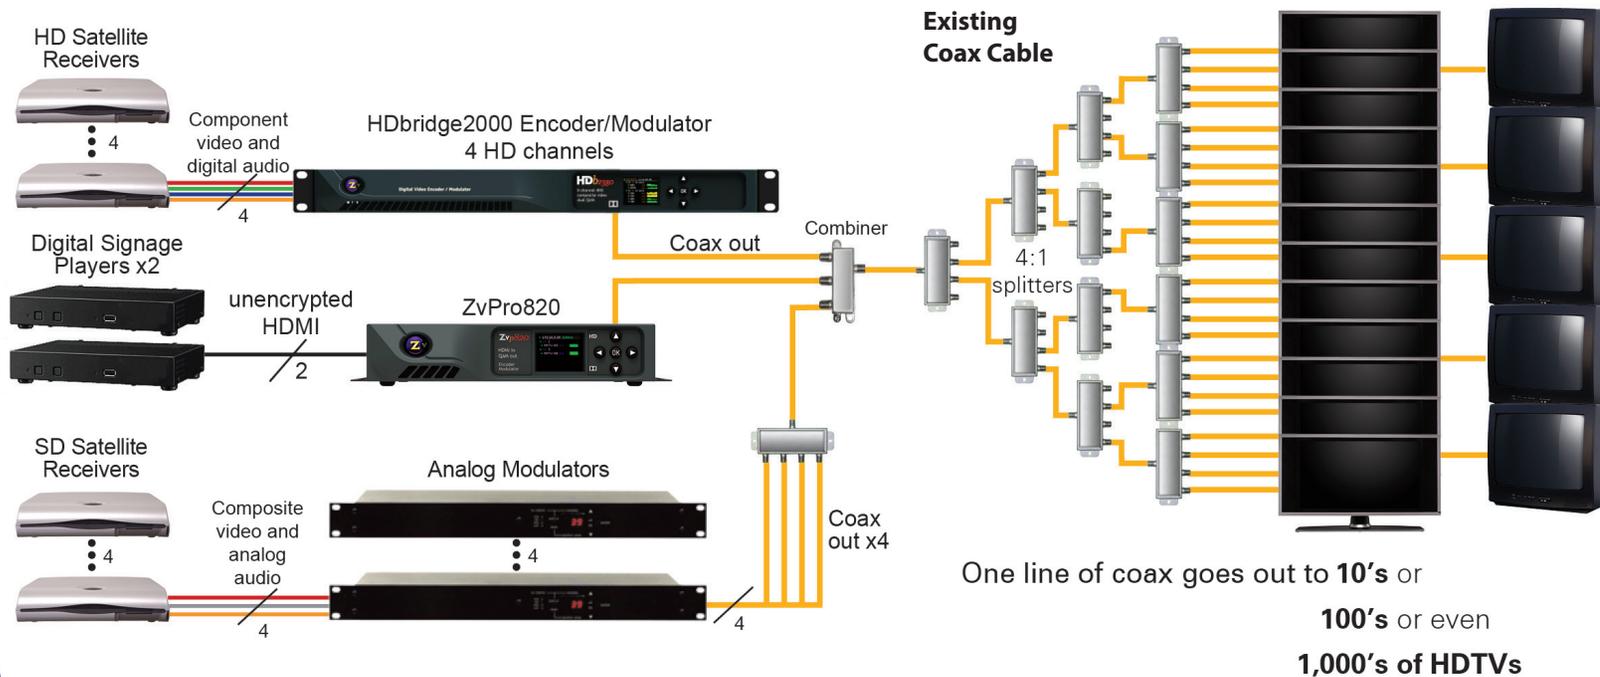

Digital

Combine analog and digital video over coax — accommodate older and newer TVs.

How it works!

ZeeVee's digital modulators broadcast HD video to unlimited HDTVs —all over existing coax!
