

BadgerCare Expansion Is Good for Everybody

BadgerCare expansion will increase health care access to workers who aren't offered health insurance through their jobs and cannot afford the cost of premiums or out of pocket costs.

It will provide access to healthcare for people who fall on hard times because they lose their job due to cancer, other serious illnesses, downsizing, or can't work because they are caring for an ailing parent or sick child.

It will offer working families financial protection against bankruptcy when faced with an unexpected illness requiring a hospital stay or a child with special needs like autism.

It will be good for business and help lower our insurance rates.

Lastly, it will reduce the cost of BadgerCare by \$200 million per year in addition to enrolling more than 2,200 people who live near the poverty line in Waukesha County.

Write your legislator today and tell them you want Wisconsin to adopt Medicaid expansion.
