## **Carolina Underground Solutions Expands In to Charleston, SC**

Greenville, SC (October 31, 2017) – [CAROLINA UNDERGROUND SOLUTIONS] CUS, a leading underground telecommunications contractor, has been recently won two Charleston, SC based projects.

CUS is providing underground fiber installation on the Honeywell campus in Charleston, SC on behalf of IES Communications. The project will involve approximately a half-mile of new in-ground fiber connecting multiple buildings with Honeywell's main distribution facility, improving communications and data bandwidth for multiple facilities on campus.

Also located in Charleston, SC, CUS is installing approximately one mile and a half of fiber cabling (over 7,000 feet) under West Montague to support the fiber backbone provided by Wide Open West (WOW) Communications, a Charleston based provider of cable, internet and phone services.

"These are great projects for high-profile customers and fit perfectly with Carolina Underground's growth strategy that includes focusing on the I-95 corridor," stated Braddock Cunningham, President of CUS.

### About Carolina Underground Solutions

Founded in 2015, CUS, a certified veteran-owned contractor providing drilling, directional boring, and trenching services for the installation of underground telecommunications cabling such as Fiber Optic and innerduct conduit.
