

Selectiva™

High Performance Nitinol Guidewires

Advanced PES Coating

PES coating enhances surface lubricity enabling smooth passage through vessels, introducers and all types of catheters.

Torque Control

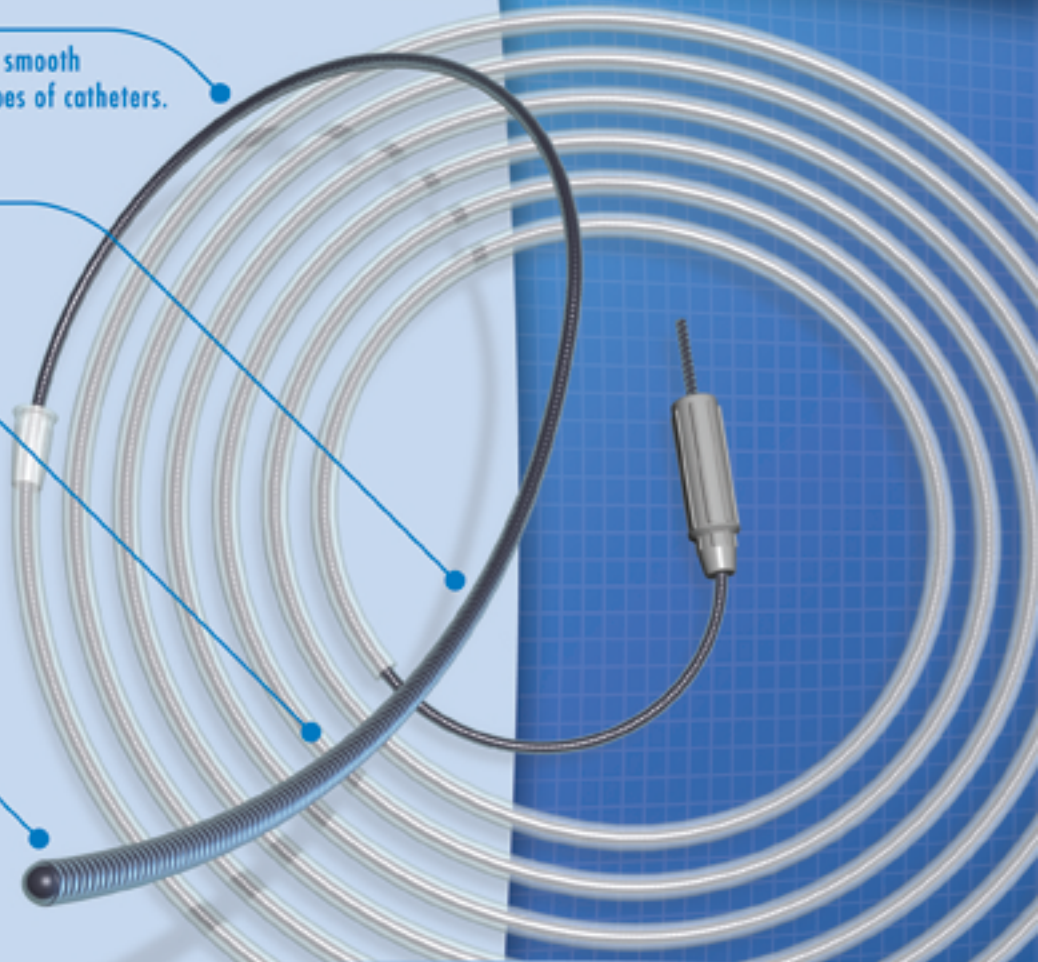

Advanced material processing allows precise torque control for selective placement.

Highly Radiopaque

Coil tip with excellent radiopacity for clear visualization of guidewire positioning. Smooth core to coil transition assures smooth catheter advancement.

Atraumatic Tip Design

Superelastic nitinol construction provides optimal flexibility with maximum kink resistance and pushability. Superior steerability enables easier navigation of vascular tortuosity and eccentric lesions.

Selectiva·SB

High Performance Nitinol Soft Body Guidewires

Selectiva's superior quality is also available in a soft body guidewire

Selectiva is also available in a soft body guidewire offering even greater shaft flexibility while retaining the superior steerability and torque control along with the highly visible radiopaque coil.

- PTFE jacketed core offers greater lubricity and kink resistant performance.
- Greater guidewire shaft flexibility for tortuous vessels.

Selectiva – Extra Support

Model Number	Length	Diameter	Tip
18060280NW-SL	60 cm	.018"	Straight, Firm
18060280NW-ASL	60 cm	.018"	Angled, Firm
18080280NW-SL	80 cm	.018"	Straight, Firm
18080280NW-ASL	80 cm	.018"	Angled, Firm
18180376NW-FB	180 cm	.018"	Straight, Firm
18180376NW-AFB	180 cm	.018"	Angled, Firm
18300376NW-FB	300 cm	.018"	Straight, Firm
18300376NW-AFB	300 cm	.018"	Angled, Firm
3508004S	80 cm	.035"	Straight, Firm
3514504S	145 cm	.035"	Straight, Firm
3514504A	145 cm	.035"	Angled, Firm
3518004S	180 cm	.035"	Straight, Firm
3518004A	180 cm	.035"	Angled, Firm

3518004A-SB	180 cm	.035"	Angled
3530004S-SB	300 cm	.035"	Straight
3530004A-SB	300 cm	.035"	Angled

Selectiva™ Guidewire Procedures

Most popular procedures list:

.018 x 60 guidewires

.018 x 80 guidewires

- Back up micropuncture wire
- Pediatric PICC and vascular access
- Midlines (short term PICC)
- Biliary access – temporary drainage
- Nephrostomy – temp kidney drain
- Abscess drainage
- Long term drainage
- A-V fistula thrombectomy
- Varicose vein access

.018 x 180 guidewires

.018 x 300 guidewires

- PTA (angioplasty)
- Embolectomy (opens vessels)
- Balloon angioplasty
- Angiography
- Embolization (closes vessels)
- Uterine artery embolization
- Renal PTA
- Thrombolytic therapy (clot busting)

All .035 guidewires including softbody

- Large vessel PTA
- Stenting
- Thrombolytic stenting
- Angiography
- Central Venous Catheters (dialysis)
- TIPS (liver bypass) +
