COVID Update

Good Afternoon from Midway Nursing Home!

There are no new cases of COVID-19 for our residents, but 1 staff person has tested positive.

Unfortunately, this means that visitation to the facility is on pause again. Virtual visits are encouraged and available every day through the Social Work and Recreation Departments.

All packages for residents sent or dropped off in person continue to be sanitized and held for 24 hours before giving to our residents so please plan accordingly as this includes laundry being dropped off.

Please stay tuned-in to our recorded phone calls and our website for updates. As the COVID positivity rates continue to increase, we ask that you and your families take extra precautions to be safe and remember to wear your masks! Also, please consider taking the COVID vaccine when it is available to you.

We look forward to seeing you soon!
