

Outlaw

Intermediate Ryegrass

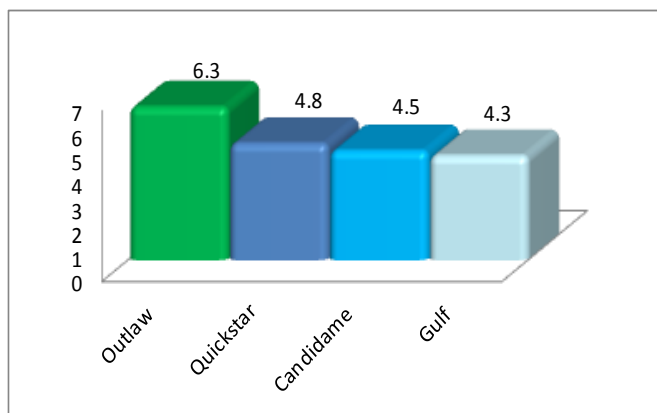

Outlaw is a turf type hybrid intermediate ryegrass developed through a series of selections between annual and perennial types of ryegrass. As is typical for intermediate ryegrasses, **Outlaw** has the growth habit of an annual ryegrass but the more attractive turf appearance and qualities of a perennial ryegrass.

Outlaw is an excellent option for overseeding southern golf courses and provides great transition performance. In the University of Arizona Bermuda Fairway Overseed trials **Outlaw** maintained better than acceptable turf quality ratings throughout the spring transition.

Outlaw intermediate ryegrass features quick establishment, enhanced color, improved mowing quality and excellent density. Use it alone or as a 30% component of a blend with Perennial Ryegrass.

Outlaw, Columbia Seeds New Intermediate Ryegrass! A great economical alternative to Perennial Ryegrass.

Turfgrass Quality for overseed entries 2014-2015 fairway overseed trials, University of Arizona. Quality ratings June 19th, 2015. Quality (1-9).
1= dead, 4= poor, 5=marginal, 6= acceptable, 9=best possible.
Values are the mean of 4 replications.

Features and Benefits:

- ◆ Great Transition
- ◆ Quick Establishment
- ◆ Improved Mowing Quality
- ◆ Good Color
- ◆ Excellent Density
- ◆ Improved Price Point
