PART NUMBER	DESCRIPTION	QTY
HRC1500	1.5" Handrail Clamp	6
5/16-18x3/4FB	5/16"-18 x 13/4" Flange Bolt	6
5/16-18SFN	5/16"-18 Whiz Lock Nut	6

- Using a Tube Roller Former, curve all rails to fit the diameter of the bin. The 1" handrails have small holes that should face towards the stairs when installed on the bin, which are screwed into when installing rails on other stair sections.
- The swaged ends on all rails should face up the stairs while the larger, unswaged end should point down the stair run.
- Using three (3) 1.5" handrail clamps, line up the 1.5" handrails with the bottom post, as shown in Detail K. Secure each handrail clamp to the post with a 5/16" Flange Bolt and 5/16" Lock Nut, and secure the handrail to the clamp with a self-tapping screw.
- Using the next three (3) 1.5" handrail clamps, fix the 1.5" handrails to the next post. Secure each handrail clamp to the post with a 5/16" Flange Bolt and 5/16" Lock Nut, and secure the handrail to the clamp with a self-tapping screw.
- Lining up the small hole on the 1" intermediate handrail, secure to the lower post using a self-tapping screw, as shown in Detail L. Then use a self-tapping screw to secure the intermediate 1" rail to the second post.
