

DREAM HOMES

GREATER PHILADELPHIA

AN EXCLUSIVE SHOWCASE OF
GREATER PHILADELPHIA'S
FINEST ARCHITECTS

The JK Roller methodology utilizes an organized, ordered process for every project, beginning with open ears and minds. The design staff listens carefully to its clients' requests, developing an understanding of their needs, issues, and challenges. Options are provided and analyzed through a collaborative process with every client. As the documentation and construction processes unfold, the firm is on hand to answer questions and guide projects through to a smooth finish.

"Creating the right architectural space doesn't have to be difficult," explains the firm promotional materials, which are emblazoned with the phrase "Trust is not a four-letter word." The to-the-point wording and clean graphics present an honest, straightforward approach to architecture that both excites and puts clients at ease. It is clear that JK Roller is a firm that has fun with the process, constantly learning from its experiences and improving its technique.

The team behind JK Roller is just that—a team. The firm's office is a prime example of a space that works—its staff members collaborate, innovate, and energize one another to continue exceeding expectations for design and service. The company website offers a glimpse into the outstanding qualifications and personalities behind this team, including licensure in 12 states plus Puerto Rico, professional leadership in organizations such as the American Institute of Architects and the Building Industry Association, and commitment to the environment through membership in the US Green Building Council. The Center City-based firm has a wide range of residential design experience, from loft-style apartments to luxury condominiums and custom homes in Philadelphia and along the East Coast from Maine to Florida.
