

Longhorn Organics

Environmental and Aquatic Consulting

Arthur “Art” Hart began his career with the US Navy receiving technical training in electronics and guided missile automation. After his enlistment in the navy, Art transitioned to civilian life by joining Eastman Kodak Company as an Automated Equipment Mechanic installing, debugging and maintaining film finishing and packaging equipment. During his time with Kodak, Art moved into the role of Education Specialist helping create and deliver technical training to company technical support personnel.

Art furthered his career with a move into the personal computing sector taking a position with Gateway, Inc. as a Project Manager; earning Six Sigma Black Belt certification for conducting process and quality improvement projects for the company at its primary assembly facility. Due to his outstanding track record of mentoring and educating technical staff, Art promoted into the role of Program Manager with Gateway, managing a team that developed technical support tools for use in training technical support personnel.

Applying his mechanical and technical skills Art transitioned to a Life Support Systems Technician with SeaWorld Parks & Entertainment in San Antonio, TX in 2004. Art became a certified Life Support Operator Level I, II, and III through the industry’s trade organization Aquatic Animal Life Support Operators (AALSO), where Art has been an active member for 15 years. Art took on additional roles and responsibilities within the SeaWorld organization ultimately managing the Animal Life Support staff, ALS Automation, and accountable for Facilities plumbing, HVAC, site chilled water plant and Aquatica Water Park Water Quality. Art also managed numerous special projects during his tenure including rehabbing hi-rate sand filters up to 12’ in diameter, converting most of the exhibits ozone applications from legacy air stones to Mazzei injectors, and served as owner’s representative for large capital projects including Stingray Falls, Discovery Point, and Turtle Reef.

Since joining the Longhorn Organics team, Art has used his prior experience managing complex project operations and his knowledge in creating technical training programs to provide mentoring, coaching, and support to our technical personnel while overseeing the Quality Assurance program companywide. As a Project Manager, Art is an integral member of the Longhorn Organics’ construction management team and brings with him several industry qualifications including:

- Certified Pool/Spa Operator - NSPF
- AALSO Operator Certification Level I, II & III
- OSHA 10-hour
