

# **YOUR MASTER PLAN**

## ***Stop Political Islam in America***

If you have worked through the information [on this site](#) and have a good grasp of the various ways that Political Islam is trying to insinuate itself into our society, you are ready to take action and become part of the solution. As you can see, we have given you all the tools that you will need to stop the sinister Islamic groups from co-opting well-meaning but uninformed Americans in their plan to Islamize America.

Without the help and credibility of “*recruited partners*”, these sinister organizations can not win, since Muslims as a whole make up less than 2% of all Americans. Keep in mind that our worst enemy is the uneducated masses of Americans that are complicit in furthering Political Islam’s mission – primarily, out of ignorance of the real truth. By becoming the mouthpieces and supporters for these parasites, they are helping to bring the country closer to supporting the goals of Political Islam and the gradual implementation of Shariah law. The primary groups that will need your leadership are 1) Liberals, 2) Lawmakers, 3) Law Enforcement, 4) Religious Leaders, and 5 Educators.

We have put together three **(3) levels of activism for you to choose from** depending on your skill set, knowledge level, available time and motivation. They are 1) **Personal Patriot**, 2) **Neighborhood Activist**, and 3) **Community Leader**. Each level incorporates all of the activities of the previous ones and adds additional requirements for skills, knowledge and time - when you are ready. We’ll start at the most basic level of **Personal Patriot** that any patriotic America can implement immediately.

### **A) LEVEL 1: PERSONAL PATRIOT** (*basic level*)

**Primary Objective(s):** Substantially increase personal knowledge of Political Islam and its subversive nature, stay up-to-date on current events and familiarize yourself with the tools available ([at this site](#)) to personally dismantle Political Islam within your sphere of influence.

**Secondary Objective(s):** Educate others within your sphere of influence. Ask them to become *Personal Patriots* also. At the very least, you’ll want to inform them about [www.SneakyIslam.com](http://www.SneakyIslam.com) and get them to subscribe to the “Top 10” *Free Email Updates*, available on the **ATTACK** page of the website.

**Primary Audience:** Friends, family, co-workers and other personal acquaintances

## **PLAN OF ACTION**

- 1) Children are being indoctrinated on Islam at an incredible rate through the public school systems. Islamic organizations are being brought in under the guise of “tolerance toward others” as they teach the Pillars of Islam with the approval of teachers. This is happening even at the pre-school level. In addition, many of America’s textbooks have been discovered to contain hundreds of inaccuracies

and outright lies since Islamists forced publishers to include Islamic approval of all texts. Clearly, Islam is laying the foundation for the future of Shariah in America by co-opting the minds of future generations now.

To start, have conversations with your children and honestly inform them about the truth of Islam. Inquire about any teachings about Islam or of Muslim guests in the classroom. Tell your children to alert you immediately of any school plans. Check your children's textbooks using the school guides listed on this website and get those teaching aids into the hands of school principals and administrators. If they refuse to listen and/or correct errors, threaten to rally your neighborhood and/or speak at the PTA meetings. Show up and rally others at school board meetings. Fight back! Parents must protect their children at all costs.

- 2) Insure that you are not helping Political Islam grow in America. That means personally boycotting Islamic businesses. Support only merchants that you know you can trust. Since you cannot know which Islamic businesses support Political Islam (*the vast majority*), you will probably have to avoid them all. Even many Thai and Indian restaurants are owned by Muslims, so do your homework in your area. Here are a few resources to help you find halal-approved places in your area:

<http://www.zabihah.com/>  
<http://halalmaps.com/USA/index.html>

Download the free application to your smart-phone and always check it before deciding to dine out.

- 3) If you enter a business where you will be served by someone wearing traditional Muslim garb or the headscarf (*a political – not religious statement*), show your displeasure by asking for a different server or just walk out. You may want to inform the manager of your reasons.
- 4) If halal food is served where you go, there is a strong possibility Political Islam is also supported there. Check your local supermarkets for halal food and Islamic promotions. Ask the manager if meats are halal, and if so, point out that you do not want to buy meat that has been sacrificed to Allah. Demand proper labeling.
- 5) Insure that you are not treated by doctors and nurses that support Political Islam. Ask them if they support Shariah or just avoid them all together.
- 6) Watch out for convenience stores. Many, many of these are owned by Muslims that support Political Islam.
- 7) Visit all of the sites listed in our *Free Email Updates* section and at least subscribe to the top 10. This will keep you up-to-date on the happenings on a daily basis.
- 8) Sign up to become a free member of one or more of the well-known groups fighting against Political Islam like **ACT! for America** and consider making a small monthly donation, if possible.
- 9) Begin your study with reading about the plots against America in the Stealth 1

section and then move on to “Shariah Law for Non-Muslims” and “Can We Talk”.

- 10) There is a real possibility that your banking institution is promoting Shariah-compliant finance. Many, many of the largest banks are offering financial products that comply with Shariah law and invariably help to fund terrorism. These products prohibit investments in enterprises such as American defense companies like Lockheed Martin and General Dynamics. Further, since all Shariah products require a small portion of funds to ultimately go toward financing jihad, you need to make sure you are not part of the problem. Research your bank on line and ask questions. Consider using a credit union. Visit the following site for a partial list of suspect banks

<http://www.shariahfinancewatch.org/blog/shariah-financial-institutions/>

- 11) Continue to increase your knowledge and begin to have casual conversations with friends. Do not become argumentative. You are an educator. Help them to see the light by being able to prove everything you say. Send them new info regularly.
- 12) Expand your sphere of conversation to others (*as listed above*) as your confidence and knowledge grow.
- 13) Consider adding Level # 2, **Political Activist** to your personal campaign.

By executing the above personal strategy in your life, you are ensuring that you are not part of the problem of furthering the cause of Political Islam in America. Congratulate yourself for taking personal responsibility and doing your part in helping to keep your country free of the oppression of Political Islam.

### **Final Notes:**

- 1) Always speak in terms of Political Islam. Get used to saying it. Do not condemn all Muslims or even Islam in general, even though it is threading a needle to try and separate Political Shariah from religious Shariah. However, you should have no problem with anyone that wants to practice their faith in a way which does not attempt to control you, your country, or your environment or do harm to others. Let Muslims know you support them if they can truly separate state and religion and are not in favor of anything that looks like Political Islam. Freedom of Religion in America is not about doing anything you want because your religion calls for it. For example, is it legal to have a religion that condones human sacrifice? Of course not. It is also not acceptable to have a religion that supports the eventual overthrow of the U.S. Constitution or seeks to impose itself on every aspect of society and to force a host culture to change its laws and culture to accommodate it.
- 2) If you have reservations about boycotting Islamic businesses, then you should consider the Islamic alms giving practice of Zakat. Nearly all religious Muslims participate in Zakat, the charitable giving concept in Islam, so it is considered mandatory. However, did you know that Islam’s holy texts require a portion of all Zakat to go towards jihad? **Therefore, nearly all pious Muslims in America are supporting terrorism in some form.** Does that make you feel any different? As

with most things in life, a few innocent people always wind up suffering because of the unjust actions of others.

## THE APPROACH

As a **Personal Patriot**, you will primarily work on your own when you have some spare time. Seventy-five percent (75%) of your time should be spent learning and 25% talking to others. Start with your family and like-minded friends and then, with the help in our section titled *“Tools for Liberals and Skeptics”* in the **Liberals** section of the website, move on to those that present a greater challenge.

After about six (6) months of increasing your skills and knowledge and working with those that know you, you may want to expand your influence by reaching out to:

- 1) **Civic Groups** – if you are a member of any group like the VFW, American Legion, The Rotary, Chamber of Commerce, etc., consider contacting them about giving a short presentation or distributing free material. Many of these groups are always on the lookout for someone to come in and speak on interesting topics. At least get some literature to them. *Shariah Law for Non-Muslims* is an excellent small guide to distribute. Make sure to get them to the [website](#) also.
- 2) **Business Leaders You Know** – study our ground-breaking guide, *“Muslim Accommodations in the Workplace: An Employer’s Survival Guide”* and share it with those employers/leaders so they understand the issues that they may encounter after hiring Muslim workers and the potential lawsuits they can expect..
- 3) **Personal Minister/Rabbi/Priest** – study our new guide, *“America’s Interfaith Dialogue with Muslims: A Guide in Due Diligence”* and share it with your religious leaders in your congregation. Don’t just stop with the top leader, but get your information into the hands of deacons, elders, etc., as they can properly influence they top leader if they seem to be going down the wrong path. If they won’t listen, take your cause to the members and challenge the leaders openly.
- 4) **Government Leaders** – if you personally know any thought leaders in your community in this category, begin to educate them slowly. Share the PDF booklet, *“Shariah Law for Non-Muslims”* first and then move on to increase their knowledge when they show they are beginning to understand the problem. Next, expose them to the incredible work from the Centers for Security Policy on the Muslim Brotherhood’s infiltration into all areas of government.
- 5) **Local Library** – most of the Islamic groups are working overtime to get glowing Islamic materials into the public libraries. Visit your local libraries and ask if they will include *Shariah Law for Non-Muslims*. Buy a few copies for them. They are only about \$5.00 each in small quantities at [www.PoliticalIslam.com](http://www.PoliticalIslam.com) .
- 6) **Your Muslim “Friends”** – make absolutely sure that you have followed Dr. Bill Warner’s advice at [www.PoliticalIslam.com](http://www.PoliticalIslam.com) and stay focused ONLY on Mohammad and the Qur’an. They are the ONLY experts on Islam. Do not get off into other tangents about the Bible, etc. as distractions. Do not allow yourself to be put on the defensive by answering questions about past grievances or your

beliefs. Use our tool, “25 Questions to Ask Your Muslim Friends” and for reference, stay with the concepts in “Shariah Law for Non-Muslims”, “Can We Talk” and “Stats: - Proving Islam’s Hate”.

Encourage them to explore the topics with you and to be honest and think critically. Your objective here is to find out if they really are a true friend or just another supporter of Political Islam that calls for your ultimate death or submission. They cannot be both. **Get to the truth.**

## **B) LEVEL 2: NEIGHBORHOOD ACTIVIST** (*intermediate level*)

**Primary Objective(s):** To insure that every primary local decision maker in your neighborhood has been exposed to the appropriate materials to understand the threat that political Islam poses to their organization and the community at large.

**Secondary Objective(s):** 1) To eliminate any attempts by local leaders to embrace the Islamic goals of sinister groups to build new neighborhood mosques or madrassas, 2) to stop attempts by Islamic groups to co-opt church/synagogue leaders through sham Interfaith Dialogue meetings, 3) to shut down any attempts to indoctrinate children or college students through personal presentations or material handouts at schools and colleges, and 4) to stop any attempts to extort business owners over Islamic garb or Islamic customs lawsuits disguised as religious requirements and civil rights violations.

**Primary Audience:** Neighborhood Educators, Local Churches / Synagogues, Human Resource Departments of local medium and large businesses, City Council Members, Chief of Police.

If you have made excellent progress in executing your **Personal Patriot** strategy and you have confidence in your knowledge and skills, you should move on to spreading the word to a broader audience. This is just a small step up from Personal Patriot but should be the main goal of every American. If every patriotic person in America would implement the strategy of **Neighborhood Activist**, Political Islam would be quickly shut down in America.

## **PLAN OF ACTION**

- 1) **Neighborhood Schools** – make a list of all schools in your small local area. Visit the public school websites to obtain the names and titles of superintendents, principals, and administrators. Start at the highest level and ask for a meeting. At the meeting, express your concerns and discuss the school reports that we have made available on the [website](#). Ask for a commitment that they will appoint someone to examine the textbooks for issues and ask about any attempts of Muslims to make presentations. If they have made presentations or are scheduled to do so, demand equal time for other religions to present their point of view. Have your own faith leader contact them as a follow up. Send copies of school indoctrination reports and Islamic distortions by email after your meeting.

- Continue to follow up by email and get the school reports into all administrator's, principal's, vice-principal's and superintendent's hands, again by email. Make sure if there are textbook distortions and lies pertaining to Islam that the Supplemental Guides will be used by teachers in all classrooms affected. Ideally, you would want a commitment that the school will stop using any textbook identified to contain Islamic distortions or unequal representations of other faiths.
- 2) **Local Churches/Synagogues** – search the Internet and phone directories for names of churches and synagogues in your neighborhood zip codes. Obtain the name of the minister/pastor/rabbi/priest by calling if necessary and mail a personal copy of *“America’s Interfaith Dialogue with Muslims: A Guide in Due Diligence”*, *“Stats: - Proving Islam’s Hate”* and *“Shari’a and Violence in American Mosques”* (the mosque project) that we have linked to. If you cannot afford to mail a copy, drop one off personally or alternately, you may be able to obtain the email addresses and email a cover letter and the Guide. The most effective way would be to set up a personal meeting, express your concerns, and hand a copy to the leader personally.
  - 3) **Local Businesses** – small businesses do not have to comply with “religious” accommodations the same way larger ones do, so focus your efforts on the big ones. These are the ones Political Islam likes to go after anyway to “set an example” and to have the best opportunity to receive large monetary settlements for supposed “violations”. Visit the local library and use business guides to find the names, titles and addresses of important corporate leaders in Human Resources and Administration such as Presidents, CEO’s and others in local businesses. Once again, mail or email if you cannot afford to print and mail the copies, but get make sure all of them have a copy of *“Muslim Accommodations in the Workplace: An Employer’s Survival Guide”*.
  - 4) **City Council Members** – these people decide, in large part, what happens in your local area. Your job, once again, is to educate them. Show up at meetings and get to know them and where they stand on various issues before approaching them about Islam. Find out what motivates them or what they are passionate about and talk about those issues. Once you have a comfortable relationship going, introduce the Islam issue by asking questions like, *“What are your thoughts on..”* Gradually introduce them to the tools listed below. Follow up and see that that have reviewed the info and then ask what can be done to stop Political Islam at the local level. **Ensure that they have been exposed to the website info at Additional Resources on “How to Stop a Mosque”** *“Stats: - Proving Islam’s Hate”*. *“Shari’a and Violence in American Mosques”* *“Shariah Law for Non-Muslim”s - Government Infiltration section at Stealth I.*
  - 5) **Police Chief** – ask for a meeting with your local Chief of Police and explain that you are concerning about the subversion of Political Islam. Inquire about any initiatives they may have underway for training on Political Islam. See if you can distribute literature. At the very least, leave some reading material – the same as you used for the City Council members. Appeal to their patriotism and duty to protect.

- 6) **Journalists** – finding journalists that are unbiased and willing to put out anti-Political Islam information is becoming more and more difficult. Read different publications and look for journalists with a willingness to speak the truth about Islam. Feed them additional info and direct them to [www.SneakyIslam.com](http://www.SneakyIslam.com) . Whenever you see a biased article that supports Political Islam, send them a note and direct them to [www.SneakyIslam.com](http://www.SneakyIslam.com) also. Challenge them with questions and particularly direct them to the **LIBERALS** section on the website.

### **C) LEVEL 3: COMMUNITY LEADER** (*advanced level*)

If you have studied extensively, performed well at the Community Activist level and organized your resources, you may be a good candidate for **Community Leader**. Make no mistake, this level requires a much greater time commitment and will prove demanding. This position may work best for those that work part-time or are retired.

#### **Organization**

To be successful, you will need to draw up organizational charts, find meeting venues, set up regular member email updates and add a shared repository (*like Dropbox*). In addition, and at a minimum, you will want to design documents for defining your mission and rules of order.

#### **Recruitment**

You will need a system for constant recruitment to keep your numbers growing, as many people may lose motivation. One approach to this is to have new members gather their family and friends at their home for your PowerPoint presentation on stopping Political Islam. Ask people to join the group and ensure that they know about [www.SneakyIslam.com](http://www.SneakyIslam.com) . Hand out some of the brochures available on the website and let them know they can freely print off their own and distribute them in their communities.

#### **Training**

To be credible, your members will need to be educated on Islam and the threat. You will also need to appoint mentors from the group that has a greater knowledge of Islam so they can constantly be educating your new members and helping them get their **PERSONAL PLAN OF ATTACK** going.

#### **Networking**

Get involved with other groups to help spread the word on the new projects that your group has developed. A good place to start is **ACT! for America**, a national organization that has designed quite a few training tools for leaders of anti-Shariah groups. Joining is free and nearly anyone can become a **Chapter Leader**, even with a

group as small as one (*you*).

### **Projects**

As the leader of the group, you need to lead in defining projects that are realistic and that can truly make a difference in stopping the threat of Political Islam. You will need to define priorities for things that your group intends to accomplish and draw up forms to evaluate members for their skills and to log their desire to work in areas of interest. If you grow large enough (100+ members) you should consider establishing a non-profit status and a bank account in the group's name to collect donations for developing larger projects to fight the invasion of Political Islam.

### **Cautions**

There is no limit to the projects you can bite off in your group. However, you must understand that people have lives and jobs that do not revolve around Islam and may not have anywhere near the motivation you do to fight back. Try to find a solid group of 5-10 individuals that are very motivated and willing to make continuous contributions and do not get bogged down trying to motivate people that waste your time but do very little to further the group's goals. If people do not show up for three meetings in a row (*usually monthly*) drop them and move on. Don't become a babysitter. It is a fairly reliable to assume that only 20% of the people you recruit will be responsible for 80% of the results your group achieves. (*Pareto Principle*).

### **Final Note:**

[SneakyIslam.com](http://SneakyIslam.com) is considering adding a new section in the future that will have sample documents for all of the above suggested tools as well as many more to help you with your new organization. Please check back for a new section called "ORGANIZE" in 2016

Good Luck and don't **EVER** give up!

**THE TRUTH AND FREEDOM SOCIETY**
