- Product Components. 15-18

FEATURES & BENEFITS

- Three vane sizes complement any window, providing desired view through – available in 2", 2 1/2" and 3" for decorating flexibility.
- Available in translucent and light-dimming vane styles to provide varying degrees of light control.
- Filters out up to 88% of incoming harmful UV rays when open, and up to 99% when closed.
- Covers large window expanses with no visible internal lift cords to detract from their elegant appearance.
- When raised, they completely disappear into the headrail allowing more outside view.
- Standard cord loop, retractable cord control, cordless lift and battery-operated RemoteLift 2.0 motorization options for operating convenience.
- Cordless lift and battery-operated RemoteLift 2.0 motorization shades are certified Best for Kids
- Fabric-covered headrail option for a soft look top to bottom.
- Limited Lifetime Warranty ensures your customers' satisfaction.

* Light Dimming fabrics provide category C, opaque light control because even when the vanes are completely closed they DO NOT completely seal off all incoming light. See vane closure diagram on page 12 for a visual reference.

Note: Collections are presented alphabetically. Within each collection colors are also arranged alphabetically

A. Glare Reducing

Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

B. Filtering

Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

C. Shading

Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening.

D. Blocking

Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout vanes).

E. Blackout

Blocks out virtually all light (except light that may enter on the sides of the shade) for maximum privacy and darkness.

Minimum casement depth*	1"
Minimum casement depth*, fully recessed	3-3/8"
Minimum rear fabric clearance	1/8"

OUTSIDE MOUNT - Standard, Cordless & Retractable Cord	
Minimum mounting surface height	1"
Recommended width overlap per side	3"
Minimum rear fabric clearance	1/8"

END MOUNT - Standard & Retractable Cord	
Minimum mounting surface depth*	1-1/4"

* Add 1/4" to minimum depth dimensions if optional back cover is used for inside or end mounts.

INSIDE MOUNT - REMOTELIFT 2.0	Built-In Wand	Sat. Bat. Pack
Minimum casement depth*	2"	1-1/4"
Minimum casement depth*, fully recessed	4"	3-1/2"
Minimum rear fabric clearance	1/8"	1/8"

OUTSIDE MOUNT - REMOTELIFT 2.0	Built-In Wand **	Sat. Bat. Pack
Minimum mounting surface height	1"	1"
Recommended width overlap per side	3"	3"
Minimum rear fabric clearance	1/8"	1/8"

END MOUNT - REMOTELIFT 2.0	Built-In Wand	Sat. Bat. Pack
Minimum mounting surface depth*	2-1/8"	1-1/2"

* For inside and end mounts an optional back cover and back cover bracket may be ordered.

The back cover bracket attaches to the installation brackets.

** Requires 3/4" spacers per installation bracket (included), due to the added clearance required for the battery wand.

CORD LOOP DROP CHART

SHADING HEIGHT	CORD LOOP DROP
16" to 26-7/8"	1 ft. (white-only)
27" to 39-7/8"	2 ft.
40" to 59-7/8"	3 ft.
60" to 83-7/8"	4 ft.
84" to 107-7/8"	5 ft.
108" to 120"	6 ft. (white-only)

OPTIONAL CORD DROPS (White Cord Only)	
CORD DROP	INCREMENTS
6' – 12'	6" increments
12' – 16'	12" increments

Note: 18" white only cords available upon request

FINISHED DIMENSIONS

Dimensions apply to standard loop control, cordless lift, retractable cord and motorization	
NOTE: WIDTH AND HEIGHT MAY VARY ± 1/8"	
INSIDE MOUNT – Standard Deductions	
Headrail unit	1/8" less than ordered width
Fabric width	1" less than ordered width
Fabric width - Cordless Lift	3/4" less than ordered width
Shading height	Ordered height
Shading height - Cordless Lift	1/8" less than ordered height
OUTSIDE MOUNT – Standard Deductions	
Headrail unit	ordered width
Fabric width	3/4" less than ordered width
Fabric width - Cordless Lift	5/8" less than ordered width
Shading height	ordered height
Shading height - Cordless Lift	1/8" less than ordered height
END MOUNT – Standard Deductions (not available with cordless lift)	
Headrail unit	11/16" less than ordered width
Fabric width	1-1/2" less than ordered width
Shading height	ordered height
TWO-ON-ONE HEADRAIL (not available with cordless lift)	
Fabric width	1 1/4" less than ordered width
Gap between fabric panels	3/8"
FABRIC GAP – End Gap to Fabric (Gaps On Each Side)	
Control Side	5/8"
Idle Side	3/8"
Both Sides - Cordless Lift	3/8"

OPTIONS

RETRACTABLE CORD

Raise, lower and tilt shadings with one retractable cord. The cord length remains constant when shading is raised or lowered, making it ideal in homes with children or pets. Cord length will be equal to 2/3 of the shading height and may be shortened for enhanced child safety.

TWO-ON-ONE HEADRAIL

Cover patio doors and other large expanses by placing two independently operated shades side-by-side on the same headrail. Note there will be a 3/8" light gap between the two shades, see minimum/maximum requirements under product specification section.

CORDLESS LIFT

To Lower the Shading

Gently pull down on the strap handle.

To Open the Vanes

Lower the shading all the way down and continue pulling down on the handle until the vanes open.

To Close the Vanes and Raise the Shading

Pull down on the handle slightly (about 1") and release the handle. The vanes will close first and then the shading will retract into the headrail.

NOTE: With inside mounted shadings, you may need to pull the bottom rail away from the window to release the locking mechanism.

IMPORTANT: To reposition the shading, it must be raised several inches first to reset the mechanism and then pulled down to the new position.

NOTE: Once you are done operating the shading, lift the pull ring toward the front of the bottom rail until the magnet holds it in place.

TILT ONLY SHADING

Ideal for sidelights or narrow windows.

- Shading cannot be raised, it can only be tilted open or closed.
- Hold down brackets are used to secure the bottomrail.

FABRIC-COVERED HEADRAIL

Features a coordinating fabric wrapped onto the headrail to provide a soft fabric look from top to bottom.

OPTIONAL BACK COVER (INSIDE MOUNT)

Used with inside mounts to conceal the open rear side of the headrail for a more pleasing exterior look. Use of the back cover adds 1/4" to minimum inside mounting depths.

MINIMUM INSIDE MOUNTING DEPTH

The back cover is secured in place by a back cover bracket attached to the installation bracket.

BACK COVER BRACKET

When a back cover is used, attach back cover brackets to the installation brackets before mounting them. Remove the tab from the top of the back cover brackets and both tabs at the rear of the installation brackets.

After mounting the installation brackets, install the back cover.

OPTIONAL DUST COVER (OUTSIDE MOUNT)

Shields the fabric and internal headrail components from dirt, dust, and other contaminants.

SIDE-BY-SIDE VANE ALIGNMENT

When window shadings are installed side by side, vane alignment can be guaranteed within 1/4" only if:

- Shadings are ordered at the same time and in the identical style, color and height.
- Shadings that need to be aligned are specified on the order form (a note must be included in Special Instructions).

Note: Vane alignment cannot be guaranteed for Two-On-One Headrail and motorized shadings combined on the same order.

ADJACENT SHADINGS

To span wide window openings, window shadings may be installed adjacently, so their headrails abut. The gap between the fabric panels of the adjacent shadings varies according to the control placement, as shown in the table below.

CONTROL PLACEMENT	
Adjacent (Abutting)	Window Shadings
Left/Right Shadings	Center Gap
Right/Right Controls	3/4"
Left/Left Controls	3/4"
Right/Left Controls	1-1/16"
Left/Right Controls	1/2"
Window shadings are not recommended for bay windows or butt-and-pass applications.	

ADDITIONAL NOTES

SHADING ADJUSTMENT

Shadings should wind evenly and not skew to one side.

A balance weight on the bottomrail can easily be adjusted if the fabric winds unevenly on the roll when the window shading is raised. Uneven winding can cause damage to the edge of the fabric.

- If skewing does occur:
 - Ensure headrail was installed level; shim if necessary.
 - To release, insert a flat blade screwdriver into the weight lock and turn clockwise.
 - Adjust placement of weight in bottomrail, 1" at a time, toward side where fabric is gathering.
 - Secure the weight locks in position by turning them counter clockwise, after making the adjustment.
 - Raise shade, then lower, if necessary, adjust again.

SHADING INSTALLATION

To mount the shading, insert the top of the headrail into the brackets between the locking tab and the bracket flange. Push the headrail into the brackets until the locking tab clicks in place.

To remove the shading, lift the locking tab to release the headrail, rotate the headrail forward, and pull it straight out.

MAGNETIC HOLD-DOWN BRACKETS

Magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Available upon request. Standard on tilt-only shadings.

REMOTELIFT™ MOTORIZATION OPTIONS: EXTRA CHARGE – SPECIFY ON ORDER

• Motorization	add \$502 per shading
• Remote Control.....	Part #2984495100.....add \$61 each
• Satellite Battery Pack – select with wire length below.....	Part #KIT2520
• Satellite Battery Pack – with 15" wire	Part #2989899000.....add \$71 each
• Satellite Battery Pack – with 4' wire	Part #2989900000.....add \$79 each
• Satellite Battery Pack – with 10' wire	Part #2989901000.....add \$91 each
• Satellite Battery Pack – with 20' wire	Part #2989902000.....add \$102 each
• DC Power Supply – select with wire length below.....	Part #7806000000
• DC Power Supply – with 15" wire	Part #2989899000.....add \$106 each
• DC Power Supply – with 4' wire	Part #2989900000.....add \$107 each
• DC Power Supply – with 10' wire.....	Part #2989901000.....add \$112 each
• DC Power Supply – with 20' wire.....	Part #2989902000.....add \$116 each
• Daisy Chain Adapter – select with wire length below	Part #2989875000
• Daisy Chain Adapter – with 15" cable	Part #2989899000.....add \$50 each
• Daisy Chain Adapter – with 4' cable	Part #2989900000.....add \$57 each
• Daisy Chain Adapter – with 10' cable	Part #2989901000.....add \$62 each
• Daisy Chain Adapter – with 20' cable	Part #2989902000.....add \$67 each

- Momenta Extender Kit.....Part #2920075100 (must be submitted as part order).....add \$54 NET Cost

Momenta App Bridge Kit (Includes One Momenta Extender Kit)

REMOTELIFT 2.0 ORDERING NOTES

- Specify Inside (IB), outside (OB) or end (EB) mount.
- Specify if optional back cover is desired with inside (IB) mounts or end (EB) mounts.
- Specify if additional spacer blocks or extension brackets are needed for added clearance.
- Specify left- or right-side motor assembly.
- Specify number of remote control units (at least 1 required per order).
- If ordering satellite battery pack, specify wire length (15", 4', 10' or 20').
- If ordering DC power supply, specify wire length (15", 4', 10' or 20').
- Specify if daisy-chain cables are required to daisy-chain 2 or 3 shadings together (requires DC power supply). If ordering, specify wire length (15", 4', 10' or 20')

REMOTELIFT™ 2.0 PRODUCT CONFIGURATION SPECIFICATIONS

RemoteLift 2.0 combines IR and RF wireless signals to control your window shadings. By using both line-of-sight (infrared technology) and "out-of-sight" (radio frequency technology), your customers achieve more operating flexibility. RemoteLift 2.0 operates one window at a time or a group of windows, even in multiple rooms.

- Quieter, more robust motor for raising, lowering and tilting shadings
- Ideal option for hard-to-reach windows behind furniture, above counters, in high foyers, etc.
- Enhanced safety in homes with children and pets
- State-of-the-art convenience; multiple options allow even further customization of window shadings
- Battery-powered system is easy to install and requires no additional wiring

REMOTELIFT 2.0 SYSTEM OPTIONS

BATTERY WAND

Battery wands are the standard power source whether inside (IB), outside (OB) or end (EB) mount, if applicable. Battery wands are mounted on the rear of the headrail. The redesigned battery wand will allow for batteries to be changed without removing the window covering from the window.

- 12 AA 1.5V alkaline batteries.
- Battery life exceeds one year, depending on usage.
- Replace batteries when the window covering(s) begin to operate slowly.

18V Battery Wand

SATELLITE BATTERY PACK

The satellite battery pack is an optional power source. The battery pack connects to the same side of the headrail where the receiver eye or satellite eye is located. The satellite battery pack is the best choice when the window covering is mounted in a high window, restricting access to a battery wand.

- 18V satellite battery pack:
 - Available in 15", 4', 10' and 20' wire lengths.
 - 12 AA 1.5V alkaline batteries.
- Battery life is approximately one year, depending on usage.
- Replace batteries when the window covering(s) begin to operate slowly.
- Mounting options: top of headrail, next to molding or under the sill.
- Satellite battery pack cover can be painted.

18V Satellite Battery Pack

DC POWER SUPPLY

The DC power supply is an optional power source. The DC power supply plugs into any standard household outlet.

- 18V DC power supply:
 - Available in 15", 4', 10' and 20' wire lengths.
- Eliminates need to change batteries.

18V DC Power Supply

DAISY CHAIN

The optional Daisy Chain Adapter allows up to 3 shades to run off of one DC power supply. You must specify the cable wire length when order is placed.

Note: Keep in mind which side the sensor eye is positioned on each side when determining daisy-chain length.

Daisy-Chain Adapter/Connector

STANDARD SHADING OPERATION

STANDARD SHADING OPERATION

Shadings are operated using a continuous cord loop. As shown in the illustration below, from the fully raised position [1] pulling down on the rear half of the cord loop lowers the shading [2, 3]. After it is fully lowered, continuing to pull down on the cord pivots the bottomrail and opens the fabric vanes [4]. When the vanes are fully open [5], limit stops in the headrail prevent further movement in that direction.

With the fabric vanes fully open, pulling down on the front half of the cord loop first closes the vanes [6, 7] and then raises the window shading [8]. When it is fully raised [1], limit stops again halt shading movement, preventing the bottomrail from being retracted too far into the headrail.

Light Control

With the shading in the fully lowered position, the continuous cord loop is used to adjust the fabric vanes from open to closed, and anywhere in between. Light control is at your customer's fingertips. (Note: The degree of maximum vane closure varies slightly from the top to the bottom of the shading.)

Vane Opening

Vane opening is the amount of unobstructed visibility between fully open vanes when looking through the shading at eye level. Vane opening for shadings is 1" to 1-1/2" depending on vane size and opacity.

Vane Closure

When the vanes of a window shading are closed, they overlap each other, blocking the view. However, the vanes do not contact each other along the full length of the shading – they do not form a perfect seal against light leakage. This is most visible toward the bottom of the shading.

Vane closure is measured as the distance between the front and rear fabric facings 6" up from the lowest point of the bottomrail, with the shading fully lowered and the vanes closed, as illustrated here. Vane closure is 5/8" for shadings under 96" in height and 7/8" for shadings over 96" in height.

PLEASE NOTE: Cord tensioner MUST be mounted to window casement or wall in order for the shade to operate.

OPERATION

RETRACTABLE CORD

To Lower the Shading

To lower shading and open vanes, pull cord toward the center and down in long even strokes.
Note: Allow cord to fully retract between each stroke.

To Close and Raise the Shading

To close vanes and raise shading, pull cord straight down or down and slightly out using long even strokes.

CORDLESS LIFT

To Lower the Shading

Gently pull down on the strap handle.

To Open the Vanes

Lower the shading all the way down and continue pulling down on the handle until the vanes open.

To Close the Vanes and Raise the Shading

Pull down on the handle slightly (about 1") and release the handle. The vanes will close first and then the shading will retract into the headrail.

NOTE: With inside mounted shadings, you may need to pull the bottom rail away from the window to release the locking mechanism.

IMPORTANT: To reposition the shading, it must be raised several inches first to reset the mechanism and then pulled down to the new position.

NOTE: Once you are done operating the shading, lift the pull ring toward the front of the bottom rail until the magnet holds it in place.
