First Female University City HS Student Achieves ICDL Certification Level I

Special congratulations to Tamanna Sultana, age 17, as she completes the 11th grade and moves on to the 12 grade in September 2007. This month, Tamanna achieved her International Computer Drivers License Certification (ICDL) Level I. Tamanna is Asian American and was born and lived in Bangladesh for fifteen (15) years prior to coming to the United States. Her father, a U.S. Citizen, brought Tamanna and her family to the U.S. so they would have a better education and quality of life.

Tamanna has two sisters. She and her family live in West Philadelphia. Her career choices are to be a Medical Doctor, Pharmacist and/or a Teacher. She is taking college classes and likes to work as Teacher Assistant. Tamanna says she likes the METworks After School Technology and Career Prep Program because she is learning important skills and career information and sees how it will help her with her studies, career, and long terms goals. She says her computer knowledge and accomplishments give her added respect from her peers and family.

She loves teaching and would like to use her knowledge to help others as she studies to complete the next ICDL Technology Certification Level II. She says she is very competitive, "...I was jealous when my classmate Amir Potts was the first to achieve his ICDL Certification Levels I and Level II. "I learned about the METworks After School Technology Certification Program from my good friend Theresa Mieh..." Tamanna knows how to type with all fingers which gives speed to her computer skills. She proudly says "...I like myself because I know how to respect myself and others ...if you have focus, be respectful to others and yourself, I think you can go anywhere..."

ICDL Certification is a globally recognized credential that certifies an individual as competent using computers. Over 3.5 million people in 135 countries are pursuing their ICDL.
