

Agent Orange at Ft. Gordon & Eglin AB

Please forward to all of your friends so they can tell their friends who may have served at Ft. Gordon after July 1967.....Or Eglin AFB from 1961 thru 1970 testing and thereafter! Eglin will be the next base to expose with 9 years of continuous testing there! Not only were agents orange, white (w/picloram) and blue (w/arsenic) tested at Gordon; 13 lakes and their surrounding areas were also sprayed by James Cripps, a MP assigned as a Game Warden at Ft. Gordon. Anyone who needs help on direction in filing a claim, or for documents I have on hand, please e-mail me back or call. If one of the TV affiliates in Florida or the surrounding area ever get behind this "public disclosure" as it relates to the extensive testing at Eglin, we can move on to Gulfport, Mississippi. Gulfport stored over 1500 - 55 gallon drums, more than 82,000 of Agent Orange, with drums in disrepair and leaking daily. WHO will help us break the story there?????Lou 843-215-3753 Home and FAX843-251-8004 Cell
