General Meeting & Program
Monday, February 16th, 2015
7:00 p.m.
1st 15 minutes:
Becky Tipton presents
Kansas Honey Producers Meeting
update & Clarence Collison
And
Presentation by 3 Youth
Scholarship Students
And
“Pruning and Choosing Plants
without Neonics”
Presented by
Clinton Parkway Nursery
And
How I Do It—Making Nucs
Presented by Al Abts

Whew—Becky has a very ambitious program planned for us this month!
First she is going to psyche us up for attending beekeeping meetings and let us know about the amazing Dr. Clarence Collison.
Next we have several youth scholarship students who will present at this meeting.
Next Becky has asked the folks at the Clinton Parkway Nursery in Lawrence to give us some tips on pruning. Then they will also share some tips for getting and raising plants without neonicotinoids.
Last but not least, NEKBA member, Al Abts, will share his knowledge about how he splits his really strong hives to make nucs or new hives. He’ll talk about building is hive populations up and what he does to keep them from swarming by making nucs.
A very exciting program is planned! Hope to see you there!

Directions: The address is 2110 Harper St. It is easily accessible from K10, turn north on Harper Street and it is just a few blocks. We are in Building 21 North which will be on your left you after you turn into the fairgrounds.

2015 Youth Scholarship Students & Mentors
Congratulations to our 2015 youth scholarship students—welcome to the club.
- Paul Gizel, Topeka mentors Marlene and Al Pantos
- Caleb Euthon, Olathe Mentor Kristi Sanderson
- Riddhi Duvver, LeCompton Mentors, Steve and Becky Tipton
- Connie McDonald, Paola Mentor, Robert Burns
- Elizabeth Spurtin, Leavenworth Mentor, Al Abts
- Mya Williams, Rantoul Mentors, Joli Winer & Cecil Sweeney

Sunday, March 15th & Sunday March 22nd 2015
The New Beekeeper Class will be held at the Douglas County Fairgrounds Bldg 21. Guest speaker on the March 15th will be Dr. Clarence Collison. Price will include a textbook and presentation notes. Information at nekba.org.
As always I would like to start with a thank you to Becky Tipton for putting these programs together each month and Christy Milroy for her work on the scholarship program.

This past meeting was a very special meeting with a couple of our last year scholarship students presenting their programs on their first year as a beekeeper and their accomplishments and experiences. A big thank you for such great presentations and good luck in the future with beekeeping.

Sometimes it is hard to express your thoughts and feeling on certain items or subjects and in my mind I have trouble writing my true feeling on this subject so will try and muddle through it. This past year we received applications to the Youth Scholarship Beekeeping Program from some fantastic children or young adults. This has been something that has been important to me for the sheer reason these will be our future beekeepers and leaders in America. There is no doubt in my mind the ones we had the privilege to talk to with their parents will do just fine in their future endeavors. As with any organization we are limited in the amount we can sponsor and this was really hard for all of us to have to choose. We know that all of these were great kids which their parents should surely be proud of. This is a program started a couple of years ago and can be reapplied to the next year if they did not receive a scholarship this year. Each recipient will have a mentor to help and guide them through a year and then even past that if help is wanted. I have had the privilege of mentoring two young adults and co-mentoring another and it is very rewarding seeing them learn and develop beekeeping skills. Thanks again for the honor of being able to sit in with the young adults and their parents for the interview process.

This year has many exciting things going on and if you can make any or all of these events it would be a very rewarding and informational as a beekeeper. The Kansas Honey Producers will be having their spring meeting in Manhattan Kansas with Dr. Clarence Collison as a guest speaker. There will be two days of informational talk’s beside Dr. Collison there will be other guest speakers. This is a great way to meet many new beekeepers from across the state and make new contacts. At the last meeting I met a fellow beekeeper who needed some comb honey so I ended up shipping some to the Wichita area, imagine that, so who knows what you may run into (just a bunch of friendly beekeepers). This meeting is very close to us!

Second there is the Beginners Beekeeping class in March and to add even more to it we will have Dr. Clarence Collison as a speaker for the first weekend. I have spoken to members who took the beginners class a second year and said that they could really relate to the information after having bees for the first year. I have experienced this myself at different programs or lectures where you receive the basics but the second time it all falls into place. If you know someone who might be interested in becoming a beekeeper bring them along with you to the next meeting. As always I say we are ambassadors of our club and welcome new people into an elite group of beekeepers.

June is FUN DAY and it looks as if there is another Fantastic Day in store for those who can attend. I know Marla Spivac will be one of our guest speakers and the list is still being put together with a huge amount of programs that were requested from past evaluation sheets. Dr. Marion Ellis from Nebraska has also agreed to present this year. The program and workshops are still being revised. I think the committee is doing a great job. They take your comments and work to make it better each year. This is another time to visit with fellow beekeepers from around the area. Last year we had beekeepers from Kansas, Missouri, Iowa, Colorado, Ohio, Nebraska, and Oklahoma!

The Mother Earth News Fair is another event that takes place each year in Topeka. The NEKBA had an outstanding booth and it was a blast talking to people who were interested in bees. I even spoke with a couple from Dallas Texas and their information on the Africanized bees, pretty interesting.

The State Fair each year is another event that
the NEBKA in deeply involved in and another time to use your knowledge in helping in the booth selling honey and talking to a lot of nice people. The children that come through there with their parents are absolutely amazing with the questions they ask.

These are just a few of the events that our officers and board members do to help this great club keep active. This is what makes this one of the best bee clubs in the Midwest. Many thanks to all in this club for all and everything you do as it makes a difference.

I know there are a lot of things that will help us keep our bees through the winter months and Joli puts a good list in the Buzzer each month. It is very helpful. I have always believed in a good wind break as this is Kansas!! After eleven years I finally replaced a fifty foot snow fence as a north wind barrier. All it took was two fifty foot rolls of lathed snow fence and two rolls of HEAVY black plastic sandwiched between the fencing and it is one of the best wind breaks money can buy. (My opinion as it lasted eleven years).

Hope to see you all at the next meeting. I hope you had a chance to check on your bees during the few warm days we had.

### Tips for February

- Renew your club membership if you have not done so- check the date on your mailing label
- Send in your registration for the Beginning Beekeeping workshop and find a friend or relative to take the beekeeping class with you.
- Get your queens and packages ordered!
- A good winter project is to melt down your wax cappings—the smell of beeswax will warm your soul.
- Look through your seed & flower catalogs and order some trees and plants for the bees.
- Make sure your lids are still on your hives
- On a warm day check your bees and see if you have to move some frames of honey around to get it closer to the cluster of bees.
- Repair any old equipment that you have sitting around—spring is just around the corner. You’ll be needing it soon
- Clean those recycled frames—foundation over 5 years old is too old, replace it.
- Brood rearing begins this month; food consumption increases quickly—double and triple check food.
- Do your bees need pollen? Feed pollen substitute (protein).
- Resolve to keep better bee records for 2015
- Read at least one new beekeeping book this winter
- Work on your bee equipment
- Check the front of your hives for skunks scratching on them. Beekeepers can be quite creative in eliminating skunks!
- Consider writing an article for *The Buzzer*.
- Subscribe to a beekeeping magazine this year.
- Check your home for library books

### Taking Care of your Bee Hive if your Bees Die

I’ve had a few calls and emails about how to take care of your beekeeping equipment if your bees die. Here are some suggestions.

Take your equipment in and check it first to make sure you did not have American foulbrood. If you do not, than you can get it ready to reuse and recycle. It is perfectly fine to put new bees in—but first there are some things you should do first.

Repair and repaint any equipment that needs it—this is a great time to perform those tasks.

Take out each frame and brush off the bees, the more bees that you can get out the better it is for your new bees later on. Sometimes the bees left on the comb will mold so the more you get off the better.

Close your equipment up and store it a cold, unheated area. Any honey can be reused for your new bees. Your already drawn out comb can also be used for your new bees.

---

**We are looking for someone to help us with our sound system at the meetings. If you can help us please approach Joli or Becky at the meeting.**
The Honey Pot
By Becky Tipton

Never say never….I was certain that when I retired from teaching, I would never go back, substitute, or be involved in public education in any significant way. My principal called a couple of weeks ago and asked me to do a long-term sub job at my old school, in my department. The job is supposed to be for 3 weeks in February—I checked my calendar and I wasn’t doing much in February, so I said yes. I’ve been retired 3 ½ years. There are so many new faces in the building! Although the kids are all new (everyone I worked with has graduated), they are really the same. They want someone to see them and understand them and respect them. I’m loving it.

Thank you to Matt Smith for requesting this recipe. He was looking for a honey-sweetened cornbread. This is a wonderful rich cornbread. I bought a grain mill a few years ago and now grind my own cornmeal. Popcorn makes the very best cornmeal. I hope to grow my own popcorn this summer and try making cornmeal from some different colored kernels.

Honey Cornbread
1 cup flour
1 cup cornmeal
1 teaspoon salt
3 1/2 teaspoons baking powder
1/4 teaspoon baking soda
1 egg—lightly beaten
1/2 to 2/3 cup honey
1/3 cup oil
1 cup milk

Directions
Preheat oven to 400 degrees. Spray or lightly grease a 9-inch cast iron skillet (or 9” round pan or 8” square pan). If you like a crisper crust, put the skillet in the oven to get hot while you mix your cornbread. In a large bowl, combine flour, cornmeal, salt, baking powder, and baking soda. Set aside. Stir together egg, honey, oil, and milk (adding in that order). Combine the dry and liquid ingredients just until well combined—don’t over beat. Pour batter into prepared pan. Bake in preheated oven for 20 to 25 minutes, or until a toothpick inserted into the center of the pan comes out clean.

In the hopes of staying healthy while I’m working with kids, I’m drinking a tea to boost your immune system that was recommended by Rosemary Gladstar. The ginger is anti viral and anti bacterial, the lemon is packed with vitamin C, and, of course, a generous serving of my wonderful honey to soothe my throat.

Winter Tea
2 TBSP grated fresh ginger (peel and use a fine grater)
juice of one lemon
2 TBSP honey (more or less to taste)
One quart boiling water
Add ginger, lemon, and honey to a large glass container (large pyrex measuring cup works well). Pour in 1 quart boiling water. Stir. Let stand covered for 10 minutes. Strain. Serve. I pour my tea into an insulated cup and sip on it all day. It’s also good poured over ice – refreshing!

Looking for a recipe using honey, e-mail me at bstbees@embarqmail.com and I’ll search my cookbooks and try to find what you’re hungry for!
Meeting Dates for 2015—mark your calendars now!

Meetings are held at the Douglas County Fairgrounds at 2110 Harper St. It is easily accessible from K10, turn north on Harper Street and it is just a few blocks. We are in Building 21 North which will be on your left you turn into the fairgrounds.

- Sunday, March 15—New Beekeeper Class 1
  *Special Guest—Clarence Collison
- Sunday, March 22—New Beekeeper Class 2
- Monday, April 20 7:00 pm How to inspect a Beehive
- Monday, May 18 7:00 pm Supering and Producing Comb Honey
- June 6—FUN DAY!
  Full day workshop
  Keynote speakers—Dr. Marla Spivak & Dr. Marion Ellis
- July? Bee-Bee Q Meeting held at alternate location, date to be determined—Bee Olympics
- Monday, August 17, 7:00 pm Honey Judging, Integrated Pest Management
- Monday, Sept 21 7:00 pm Getting Bees Ready for Winter
- Monday, October 19 7:00 pm Evaluating Your Hives and Making Plans for 2016
- Monday, November 16 7:00 pm TBA
- Monday, December 21 7:00 pm Holiday Cookies and Youth Scholarship Auction
- January 11, 2016 (2nd Monday) Youth Scholarship presentations

Late Winter—what's happening in the hive now!

Egg laying resumes in January which is probably a response to day length and the earliest pollen flows. The inception of egg laying changes everything. Heat production increases to incubate new brood, energy demands escalate accordingly, and food store rapidly plummet.

This begins the most stressful time of the year for the honey bee colony. Keep an eye on your hive to feed if needed. Beginning in March your hives will start growing and using food.

*From Honey Bees and Beekeeping by Keith Delaplane—the book we’ll be using for our new bee class

---

Old Bee Guy

Cecil Sweeney

Now is the time to decide what you are going to do with your bees this spring. You’ve had a few opportunities to check your bees and see how they are doing. If there are a lot of bees you might want to consider making a split or two from your hive to increase your numbers.

If you decide that you want to split your hive now would be the time to start stimulating your hive by feeding a 1:1 sugar syrup—that’s 1 part by weight water to sugar. So that’s about 4# of sugar to about ½ gallon of water.

**Note:** if your bees have honey and you do not want to increase your hive numbers than don’t feed your bees! You will only make your bees strong and they will swarm.

The syrup simulates a nectar flow and therefore stimulates the queen to lay more eggs and increase the numbers so that you will have more bees to make a split with. The queen will only lay out as far as the bees can keep the brood warm. So right away there won’t be a lot bees but after a hatch of brood there will be more bees.

Come to the meeting this month to hear how Al makes his split—next month we’ll talk about how Cecil makes his splits. You are just getting them ready right now.

Basic Spring Management

Any colony in spring, whether mature or a new package, must be queenright, healthy, and well fed if it will build up suitably for the nectar flows.

Colonies sometimes lose their queens over the winter. If you discover a queenless hive before mail order queens are available than shake out the bees into a healthy colony and protect your equipment. If queens are available and you have a lot of bees than add a queen a few frames of bees from another colony.

From *Honey Bees and Beekeeping* by Keith Delaplane—the book we’ll be using for our new bee class
Honey Plants

Peter Lindtner’s Garden Plants for Honey Bees, (Wicwas Press, 2014) is a gold mine of plants that give bees pollen and nectar year-round for adequate nutrition. The 400-page book has about 700 images and colored photos. His comments are a bonus such as: “every beekeeper should have one to two Osmanthus Evergreen trees as the last source of nectar and pollen before winter,” p 360; “plant one to two Vitex close to hives,” p 311; “highly recommend planting close to hive six Speedwell plants/each colony,” p 265, and Crocus, p 346. His observations such as “bees literally swarm” on Winterberry p 180, and Alder Buckthorn p 199, and a Shiny Sumac had February (number indicates page)
American Hazelnut Shrub Corylus americana 15 P****
Snowdrop bulb Galanthus nivalis 19 P****
Winter Aconite Eranthis hyemalis 13-14, 18 P****
*Silver Maple tree Acer saccharinum 14-16 P****

March
Pussy willow Salix caprea 39 P****
Honeysuckle Lonicera fragrantissima 35 P****
Crocus spp 30, 31, 56 P****
*Red maple tree Acer rubrum 26 P****

April
Japanese Quince shrub Chaenomeles japonica 53 P****
Cotoneaster shrub Cotoneaster horizontalis 56 P****
Enkianthus shrub Enkianthus perulatus 58-59 P****
*Alder tree Alnus glutinosas 47 P****
*Ornamental Cherry tree Prunus ‘Okame’ 71 P****

May
Oak-leaved Hydrangea shrub Hydrangea quercifolia 110 P****
Nevada Rose shrub Rosa nevada 139 P****
*Ornamental Crabapple tree Malus floribunda 119 P****
*American Holly male tree Ilex opaca 111 P****
*Black Locust tree Robinia pseudoacacia 138 P****
*Washington Hawthorn tree Crataegus phaenopyrum 173 P****

the “highest density of bees on flowers I have ever observed,” p 374 are informative.

Lindtner contends that small gardens are healthy for bees in that typically they are not sprayed with poisonous chemicals. In planning a bee garden his star system for evaluating pollen and nectar for each plant is most helpful -- five stars (***** the most resourceful.

Below is his list for a quarter-acre (about 100 feet x 108 feet) bee garden, listed according to monthly bloom time. An asterisk marks additional suggestions for a half acre or larger plot with three to six bee colonies. Listed are 17 honey shrubs and 14 trees which are vital sources of pollen and nectar. But even if you do not have room for trees or shrubs, the star rating is helpful in choosing annuals and perennials for containers or smaller gardens. For example, California poppy P (pollen)**, N (nectar)*; Borage P*** N***, Lily of Valley P*, N*, Cranesbill P**, N**, etc.

June
Alder Buckthorn shrub Rhamnus frangula, 199 P****
Hollyhock Alcea rosea 158, 165 P****
Winterberry shrub Ilex verticillata 180-181 P****

Upcoming Events
Friday and Saturday March 13 & 14 2015 Kansas Honey Producers Meeting, Manhattan KS
Our guest speaker will be Dr. Clarence Collison, Beekeeping Specialist, Emeritus Professor/Dept. Head, Dept. of Entomology and Plant Pathology, Mississippi State University. He also writes a monthly column, *A Closer Look*, in the *Bee Culture Magazine*. Author of *What do you know?* Holiday Inn at the Campus, 1641 Anderson Avenue, Manhattan KS 66502 Registration forms at kansashoneyproducers.org.

Sunday, March 15th & Sunday March 22nd 2015
The New Beekeeper Class will be held at the Douglas County Fairgrounds Bldg 21. Guest speaker on the March 15th will be Dr. Clarence Collison. Price will include a textbook and presentation notes. Information at nekba.org.

Saturday June 6th 2015 Nekba Funday, Dr. Marla Spivak, & Dr. Marion Ellis & hopefully Dr. Chip Taylor guest speakers. Douglas County Fairground Save this date—it’ll be the meeting of the century Marla, Marion & Chip—Don’t miss it.

Some Past Beekeeper’s of the year
At the January meeting the beekeeper of the year award was presented to Andy Nowachek
1994- Melissa Ostermeyer
1995- Ed Bishop
1996- Don Hendrickson
1997: Wendell Ohmes
1998: Joli Winer
1999: Joy Young
2000: Merlene Eads
2001: Larry Coppperger
2002: Becky Tipton
2003: Kristi Sanderson
2004: Robert Burns
2005: Ray Morgan
2006: Cecil Sweeney
2007: Steve Tipton
2008: Michael Sinclair
2009: Ron Ward
2010: Joli Winer
2011:
2012:
2013: Al Abts
2014: Andy Nowachek

Renew your membership & Sign up for the new bee class—you may learn more the 2nd year!

Starvation
There’s been a lot of facebook chatter about if bees starved or not. If your bees are dead and are head-first in the cell than you are seeing starvation. This is caused by either an absence of food or immobilization from cold that prevented bees from moving to food. One of the saddest sights in beekeeping is a cluster of dead bees just inches from whole frames of honey.
Shake out the dead bees to prevent mold and store the equipment for later use.
From *Honey Bees and Beekeeping* by Keith Delaplane—the book we’ll be using for our new bee class
Northeastern Kansas Beekeepers’ Association  
Beginning Beekeeping Class 2015  
Sundays, March 15th & 22nd Registration 12-1, program 1-5:30 p.m.,  
Dr. Clarence Collison, Beekeeping Specialist, Emeritus Professor/Dept. Head, Dept. of Entomology and Plant Pathology, Mississippi State University. He also writes a monthly column, A Closer Look, in the Bee Culture Magazine  
and is the author of What do you know?  
Douglas Co. Fairgrounds, 2110 Harper St., Bldg. 21, Lawrence KS  
K-10 to Harper Street, go north 2 blocks to the Fairgrounds.  
New members  will be eligible to win a starter single story hive and a 3-pound package of bees with a queen.  
All other registrants will be eligible to win door prizes. You must be present to win.  
Each family will also receive 1 set of the text books, Honey Bees and Beekeeping. A Year in the Life of an Apiary, 3rd Edition by Keith Delaplane and Field Guide to Honey Bees and their Maladies By Penn State University & MAAREC If you already have these books there will be an alternate choice available.  

Sunday, March 15th  
12:00-1:00  Registration  
1:00  Introductions of club officers, President Andy Nowachek  
1:05-1:45(40)  Basic Equipment, tools to use, clothing, woodware. Learn the proper names for beekeeping equipment. This presentation will give you a good idea of the equipment you have to have to keep bees. Steve Tipton presents.  
1:45-2:45(60)  Honey Bee Biology 101 Dr. Clarence Collison will present. Why do we need to know biology to keep bees? This talk will include some anatomy and development and the basics of the bee nest.  
2:45-3:15(30)  Break  
3:15-4:15(60)  The Art of Colony Examination. Dr. Clarence Collison presents  
4:15-4:45(30)  Ways to Acquire Bees & Installing a package of bees  
Our speaker Kristi Sanderson will talk about the various ways you can get bees and will demonstrate how to install a package of bees.  
4:45-5:30(45)  Diagnosing problems with Bee Diseases & Pests and What to do about Them. Recognition and control of diseases including integrated pest management. Dr. Clarence Collison presents  

Sunday, March 22nd  
1:00-1:45(45)  Management of Package Bees & Nucs how to take care of your new hive of bees from how long you need to feed them, when to put on the next hive body and when to add your honey supers. Steve & Becky Tipton present this.  
1:45-2:30(45)  Seasonal Management-Late Summer and Fall Removing your honey from the hives, fall management, includes checking your hives to make sure they have enough bees and food and getting your bees ready for winter. Cecil Sweeney presents this.  
2:30-3:00  Break Participants are asked to bring refreshments made with honey for this break, you may bring your recipes, beverages will be provided.  
3:00-3:45(45)  Extracting Honey Club members will demonstrate how to remove honey from your hives and uncap your honey, extract it and bottle it for sale and gifts. Andy Nowachek presents  
3:45-4:15(30)  Tips for the Beekeeper Robert Burns will demonstrate how to light your smoker, approach a hive, open it up and get started on your beekeeping adventure and safety. Robert Burns presents.  
4:15-4:30(15)  Opportunities for members of the bee clubs. Books, DVD’s and magazines, our library & other beekeeping clubs in the area. She’ll also let you know about our Funday on June 6th. Joli Winer presents  
4:30- close  Question and Answer Session & Drawing for door prizes-you must be present to win, one door prize ticket per paid registration. All presenters will answer questions.  

Program and presenters subject to change
Northeastern Kansas Beekeeper’s Association
Beginning Beekeeping Class Registration Form
Sundays, March 15th & 22nd 1-5:30 p.m.,

I have lined up a great hotel and meeting rooms and I’m working on a fantastic program. Our main guest speaker will be Dr. Clarence Collison, Beekeeping Specialist, Emeritus Professor/Dept. Head, Dept. of Entomology and Plant Pathology, Mississippi State University. Clarence is retired now and is hard to get out of retirement to make presentations—but he has agreed to spend some time with us in March! We are so lucky. Clarence is an excellent teacher and will be great for both new and experienced beekeepers. The spring meeting is usually primarily our beginning beekeeping class but this year I am going to try something different by having a second series of talks concurrently for 2nd year and more experienced beekeepers. I’m still working on confirming a few speakers and topics and the program for the Friday night dinner.

Our meeting will be held at the Holiday Inn at the Campus in Manhattan. We chose this city because they have a new bee club that is going gangbusters! Make your hotel reservations by February 10th by calling 785-539-7531 and mentioning the code KHP to get the discounted rate of $99.95.

As an added feature this year we are going to have an Art Show. It won’t be a contest but a show. I thought you might want to work on something over the winter. It can be anything related to beekeeping or something using beeswax. Maybe you have tried batik, encaustic painting, carved something from beeswax, taken a great photo—anything. Have you sculpted a bee from wood or done something cool with stained glass. Did you use beeswax when you made a bronze statue? Maybe someone buys beeswax from you and they do something creative with it—bring a sample.

FYI: At this meeting we will have representatives from Dadant and Sons, the Walter T. Kelley Company from Clarkson KY and Wicwas Press- beekeeping booksellers all will have displays.

If you have questions you can email me at joli@heartlandhoney.com or call me at 913-856-8356. Watch the kansashoneyproducers.org website for program updates.

Thursday night March 12th 8:00 p.m. 
Board Meeting Holiday Inn at Campus, Manhattan KS, Presidents Room

Friday, March 13th 2015    B Beginners    A Advanced

Now you can pay online at nekba.org
**The Northeastern Kansas Beekeepers’ Association**

Membership is open to anyone who is interested in bees or bee culture. Dues are $15.00 per calendar year (December 31-December 31) for the first in the family joining. Those joining in July or later in the year may pay $7.50 for ½ year. Additional members of that family wanting voting privileges shall be assessed dues at $1.00 per year. Youth memberships (18 years of age and younger) are $7.50 per year. New memberships and renewals should be submitted to the treasurer.

The *Bee Buzzer* is the official publication of the Northeastern Kansas Beekeepers’ Association, Inc. and is published monthly. Commercial ads are accepted in the newsletter for a fee; non-commercial ads by paid up members are accepted and are free.

The library of the association is free to all members. Books may be checked out at the meetings and kept for a period of 30 days. The bee publications, *The American Bee Journal* and *Bee Culture* can be subscribed for through the treasurer.

The Association meets each month on the third Monday at 7:00 p.m. except during the months of January, March, June and July. A beekeeping class is held in March. This is a nonprofit organization; elected officers serve without pay. Everyone is invited to attend the meeting. Check *The Buzzer* or our website at nekba.org each month for the actual date, time and location. If the weather is bad call an officer to find out if the meeting will be held.
