**Forest Park, Queens, New York, USA: March 31, 2005** At the Water Hole at the northwest side of the park, in early evening, was a male **PROTHONOTARY WARBLER** (new species for US) in full breeding plumage. Flew into vision, sat on a bush for five seconds and

then deeper in a bush for five minutes of excellent views. Disappeared for 10 minutes before being relocated bathing in the swampy water. Also, Carolina wren and Hairy woodpecker. Warbler first seen at 5:20 p.m. on a windless, cloudy day, then again at 5:35

**Central Park, New York City, New York, USA: April 6, 2005** At the north end of the park. Four Eastern screech owl in evergreens; along loch, wonderful sights of **LOUISIANA WATERTHRUSH** (new species for US), with eye stripe very white; also, Song sparrow. On Great Hill, two Golden-crowned kinglet and flock of Dark-eye juncos; on the way home in Morningside Park, first Eastern phoebe of the year. Also, wonderful view of perched Red-tailed hawk

**Central Park, New York City, New York, USA: April 8, 2005** First warblers of Central Park this year, Palm warblers and very drab Pine warblers; also, the reported **YELLOW-THROATED WARBLER** (new species for US) At 6 p.m. on north side of Great Lawn. Amazing views of very Nuthatch-like behaviour scaling up tree trunks and Flycatcher-like behaviour hunting insects in sorties. Peregrine seen swooping over said birds; small flock of Chipping sparrow, and first Red-breasted nuthatch of year

**Central Park, New York City, New York, USA: April 9, 2005** I and another birder rediscovered the yellow-throated warbler, seen this time at east side of Turtle Pond. Also, Cedar waxwing. At the Azalea Pond, immature **COOPER'S HAWK** (new species for US). Much discussion as to whether it might have been an immature Sharp-shinned hawk, but consensus was that streaking and large head and neck pointed to Cooper's

**Forest Park, Queens, New York, USA: April 14, 2005** At the Water Hole again, quite the spot this year. The male Prothonotary warbler remains, probably the same one as was seen on April 6, although two others have been sighted. Only one present today, but the views were much better than previous. It seems quite used to birdwatchers as it searched for insects no more than 10 feet away. Brilliant yellow. Also, present, was **SWAINSON'S WARBLER** (new species for US), for which most birdwatchers were present. Views were amazingly close, the bird sometimes no more than five feet away searching the underside of leaves for insects. Occasionally, remained stock still for two or three minutes. Flew, but was relocated on east side of waterhole, but it was never in the company of the Prothonotary warbler, as it preferred drier material away from water hole. Also, Downy woodpecker

**Mill Creek Marsh, Secaucus, New Jersey: April 13, 2005** Palm warbler; Red-winged blackbird; Eastern phoebe; Tree Swallow on this relatively recently restored area of marshland by the New Jersey Turnpike

**Central Park, New York City, New York, USA: April 16, 2005** Another male Prothonotary warbler turned up in the west side of the Lake, close to the Upper Lobe. Also, at the same spot a Blue-grey gnatcatcher. A little further around, in the Cave, was an Orange-crowned warbler. Up by the Loch was a White-eyed vireo

**South Florida, USA: April 17-20, 2005**

**On Dania Beach**—three **GULL-BILLED TERN** (new species for US), many Royal tern and Brown pelican; in the grounds of the Doral Resort, Spa & Golf Course in Doral, Miami, was a Loggerhead shrike

In late afternoon, at **Bill Baggs State Park, Cape Florida, Key Biscayne**—Black-throated blue warbler; Blackpoll warbler; Ovenbird; Prairie warbler. Many Red-bellied woodpecker, and several White ibis

**At Fort Zachery State Park in Key West**—on beach: Sanderling and Turnstone; in scrub land by fort and near car park: Black-and-white warbler; Prairie warbler; Grey catbird; Grey kingbird (new species for US); Indigo bunting. Two Osprey on nest platform in far corner, and in tatty bush cover **BOBOLINK** (new species for US; hard to pin down but eventually a great view; I believe a female was in male's company, but that was even harder to confirm). Also, Common yellowthroat

**On Little Sugarloaf Key**—in well-documented site, two **MANGROVE CUCKOO** (new species for US; good view of one, which then dropped down and out of sight. Other was a bird rushing through the mangrove as I was being bitten to death by mosquitoes)

**In Fairchild Botanical Garden, Coral Gables, Miami**—Red-shouldered hawk; Common moorhen; Anhinga; Green heron

**In Tree Tops State Park, Davie, near Fort Lauderdale**—Tricoloured heron; Green heron; **PURPLE GALLINULE** (new species for US; good sight but deep in reeds) and **SNIBE** (new species for US; deep in reeds but visible)

**Central Park, New York City, New York, USA: April 22-24, 2005** Overcast, seasonably cool weekend with some rain, heavy on Saturday night. Also, the wind was in the wrong direction for migration to this spot: Northern rough-winged swallow; Barn swallow; several Northern flicker, one Blue-grey gnatcatcher; Black-crowned night-heron; Palm warbler; lots of Yellow-rumped warbler, half a dozen or so Black-and-white warbler; Hermit thrush; Eastern towhee; Blue-headed vireo; White-throated sparrow, Eastern kingbird; still around in late April, Dark-eyed junco, Ruddy duck and Bufflehead Mill Creek Marsh, Secaucus, New Jersey: April 26, 2005 Warmer than weekend but still windy. Several Brown-headed cowbird; two Spotted sandpiper, and Savannah sparrow

**Central Park, New York City, New York, USA: May 1, 2005** Started at 8:30 a.m. with steady rain, which stopped at 8:50. Continued overcast and very cold for the time of year, so much so that the hands were a little numb at 11; following a cup of coffee, returned to birding and, soon after, to a sunny, beautiful day with temperatures in the mid-60s. Four Cedar waxwing along Reservoir. At Turtle Pond, Tree swallow; Barn swallow; Northern rough-winged swallow; Eastern towhee; Yellow warbler; while on path towards Belvedere Castle, Magnolia warbler; Northern flicker. In the Rambles, Chimney swift; Brown thrasher (very high); Wood thrush; several Veery; Grey catbird; Eastern towhee; Baltimore oriole; Hermit thrush, Song sparrow; Field sparrow; White-throated sparrow; Black-throated blue warbler; Black-Throated green warbler; Black-and-white warbler; Ovenbird; Northern waterthrush, as well as a second Yellow warbler by the Boathouse. Along lower lobe of the Lake, nesting Green heron; two Eastern screech owl. Palm warbler and Red-Bellied Woodpecker along Delacourt Oval, and five Ruddy duck, one male, four females, on Reservoir. On the Pool,

another Northern waterthrush, while along and above the Loch, Blue-grey gnatcatcher; American redstart; House wren; second Baltimore oriole, this one at head height, singing; right at the end of the day a wonderful male Rose-breasted grosbeak on the Great Hill. In total, 52 species

**Central Park, New York City, New York, USA: May 6-8, 2005** Dull weekend, with bad light. Went running on Saturday instead of birding, a good move as reports for this day were low. Friday was dull, too, but there was some brightening up by Sunday. On Friday, highlights were Solitary sandpiper and Black-throated blue warbler, while on Sunday at the Maintenance Field saw a male **BLUE-WINGED WARBLER** (new species for US) singing and displaying with excellent views and, my own discovery, a male Orchard oriole, very low down and out in the opening. Both the warbler and oriole often disappeared into the thick but re-emerged several times. Also present in the Ramble were Northern flicker, Black-and-white warbler, Wood thrush, and Green heron, hunting at the Azalea Pond, while at Tanner's Spring were Eastern towhee and Northern parula

**Central Park, New York City, New York, USA: May 10, 2005** A bright early evening in which I had no more than an hour to bird watch before a running class. In the Rambles, an American redstart; first Scarlet tanager of the year. Then a report came in of a species that was first seen in the Rambles at midday, which led to me running two miles in 15 minutes to see **KENTUCKY WARBLER** (new species for US) in the North Woods, off a path that led off right from the Loch. I think it was a male, but it did not show as much black marking to the head as perhaps a male might have but more than perhaps a female would do. The bird was jumping up continually on both sides of the path and gave great views

**Central Park, New York City, New York, USA: May 13, 2005** A dull evening (one of many this year), in which the only notables were Red-eyed vireo, male and female Black-throated blue warbler, Cedar waxwing, Ovenbird, Black-throated green warbler, Magnolia warbler and Spotted sandpiper in the Turtle Pond

**Forest Park, Queens, New York, USA: May 14, 2005** Arrived at 11:30 a.m. following the Queens half-marathon (1:29:12; 6:47 pace), but the day was productive. The waterhole in the park is a great deal smaller than when I came here in late March and mid-April, but an artificial bathing pool brought in many species, including Indigo bunting; Nashville warbler; Blackburnian warbler. Also around were Northern Parula; Lincoln's sparrow; female Downy woodpecker, American redstart, Scarlet tanager and first-year **SUMMER TANAGER** (new species for US). Additional species included Northern waterthrush; Blackpoll warbler, and Chestnut-sided warbler

**Central Park, New York City, New York, USA: May 15, 2005** Just an hour in the North Woods, but I did see my first Canada warbler of the year, as well as Black-throated green warbler; Magnolia warbler; Least flycatcher; Red-eyed vireo; female Scarlet tanager. That it was a thrasher was not of concern, and then this morning I saw that one of Baja's endemics was this species, which goes no farther north, hence no inclusion in Sibley); Belted kingfisher (this was odd. Again, there was no mistaking what this was. One online guide said that a few do summer in its winter range, where they can find water, which might mean that the two aforementioned ponds were permanent); Greater yellowlegs (Sibley has very few waders present in summer, but this and the following I definitely ID'ed); Pectoral sandpiper; Wilson's plover (the only plover present in Baja in summer); Killdeer (several); Brown pelican (hundreds, even though Sibley suggests none should be in Baja in August); Osprey; Mexican mallard (subspecies; they look like Mallard, but with no striking drakes; California quail (a family close to the hotel. The head is black, but there is some mottling of black and brown on the nape that sometimes looks green. Two white wing bars are evident. It now has bugs to fit on but flew to yards from me as it tapped at sap scratchings that it had made in a small viburnum bush. Also, Eastern phoebe, a definite harbinger of Spring

Also seen were Kingfisher; Peregrine falcon, and Common redshank

**Staines Reservoir, Surrey; 26 January, 2018 SHORE LARK** (new species for U.K.) seen on the banks of the south reservoir. This bird has been seen at the reservoir on and off for

several months and is in fact the American sub-species American horned lark, so if one day the birding eggheads decide to separate all or some of the many subspecies of “Horned lark,” notably in this case *Eremophila alpestris* or *Eremophila alpestris hoyti* (the Staines bird is likely to be one of those two sub-species) I will just have to see a British shore lark and get to add an armchair tick of the bird I saw today

It has been reported for most of April, but in the last few days appearing only in the hour before dusk. I missed its first flight as I walking along the River Waveney so as to feel a little warmer, but it reappeared for three flights, during which I could identify it properly and for a view of 30 seconds performed the classic next-stretched-up pose. Also, two Yellow wagtail, including one very bright male; 10 or so Avocet; Short-eared owl, and ever-present Marsh harrier

**Nazeling Mead, Broxbourne, Hertfordshire: April 29, 2018** Weather still unseasonably chilly, a couple of degrees cooler than the day before (American bittern not see today either, hunkered down to keep warm, no doubt. **RED-RUMPED SWALLOW** (new species for U.K.), two views of the bird). **Gravesend, Kent: September 29, 2018** (Startling discovery on 25 September and still there on the Saturday of the weekend, a Beluga whale, the southernmost sighting ever of this Arctic mammal. Perhaps along with a specimen seen in 1913, and some 3,100 kilometres south of its usual range. It has been swimming in the River Thames quite happily, and the authorities are happy to allow it to make its own mind as to where to go—at least for the moment.) Also seen, Black-tailed godwit; Dunlin and Common ringed plover

**Welney Wetland Centre, Welney, Norfolk: October 6, 2018** A pretty grim day weather-wise, although the heavier rain seen later on kept away. **WHOOPER SWAN** (new species for U.K.) seen, with probably 50 individuals newly arrived as I sat there. Also, Jack snipe bobbing up and down; Little owl; Linnet; Brant; Grey wagtail; Avocet; Kestrel; Sparrowhawk, and Marsh harrier. U.K.), which another birder heard and I located. The view lasted 10 seconds, but the mask and red to the top of the back were evident. Then I needed to run to catch the train up to London to go to work. The bird was seen on another four occasions, but always fleetingly, during the day. It was found on February 18.

**Wanstead Flats, Manor Park, London: April 1, 2019** Very happy bobbing around on the small, innocuous Jubilee Pond a male Garganey, providing the best views I have had of this duck. Other birders reported it as having been skittish in the morning, hassled by other birds and flying away on at least one occasion, but for me, arriving at midday, it was very calm. On walk across the heathland, also, Kestrel; Greenfinch singing, and Skylark displaying. The Garganey was present for only this one day

**Albufera, Mallorca, Balearic Islands, and other sites: April 6-7, 2019**

Today it was a **GREAT REED WARBLER** (new species for U.K.), which is the first for the London birding area. I saw it very soon after arriving, and heard its fairly loud croaking call. Somewhat a challenge to see and photograph as the view was from behind a metal fence with reeds in between me and the reeds in which it was flitting. Also, reed warbler, Sedge warbler, and two Whitethroat feeding young

**Dungeness, Kent, and other Kentish spots: May 26, 2019** Essentially a day out with my parents to show my Mum orchids, and we went to Park Gate Down and Yocklett's Bank. At the first we saw Monkey orchid; one or two Early purple orchid still in near enough good shape and Common twayblade. At the latter we saw Lady orchid, two Fly orchid and one, my first ever, Greater butterfly orchid, and in bloom, perhaps early for this species. A quick trip down to Littlestone, near Old Romney, failed to produce the Serin that has been reported most of the week, mostly because for the first time in that week the wind picked up. A quick visit to Dungeness to get a cup of coffee produced Common gull on nest box right by the visitor centre; Oystercatcher; Common tern; Pochard; Great crested grebe, and Little stint.

**London Wetland Centre, Barnes, London: May 27, 2019**

Quite quiet. Redshank; Ringed plover; Little ringed plover on eggs (a wire cage has been placed around the pair); two Common tern; Sand martin; Swift; Blackcap, and two Stock dove. (Disappointing in butterflies, too, with only a Red admiral, Brimstone and Large white seen.)

**Dungeness, Kent, and other Kentish spots: June 1, 2019**

I caught up with the **SERIN** (new species for U.K.) on a very much calmer day, the bird still in the conifer tree by a house and singing. In total, 51 species, including Lesser whitethroat; Whitethroat; Sedge warbler; Reed warbler; Cuckoo; Hobby; Whimbrel; Linnet, and one Mediterranean gull

**Rainham RSPB Reserve, Purfleet, Essex: June 2, 2019** Warm and still. Barn owl; Redshank (three perched on posts, two of them on consecutive perches); Curlew; Cetti's warbler; Cuckoo, and 3 x Avocet

**Lea Valley, Seventy Acres Lake/Fishers Green, Essex: June 2, 2019** drake Ring-necked duck. It took a while to find, hidden behind an island, after a search around the whole lake. Good views, and far better than the one other time I have seen it

**Ditchling Common Country Park, near Burgess Hill, East Sussex: June 22, 2019** Garden warbler, Chiffchaff; Lesser whitethroat and male Bullfinch. (Also, my reason for coming here, Black hairstreak, a new species for me and my 45th U.K. butterfly, in a recently discovered colony for this rare butterfly; also, Common blue, Ringlet; Red admiral; Meadow

brown, Speckled wood and Painted lady. It took a while to see the Black hairstreak, but one was quite docile at ground level, another paused for some while in the branches maybe two metres above head height)

**East Blean Woods, near Hoath, Kent: June 23, 2019** (And another rare species, my 46th U.K. butterfly, Heath fritillary. Quite easy to see once in the right black, the species seeming to be jittery in flight and more than happy to alight on bracken at about one metre above the ground. I might have seen 15 individuals in 30 minutes; also, Painted lady (quite numerous on my walk to the woods from Herne Bay), Red admiral and Ringlet)

**Hutchinson's Bank/Chapel Bank, New Addington, Surrey: July 6, 2019** (Butterflies along the chalk escarpments—one Small blue; Common blue; Ringlet; hundreds of Marbled white, and a dozen Dark-green fritillary)

**Fairmile Common, Cobham, Surrey: July 13, 2019** (Within the M25 London orbital road but on heathland with bell heather, my 47th U.K. butterfly species, both male and female Silver-studded blue; also, my first Gatekeeper of the year)

**Oare Marshes Nature Reserve, Oare, Faversham, Kent: July 14, 2019** My third-ever Lesser yellowlegs and second-ever Bonaparte's gull, very likely the same adult that has been wrongly migrating here for seven or eight years and also likely remains somewhere in the U.K. all year and comes to Oare to moult. In mid-July, though, it is in full summer plumage; also. Spotted redshank; Common redshank; Black-tailed godwit (500); one very early Golden plover; Bearded tit; Peregrine, and three male Ruff in close to summer plumage

**Headley Heath, Tadworth, Surrey: July 20, 2019** (Butterflies on heath and chalkside, including a new species, my 48th U.K. butterfly species, one single White-letter hairstreak, and on a white flower on a chalk hillside, not near elm or bramble; also, Brown argus; White admiral; Dark-green fritillary; Silver-washed fritillary; Large skipper; Small skipper; Gatekeeper; Painted lady, and Grayling on stony soil among the gorse. No luck with the Silver-spotted skipper, of which a few reports have come in.) Juvenile green woodpecker

**Rainham RSPB Reserve, Purfleet, Essex: July 28, 2019** Water dredged from some of the marsh area. Wood sandpiper; 3 x Ruff; Avocet; 200 x Black-tailed godwit; Lapwing; 10 x Little egret, and Curlew. (Grey seal basking on the river shore)

**Oare, Uplees and Conyer marshes, Faversham, Kent: August 5, 2019** More of a wonderful walk with Francesca, my wife, than a birding excursion, but the Bonaparte's gull remains, although now heavily moulted. Also, Curlew; Whimbrel; 10 x Common sandpiper; 5 x Oystercatcher; Marsh harrier, and 3 x Kestrel, but not much on the East Flood due to maintenance. (Also, Clouded yellow butterfly and several Painted lady)

**Hutchinson's Bank, New Addington, Croydon; 25 August, 2019** A visit to see if I could spot a Glanville fritillary butterfly (I did not), which for the first time in this introduction site reputedly started by person or persons unknown in 2011 had a second brood, albeit probably lesser in number than the first brood in April/May. But as I and another birder-turned-summer-butterfly-watcher searched a steep-sided paddock I spotted a **GOSHAWK** (new species for U.K.) that floated over the tree line scattering pigeons. A juvenile, it showed large broad wings, pear-drop shape splotches running from neck to belly, pale belly and correct banding on the tail. It was also large, with all the ID marks together ruling out Common

buzzard and/or female Sparrowhawk. (Also, Chalkhill blue, Brown argus; Small copper; Dark-green fritillary, and Silver-washed fritillary butterflies; and a Common shrew, a species I do not remember seeing before.)

**Oare Marshes Nature Reserve, Oare, Faversham, Kent: August 31, 2019** A Peregrine spent much of the day pestering the pigeons and waders. Also, a Kestrel; 2 x Curlew sandpiper, with one adult retaining some summer plumage; Knot; Golden plover; Grey plover; a juvenile Wood sandpiper; 300 x Black-tailed godwit; Water rail; 30 x Dunlin, also some retaining summer plumage, and the Bonaparte's gull remains, although I was lucky to pick it out in its autumn plumage as I was searching for Curlew sandpiper

**Titchfield Haven, Stubbington, Hampshire: September 21, 2019** **BLUETHROAT** (new species for U.K.), seen from the Meon Hide, with two good views of a minute or so each out in the open, and some more half-hidden views within the reeds. Also, Turnstone by the harbour

**Somerset (West Hay; Chew Valley Lake): Oct. 5-6, 2019** Little egret, Great egret and Cattle egret all in the same telescope view. All told, 13 x Great egret; 6 x Little egret, and 3 x Cattle egret, two of which showed yellow blush to head. Also, 2 x Yellow-legged gull; Pintail; Little grebe, and numerous Gadwall

**Mai Po Reserve and Tai Po Kau, New Territories; Pokfulam, Hong Kong Island, Hong Kong: 20-21 October, 2019**

Spoonbill; Eastern spot-billed duck; Gadwall; Little egret; Great egret; Greenshank; Black-winged stilt; Azure-winged magpie; White-throated kingfisher; Collared crow; Little grebe; Great-crested grebe; Kingfisher; Plain prinia; Common sandpiper; Green sandpiper; Chinese pond-heron; Grey heron; Purple heron; Greater coucal; White-breasted waterhen; Rufous-capped babbler; Great cormorant; Marsh harrier (female); Black kite; Eastern spotted dove; Long-tailed shrike; Oriental reed warbler; Black-collared starling; Daurian redstart (female); Oriental magpie robin; Pied kingfisher; Grey treepie; Black-throated laughingthrush; Chestnut bulbul

**Mai Chau, Pu Luong and Van Long, Vietnam: 30 October-8 November, 2019**

(Birding not impressive, with the sense that conservation is not a priority and the cognisance of birds being things to sing from cages)

Blue rock thrush; Eyebrowed thrush; Red-vented bulbul; Black-whiskered bulbul; Black-crested bulbul; Little egret; White-throated kingfisher; Kingfisher; Siberian stonechat; Grey-backed shrike; Yellow-billed blue magpie; Japanese white-eye; White wagtail; Grey wagtail; Little grebe; Grey-headed swamphen; Crow-billed drongo; Asian palm swift; White-browed crane; Cinnamon bittern; Bronze-winged jacana; Chinese pond heron; Short-billed minivet; Black-naped oriole; Asian brown flycatcher; Collared treepie; Little pied flycatcher; Oriental magpie robin; White-capped water redstart; Common myna; Green-backed tit; Crested finchbill; Golden parrotbill; White-headed munia; Black-throated laughingthrush; Dark-necked tailorbird

**Oare Marshes, Faversham, Kent: 17 November, 2019**

Gadwall; Little egret; Great-crested grebe; Kingfisher; Grey heron; Marsh harrier; Black-tailed godwit; Redshank (100+); Dunlin (1,000+); Avocet (50+); Pintail (three drakes, one

duck); Shoveler; Snipe; 6 x Bearded tit (but all juveniles); 2 x Curlew, and 2 x Bewick's swan

**London Wetland Centre, Barnes, London: December 7, 2019**

Birds mostly difficult to see. Jack snipe; Snipe; Goldeneye (female); Caspian gull (my second ever); Bittern, and Pintail (three drake, one duck)

**Whipsnade Zoo, Whipsnade, Bedfordshire: December 14, 2019**

First visit to this zoo (I did not see much of it) for a **BLACK-THROATED THRUSH** (new species for U.K. and my 275th) amid a flock of Redwing. Great views of it flying across open space pretty much as soon as the gates opened at 10, but fresh wind following heavy rain saw all birds staying a little distant. Good views later, on berry bushes. Also, Red kite

**Slimbridge, Gloucestershire: December 16, 2019** 2 x Water rail, right in front of the Willow Hide, and the best views I have had of this species, and two of them; 24 x Bewick's swan; 10 x Pintail; numerous Ruff; Redshank; Dunlin; Black-tailed godwit, and Lapwing; Rook; Stonechat; Greylag goose; two Eurasian crane flyovers (but, again, there is a reintroduction scheme here)

**Portland (various sites), Dorset: December 17, 2019** Very productive day, with 2 or 3 Great northern diver; 2 to 3 Black-throated diver; 20 x Great crested grebe; 2 x Little grebe; 6 to 8 Black-necked grebe; **VELVET SCOTER** (a new species for U.K.; female, and one I found by scanning large geese flocks); 200+ Brent goose, both dark- and light-bellied forms); 4 x Eider; 30 Red-breasted merganser; 2 x Razorbill; 3 x Common guillemot; Black guillemot; Gannet; 30 x Mediterranean gull; 5 x Cormorant, and 30 x Shag. (A Bottlenose dolphin—we had a grandstand view of a harbour-patrol boat's staff untangling a dolphin from fishing netting, after which the dolphin seemed to raise a tail out of the water as a thank-you gesture, spin around the small boat a couple of times and then swim towards the harbour mouth)

**Rainham RSPB Reserve, Purfleet, Essex: December 20, 2019** Sparrowhawk (female); Barn owl; 7 x Snipe; Curlew; 2 x Avocet; Dunlin; Skylark, and Blackcap (female); the water levels were very high following a great deal of rain over the last couple of weeks

**Walthamstow Wetlands Reserve, London; 26 January, 2020** Firecrest, maybe two, as I saw one twice amid a flock of 12 or so Long-tailed titmice; also on the reservoir, female Goldeneye and two Peregrine falcons bathing and then flying to a nearby pylon

**Valentines Park, Gants Hill, London; 26 January, 2020** Amazingly, someone on a RSPB walk in a place I suspect is not birded often, a Turtle dove, a species seen here in the summer overwintering and likely remaining from last summer. Amid a flock of 20 or so Collared dove. It is my first Turtle dove for probably 30 years; when I was a teenager, I would see 50 on any summer's day, but that is a thing of the past

**Perrymead Lake, East Horsely, Surrey; 22 February, 2020** One drake Goosander and two drake Mandarin duck, on a pond that was filled fairly high with flood water

**Frensham Common, Frensham, Surrey: 22 February, 2020** Great grey shrike, the best view I have ever had, and only my second example. Excellent views of a bird constantly making a circle around one part of the common. Also, Treecreeper

**Poulter Park, Mitcham, Surrey: March 1, 2020** 2 x Siberian chiffchaff (sub-species) in pretty much the same spot I saw one, my first, three years ago in January 2017 on the River Wandle. Also, my second-ever Yellow-browed warbler, always moving and largely hidden, but seemingly chasing Chiffchaff and other species from one bushy trees. Grey wagtail, male Blackcap

**Sydenham Woods, London: March 29, 2020** The world is in the grip of COVID-19 coronavirus, and everyone is remaining at home, only going out close to their home once a day for exercise, shopping or emergencies, and the death toll—mainly the old and those with existing health conditions—is numbering in 10s of 1,000s around the world. Any birding is local, that is very local. I did see 2 x Stock dove, drinking in a pond, and 6 or 7 x Redwing, which is pretty late in the season for this species. Also, a Wren singing like crazy

**From the window of my home, Sydenham, London: March 31, 2020** Marsh harrier floating over the houses. I wonder if the very noticeable absence of people on the streets, cars on the road and noise in the air might be beneficial to nature, certainly as now we are in the breeding season?

**Hutchinson's Bank, New Addington, Surrey: May 2, 2020** (I saw the first sighting anywhere in the U.K. of a new species for me (my 49th for the U.K.), Glanville fritillary after several years of trying to find one on this site, which is not recognised by Butterfly Conservation, despite the population being self-sustaining. I saw two examples, one showing the underwings, one showing the outer-wings, and also six or so caterpillars of the species. Also, Dingy skipper)

... also, Glanville fritillary on 20 May and 7 June

**South Benfleet, Essex: June 13, 2020**

The COVID-19 lockdown has eased slightly. **MARSH WARBLER** (a new species for U.K.), difficult to see, but on the two occasions I got a good view, sufficient to ID this species, its long primaries being the main feature. Also, Common tern; Little egret; Goldfinch. (Also, first Small skipper and Marbled white butterflies of the year)

**Sandwich Estate, Kent: June 22, 2020**

Skylark; Linnet; Reed bunting; Spotted flycatcher; Common ringed plover; Stonechat; Whitethroat. (Also, my first Lizard orchid)

**Dungeness, Kent: June 26, 2020**

After some searching after an almost immediate flyover, a **GULL-BILLED TERN** (a new species for U.K.) that was flying and fishing actively but always fairly distantly over the site's ARC Pit. Also, my third U.K. Black-winged stilt and on Dungeness beach a Black redstart

**Oare Marshes Nature Reserve, Oare, Faversham, Kent: July 11, 2020** Bonaparte's gull again, the rare American gull that comes from somewhere to moult every year here; also, Spotted redshank; Common redshank (30); Skylark; Linnet; Yellow wagtail; Black-tailed godwit (30); Curlew (four), and an escaped falcon mix with two tags.

**Oare Marshes Nature Reserve, Oare, Faversham, Kent: July 18, 2020** Lesser yellowlegs, almost exactly a year after one came last year; also, two Yellow wagtail; Little gull; a very close Curlew; one Knot; Dunlin; Avocet; Skylark; 30 Redshank

**Hutchinson's Bank, New Addington, Surrey: July 19 and 20, 2020** On first day, overcast, juvenile Goldfinch and adult and juvenile Green woodpecker; on second day, 2 x Marsh titmouse (I saw one here last year). (Also, several Marbled white; second-brood individuals of Common blue and Small blue; Gatekeeper; Ringlet; Meadow brown, and one Dark-green fritillary)

**Cuckmere Haven, Sussex: July 26, 2020** Greta views of an adult male Little stint and a juvenile Wood sandpiper. Also, Little ringed plover; Rock pipit; Dunlin; Shelduck; Linnet; Skylark; Buzzard; Kestrel; Peregrine, and Oystercatcher

**Dungeness, Kent, England: 1 August, 2020:** Great white egret; 100 x Gadwall; 20 x Pochard; Ruff; 10 x Gannet; Common tern; Yellow wagtail; Meadow pipit; Stonechat; Whitethroat; female Wheatear and two young; Oystercatcher; Little egret, and juvenile Mediterranean gull

**Headley Heath, Tadworth, Surrey: August 9, 2020** First-ever sighting of a Silver-spotted skipper, my 50th U.K. butterfly species

**Beckenham Place Park, Beckenham, Kent: 11 August, 2020:** Word has got out that there are now fledged 2 x juvenile Hobby, perched on tree branches, of a rare example of this species nesting in a London park. Juveniles were not very confident yet of flying; another juvenile was flying, though, as were two adults that kept pretty much out of the picture save for a hawking expedition or three

**Shapwick March, Somerset: September 4, 2020:** Osprey; Marsh harrier; Hobby; Little egret, and Great egret. Also in Somerset, Raven

**Nuthurst, Sussex: September 5-11, 2020** Spotted flycatcher; Marsh titmouse; Wren; Great spotted woodpecker; Coal tit. Also, elsewhere in Sussex, Wheatear; Marsh harrier; Common sandpiper, and Red kite

**Ditchling Beacon, Sussex: September 5-6, 2020** On arrival to Sussex from Somerset, set off to see a **DOTTEREL** (a new species for U.K.). I had no luck on the Saturday evening, when three were present, but I did see Wheatear and Grey partridge, but I saw one, and one only, on the Monday morning

**East Head, Sussex: September 10, 2020** Bar-tailed godwit; Curlew; Whimbrel; 200 x Oystercatcher; Dunlin; Redshank, and Greenshank

**Pagham Harbour RSPB Reserve, Sussex: September 5-6, 2020** 40 x Cattle egret, certainly the most I have ever seen and possibly the most anywhere collectively in the U.K. (the reserve in 2020 recorded the first breeding success for the country); Whinchat; Stonechat; male and female Redstart; one Spoonbill; Spotted redshank; Redshank; Snipe; Yellow wagtail; Curlew; Black-tailed godwit; Great black-backed gull, and Kingfisher

**Whitehawk, Brighton, Sussex: September 19, 2020** Following a 25-mile run from Hassocks to and along the South Downs Way to Southease and back across a separate section of the Downs to Telscombe and above Rottingdean, my first-ever sighting of a Long-tailed blue, my 51st U.K. butterfly species. Also, butterfly species Clouded yellow and Wall

**Sandwich Estate, Kent: September 20, 2020**

Juvenile Skylark; Wheatear; Stonechat; Common buzzard; Kestrel; Linnet

**Shuart Marshes, Kent: October 18, 2020** Quick trip down the Thames past Faversham to see a **MASKED SHRIKE** (a new species for the U.K.), the fourth ever to come to the United Kingdom and the first for Kent. Also, Goldcrest; Swallow; House martin, and Kingfisher. (The shrike disappeared sometime in the night of 18-19 October)

**Chew Valley Lake, Somerset: October 28, 2020** Tried to find the Lesser scaup that has been seen distantly from the Moreton hide but with no success. Great egret and Grey heron both catching perch; also, Little egret; Little grebe; Lesser yellowlegs (my fifth in the U.K.); Goosander, and Goldeneye

**Somerset Levels, Somerset: October 29, 2020** 143 Cattle egret (hardly a rarity any more, especially in this area) in three groups. Also, my third Glossy ibis; Great egret; Little egret; Fieldfare; Redwing; one male Bearded titmouse, and 2 x eclipse Wigeon

**Willsbridge Mill, Avon: October 30, 2020** Grey wagtail

**Bewbush Brook, Crawley, Sussex: October 31, 2020** On the way home from Somerset a stop-off to see **DUSKY WARBLER** (a new species for the U.K.). I enjoyed a couple of somewhat brief looks as it, firstly, came in ahead of a group of Long-tailed titmouse, which could have been a coincidence, and then, secondly, for a little more time to better see its brown-russet back, eye-stripe and large Wren-like stature. (Also found out today that the Bottlenose dolphin, seen almost a year ago on December 17, 2019, in Weymouth Harbour being freed from netting, died. It was the only dolphin to live almost exclusively in and around the harbour and unfortunately had a collision with a boat.)

**Worth Marshes and Kingsdown, Kent: November 21, 2020**

Failed to see the Eastern yellow wagtail, which has been seen that day, but I did see two, maybe three, of the five reported **LAPLAND BUNTING** (a new species for the U.K.) as I left the area they had last been seen in and walked along footpaths to the right of the village of Worth. Also, three Jack snipe and several Stonechat.

As I was leaving to go home, news came in of a real find at Kingsdown, a 15-minute drive away, and I got to see **CRAG MARTIN** (a new species for the U.K.) with about 10 minutes left of good light. Great views as it started to roost against the white cliff side. It was seen briefly the next day as it flew south, but it returned on Monday, 23 November, too. It had been found, so I was told, by a “non-birder” who thought what he thought was a Sand martin did not quite look right, so he called a birding friend who came down to see it, confirmed its identity and spread the word. That does not sound like a “non-birder” to me

**Rainham RSPB Reserve, Purfleet, Essex: November 26, 2020** 5 x Pintail; one Water pipit that I found and managed to show several other people, for most of whom it constituted a new species, so that was satisfying, as it is usually someone else who shows me a bird, or I hear of one being seen somewhere. Several Marsh harrier, Buzzard sitting on a post and two

Redshank on the River Thames. Wigeon back in high number. I bumped into an old friend, Joel Williams and his daughter

**Sonning, Oxfordshire: November 29, 2020** My first Redwing of the winter

**Thursley Common, Surrey: December 4, 2020** Arrived at first light to try and find two species that have been seen the previous six days but not the day before I went, which was a day of horrendous rain. I found the **RUSTIC BUNTING** (new species for U.K.) and Little bunting, which comprised only my second sighting, and definitely the best. Both birds were elusive, often hiding in the grass among scrub and gorse, and several Reed bunting confused the identification. The light was best before 9:30 a.m., which was when I took my only photographs. The rest of the time did not produce good sightings, maybe because there was later on a dozen people there looking for the birds. Also, Red kite; one Dartford warbler; 2 x Fieldfare; Coal tit, and Goldcrest

**Swale Estuary and Capel Fleet, Isle of Sheppey, Kent: December 7, 2020** A very murky, foggy day, a heavy mist that did not lift. Beautifully atmospheric, and I met one other birder all day. Along the Swale I saw Curlew, also calling; Redshank and 100 x White-fronted goose in two groups. At Capel Fleet a scan in the gloom revealed a Barn owl, at 2:15 p.m., and, my first for decades, Hen harrier, a female. All photos were certainly not show-stoppers. Also, Turnstone, Redshank, and Oystercatcher on the shore at Leysdown-on-Sea, by the Shellness Estate

**Letcombe Regis, Oxfordshire: December 11, 2020** GREAT BUSTARD (new species for U.K.), but one I will regard as an escapee unless told otherwise—even though the population is self-sustaining, all birds do come from a reintroduction programme on Salisbury Plain. A magnificent bird, the heaviest flying bird on the planet. Also, a Fieldfare sitting on a fence, and a male Pheasant who might have walked across the field in which the bustard was if the bustard was not five times as large

**Stearth Marshes, Cheddar Reservoir and Barrow Gurney Reservoir, Somerset: December 12, 2020** A sunny day among several of gloom, and an **EASTERN YELLOW WAGTAIL** (new species for the U.K.), a relatively recent split from the Yellow wagtail, at Stearth. After not seeing one on November 21, 2020, it was good to catch up with one here, but it was hard work to find. It also is notable in that it is the first “lifer” Alex Carlisle and I have seen together for more than 30 years, his U.K. list being far larger and mine and I having lived in the USA for 20 years. Some birders had arrived at dawn, 7:30, and it was seen only once all day, at 2 p.m. We did hear it a couple of hours before we saw it, and it was lucky we managed to see it at all. We had turned the car around while eating lunch to view a compost heap that the bird occasionally favoured, and it was only because we were now facing the marsh wall that we saw some birders show signs of anxiousness. We were out of the car in a flash and run up and along the wall to where we had been earlier to view the birds for perhaps no more than 40 seconds before it flew up, around in a circle above our heads and disappeared. Other birders scattered along the wall would have missed it for sure. Also, good views of Hen harrier low over the marshes and a Merlin that shot though and took out a Redshank. We also saw Nature Watch’s Iolo Williams and Mya-Rose Craig filming for an upcoming series, possibly the Penduline tit that would only be able to be seen well with a very high-powered TV camera.

Last stop was Cheddar Reservoir for a **RED-CRESTED POCHARD** (new species for the U.K.), a species that is not reported but does not have huge numbers in the U.K. outside of one park in the Cotswolds, a species that I simply had not got around to seeing before. Our first stop of the day was Barrow Gurney Reservoir for a very confident Great northern diver, definitely my best views, and my first U.K. male Long-tailed duck, a super thing, as is the diver. Also, a Common sandpiper

**Cooling Marshes and Salt Fleet, Cooling, Kent: December 20, 2020** A long, muddy walk from Cooling Castle across the marshes to Salt Fleet, the scene of a hurried swim across Egypt Bay creek 35 years ago or so with Alex Carlisle and Clive Gilby. This time around I did not walk around the Thames shore path so far but saw a **RICHARD'S PIPIT** (new species for the U.K.) that flew out of cover and landed 50 or so metres from me. Evident supercilium that went over the eye to the bill, long legs and upright stance. It was skittish. Also, two Peregrine falcon; Marsh harrier; Kestrel; 200 x Shelduck; 50 x Skylark, a flock of Redwing and Fieldfare. Also saw two dead foxes laid neatly side by side off Rye Street in Cooling, which I reported, although I have no idea if a crime was perpetrated

**Reculver and Oare Marshes Nature Reserve, Faversham, Kent: January 3, 2021** At Reculver, 3 x Snow bunting, my best views of this wonderful species, although flitty and sometimes difficult to see amid the shingle. Also, Sanderling; Curlew; Redshank; Oystercatcher; 40 x Corn bunting; 20 x Reed bunting; 50 x Meadow pipit; Stonechat; 100 x Brent goose; Common buzzard  
At Oare, 4 x Bearded tit (I had expected stronger winds today, but no), including two males, one of which was confident for at least one close-up photo; 20 x Pintail; Gadwall; Teal; Kingfisher hovering over Oare Creek; one Turnstone; 3 x Curlew; 100 x Avocet; several Shelduck; Dunlin; 3 x Grey plover. In addition, a Slow-worm (I reported this to the relevant herpetology website), which I thought initially was dead and which when I realised it was not moved gently with gloves off the sea-wall path and into an area of denser vegetation, and a Common seal in Oare Creek

**Rivers Pool and Ravensbourne, London; February 27, 2021** So very little birding as we mope around in the midst of a 3.5-month lockdown to at least 12 April, but two Grey wagtail; Kingfisher zipping up and down; Sparrowhawk, and Goldcrest

**Crossness Nature Reserve, Belvedere, Kent: March 12, 2021** 2 x Fieldfare; 3 x Grey wagtail; Teal; Pochard; Wigeon; Shelduck; Gadwall; 5 x Redshank, and 3 x Barnacle goose (I heard of a birder who has 195 species for this site but not a Barnacle goose, well, until March 13, 2021. The resident southern population of this goose I believe is to get or has got recognition as a self-sustaining population, but I have seen many of the Solway Firth between England and Scotland so definitely know I have an accepted example

**Peckham Rye Park, London; March 14,15, 16 and 17, 2021** Four visits on four consecutive days to see a Little owl roosting in a pine tree just outside the perimeter of Sexby Gardens. The best views I have had of this species; also, on 14 March, a Great-spotted woodpecker

**Crossness Nature Reserve, Belvedere, Kent: March 20, 2021** Great view of a Cetti's warbler flying over reeds. Also, Curlew; 4 x Black-tailed godwit; 3 x Oystercatcher, and a Peregrine falcon

**Crossness Nature Reserve, Belvedere, Kent: March 27, 2021** 2 x Peregrine falcon; one male and one female Wheatear (first for the year); several Chiffchaff; 2 x Stock dove, and Oystercatcher

**Hutchinson's Bank, New Addington, Surrey: March 28, 2021** Two Red kites and 2 x Skylark on Farleigh Golf Course

**Moors Nature Reserve, Redhill, Surrey: April 1, 2021** Female Ring-necked duck quite close to the bank that gave excellent views. This is only third I have seen, and the first female. Also, Coal tit; Little grebe, and nesting Great crested grebe

**Staines Moors and Staines Reservoir, Staines, Surrey: 1 April, 2021** My first visit to Staines Moors to try and see (I did not) reported Ring ouzel, but Linnet; 50 x Skylark; male Wheatear; Green woodpecker; Blackcap; Chiffchaff, and first Swallow of the year, while on the reservoir was a Little ringed plover and 50 x Pied wagtail

**Barcombe Cross, Sussex: April 10, 2021** An early drive down to see **WHITE-THROATED SPARROW** (new species for the U.K.) that had been reported in the previous two days and could well be the same individual as was seen (and suppressed) in Kent in January. After a hour of searching it gave great views at approximately 8 a.m. on a chilly morning. On the way home stopped off at Weir Wood Reservoir and saw Nuthatch and year's first Whitethroat

**Crossness Nature Reserve, Belvedere, Kent: April 16, 2021** My first walk to the Southern Marsh area of this reserve, where I found a female Ring ouzel and watched it for 45 minutes, with it being in the company of four Song thrush

**Shrewsbury Park, Shooters Hill, Kent: April 20, 2021** Tawny owl. I had been told of it and its location, and it was quite easily found, although there was no sign of its chicks, which have been seen

**Samphire Hoe and Dungeness, Kent: April 23, 2021** At Samphire Hoe, Black redstart; Meadow pipit; Stonechat; numerous Linnet; 3 x Raven; also, my first-ever Early spider orchid, the main reason for my visit. After searching for two hours, I found one flowering example with one flower, as well as several orchids not yet in bloom  
At Dungeness, at sea, Gannet; Common tern, and 16 Whimbrel; on a low, flat roof of the nuclear power station, Iceland gull; and in the RSPB reserve, on the feeder, 2 x Brambling, one male, and Greenfinch, and out in the field 32 x Curlew, which was a very nice sight, as well as Sedge warbler

**Nettlebed, Oxfordshire: April 24, 2021** On a walk with friends, an albino Pheasant being looked at carefully by a Red kite, of which I saw many, this being the epicentre of the English reintroduction of this species some 20 years ago or so. Having my first pint in a pub (outdoors being the only seating allowed at the moment) I saw that the town-sign mural of the village featured a Red kite

**Hartslock, Oxfordshire, and Hambleton, Buckinghamshire: May 16, 2021** An orchid trip, essentially, but at Hartslock a Cuckoo calling and breaking cover, but also a few Lady orchid, a handful of Monkey orchid and numerous examples of Lady-Monkey orchid, the only place in the U.K. where these exist

In the Hambledon area, Military orchid (the first time I have seen them) in one of only three places in the U.K. they exist, and three Early purple orchid. The Military orchid were still in closed spikes, but I found one “soldier” who was out of barracks, so to speak. Also, maybe 40 Red kite, one Common buzzard and three or four Orange tip butterflies

**Cumbria and County Durham: May 29-June 1, 2021** A short holiday. Also, 3 x Broad-leaved helleborine, but a few weeks from flowering. Nightingale heard and Mistle thrush seen

**Nuthurst, Sussex, and other spots in Sussex: June 26-July 17, 2021** In the garden of the cottage we stayed in, Yellowhammer; Song thrush; Greater-spotted woodpecker; Red kite; Buzzard; Coal tit; Nuthatch

At Knepp, White stork (a new species for me in the U.K., but these are introduced birds); male Bullfinch (to go with the female Bullfinch I saw at Warnham Nature Reserve, Horsham) At Amberley Brooks, distant but credible view of a juvenile White-tailed eagle, also one from a reintroduction project, in its case on the Isle of Wight (local birders on line suggest it is searching for a breeding ground of its own); I had almost given up searching for it when I saw what seemed to me to be an unusual lump on a tree (Other wildlife sightings dominated by orchids: At Heyshott, my first-ever Musk orchid (12 spikes), after a long search and amazement at how tiny they are); also Chalk fragrant orchid; Common twayblade, and Bee orchid, and nearby hundreds and hundreds of Pyramidal orchid. At Firl Beacon, my first sighting of Frog orchid (nine spikes)

**Rainham RSPB Reserve, Purfleet, Essex: August 15, 2021** All three species of egret, Cattle, Great and Little. Also, Marsh harrier; Yellow-legged gull, and Curlew. (Later on, went to near Vigo, Kent, and found my first Violet helleborine)

**Normandy Marsh, Lyminster, England: October 10, 2021 WESTERN SANDPIPER** (new species for U.K.), I believe the 13th for the U.K., and Little stint. The sandpiper smaller than surrounding Dunlin and possessed a characteristic bobbing movement as it moved and searched for food

**Dulwich, London, England: October 17, 2021** On a walk with Francesca, a Little owl and, later, a Peregrine falcon

**Rainham RSPB Reserve, Purfleet, Essex: October 24, 2021** A couple of decent but fleeting views of Dartford warbler, but the first time I have seen this species within view of Dartford itself, the town in which I was born. Also, 4 x Cattle egret

**Thamesmead, Erith, Crayford, Kent: November 19, 2021**  
Searching with Alex and Mike for Caspian gull, with a few examples we thought were our quarry, but turned out not to be. Yellow-legged gull, though.

**Oare Marshes, Faversham, and Cliffe, Kent: November 28, 2021** Hoping for a day of strong northerly or easterly winds, with alcids and tubenoses, but it was a gorgeous if chilly day, with the winds not moving the way I wanted. At Cliffe, Black-throated diver; Kingfisher, and Red-breasted merganser

**Blacktoft Sands RSPB, Goole, Yorkshire: December 16, 2021** Visit to see the long-staying **WHITE-TAILED LAPWING** (new species for U.K.), which, although I assumed it was still there, I found for myself, waiting for five minutes before it popped out from behind a small muddy islet. Also, quite a number of Snipe

**Carr Vale Nature Reserve, Chesterfield, Derbyshire: December 16, 2021** Stopped off on the way home to see **AMERICAN WIGEON** (new species for U.K.), among numerous (Eurasian) wigeon and Teal; also, much to my surprise, **WILLOW TIT** (new species for U.K.), which I called out (the other birders there were looking at right angles to the flat-tray bird feeder at the American wigeon) as Marsh tit, but was delightfully corrected. I saw one on another occasion, too. Also, 3 x Pink-footed goose and 2 x Pintail, both species flying overhead

**Pulborough Brooks RSPB, Pulborough, Sussex: December 19-31, 2021** A few birding visits among two weeks near Horsham for Christmas. For dearest little White, one of our cats, I dedicate a wonderful sighting of a Lesser-spotted woodpecker on two visits; also, Goshawk; Marsh harrier; White-fronted goose; Bullfinch  
At Warnham Nature Reserve, Horsham, a Bullfinch and five titmouse species—Blue, Coal, Great, Long-tailed and Marsh

**Western Parade, Eastbourne, Sussex: January 16, 2022**

**HUME'S LEAF-WARBLER** (new species for U.K.). Seen within a minute. I heard it zip over, and had good views of a flitty bird. Two birders standing next to me said they had waited 45 minutes before they saw it the same moment

**Isles of Grain and Sheppey, Kent: January 22, 2022**

At Yantlet Creek, Isle of Grain, no luck with a reported Glossy ibis but several Sanderling and Turnstone, while at Leysdown on the Isle of Sheppey, probably 100 Brambling, while on the beach by Little Groves Leisure Park, seven Shore lark. This is the first time I have seen the European *Eremophila alpestris flava* Shore lark, but I did see an American horned lark in the U.K. at Staines Reservoir, Surrey on 26 January, 2018, which could be referred to as the principal Shore or Horned lark prototype. There are 42 subspecies globally.

At Capel Fleet, probably 200 Golden plover and 1,000 Brent. Also, a small flock of White-fronted goose and a Red kite

**Marsh Farm Country Park, South Woodham Ferrers, Essex: January 23, 2022**

My 300th U.K. species, **RED-BREASTED GOOSE** (new species for U.K.). I arrived at the site at approximately 9 a.m. just as another birder, Daniel Field, a Canadian ornithologist teaching and researching at Cambridge University, arrived, too, so we introduced ourselves and decided to find the goose together. It was not in the flock of Brent goose present, and we walked all the way around the country park to where Clementsgreen Creek meets the River Crouch, where we saw the Red-breasted goose fly in all on its own. We searched for it along the river bank, but then heard word that it was within the original flock. After that, we had great views, and it, and the flock, came somewhat close. Also, Grey plover; Golden plover; Dunlin; Rock pipit, and a "Black" brent, or Brant, subspecies (*Branta bernicla nigricans*)

**Oslo, Norway: January 24-27, 2022**

A work trip, and I did not leave Central Oslo, but the crow here is only the Hooded crow, and in the harbour was a pair of resplendent Goldeneye

**Eastbourne, Sussex: February 12, 2022**

**AMERICAN ROBIN** (new species for U.K.), seen not so far from the sighting of the Hume's leaf warbler less than a calendar month before. Glorious sunshine, and I arrived at 7 a.m. Seen immediately, and it flew and perched within 15 feet for fantastic views. (I am aware that I never gave a second glance of the 500,000 of this species I saw when I lived in the US, apart from enjoying its habit of walking fast forward three steps, coming to a halt, then repeating.) I went to see if I could see the Hume's leaf warbler again, but the surf was making a lot of noise, it was chilly and the wind blew, so I did not give it long. On the way home, right on the outskirts of Eastbourne at Polegate, there was a Hooded crow. A local said it had been there for three weeks, and I rather suspect the same is true of the American robin, even though it came to birders' attention only on February 8

**Priory Country Park, Bedford, Bedfordshire: February 26, 2022**

**GREEN-WINGED TEAL** (new species for U.K.). A gorgeous sunny day, mild for the time of year, and this new species that took some while to find. There were not so many teal, at least even half-visible, but a slow scan through lots of reeds finally revealed one with the tell-tale white bands going down through the breast. Also there, one Greater white-fronted goose; Marsh harrier; 3 x Snipe; 2 x Oystercatcher, and a flock of 40 feral Barnacle geese.

A stop off at RSPB Sandy, the organisation's HQ and a place I have never been to, showed Siskin; Coal tit; 3 x Red kite, 2 x Greenfinch, and a Nuthatch

**Crossness Nature Reserve, Belvedere, Kent: February 27, 2022**

Common sandpiper; 20 x Redshank; 20 x Black-tailed godwit; Wigeon; Pochard; Gadwall; 100s of Teal; Linnet; Peregrine

**Epping Forest, Essex: March 20, 2022**

On a walk with friends, a Firecrest in really good light

**Mayow Park, Sydenham, London: March 29, 2022**

Francesca took a photo of a “strange bird” she saw while out on a run, and it was the escaped Crested caracara from London Zoo, which has been roaming around south and southeast London (and last heard at Kemsing, Kent) for three weeks. A team came from the zoo to see if they could recapture it, but they failed, obviously. (It was finally recaptured.)

**Lower Pond Lane Ponds, Marlow, Buckinghamshire: April 3, 2022**

**BLUE-WINGED TEAL** (new species for U.K.). So, two American teal U.K. lifers for me in a row, this one being a female; also, a Red kite landed in a tree very close to me, and I got a couple of good photos before it saw me and dashed off

**Abberton Reservoir, Peldon, Essex: April 9, 2022**

**LESSER SCAUP** (new species for U.K.), which took some finding. There were only two flocks of tufted duck on the reservoir, a small flock of six and a large flock of maybe 200. It was not in the smaller flock, and in the larger flock it took a lot of searching, but finally I saw the grey back, upright head and small bobble to the back of the head. It was not windy today, but all the ducks were diving, and it was very easy to lose. Also, a pair of Goldeneye and my first Swallow of the year

**Mucking Marshes, East Tilbury, Essex: April 9, 2022**

My second-ever Temminck’s stint, which I believe is the same bird that has been seen in Cliffe, Kent, and was found by a friend of mine, Paul Dietrich. Really tidy individual, with the pale brown head and breast band showing nicely. Also, a Ringed plover and a Little ringed plover, my first for the year

**Ham Wall RSPB Reserve, Somerset: April 23, 2022**

A very unpromising day that turned into a very warm one, albeit with some gusts of strong breeze. The highlights were six Glossy ibis all in a group (five of which later took to the air, scared off by an overenthusiastic photographer) and five Garganey, including four males. Also, Great egret; Willow warbler; Blackcap, and a Bittern, although also we heard three or four booming, one very close but still unseen

**Grunwald, Berlin, Germany: May 2, 2022**

The first train stop—albeit a fairly long one from the Zoo area of Berlin—to a very large deciduous wood area dropping down to the Havelsee lake. Incredible birding so close to the city centre, with Hawfinch; Redstart; Nightingale; Wood warbler; Black woodpecker; Treecreeper; Nuthatch, and a pair of Crane on the small Platsee

**Richmond, London, to Oxford, 100-mile Centurion Running race: May 7-8, 2022**

I ran 100 miles—actually, 102 due to a bridge being closed by the Environmental Agency the evening before the race’s start—from London to Oxford along the Thames Path. Forty-two species recorded, including Green woodpecker, Marsh tit and four calling Cuckoo

### **Regents Park, London: May 14, 2022**

Heard numerous times before seen, an Iberian chiffchaff. The second time I have seen this species, but the first time I have heard and seen it singing repeatedly

### **Skokholm Island, Pembrokeshire, Wales: May 29, 2022**

Quite extraordinary how I got here. On a trip to celebrate Francesca's birthday, and a trip modelled on her pace and interests, we had a planned trip to Skomer Island, essentially to see Puffin, but due to northerly winds it is impossible or dangerous for boats to land there, even if the sea looks like a millpond. I was told it has everything to do the swell. For a few days I had seen that on the normally inaccessible island next to Skomer, Skokholm, there had been a **MOLTONI'S WARBLER** (new species for U.K.) present, so when I got an email saying the Skomer trip was cancelled, I called the number for the special birding boat organised, especially to see that species. Apparently, it is only the third time this century a boat has been organised to land at the bird reserve, which is always off limits (the other two boat trips were organised to see a Swainson's thrush and a Yellow-rumped warbler). Twenty-nine birders were met at the jetty and literally frogmarched to where the warbler had been seen. It was very elusive, but I saw it well twice, but never long enough to photograph. Also, spotted an **ICTERINE WARBLER** (new species for U.K.), among the few birders who were far enough along the trail to get back to the boat, so I got two new species, even though it, too, was very flitty. Also, Puffin; Razorbill, and Guillemot, my best views of these three birds I have ever had. Raven, too. It was a real privilege to come to this island. A memorable day. The Moltoni's warbler is, I believe, the 12<sup>th</sup> record for the U.K., and all of them have been in fringe, usually very isolated destinations, with the exception of two at Blakeney Point, Norfolk. It also is the first for Wales. The Icterine warbler was the 30<sup>th</sup> for Skokholm but the first since September 2014, just the third this century and the second to be seen in May

(Moltoni's warbler twitch, Skokholm Island, Wales; May 30, 2022)

(I am the last in line up the hill from the jetty, Skokholm Island, Wales)

### **Worth Marshes and Stodmarsh, Kent: June 2, 2022**

Capping off what has been a very remarkable week of bird an **ELEONORA'S FALCON** (new species for U.K.), the first-ever twitchable example of the species for the country, with its appearances always being for one day only. This one has been here for since May 26, the day before I was happily ensconced in Wales. I was there at 0645, and I waited until 0712 before it dropped from its roost in the Great Wood to start patrolling the marsh in front of it. Very good views, including one of its hunting and devouring a dragonfly. Also, my second-ever Red-footed falcon, this one a juvenile with a white face and belly and a Hobby. There were at least six Hobby in Stodmarsh, as well as several Marsh harrier. Also, at Worth were several Avocet with chicks and two Little ringed plover

### **City of London: June 11, 2022**

A non-birding day to a series of "secret" gardens opened up once a year as part of the Open Gardens event. At the Nomura Insurance Co. headquarters on Angel Lane, I was very privileged to be invited to the rooftop garden, usually out of bounds, and not open during this event, to see Small-flowered tongue orchid, which were discovered at the site in 2021 and which were the first of its species to be discovered in the United Kingdom since 1989. There are almost 30 spikes, but already this year they were fading, but there was one with some flowers. Obviously, a new species for me

### **Old Lodge, Ashdown Forest, Nutley, Sussex: June 12, 2022**

12 x Redstart, males and females; 12 x Dartford warbler, with the first time I have managed to photograph one; 2 x Tree pipit; Wood lark; Red kit; Buzzard, and Hobby. (Also, Heath-spotted orchid)

**Bempton Cliffs RSPB, Yorkshire, and Idle Washlands, Nottinghamshire: June 26, 2022** At long last, a chance to catch up with the famed **BLACK-BROWED ALBATROSS** (new species for U.K.) that erroneously arrived here in summer 2021 and has returned for a second lost but wonderfully so year. I arrived at 9 a.m. and waited for 90 minutes before it decided to launch itself off some hidden rock crag, but the wait was well worth it, the huge bird circling three or four times right beneath me. It then disappeared, and it did not reveal itself for more than five hours. I had long gone, with the winds picking up noticeably. Also, Puffin; Razorbill; Guillemot; Fulmar, and Kittiwake. By the visitor centre were several Tree sparrow

On the way home, stopped off at Idle Washlands to see a **CASPIAN TERN** (new species for U.K.). This is the largest tern species, and it dwarfed a Black-headed gull standing next to it. Also, one Wood sandpiper

Also, Killer whale (x 3); Humpback whale (x2); Harbour seal, and California sea lion

**Pagham Harbour RSPB and Medmerry RSPB reserves, July 30, 2022** A trip to see **SQUACCO HERON** (new species for U.K.), which was seen with no fuss at all intermingling with 20 or so Cattle egret. Very little else at the reserve.

At Medmerry, on what remained a humid if not sunny day, Curlew sandpiper in mostly summer plumage; Yellow wagtail; Ringed plover, and a Wood sandpiper that I rediscovered deep in grass but which then took a long walk along and back along a stretch of mud. A great many Sand martin were flying around

**Greenwich, London, July 31, 2022** Following seeing a wonderful photograph online of four Peregrine falcon on a church weathercock, a quick hop to see two of them. I waited for 40

minutes before I saw one fly by quickly, and then two play-fought acrobatically and settled on two protuberances of the Catholic Church of Our Lady Star of the Seas. The priest of the church, Father Kevin, happened to be on a stroll, and he invited me into his back garden to get a better look as the light in the afternoon was directly in front of me if I stood in front of the church. He and his wife, Frances, and daughter, Lisa, were very kind and hospitable, and I promised I would send some photos to them for their use, even if I did issue the caveat that the steel-grey light was not perfect for photography

**Dungeness, Kent: August 6, 2021** 5 x Glossy ibis and 5 x Great egret; also, Ringed plover; Little ringed plover; Common sandpiper; Sedge warbler; 4 x Lesser whitethroat; 2 x Black redstart; one male Pied flycatcher; one Wheatear and one Yellow-legged gull

**Timberland Fen, Timberland, Lincolnshire: August 27, 2021** **ROLLER** (new species for U.K.), a species I have dreamed of seeing since I received my first book on birds—“Bird spotting” by John Holland, illustrations by Rein Stuurman, published by Blandford Press, which contained a poor illustration of a Roller, but one that still caught my imagination—in the late 1970s. The bird was a juvenile, and it kept a little distant, but it flew off from its perch like a Spotted flycatcher quite often, which showed its blue wings to excellent effect. Also, Peregrine; Kestrel; Buzzard, and Red kite

**Cliffe, Kent: August 29, 2022** Birding with Mike, in which he saw four lifers—Curlew sandpiper (approximately 15, including one with reddish splodges); Little stint; 2 x Stone curlew (only my second ever), which took some searching before being obvious and then just as suddenly disappearing after 10 minutes of watching them), and Pectoral sandpiper, which we saw on two occasions. Also, 100 x Avocet; Whitethroat, and Sanderling. Bumped into Barry Wright, a well-known Kent birder who I birded with in the 1980s but have not seen for 35+ years. We did not see the reported Glossy ibis, which was again reported after we left

**Wanstead Flats, Manor Park, London: September 2, 2022** On a chase for a reported Wryneck that I managed to see disappointingly zipping out of cover and then lost to view. Also, 2 x Wheatear and a Whinchat in an area wonderfully sealed off from the feet of Londoners to help nesting Skylark and other birds

**Pett Level, Sussex, and Dungeness, Kent: September 3, 2021 RED-NECKED**

**PHALAROPE** (new species for U.K.), a species I would have thought I would have seen before now, but some say it is not to easy to see, although 2022 seems to have reported a few individuals. Wonderful views in the front area of the middle of a pond, the juvenile bird zigzagging and constantly following a small group of Black-headed gulls. Also, Bearded tit; Yellow wagtail; 6 x Curlew; 2 x Spoonbill; Gannet; Common tern; Sedge warbler; Bearded tit; Whinchat, and Sedge warbler

At Dungeness, Pectoral sandpiper at Denge Marsh and, in wonderful light, at the ARC Pit, 2 x Glossy ibis; 2 x Snipe; Wood sandpiper; Curlew Sandpiper; Common sandpiper (these last four species very close to the hide); 200 x Golden plover

**Anchor Bottom, Steyning, Sussex: September 4, 2022** A first visit here, in the South Downs National Park, to find 100, maybe 200, spikes of a new orchid species for me, Autumn lady's-tresses, the U.K. last flowering orchid of the year. Also, 2 x Kestrel and a Buzzard

**West Peckham, Kent: September 10, 2022** Seem sitting on a wire, a Turtle dove, apart from the one I saw out of season in 2020 the first summer one I have seen in more than three decades
