## BBolder 30 Treatment

Your BBolder 30 Hair Treatment lasts for 30 days and is the ultimate hair pampering experience.

BBolder 30 consists of concentrated protein, moisture, and essential fatty acids, while also sealing your hair cuticle to retain softness and bounce. Your hair will have less frizz, softer ends, and bouncy volume when you style your hair!

1. Wash your hair twice with shampoo to remove all residual styling product and natural oils, then towel dry vigorously to get excess water out of the hair.
2. Apply half of your tub of BBolder 30 (4oz.) generously in your hair and completely saturate! If your hair needs more for full saturation, then use more. More is better than less when it comes to the BB30 Treatment.
3. Put your plastic cap on your head to hold body heat in the hair, and place a small towel around your shoulders in case it drips.
4. You can add some extra heat by using your blow dryer gently for a minute or two.
5. Allow 30 minutes for BB30 to work its magic.
6. Rinse your hair thoroughly and use your regular conditioner as the finish.
7. It is suggested to use BB30 every month or every other month as you desire for the health and shine of your hair.

Custom Notes For Client:
