

Public Notice to MPSC, Michigan Public Service Commission

Date

From

Subject: Smart Meters

To Chairman Quackenbush, Commissioners Isiogu and White

Here's the formal notice to Michigan Public Service Commissioners:

I am here today to read this into the record. This is official notice of liability to each member of the Michigan Public Service Commission (MPSC) that Smart Meters are harmful to human health.

Smart Meters cause dangerous radio frequency microwave radiation. There are no human health studies of people living in homes with Smart Meters. Public Health Physician Dr. David Carpenter says that exposure to elevated radiation for long periods of time is linked to cancer, damages the nervous system and has adverse reproductive effects.

Smart Meters can also interfere with medical devices like pacemakers. Additionally, high frequencies and transmitters contaminate 60 Hertz cycle electricity delivered to homes, which is called dirty electricity. Dr. Sam Milham, a physician and epidemiologist who specializes in occupational health has proven that dirty electricity causes cancer and heart disease. Banks of Smart Meters for apartments are even more dangerous.

This will serve as official notice of liability to each member that Smart Meters violate federal wiretapping laws by recording and storing databases of private activities without the knowledge and consent of the People who are monitored. Because Smart Meters can identify individual electrical devices, and record when they are operated, this is an invasion of the right to privacy and amounts to domestic terrorism for profit by government permission violating health security of Michigan homes.

A failure to regulate so as to stop this Smart Meter installation activity by MPSC is individual commissioners admission of guilt after this Public Notice and Demand to quit. Private corporate profit coupled with government "permissions" must never damage public health without redress by Citizens; it is far better for MPSC to stop the practice of installation now before capital costs of installation become a delimiting factor in ending the practice in the future. Consumers Power and Detroit

Public Notice to MPSC, Michigan Public Service Commission

Edison must be put on public notice by this commission to NOT INSTALL these things before public health is negatively affected.

The contract permitted by the MPSC not acting timely and Michigan energy suppliers' vendors to implement Smart Meters is unlawful because of the lack of disclosure to the public consumers of electricity, lack of equal consideration of persons affected and is an unconscionable act of failure to first obtain informed consent amounting to fraud committed against the consumer through deception.

You have been legally been put on notice, your immunity as a government official is now nullified, and you may be held personally responsible for illnesses resulting from Smart Meter radiation and dirty electricity, in addition to illegal wiretapping.

You must adhere to the "Precautionary Principle" or be held accountable by ALL!

*The precautionary principle or precautionary approach states that if an action or policy has a suspected risk of causing harm to the [public](#) or to the [environment](#), in the absence of [scientific consensus](#) that the action or policy is harmful, the [burden of proof](#) that it is not harmful falls on those taking the action.*

*This principle allows policy makers to make discretionary decisions in situations where there is the possibility of harm from taking a particular course or making a certain decision when extensive scientific knowledge on the matter is lacking. The principle implies that there is a social responsibility to protect the public from exposure to harm, when scientific investigation has found a plausible risk. These protections can be relaxed only if further scientific findings emerge that provide sound evidence that no harm will result.*

You are denied the consent of the We the People of the State of Michigan. Smart Meters and any other radiation emitted from towers or devices causing public health damage violate wiretapping laws in Michigan and must be banned. I am demanding that you recon to your Oath of Office as public Commissioners and stop this installation of Smart Meters. They may be acceptable in large public factories or switching stations, but they must never come near homes and small business in proximity to publics negatively affected by these meters.

I thank you for hearing me today.

Sincerely
