Out of Hospital Committee

1/24/19

Chair (acting) & recorder: Michael Fraley

Present: Del Horn, Linda Vollmar, Corey Smith, Jeff Nuernberger, Jim Herron, Robbie Deede

Stop the Bleed

Group discussed promoting the ACS BleedingControl.org National Stop-the-Bleed day May 23.

Robbie reported that we may be contacted to assist with the state employee education day. The HERC Coordinator from Region 3 may be holding Stop the Bleed classes as part of the day

Spinal motion restriction position paper

Motion by Smith to endorse the SMR position paper as presented. Second by Herron. Unanimously approved.

Members are seeing localized adoption of the guidelines already although there are many areas that are doing full immobilization.

SALT Triage

Horn asked if the committee wanted to take any further action to promote the use of SALT triage. It is identified that a key would be to educate the EMS medical directors. Will add it to our goals for the update of the regional trauma plan.

Regional trauma plan review

Group reviewed the OOH section of the regional trauma plan. Recommend adding "provider level education" to the future goals section.
