

# OPPD Monthly Reports

## Cougar Electric Car

### April

<b>Car: A30</b>	The 30 cars team had some fixes throughout the month but nothing too difficult to fix. The tail has some issues because the buttons we are using are pulling through the fiberglass. The canopy needs to be fixed because the plastic is being cracked with the riveting.
<b>Car: S40</b>	This month the 40 car's team has built a canopy for the aerodynamics for driving. They had difficulty with things coming apart and keeping the chain straight. However the future thought of the car is to put on a tail.
