

Summer Village of Yellowstone

Policy #2-2015 - Boat Lift & Pier Section Removal Policy

Policy Statement

The Summer Village of Yellowstone would like to have all privately owned boat lifts, pier sections and pier stands, removed from the municipal reserve areas by June 1 of each year.

Reason for Policy

The Summer Village of Yellowstone has deemed it necessary to remove the boats lifts, pier sections and pier stands to provide consistent park maintenance. Removal of these items also allows all residents in the Summer Village free and unencumbered access to the municipal reserve areas.

Related Information

The Summer Village of Yellowstone does allow for storage of privately owned boat lifts, pier sections and pier stands in discreet locations on the municipal reserve areas during the period of September 1 to May 31 of each year. Storage of these items must be to the side of the municipal reserve, as not to interfere with public access to the lake.

Responsibilities

The Summer Village will remove all privately owned boat lifts, pier sections and piers stands remaining on the municipal reserves between June 1 and September 1 of each year.

Disposition of Seized Equipment

- Seized Equipment will be removed and stored at a municipal location for a maximum of 30 days.
- To reclaim seized equipment within the 30 days, a fee of \$100.00 plus the cost of removal and storage is owed to the Summer Village.
- After 30 days the seized equipment will be sold or destroyed, at the discretion of the municipality, to offset the cost of removal.

Date Approved: November 20, 2015
